The Maybank amendment, however, has lived on, and became a significant problem in its own right as it has affected the DOD's labor surplus area set-aside program. This program was initiated in 1952 under Defense Manpower Policy No. 4 which requires that certain procurement contracts be set aside for bidding in areas of substantial unemployment. The program was meant to preserve management and employee skills useful to the Nation's defense during times of economic downturns. This program is a valuable one, and ought to gain increased attention today as unemployment hovers at an unacceptable level of 7.3 percent.

The General Accounting Office has, however, in its construction of the Maybank amendment and the labor surplus area set-aside program, limited implementation of the goals of the latter by its determination that a defense procurement contract cannot be totally set aside for award to firms located in labor surplus areas, but rather must be split up into two or more units with at least one of those contract units beginning bidding competitively among all firms, within and without labor surplus areas. Under the GAO interpretation, the open competition on a portion of the total contract award determines the highest price payable on the remaining portion of the contract to be set aside for labor surplus areas. This construction is based on the theory that the best price can only be obtained by an open competition among all sorts of firms and would not be obtainable under a total set-aside to labor surplus areas. Such a theory might have made some sense in times of low levels of unemployment where there were few qualifying labor surplus areas, but makes little sense today.

I might add that in 1953, when Senator Maybank first introduced his amendment, unemployment was only 3 percent. In a time of 7.3-percent unemployment when approximately 800 areas across the country were designated by the Secretary of Labor as having substantial unemployment in a count made a year ago, setting aside a Government contract for procurement among firms in these areas would surely yield a competitive price. Furthermore, the GAO interpretation which refuses to allow such a total set-aside severely limits the labor surplus area set-aside program's goal of helping alleviate localized severe unemployment. The time has come to change the statutory structure to allow total labor surplus set-asides and to eliminate the GAO's tortured construction to the Maybank amendment.

SPECIFIC PROCEDURES

My bill would allow the Secretary of Defense or his delegate, the contracting officer, to make a total set-aside to labor surplus areas of a Government contract when the Federal Government will not be forced to pay an unreasonable contract price. In order to make the determination the officer should look at the number of labor surplus areas, the overall unemployment level, the number of firms within the labor surplus areas willing and capable of performing such contracts and the probability of such firms competing such contract at a fair and reasonable cost.

This determination would be made on a contract-by-contract basis, substituting specific criteria for the present procedure which arbitrarily decides that a total labor set-aside is not feasible.

The procedure I suggest for allowing total labor surplus area set-asides borrows heavily from current procedures followed by a contract officer in placing a procurement into a total small business set-asides, regarding which the Armed Forces procurement regulation states that:

The entire amount of a procurement may be set aside for exclusive small business participation if the contracting officer determines that there is a reasonable expectation that officers will be obtained from a sufficient number of responsible small business concerns so that awards will be made at reasonable prices.

This procedure has worked well for such total small business set-asides. The procurement officers solicit bids from available firms on bidders lists compiled by the Small Business Administration and from lists compiled by the DOD of firms which have bid in the past on other contracts to insure adequate competition. The same sort of lists could be obtained of the labor surplus area firms.

The contracting officer has an additional safeguard against an unreasonably high bid price under total small business set-aside which would also be available under a total labor surplus area set-aside; he may cancel the set-aside and readvertise among all firms.

My bill would extend these well established and workable procedures to make them applicable to total labor surplus area set-asides, and would remove the current blanket prohibition against such set-asides.

PRIOR OBJECTIONS

My bill would not mandate a total labor surplus area set-aside in situations where such a procedure would prove uneconomical. In previous Congresses I had attempted an outright repeal of the Maybank amendment. In fact, the last session of the 93d Congress, an amendment offered by Senator Pastore and myself which did repeal Maybank, was accepted by the Senate, but dropped in conference, apparently due to DOD opposition. The DOD objected to outright repeal because in certain circumstances a total labor surplus set-aside would not result in an economical contract price, such as where there were an insufficient number of firms within the labor surplus area to generate a fair price. I appreciate the nature of such objections and have drafted the bill accordingly. The bill would preserve the positive features of the Maybank amendment and at the same time unfetter the labor surplus area set-aside program, so badly needed in today's economy.

Based on my prior experiences in having this proposed change in law rejected by House conferees due to expressed opposition from the Department of Defense, I would like to make my colleagues aware of some of the arguments raised against this proposed change, and my rebuttal to these arguments.

In this regard, I prepared two letters to Chairman McCLELLAN in November of 1975. I ask unanimous consent that these letters be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., November 26, 1975.

Hon. JOHN L. McCLELLAN,
Chairman Senate Appropriations Committee, Washington, D.C.

DEAR JOHN: I understand that you have been contacted by the Department of Defense regarding its objection to the Senate amendment to H.R. 9861, which modifies the Maybank Proviso to permit a procurement contract to be totally set aside for firms located in labor surplus areas where the Sec-

retary of Defense determines that sufficient competition exists in these areas to insure a reasonable price to the government. Such a total set-aside is not possible under the current G.A.O. interpretation of the Maybank Proviso.

First, I would like to stress that the amendment as finally drafted was intended to meet the previously expressed objections from DOD to my earlier attempts to repeal the Maybank Proviso. On those occasions, the DOD had objected on the grounds that the Maybank Proviso was necessary lest the government be forced to pay unreasonable prices on contracts, whether or not procured through the labor surplus set-aside program. Consequently, my amendment this year was intended both to allow for total labor surplus area set-asides and insure that contracts would be bid at a fair price to the government. At the time the amendment was offered, I was advised that the DOD had no objections, that it met DOD's concerns. Now it is disturbing that a new source of objection has arisen, and ironic that DOD bases its objection over a concern for small business. While I understand that the DOD opinion could change upon further reflection, I wonder whether this further objection ought to be considered to be in good faith, and not simply motivated out of an aversion to any change in status quo.

The DOD's objection, as I understand it, is based upon a concern that such a modification would result in fewer contracts going to small businesses which are not located in labor surplus areas. As you may recall, the same concern was expressed last year by the Small Business Administration to a Senate amendment which would have repealed the Maybank Proviso. At that time I offered a rebuttal to their expressed concern, but unfortunately the amendment was dropped in Conference. I repeat that rebuttal now.

The Small Business Act provides that small businesses shall receive a fair proportion of total government purchases and contracts. To implement this mandate, the Armed Services Procurement Regulations establish preference categories when set-asides are to be made.

A procurement officer gives primary consideration, or first preference to making a small business set-aside, a portion of which is further set aside for small business located in a labor surplus area. Thus the first preference is given to small business both in and out of labor surplus areas.

Second preference is given to partial set-asides in labor surplus areas. With the modification of the Maybank Proviso, total set-asides could be given to those labor surplus areas.

Third preference is given to total set-asides to small business only with no part of the procurement being reserved to small businesses located in labor surplus areas.

Fourth preference is given to partial set-asides to small business.

The DOD seems to be concerned that, if the restriction against total set-asides is eliminated from the second preference category, more procurements will go into the labor surplus area program and fewer procurements will be assigned to the third category, giving total set-asides for small business only.

Last year, 73.4 percent of the contracts set aside for labor surplus areas went to small business. I am of the opinion that, with the authority to make total set-asides to labor surplus areas, larger numbers of contracts will go to this program, and small business will most likely retain its proportionate share. The enlargement of the labor surplus area program has a two-fold purpose—one, to aid small business and the other to alleviate unemployment in labor distressed areas.

If modifying the restrictive language of the Maybank Proviso does result in fewer contracts being set aside for small business under the third preference, then in accordance with the mandate of the Small Business Act, the preference categories should be rearranged to assure that a fair proportion of purchases and contracts go to small business.

In fact, a reordering of these relative priorities is now being considered by the Office of Federal Procurement Policy of the Office of Management and Budget. Mr. Hugh Witt, Administrator of the O.F.P.P., stated in testimony at hearings before my Subcommittee on November 11 that a determination would be made within 60 days of that date. The Senate amendment, by allowing total labor surplus set-asides, would give the O.F.P.P. increased flexibility in making such a determination.

The claim that allowing for increased use of the labor surplus area set-asides would injure small business located outside labor surplus areas rests on a false premise: that any increase in one program would result in a concurrent loss in the other. It is far more likely that small businesses located both inside and outside labor surplus areas would benefit from an increase in the variety of set-aside programs which the DoD must fulfill. In this way the total number of contracts going to small business in all areas would increase.

My intention in offering the amendment to modify the restrictive language of the Maybank Proviso from the Defense Appropriations bill was to aid small business in an area which I feel is being hampered by the restrictions of the Maybank Proviso. I believe that the modification will be an aid to small business, and I urge the members of the conference committee to support the modification of this restrictive language from the legislation before it.

With best regards.

Sincerely,

WILLIAM D. HATHAWAY,
U.S. Senator.

U.S. SENATE,
COMMITTEE OF LABOR AND
PUBLIC WELFARE,
Washington, D.C., December 2, 1975.

Hon. JOHN L. MCCLELLAN,
Chairman, Senate Appropriations Committee, Washington, D.C.

DEAR JOHN: I would like to supplement my letter to you dated November 26, to explain further my goal in offering my amendment to H.R. 9861 and my hope that this amendment will be retained in conference.

It is my understanding that the Department of Defense has now been joined in opposing the amendment by the Small Business Administration and the Office of Federal Procurement Policy. I would agree that the united opposition of these different entities of the Executive Branch ought to be carefully considered, but also ought to be examined for motive and purpose.

All of these entities seem to be concerned that any increased emphasis on the labor surplus area set-aside program would necessarily have an adverse impact upon the small business set-aside program. Such a result would be contrary to existing law and contrary to the intent of my amendment. I suspect that this charge on the part of these entities is motivated more by an affection for the status quo than any legitimate dispute regarding the impact of the amendment.

At heart, the objections are based on a unified sentiment that the amendment would be difficult to administer, that it would be hard to simultaneously fulfill the Nation's defense goals and to channel contracts to areas of high unemployment and to small business. Of course the task may be difficult but it can and ought to be done. Without the amendment it will never be done and the labor surplus area set-aside program will continue as a dead letter with little if any practical significance.

All of the expressed objections could be met with a simple reordering of the current Armed Services Procurement Regulations, to allow for total labor surplus area set-asides and uphold the precedence of small business in this and other set-aside programs. I would envision the following priority structure emerging from this administrative change in regulations:

1. Highest priority be given to total set-asides for small businesses located within labor surplus areas, followed by:
2. Total set-asides for small businesses located anywhere, then:
3. Partial set-asides for small business anywhere, and finally:
4. Total set-asides for firms located within labor surplus areas, whether or not small businesses.

Such a change in the priority structure or something very close to it would be required in order to assure the precedence of small business as mandated by the statutory authority of the Small Business Act. I believe the SBA makes a mistake in seeing the current regulations as static and not requiring such change.

Regulations that are not static must change as their statutory underpinnings change. Let us not lose this opportunity to remove an anachronistic constraint from the Defense Appropriations legislation simply because the Executive branch prefers not to amend its regulations.

Sincerely,

WILLIAM D. HATHAWAY,
U.S. Senator.

Mr. HATHAWAY. Mr. President, in order to make totally clear my intention that small business not be adversely affected by modification of the Maybank proviso and to insure that small business, both within labor surplus areas and outside such areas receive special consideration and priority in Government procurement procedures, the bill I am introducing today in subsection (b) stipulates the order of priority as delineated in my previous letter to Chairman MCCLELLAN.

The difficulties I have experienced in seeing this needed change become law have in large part resulted from the lack of attention given and lack of understanding regarding our very complex Federal procurement procedures.

I first learned of the existence of Defense Manpower Policy No. 4 and of the impediment posed by the Maybank amendment in the course of my work as chairman of the Subcommittee on Government Procurement, but I understand that my interest and expertise in this area are not shared by all of my colleagues.

Consequently, I was most pleased to learn that the Northeast-Midwest Research Institute on March 28, 1977, published a complete history and analysis of DMP 4 titled "Federal Procurement and Regional Needs: The Case for Defense Manpower Policy Number Four." The Institute was set up by the Northeast-Midwest Economic Advancement Coalition, and at the request of its chairman, Congressman MICHAEL HARRINGTON, has embarked on a study of our Federal procurement policies. Its initial report on DMP–4 prepared by Laurence Zabar, is an excellent piece of research, and highlights the need for expansion of DMP–4 and elimination of the impediment to this goal posed by the Maybank amendment.

Mr. President, I ask unanimous consent that at the conclusion of my remarks the text of my bill be printed in the RECORD, and that subsequent thereto, Mr. Zabar's excellent study be printed in the RECORD along with its appendixes, as further background to the goals of this proposed legislation.

There being no objection, the bill and study were ordered to be printed in the RECORD, as follows:

S. 1380

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the second proviso to section 723 of the Department of Defense Appropriation Act, 1977, is amended by inserting immediately after "economic dislocations" the following: "except that nothing herein shall be construed to preclude total labor surplus area set-asides pursuant to Defense Manpower Policy No. 4 (32A C.F.R. Part 8) if the Secretary specifically determines that there is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards will be made at reasonable prices".

(b) In carrying out labor surplus areas and small business set-aside programs, departments, agencies, and instrumentalities of the executive branch shall award contracts, and encourage the placement of subcontracts for procurement to the following in the manner and in the order stated:

(1) Concerns which are located in labor surplus areas, and which are also small business concerns, on the basis of a total set-aside.

(2) Concerns which are small business concerns, on the basis of a total set-aside.

(3) Concerns which are small business concerns, on the basis of a partial-set-aside.

(4) Concerns which are located in labor surplus areas on the basis of a total set-aside.

FEDERAL PROCUREMENT AND REGIONAL NEEDS: THE CASE OF DEFENSE MANPOWER POLICY No. 4

(By Laurence Zabar)

EXECUTIVE SUMMARY

At the request of Congressman Michael J. Harrington, Chairman of the Northeast-Midwest Economic Advancement Coalition, the Northeast-Midwest Research Institute has examined how federal procurement can be used to stimulate economic activity in areas of high unemployment.

The vital importance of this question is clear: In FY 77, the federal government spent more than $60 billion on procurements—approximately four times the annual amount requested by the President for his economic stimulus program.

The concept of targeting federal procurement moneys to areas of economic need dates to the early 1950's and is embodied in Defense Manpower Policy Number Four (DMP–4), issued by the Director of Defense Mobilization in 1952. The Institute studied the use of DMP–4 by the Defense Department which is responsible for 73% of federal procurement this fiscal year. The study reveals that the program has been used for only a tiny fraction of procurements and that its use has fallen since 1964.

During the year of greatest use, 1964, DOD spent .69% of a $25 billion procurement budget under the provisions of DMP–4. In the period 1973–1975, a period when unemployment rates in some sections of the country reached heights unattained since the depression, DOD spent only .23% of its total procurement budget under DMP–4. In each of those years, the percentage decreased from the preceding year: from .36% in 1973, to .30% in 1974, to .19% in 1975.

This study details the procurement process under DMP–4 and outlines limitations in its design and execution. The concluding section lists alternatives for change including:

A redefinition of the unemployment rate triggering the use of DMP–4; changes in legislation; and

A wide variety of changes in administration to make the program more effective and efficient.

Future Institute research will study this policy vis-a-vis at least three other major departments of the government that engage in substantial procurement activity: The Department of Labor, the Department of Health, Education, and Welfare, and General Services Administration. Additional research will also explore the use of DMP–4, with respect to facilities in addition to procurements.

I. DESCRIPTION AND HISTORY OF DMP—4

Targeting federal procurement funds to areas of economic stagnation is not a new concept. In the summer of 1951, no general government policy was to encourage total commitment to defense production, in support of the U.S. engagement in Korea. Numerous firms, however, contacted the Office of Labor in the National Production Authority, wanting to know why they were not being awarded defense contracts while they had unused facilities and idle manpower.

In 1951 CIO Textile Workers met in Washington with The Office of Labor to request that the government take immediate action to relieve the serious unemployment in the region's textile industry.

In response to this request, the Office of Labor contacted the Central Military Procurement Information Office of the Munitions Board. The Board replied that there was no legal means for DOD to channel contracts to firms or areas to relieve unemployment. It quoted from a DOD pamphlet: "No legislation exists which will permit the selective placing of contracts based on size of a business concern without regard to lowest cost."

The Office of Labor did not agree with that opinion and contacted numerous DOD officials concerning the placing of contracts in labor surplus areas in order to relieve unemployment. DOD repeatedly took the position that its procurement policies were controlled by the 1947 Armed Services Procurement Act (P.L. 413, 80th Congress), which required that only the most advantageous contract awards be made. DOD interpreted "most advantageous" to mean the lowest price.

The Office of Labor countered by quoting Section II(c)(1) of the Act which stipulates that the advertising policies in awarding contracts need not be complied with during a national emergency. Labor argued that since President Truman had declared a national emergency on December 16, 1950, DOD's interpretation was not applicable.

The Office of Labor also quoted five other opinions and directives that were at odds with DOD's version of awarding contracts to firms in labor surplus areas.

After a meeting on unemployment with Congressional leaders, in September of 1951, President Truman directed the Office of Defense Mobilization (ODM) to undertake a review. The ODM review determined that one of the solutions to the unemployment problem was the placement of government contracts in the area.

As a result of the study, the Office of Defense Mobilization, on February 7, 1952, issued Defense Manpower Policy Number Four (DMP–4). The purpose of DMP–4 was "to provide for procurements by negotiated contracts and purchases with responsible concerns which are in an area of current or imminent labor surplus . . ." (For text, see appendix 1)

To accomplish the objectives of DMP–4, regulations provided that preference in certain federal contracts be given to employers who would perform substantial portions of awarded contracts in areas which the Department of Labor classifiied as "persistent" or "substantial" unemployment areas.

In 15 years of operation, however, this program never realized its expected potential. DOD during this period spent an average of only $23 million per year of a multi-billion dollar budget for procurements under DMP–4.

Due to low levels of participation, a major revision of this program was introduced by the Director of the Office of Emergency Planning in October, 1967. This modification created a new category of high unemployment areas: "sections of concentrated unemployment or underemployment."

The mandate of the revised DMP–4 program was specified in the Federal Register on July 20, 1968: (For full text see Appendix 2)

"It is the policy of the Federal government to encourage the placing of contracts and facilities in sections of concentrated unemployment or under-employment and in areas of persistent or substantial labor surplus with preference being given in accordance with regulations prescribed by the Secretary of Labor in making the best use of their available resources . . ."

Describing procurement agencies:

"All procurement agencies shall use their best efforts to award negotiated procurement contracts to contractors who will perform a substantial portion of the production on those contracts within or near sections of concentrated unemployment or within labor surplus areas, giving preference to contractors in accordance with regulations prescribed by the secretary of Labor to the extent that procurement objectives will permit."

Furthermore, the Secretary of Commerce is directed to:

". . . assist employing establishments, certified in accordance (with the provisions detailed above) which have agreed to perform contracts in or near sections of concentrated unemployment or underemployment by (a) providing such firms with timely information on proposed Government procurements; (b) maintaining current information on the manufacturing capabilities of such firms with respect to Government procurement and disseminating such information to Federal procurement agencies . . ."

Despite these revisions, neither contract awards or jobs created for the unemployed increased under DMP–4. Between 1967–1969, DOD averaged an increase of only .02% over the 1952–1966 period in the value of procurements secured under DMP–4 in relation to total procurements. (See Section III)

A revision of the process governing certification of firms took effect May 1, 1970.

II. PROCUREMENT PROCESS UNDER DMP–4

During the Senate hearings on the Defense Appropriations Bill in 1953, Senator Burnet Maybank (D-SC) offered an amendment that prevented any preferential treatment on price to firms located in labor surplus areas when bidding on defense contracts. Senator Maybank's goal was to prohibit the Department of Defense from paying more for textiles produced in New England mills than they would have to pay were the textiles purchased from southern

mills. DOD at this time was willing to pay the higher price in an attempt to slow the exodus of many New England mills to areas of the country with cheaper labor costs.

The Maybank amendment has been added routinely to the Defense Appropriations Bill each year since 1953. This year (FY77) the language of the amendment read: "provided further, that no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocation;"

In 1972, the interagency Surplus Manpower Committee set up by DMP–4 determined that the only way to insure that the government can comply with Maybank was to insure that only those products that can be divided into two full production runs be considered under DMP–4. This determination used the theory that a reasonable price—the lowest or "base price"—can be determined only if bids are invited from all interested firms and that this price cannot be obtained if a contract award is totally set aside for a labor surplus area.

When a procurement agency identifies such a "splittable" item and decides to offer part of that contract to a labor surplus area firm under DMP–4, the contract is processed according to the following methodology:

The contracting officer publicizes the procurement as a "labor surplus area set-aside." This means that 50% of the award is set-aside to be bid on only by those firms certified for preference. This is known as the "reserved" portion. The other 50%—the "unreserved" portion—is open to all employers to bid on. To be considered in negotiations on the reserved portion, however, employers must also have bid on the unreserved part of the contract.

The contracting officer initially awards the unreserved portion to the lowest bidder. Once this "base price" has been determined, the reserved part is offered, at the base price, to firms in this prioritized manner:

1. Small firms with a first preference rating.
2. Large firms with a first preference rating.
3. Small firms with a second preference rating.
4. Large firms with a second preference rating.
5. Small firms with a third preference rating.
6. Large firms with a third preference rating.
7. Small firms not located in a labor surplus area and with no preference certificate.

If no firm in a labor surplus area can accept this contract, it is then offered to any firm that can meet the base price.

EXAMPLE OF DMP–4 IN PRACTICE

An agency must purchase 100 widgets. Bids are accepted from all interested firms on the unreserved portion of the contract (50 widgets) and the contract is awarded to the lowest bidder. Assume, however, that the lowest bidder can produce widgets for $1.00 each but can only produce 25. The contract for the remaining 25 on the unreserved portion is awarded to the next lowest bidder (for the sake of this example, assume that bid was $1.05 each).

Once these contracts are awarded and the base price determined, the reserved portion of the contract is offered to labor surplus area firms at the highest price paid on the unreserved portion, that is, $1.05 each. If no firm is capable of producing 50 widgets at this price, the contract is available to any firm nationwide at the lowest price paid on the unreserved portion—$1.00 each.

The Maybank amendment, coupled with the GAO interpretation discussed earlier, effectively insures that the more expensive procurements will not be directed to labor surplus areas under DMP–4. Only such products as clothing, food, construction supplies, medical supplies, etc. can be divided into two full production runs and therefore set-aside under DMP–4. Obviously, the cost for these splittable items cannot compare to the cost of an engine for a nuclear submarine.

For the past three years, Senator William Hathaway (D-Maine) has introduced an amendment to the Defense Appropriations Bill to repeal the Maybank amendment. During the debate on the FY77 Defense Appropriations Bill, Senator Hathaway's amendment provided: ". . . that no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocation, except that nothing herein shall be construed to preclude total labor surplus area set-asides pursuant to Defense Manpower Policy Number Four . . . if the Secretary specifically determines that there is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards will be made at reasonable prices."

This amendment passed the Senate by a voice vote on August 2, 1976 but was not discussed by the House when it considered the Defense Appropriations Bill. The amendment did not survive the House-Senate Conference. Senator Hathaway is likely to offer the same amendment again this year.

Should the Maybank amendment be repealed, the result would be that the contracting officer of DOD will be able to award a total set-aside of a government contract to a labor surplus area under DMP–4, if the Secretary of Defense determines that the government will be paying a reasonable price. This would substantially increase the number and value of contracts which could be awarded to labor surplus areas.

The Secretary could use any of a variety of methods for determining if a reasonable price was being paid; such as:

1. Using the last price paid for a similar or idential item, plus a normal inflator, or percentage of a normal inflator, to discourage "self-fulfilling inflation";
2. Employing experts knowledgable in the market for specific items to recommend a reasonable price or range of prices; and
3. Developing an explicit permissable price difference between the lowest bid price and the lowest DMP–4—certified firm bid price, such as .5% or 1%. This permissable difference would represent the net "price" the Federal Government is willing to "pay" to use procurements to promote employment in depressed regions. The permissable difference could be applied to all procurements, or some sub-set of all procurements.

III. PATTERNS OF UTILIZATION OF DMP–4

Between December 1972 and December 1975, the number of areas within each classification has changed as follows: (See Chart A)

1. The number of labor surplus areas has increased by 30 percent.
2. Areas of persistent unemployment have declined by 46 percent (due, in part, to the rise in the average national unemployment rate).
3. Areas of substantial unemployment have increased by 139 percent.

Thus, the number of major areas of persistent and substantial unemployment almost doubled between 1972 and 1975. Yet, during the same period the number of certified establishments under DMP–4 has grown by only 4.5 percent. (See Chart B)

The limited use of this program by DOD may discourage many eligible firms from expending the effort, minimal as it is, to obtain preference certificates. Since FY72, the ratio of the value of DOD contract awards under DMP–4 to the total DOD contract awards has dropped from .62 percent to .19 percent (less than one-fifth of 1 percent). In FY75 this amounted, to an outlay of only $64 million of a procurement budget of over $40 billion. (See Chart C)

There is also evidence that the federal dollars being spent under this program are not being targeted to areas of greatest need. For example, in FY74, the Boston area received 18 percent of all DMP–4 awards from DOD (worth $13 million); in FY75, while unemployment rose, this area received only 8 percent of all DMP–4 awards from DOD (worth $4 million). In contrast, the Atlanta region, with substantially less unemployment, received 21 percent of all DMP–4 awards in FY74 (worth $15 million) and 39 percent in FY75 (worth $19 million). (See Chart D)

The minimal use of DMP–4 can be attributed to some extent to the limitations imposed by the Maybank amendment. No explanation can be found, however, for the existing regional disparity in the allocation of federal dollars under DMP–4 by DOD.

CHART A

NUMBER OF LABOR SURPLUS AREAS (LSA's)

Area classification	Total, December 1972	Number, December 1975	Substantial, December 1972	Unemployed, December 1975	Persistent, December 1972	Unemployed,[1] December 1975	Total (percent)	Percent change in numbers, December 1972–75	
								Substantial	Persistent
Major areas [2]	45	131	36	122	9	9	+191	+239	0
Other areas [3]	830	1,009	325	741	505	268	+22	+128	−47
Total areas	875	1,140	361	863	514	277	+30	+138	−46

[1] For explanations and definitions of area classifications see Area Trends. In times of a rising national unemployment rate, persistent unemployment may become "substantial."

[2] Major labor areas usually have at least 2 central cities with a population of 50,000 or more. In most cases the geographical boundaries are the same as an SMSA.

[3] In most cases, areas smaller than the 150 major labor areas listed in Area Trends.

Note: Sections of concentrated unemployment and underemployment eligible for certification under the DMP–4 program, have not increased or decreased for some y ears. See Area Trends for definitions and listings.

IV. ALTERNATIVES FOR CHANGE

Several alternatives exist to allow the DMP-4 program to more fully realize its potential for economic development. These include the following:

1. The definition of "substantial unemployment" could be revised upward. This definition, 6 percent, has not been changed in the 24 years that this program has been operative. The 6 percent definition now includes nearly every area in the country and thus gives little, if any, selective advantage to firms located in areas especially hard hit by recession.

2. The requirement that only those items that can be split into two production runs be included could be eliminated or altered to include total set-asides of some contract awards to firms located in labor surplus areas. An instrument like the Hathaway amendment would accomplish this end and would establish the machinery necessary to direct the more expensive defense contracts to areas of highest unemployment.

3. The administration of DMP-4 can be made more effective. Because DMP-4 only encourages placing facilities and contracts in areas of high unemployment; the increased use of the DMP-4 program would appear to require an Administration willing to enforce this policy rigorously. This can be done through:

(a) Increased training of federal procurement agents in the DMP-4 program;

(b) Increased staff for DMP-4 administrators in Department of Defense, Department of Labor, Department of Health, Education and Welfare, Department of Commerce, General Services Administration, and other appropriate agencies;

(c) Increased public encouragement by federal and state agencies of obtaining DMP-4 preference certificates and increased technical assistance by these agencies to interested firms;

(d) Lengthening the time a DMP-4 certificate is usable by a firm;

(e) Federal encouragement of large contractors to put production into plants in areas of high unemployment;

(f) Requiring government agencies to set and meet dollar amount quotas to meet in the implementation of DMP-4; and

(g) Providing for more equitable distribution and efficient targeting of DMP-4 use.

CONCLUSION

Unemployment continues to be a major national problem. This year (FY77), the Federal government will spend $174 billion—nearly 40% of the total budget—on income maintenance programs (Food Stamps, welfare, unemployment compensation); funds that could be used to enhance cities, improve educational facilities, and clean up the environment were they not needed to bolster a lagging economy.

The potential for effectively utilizing the

federal procurement process to aid areas suffering from chronic unemployment exists. Specifically, Defense Manpower Policy Number Four was implemented in 1952 to serve just this purpose.

The Department of Defense, with a procurement budget of over $47 billion, is capable of targeting some of these funds through DMP–4, to firms located in areas in particular need of economic stimulation. Our research, however, demonstrates a very minimal use of this program by DOD. This can be explained, in large part, by three factors:

1. The lack of commitment by any previous administration toward addressing the unemployment problem through the procurement process;

2. The absence of any educational campaign, either on the federal or state level, directed toward those who could benefit from this program; and

3. The limitations imposed by the Maybank amendment.

The enormous potential of DMP–4 can never be realized if these obstacles remain substantially in place.

APPENDIX I.—DEFENSE MANPOWER POLICY NO. 4

Subject: Placement of Procurement in Areas of Current or Imminent Labor Surplus

I. INTRODUCTION

The aim of the mobilization program is to develop and maintain the necessary military and economic strength to carry out the policy of the United States to oppose acts of aggression and promote peace. As was declared in Defense Manpower Policy No. 1, success of the mobilization program requires efficient use of all our resources, including manpower as well as facilities. The conversion from civilian to military production, unless carefully coordinated, would result in dislocations causing serious waste of manpower and facilities in many areas and thereby reducing our defense potential. The overriding need is to obtain on schedule the goods and services required for defense. In achieving this goal, every effort must be made to hold to a minimum any waste of manpower which may result from materials shortages and conversion to defense production.

II. PURPOSE

The purpose of this Defense Manpower Policy No. 4 is to provide for procurement by negotiated contracts and purchases with responsible concerns which are in an area of current or imminent labor surplus (including a surplus of manpower possessing skills necessary to the fulfillment of Government contracts and purchases), in cases where the public interest dictates the need for doing so in order to achieve the following objectives:

a. To coordinate conversion from civilian to military production;

b. To minimize strains and dislocations in the economy resulting from such conversion;

c. To preserve employee skills necessary to the fulfillment of Government contracts and purchases;

d. To maintain productive facilities;

e. To assure utilization of the Nation's total manpower potential by making use of the manpower resources of each area; and

f. To help assure timely delivery of required goods and services by locating procurements where the needed manpower and facilities are fully available.

III. IMPLEMENTATION

By virtue of the authority vested in me by Executive Order 10193 and to supplement the national Manpower Mobilization Policy issued by the President on January 17, 1951, and to carry out the purpose set forth above, it is hereby ordered that:

1. There is created a Surplus Manpower Committee. The members of the Committee shall be appointed by the Chairman of the Manpower Policy Committee and shall include representatives from the Department of Defense, Department of Labor, Atomic Energy Commission, Defense Production Administration, General Services Administration, Small Defense Plants Administration and National Production Authority.

2. The Defense Manpower Administration of the Department of Labor will certify to the committee the existence of surplus labor area under standards to be established by the Secretary of Labor.

3. Upon such certification of surplus labor area the Committee shall obtain from the appropriate manpower and production agencies manpower facilities information which shall include the following:

a. The nature and extent of the labor surplus involved, including the availability of skills necessary to the fulfillment of Government contracts and purchases, and the need for preserving these skills in the national interest.

b. The nature and extent of the facilities involved, including their suitability and availability for the fulfillment of Government contracts and purchases, and the need for maintaining these facilities in the national interest.

4. The Committee shall make findings in appropriate cases that:

a. There exists an area of current or imminent labor surplus, including a surplus of manpower possessing skills necessary to the fulfillment of Government contracts;

b. There exists in such area facilities suitable and available for the employee skills found surplus in (a);

c. The public interest dictates the need for the negotiation of Government contracts, at reasonable prices, in such area although lower prices might otherwise be obtainable elsewhere, in order to achieve the purposes of this policy as set forth in II above;

d. Such findings may set forth any other factors which may assist in the placement of contracts in such areas including (1) an indication of the dollar amount of contracting which is desired to be placed in such area based upon the amount and timing of Government needs and (2) a determination of the maximum price differential considered appropriate to effectuate paragraph 4(c) hereof.

5. The Committee shall report these findings to the Director of Defense Mobilization with a recommendation that he notify the Department of Defense and the General Services Administration that he has concluded that it is in the public interest to give preference to such area in the placement of contracts in accordance with the findings of the Committee. The recommendations of the Committee shall be reviewed within the Office of Defense Mobilization to determine the relationships of such recommendations to other policies affecting procurement for which the Office of Defense Mobilization has responsibility, and if there are conflicts, they shall be resolved by the Director.

6. On receipt of such notification from the Director of Defense Mobilization, the Department of Defense and the General Services Administration shall (a) determine what procurement contracts can be fulfilled by utilization of the manpower skills and facilities described in the Committee's surveys and findings; (b) take all practicable steps, consistent with other procurement and military objectives, other than price, to locate procurement in the areas covered by the Committee's findings; and (c) within a reasonable time, report to the Director of Defense Mobilization the steps taken, and furnish any other relevant information requested by him.

7. After receiving reports in accordance with paragraph 6(c) above, the Committee shall request from the appropriate agencies information concerning the utilization of manpower in the area involved, and shall report to the Director the effects of the actions taken, with recommendations as to whether it is necessary to continue to give preference to such area in the placement of contracts.

8. When the application of this policy would have a major effect on the operation of an entire industry, appropriate recommendations shall be made to the Director relative to that industry in lieu of recommendations relative to specific geographical areas. In such cases, after notice to and hearings of interested parties, consideration will be given to a separate certification applying to the entire industry.

9. This Manpower Policy No. 4 shall not be deemed to authorize the payment of prices higher than ceiling prices established by the Office of Price Stabilization.

10. The appropriate departments and agencies shall furnish information and assist the Committee as necessary to carry out this policy.

11. This policy shall take effect on February 7, 1952.

TITLE 32A.—NATIONAL DEFENSE, APPENDIX 2

CHAPTER 1.—OFFICE OF EMERGENCY PLANNING

(Defense Manpower Policy 4, Revised)

DMP 4.—Placement of procurement and facilities in sections and areas of high unemployment

Pursuant to the authority vested in me by Executive Order No. 10480 and Executive Order No. 11051, as amended, Defense Manpower Policy No. 4 is hereby amended to read as follows:

1. Introduction. Success of the defense program depends upon efficient use of all our resources, including manpower and facilities, which are preserved through practice of the skills of both management and workers.

A primary aim of Federal manpower policy is to encourage full utilization of existing production facilities and workers in preference to creating new plants or moving workers, thus assisting in the maintenance of economic balance and employment stability. When large numbers of workers move to already tight areas, heavy burdens are placed on community facilities—schools, hospitals, housing, transportation, utilities, etc. On the other hand, when unemployment develops in certain areas, unemployment compensation costs increase and plants, tools, and workers' skills remain idle and unable to contribute to our defense program.

2. Purpose. It is the purpose of Defense Manpower Policy No. 4 to direct attention to the potentialities of sections of concentrated unemployment or underemployment and of areas of persistent or substantial labor surplus for the placement of procurement contracts of the location of new plants or facilities, and to assign responsibilities to specified officials of the Government to carry out the policy stated below.

3. Policy. It is the policy of the Federal Government to encourage the placing of contracts and facilities in sections of concentrated unemployment or underemployment and in areas of persistent or substantial labor surplus with preference being given in accordance with regulations prescribed by the Secretary of Labor in making the best use of the available resources in order to achieve the following objectives.

(a) To preserve management and employee skills necessary to the fulfillment of Government contracts and purchases;

(b) To maintain productive facilities;

(c) To improve utilization of the Nation's total manpower potential by making use of the manpower resources of each area;

(d) To help assure timely delivery of re-

quired goods and services and to promote readiness for expanded efforts by locating procurement where the needed manpower and facilities are fully available.

4. Implementation. By virtue of the authority vested in me by Executive Order No. 10480 and Executive Order No. 11051, as amended, and to carry out the purpose and policy objectives set forth above, the following assignments of responsibilities are made to the specified officials of the Government:

(a) The Secretary of Labor shall:

(1) Classify sections of concentrated unemployment or underemployment, and areas having a persistent or substantial surplus of labor under standards to be established by the Secretary of Labor.

(2) In cooperation with State and local authorities, provide labor market data and related economic information in efforts to assist in the initiation of industrial expansion programs in these areas.

(3) Identify skills which are in surplus supply within such sections and areas and make this information available to firms requiring such skills and interested in establishing new plants and facilities.

(4) Identify occupations and skills for which labor will be needed by new or expanding industries; and, in collaboration with other government agencies, make assistance available to area institutions and manpower users in developing on-the-job apprentice or other training programs for developing skills of the workforce.

(5) Certify employing establishments which have agreed to perform contracts in or near sections of concentrated unemployment or underemployment and which have agreed to comply with regulations of the Secretary of Labor with respect to the employment of disadvantaged applicants.

(6) Prescribe regulations establishing the order of preference in which procurement contracts shall be awarded with respect to sections of concentrated unemployment and underemployment and areas of persistent or substantial labor surplus.

(b) All procurement agencies shall:

(1) Use their best efforts to award negotiated procurement contracts to contractors who will perform a substantial proportion of the production on those contracts within or near sections of concentrated unemployment or underemployment or within labor surplus areas, giving preference to contractors in accordance with regulations prescribed by the Secretary of Labor to the extent that procurement objectives will permit; Provided, That in no case shall price differentials be paid for the purpose of carrying out this policy.

(2) Where deemed appropriate, set-aside portions of procurements for negotiations at prices no higher than those paid on the balance of these procurements exclusively with firms which have agreed to perform or cause to be performed a substantial proportion of the production on these contracts within or near sections of concentrated unemployment or underemployment or within labor surplus areas, giving preference to firms in accordance with regulations prescribed by the Secretary of Labor. Provided further, That firms which have agreed to perform in areas not meeting the minimum size qualifications for classification by the Secretary of Labor shall be eligible for participation in setasides, if these firms submit a certificate issued by the Secretary of Labor that a persistent or substantial labor surplus exists in the area in accordance with standards and procedures prescribed by the Secretary of Labor.

(3) Assure that firms that have agreed to perform contracts in or near sections of concentrated unemployment or underemployment or within labor surplus areas that are on appropriate bidders' lists will be given the opportunity to submit bids or proposals on all procurements for which they are qualified. Whenever the number of firms on a bidders' list is excessive, there will be included a representative number of firms from labor surplus areas.

(4) In the event of tie-bids or offers on any procurement, award the contract to the firms which has agreed to perform a substantial proportion of the contract in or near sections of concentrated unemployment or underemployment or in persistent or substantial labor surplus areas by incurring costs on account of production or manufacturing in such sections or labor surplus areas (by itself or its first-tier subcontractors) that amount to a substantial proportion of the contract price, giving such preference as the Secretary of Labor may by regulation prescribe.

(5) Encourage prime contractors to award subcontracts to firms that have agreed to perform a substantial proportion of the production on those subcontracts in or near sections of concentrated unemployment or underemployment or in labor surplus areas.

(6) The preferential actions described in this policy shall in addition to other such actions to which firms may be entitled because of performance in substantial labor surplus areas, such as additional preference under the "Buy American Act."

(7) Cooperate with the other agencies listed herein in achieving the objectives of this policy.

(c) The Secretary of Commerce shall:

(1) In cooperation with State development agencies, the Secretary of Defense, the Administrator of General Services, and the Administrator of the Small Business Administration, assist employing establishments, certified in accordance with sec. 4(a)(5) above, which have agreed to perform contracts in or near sections of concentrated unemployment or underemployment and manufacturers in areas of persistent labor surplus in obtaining Government procurement business by (a) providing such firms with timely information on proposed Government procurements; (b) maintaining current information on the manufacturing capabilities of such firms with respect to Government procurement and disseminating such information to Federal procurement agencies.

(2) Urge firms planning new production facilities (where Federal assistance or interests are involved) to consider the industrial location advantages of sections of concentrated unemployment or underemployment and labor surplus areas.

(3) Provide technical advice and counsel to groups and organizations in such sections or areas on planned industrial parks, industrial development organizations, expanding tourist business, and available Federal aids.

(d) The Administrator of the Small Business Administration shall make available to small business concerns in sections of concentrated unemployment and underemployment and labor surplus areas all of its services, endeavor to insure opportunity for maximum participation by such concerns in Government procurement, and give consideration to the needs of these concerns in the making of joint small business set-asides with Government procurement agencies.

(e) There is hereby continued in operation within the Office of Emergency Planning the Surplus Manpower Committee:

(1) This Committee shall be chaired by the Director of the Office of Emergency Planning, or his designee, and shall include representation from the Department of Defense (including the three military departments), Department of Commerce, Department of Labor, General Services Administration, and Small Business Administration.

(2) The Committee shall advise the Director of the Office of Emergency Planning on policies, procedures, and activities in existence or needed to carry out the purpose of this policy.

(3) When an entire industry, which sells a significant proportion of its production to the Government, is generally depressed or has a significant proportion of its production units located in sections of concentrated unemployment or underemployment or in areas of persistent or substantial labor surplus, the Committee may make appropriate recommendations relative to that industry in lieu of recommendations relative to specific geographical areas. In such cases, after notice to and hearing of interested parties, the Director of the Office of Emergency Planning will give consideration to appropriate measures applicable to the entire industry.

(f) All Federal departments and agencies shall give consideration to labor surplus areas, particularly to persistent labor surplus areas, in the selection of sites for Government-financed facilities expansion, to the extent that such consideration is not inconsistent with essential economic and strategic factors that must also be taken into account.

(g) Notifications No. 38.39, 53, 57, and 58, dealing with the placement of procurement with the textile, shoe, apparel, shipbuilding, and petroleum and petroleum products industries, are continued in effect to the extent that they are not inconsistent with this revised policy.

Effective date. This revised policy shall take effect upon the date this document is filed with the Office of the Federal Register.

Dated: October 16, 1967.

APPENDIX 3

In the revised Department of Labor regulations, effective May 1, 1970, the Secretary of Labor established the following order of preference for applicable Federal contracts:

A. First Preference Group: Employers who will perform or cause to be performed a substantial portion of a Federal contract awarded under this program: (1) in or near classified sections of concentrated unemployment or underemployment, or (2) in areas of persistent unemployment, or (3) in areas of substantial unemployment, providing that such contracts or substantial portions thereof will be performed in an establishment(s) certified by the Department of Labor in accordance with its regulations pertaining to the employment of disadvantaged workers.

B. Second Preference Group: Employers, regardless of where they are located, who will perform or cause to be performed a substantial portion of a Federal contract awarded under this program in an establishment(s) which has been certified by the Department of Labor in accordance with its regulations pertaining to the employment of disadvantaged workers.

C. Third Preference Group: Employers who will perform or cause to be performed a substantial portion of a Federal contract awarded under this program in areas of persistent or substantial unemployment.

D. Priority for Small Business Concerns: Federal procurement procedures implementing DMP-4 give priority to small business concerns. Thus, within each of the preference categories listed above, small business concerns shall receive first consideration in making awards under the program. In the event all set aside contracts under this program have not been awarded to employing establishments eligible or such preference under categories A, B, and C above, small business concerns not eligible for such preference will be afforded an opportunity for an award of a contract at the highest award price paid on an unreserved portion of the contract. However, no price differentials shall be paid in connection with any of the above mentioned preference categories.

III. REQUIREMENTS FOR CERTIFICATION

To be eligible for first or second preference, an employer must submit with his bid a

copy of a certificate of preference issued by the Department of Labor or its authorized representative to the bidding employer or the subcontractor designated to perform the subtantial portion of the contract. To be certified in the first or second preference group, an employer must meet the conditions outlined below:

A. First preference group certificate

1. The establishment must be located

a. In or near a classified section of concentrated unemployment or underemployment, or

b. In an area of persistent unemployment, or

c. In an area of substantial unemployment

2. Irrespective of whether a contract is awarded as a result of the certification, the employer must agree, in writing, to comply with the following provision:

a. The employer will hire, in the certified establishment, a proportion of disadvantaged residents from the classified labor surplus area equaling at least 25 percent of the total new hires each month, beginning with the first full month following the date of certification and continuing until the expiration of the validity period of the certificate or the completion of an awarded contract or subcontract, whichever is later. This commitment relates both to new hires to replace turnover and to new hires for expansion purposes.

b. The disadvantaged new hires shall be identified and referred by the local State employment service office, the local Concentrated Employment Program agency, or by any other nonprofit community agency designated by the local employment service office of the Manpower Administrator's Representative (MAR) as a referral source.

c. The employer will furnish to the certifying employment service office, by the tenth of each month, a report of new hire activity for the previous calendar month. The report shall include the following:

(1) A statement of the total number of new hires in the certified establishment.

(2) A list of names and social security numbers of the disadvantaged residents of the classified labor surplus area who were hired during the month.

(3) The identity of the employment service office or agency which identified and referred each of the disadvantaged residents of the classified labor surplus area.

B. Second preference group certificate

1. The employer, regardless of location, must agree in writing to comply with the following provisions, regardless of whether or not a contract is awarded as a result of the certification:

a. The employer will hire a proportion of disadvantaged workers equaling at least 15 percent of the total new hires in the certified establishment each month, beginning with the first full month following the date of certification and continuing until the expiration of the validity period of the certificate or the completion of an awarded contract or subcontract, whichever is later. This commitment relates both to new hires to replace turnover and to new hires for expansion purposes.

b. The disadvantaged new hires shall be identified and referred by the local State employment service office, the local Concentrated Employment Program agency, or by any other nonprofit community agency designated by the local employment service office as a referral source.

c. The employer will furnish to the certifying employment service office, by the tenth of each month, a report of new hire activity for the previous calendar month. The report shall include the following:

(1) A statement of the total number of new hires in the certified establishment.

(2) A list of names and social security numbers of disadvantaged workers hired during the month.

(3) The name of the employment service office or agency which identified and referred each of the disadvantaged workers.

C. Third Preference Group. No certificate is necessary for the third preference group, since no commitment to employ disadvantaged workers is required. The location of the bidding employer or his designated subcontractor in an area of persistent or substantial unemployment is sufficient to qualify for third preference.

IV. CERTIFICATION PROCEDURES

A. Responsibility for Certification. Local offices of State employment security agencies are responsible for certifying establishments for first and second preference. First preference group certificates will be issued by the local employment service office which has administrative jurisdiction over the classified labor surplus section or area. Where the employing establishment applying for certification is located in the administrative area of a local employment service office other than the office that serves the classified labor surplus area, the two offices will collaborate in deciding whether the establishment is eligible for certification, compliance, and reporting functions.

Second preference group certificates will be issued by the local employment service office which serves the administrative area in which the employing establishment is located.

B. Review of Applications for Certification. Within five working days after receipt of an application for certification, an authorized local employment service staff member will review the application, preferably in the presence of the applying employer's representative, to insure that the application is completed correctly and to clarify any points that may have a bearing on the employer's eligibility for certification or his ability to comply with the agreement. Information received from the employer's representative during the discussion may also be used to determine the type of service which the certified employer may require and the measures employment service staff and other agencies must take to insure referral of a sufficient number of applicants.

Upon completion of the review, the employment service manager should verify all information which is not known to be factual. For example, if the employment service manager does not know that public transportation exists in the manner described by the employer's representative, the information should be verified. When the application has been reviewed, the employment service manager will either approve or disapprove the application and proceed with the issuance or denial of the certificate.

C. Disapproval of an Application for Certification. If the eligibility of an employer is questionable, the area or local office manager should review the application with appropriate officers in the State agency. The State agency may authorize approval or disapproval of questionable applications. If both the local office and State agency agree that an application should be disapproved, the area or local office manager will notify the employer in writing. The notification should include the following:

1. Reasons for disapproval.

2. Statement of the employer's right to request reconsideration by the U.S. Department of Labor.

3. Procedure for requesting reconsideration.

V. SERVICE TO EMPLOYERS

Identification and Referall of Disadvantaged Applicants. Local employment service offices are responsible for providing a sufficient number of disadvantaged applicant referrals to enable certified employers to hire the required percentage.

Local employment service offices, the Concentrated Employment Program agencies, and other referring agencies are also responsible for providing intensive employability services in accordance with the Human Resource Development (HRD) concept so that the disadvantaged applicants will be better equipped to enter a job with a certified employer.

Disadvantaged applicants referred to employers in the first preference group must be residents of the classified labor surplus area. There is no residence restriction on the disadvantaged applicants referred to employers in the second preference group.

VI. RESPONSIBILITY OF CERTIFIED ESTABLISHMENT

A. Employment of Disadvantaged Applicants. Under provisions of the agreement for First Preference Group Certification, an employer is obligated to employ a percentage of disadvantaged residents of classified labor surplus areas which equal 25 percent of the total number of new hires at the certified establishment each month for the duration of the validity period of the certificate, or the completion of an awarded contract or subcontract, whichever is later.

The agreement for Second Preference Group Certification obligates an employer to employ a percentage of disadvantaged applicants which equals 15 percent of the total new hires at the certified establishment each month for the duration of the validity period of the certificate, or the completion of an awarded contract or subcontract, whichever is later. While an employer must obtain at least the required percentage of disadvantaged applicants from local employment service offices or other designated sources, he is not relieved of the responsibility for providing job opportunities acceptable to disadvantaged applicants. The intent of DMP–4 is not served unless disadvantaged applicants enter a job in the certified establishment, continue in gainful employment, and have equal opportunity for upward mobility.

B. Monthly Report of New Hire Activity. Certified establishments are required to submit a monthly report covering employment activity which occurred during the previous month. The report is to be submitted to the certifying employment service office by the tenth of each month covering the first full month following certification, and each subsequent month during the certificate's validity period, or the completion of an awarded contract or subcontract whichever is later.

C. Surrender of Certificates. Certified establishments may surrender their certificates at any time unless they are performing a contract which has been awarded on the basis of the certificate. The return of such certificates to the issuing local employment service office releases the employing establishment from its commitment to hire disadvantaged applicants and submit monthly reports.

VII. COMPLIANCE PROCEDURES

A. Responsibility. Local employment service offices which certify employers for preference are also responsible for insuring that employers comply with the agreement for certification. In situations where the certified employer is in the administrative area of a local employment service office other than the certifying office, the two offices work together to bring the certified employers into compliance. Employment service representatives are also to be available to give technical assistance to certified firms by suggesting practices which industry has proved to be successful in retraining and retaining newly hired disadvantaged workers, including equal opportunity for good wages and working conditions and upward mobility.

B. Recall of Certificates. Certificates will be recalled by the local employment service office whenever an establishment fails to submit the required reports for 2 months and cannot be persuaded to do so; or whenever the proportion of disadvantaged new hires falls below the agreed proportion for 2 consecutive months or 2 months in any 3-month period. After all efforts have been made to bring an employer into compliance with his agreement and it becomes necessary to recall a certificate, the employment service local office manager should review the case with the appropriate official in the State agency. If the State agency agrees that the certificate should be recalled, the employment service local office manager will notify the employer by letter that the certificate is being recalled and will not be valid after a specified date. Copies of the letter will be forwarded to the State agency, the Regional Manpower Administration office, and the Manpower Administration national office. In addition, if the employer is currently performing a contract awarded under this program, the procurement officer who awarded the contract should be notified of the recall of the certificate and given a copy of the notification of recall. The notification to the employer should include the following:

1. Reason(s) for recall.

2. Statement of the employer's right to request reconsideration by the U.S. Department of Labor.

3. Procedure for reconsideration.

VIII. RECONSIDERATION OF LOCAL OFFICE ACTION

A. Rights of Employers to Request Reconsideration. The Code of Federal Regulations (Section 8.9 Part 8, Subtitle A, Title 29) provides that any employer denied a certificate of eligibility may request reconsideration or review by the Secretary of Labor, or his authorized representative. The Secretary has authorized the Manpower Administrator to review such requests and render a decision.

The disapproval of an application for certification, or the recall of a certificate, constitutes denial of a certificate. In either case, therefore, employers may request reconsideration.

B. Procedures for Requesting Reconsideration. If the employer wishes to have his case reconsidered, he will be instructed to prepare a statement of justification and to forward the request for reconsideration to the appropriate Regional Manpower Administration office.

Upon receipt of a request for reconsideration, the regional office will secure from the State agency information pertinent to the case. After a review of all the facts, if the regional office determines that an employer is eligible for certification, an explanation will be made to the State agency which, in turn, will cause the employer to be certified. When the regional office agrees with the State agency that the employer should not be certified, all correspondence and other pertinent information, including the regional office's recommendation, will be forwarded to the Manpower Administration national office for final determination. The national office will inform the employer of the decision by letter signed by the Manpower Administrator. Copies of the decision and appropriate instructions will be transmitted to the regional office and State agency.

By Mr. MAGNUSON (for himself, Mr. INOUYE, Mr. STEVENSON, Mr. DURKIN, Mr. MOYNIHAN, and Mr. STEVENS):

S. 1381. A bill to provide basic standards for State no-fault benefit plans for the rehabilitation and compensation of motor vehicle accident victims, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. MAGNUSON. Mr. President, lately there has been much discourse about how we waste our limited resources, about new proposals to increase efficiency in Government and the private sector, about new measures to insure the needy receive the benefits of social programs instead of a greedy bureaucracy, and about how the consumer ought to pay the cost of goods received rather than some middleman's overhead. We have heard a great deal about these "new" ideas from both the White House and here in Congress. Well, I am here again with an old idea. Maybe if I label it a "new" idea, people will notice that it has all the attributes of these "new" models which Congress and the administration have been actively considering. You may have guessed that the old "new" idea that I am talking about is basic standards for no-fault motor vehicle insurance.

I have stood in this Chamber talking about this idea since 1971 when Senator HART and I introduced the first national no-fault insurance legislation. Since then the Department of Transportation has looked at the idea to the tune of 26 volumes. In the Senate, the Commerce and Judiciary Committees have considered it favorably; in fact, the Commerce Committee has reported favorably on the bill three times. Last year the House Subcommittee on Consumer Protection and Finance and the Commerce Committee over there looked the idea over. Together, the Senate and House committees have heard 7,703 pages of testimony on the subject of no-fault. We even have a model statute from the National Conference of Commissioners on Uniform State Laws.

But this testing has not been limited to theoretical projections and model laws. We have some "real life" evidence because testing has been going on at the State level since 1970 when Massachusetts passed the first State no-fault law. To date, 16 States have adopted some form of no-fault concept, and eight others have enacted some related reform. Quite frankly, not all of these State laws are adequate. Most are seriously flawed, but we have benefited from these States' experiences. We have learned that the inadequate laws succeed only in part whereas the adequate no-fault laws, such as Michigan's, succeed in full. We have also learned that we cannot rely on the States to enact a uniform, sensible statute.

While almost all of the State no-fault laws represent an improvement on the tort system, overall we are still faced with a hodgepodge system of automobile reparation which, to quote the Department of Transportation:

> Ill serves the accident victim, the insuring public and society. It is inefficient, overly costly, incomplete and slow. It allocates benefits poorly, discourages rehabilitation and overburdens the courts and the legal system. Both on the record of its performance and on the logic of its operation, it does little if anything to minimize crash losses.

It is, therefore, my pleasure to introduce today for appropriate reference a bill that would change that hodge-podge and provide basic standards for State no-fault benefits plans for the rehabilitation and compensation of motor vehicle accident victims.

Substantively, it contains the best of its predecessors in the Senate in the 92d, 93d, and 94th Congresses, the best of its companion bill in the House from the 94th Congress, H.R. 9650, and several modifications which have been culled from experience with various State laws.

In his confirmation hearings Secretary of Transportation Adams spoke favorably about the issue while retaining the option to comment on the bill more fully after the Department of Transportation has completed its study on the State no-fault experience.

A moment ago I spoke about waste, efficiency, as well as allocation of benefits and costs. I should appreciate my colleagues' keeping these four items in mind as I briefly describe the bill.

This bill sets forth basic standards for State no-fault benefit plans for the restoration and compensation of all persons injured as a result of a motor vehicle accident. Each State will establish its own State no-fault plan which meets these basic standards. Some States already have plans which meet these standards in part or in full, and some States may choose to enact no-fault plans which exceed the basic standards. Many options are left to the States, so that each no-fault plan will be responsive to local or regional needs, but under this bill, regardless of the site of the accident, every victim will be assured the following basic benefits.

First, payment for emergency treatment and care, and medical and rehabilitation expense up to $100,000 or $250,000 with an option in each policy to increase that coverage up to $1,000,000.

Second, wage losses up to $12,000, computed on the basis of a State/nationwide fraction of average incomes.

Third, replacement services loss benefits for up to 1 year, computed on a daily basis of $20 multiplied by the same State/nationwide fraction. That means that a victim has the means to hire someone to perform tasks which he cannot manage as a result of his injuries.

Fourth, funeral and death benefit for survivors which may be limited to $1,000.

The victim of an accident, or in the case of death the survivor, will receive payment by his or her insurance company within 30 days of submission of proof of loss. A penalty of an 18-percent interest charge in addition to the amounts due on benefits will assure prompt payment. Furthermore, if payment is not forthcoming, the victim may retain an attorney, and the insurance company would be liable for a reasonable attorney's fee if the insurer has improperly withheld benefits.

Mr. President, these benefits contrast sharply with the situation under the tort system. Under the tort system, if the accident involved a single vehicle, a hit-and-run driver or an uninsured motorist, the victim receives nothing. If the victim can identify the defendant in order to file a suit, he must still prove by a preponderance of the evidence that, first,

the other driver was at fault, and second, caused the injury and that, third, the victim was free of fault or, in some States, that he was less at fault before he receives any compensation. If the victim does prevail, and if the defendant is financially capable of paying a judgment, it still takes an average of 19 months to receive final payment. This means that if the victim is a wage-earner put out of work because of injuries, his or her family will be without support for this period. If the victim is seriously injured, rehabilitation probably will not take place because of uncertainty of ever receiving compensation for medical costs. In the interim, the victim must pay for losses unless he or she is lucky enough to have other insurance coverage such as health insurance.

Mr. President, the recovery statistics concerning judgments awarded those victims "lucky" enough to recover under the tort system speak for themselves. To begin with, one-third, and sometimes more, of the total recovery is forfeited to the lawyer as a contingent fee, regardless of the actual time expended and regardless of the sufficiency of the remaining amount to pay even the doctor bills. Approximately $1.7 billion out of $18.5 billion of annual premiums for private passenger bodily injury liability insurance goes to attorneys.

In other words, about 20 cents out of each premium dollar is expended on attorney's fees. The victim recovers about 44 cents on the premium dollar for compensation.

Under the basic standards of this legislation, lawsuits are not completely barred. The victim may sue the person at fault for any economic losses for which he is not compensated under the applicable State no-fault plan. In addition, fault-based lawsuits for noneconomic detriment—pain and suffering—are permitted in all wrongful death cases and in all cases in which the victim suffers a certain severity of injury, which the bill defines in terms of loss of a bodily function or member, significant scarring, or 180 days of continuous disability. Uninsured motorists, manufacturers of defective products, and intentional tortfeasors remain subject to liability in tort. Under the fault system litigation arising out of motor vehicle accidents uses up about one-fifth of the judicial system's resources. In a few States that figure is as high as 46 percent. Of those suits, more than half require over 2 years to reach their conclusion.

Michigan's experience under no-fault proves that no-fault does relieve court congestion. From June 1975, to June 1976, when that State's court calendar included some cases dating from before no-fault was in place, lawsuits declined 20 percent.

In addition to receiving prompt compensation for injuries, the consumer derives other benefits under this bill. The bill provides that each State will maintain a plan to assure that insurance is available to all, including the poor, at reasonable rates. The consumer is protected against capricious and unfair cancellation and nonrenewal of policies. Comparative pricing information for compulsory insurance will be available from the State insurance commissioner. A State plan will protect the consumer against duplicative costs by, first providing for coordination of benefits such as medicare, and second, passing along those savings to the consumer. To assure that the value of a consumer's benefits remain adequate, there is an economic conditions adjuster.

A State plan must have "an adequate and impartial entity or mechanism" to set and periodically review prospective guidelines for evaluating and supervising emergency medical services, medical treatment, and care and vocational rehabilitation. Likewise, guidelines must be prepared for determining what constitutes reasonably needed, reasonable charges and reasonable value. This accountability section is essential to protect the consumer against the burden of overutilization of medical services, with its accompanying costs.

The administrative or "housekeeping" provisions of this bill have been proved since the last Congress. While rate regulation and administration have been left to the States, as is proper under the McCarran-Ferguson law, in past years this bill's predecessors have been criticized for too much Federal involvement. While the substance of those bills flies in the face of that criticism, I and my cosponsors are aware of the sensitivity of States to this issue. Therefore, the bill has been modified so that the review panel and the review process are totally State controlled. State interests dominate the review panel, which consists of four persons appointed by the President from lists submitted by the National Governors Conference, the National Association of Insurance Commissioners, and the Secretary of Transportation. This is a procedure which is similar to the very successful process used to select the board members of the U.S. Railway Association. In contrast to past years, when critics charged that the bill penalized the States with a title III plan more restrictive of tort liability than required under the minimum standards, and providing higher benefits than the minimum standards, this bill provides that the alternative plan shall be the same.

The Governor of a State certifies to the review panel that the State no-fault plan is in accordance with the specified standards. Such certification is considered prima facie evidence that a plan is in accordance with basic standards. If a State has not submitted a no-fault plan which is in accordance with basic standards within 3 years, then the alternative plan will go into effect. The Secretary of Transportation will administer the plan unless the Governor certifies that he has the authority and intention of administering it himself. Thus, the State retains the right and means to administer the alternative plan at all times until it has an approved State plan.

After you have had the opportunity to look over the bill yourselves, I think you will conclude that it is a good bill which deals squarely with a difficult set of problems which confront a highly mobile society—namely, what are the most efficient, humane, and cost-effective means of dealing with accident victims. I submit that trying to find out whose fault the accident was does not help the victim with the economic or noneconomic effects of that accident. I think we owe more to insurance policyholders than a lottery ticket. It is time we looked to supporting the victim and his recovery instead of feathering the nests of the trial bar.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1381

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act, together with the following table of contents, may be cited as the "Standards for No-Fault Motor Vehicle Accident Benefits Act".

TABLE OF CONTENTS

Sec. 2. Findings.
Sec. 101. State plan for no-fault benefits.
(a) Authority.
(b) Approved State plans.
Sec. 102. Benefit levels.
(a) Medical expense benefits.
(b) Work loss benefits.
(c) Replacement services loss benefits.
(d) Funeral and death benefit.
(e) Deductibles.
(f) Tort liability damage awards.
(g) Special reduction in benefit levels to preclude premium increases.
(h) Added no-fault benefits.
Sec. 103. Restrictions on lawsuits.
(a) In general.
(b) Exceptions to restrictions.
(c) Tort penalties.
(d) Attorney's fees.
Sec. 104. Requirement of insurance.
(a) Compulsory coverage.
(b) Administration.
(c) Availability.
Sec. 105. Obtaining no-fault benefits.
(a) Entitlement to no-fault benefits.
(b) Source of no-fault benefits.
(c) Payment of no-fault benefits.
(d) Recovery of no-fault benefits.
Sec. 106. Availability of benefits.
(a) In general.
(b) Establishment of program.
(c) Assignment; notification.
(d) Participation in program.
Sec. 107. Conflict of law resolution.
(a) In general.
(b) Determination of benefits.
(c) Civil actions.
(d) Reimbursement.
(e) Compliance.
(f) Coverage requirements.
Sec. 108. Consumer protection.
(a) Restriction on cancellation, nonrenewal, and modification of insurance.
(b) Consumer information.
(c) Fraud prevention.
(d) Accountability.
(e) Rehabilitation services.
Sec. 109. Avoidance of duplication.
(a) In general.
(b) Reduction for benefits received from governments.
(c) Uninsured motorist coverage.
Sec. 110. Right of reimbursement by insurers.
(a) In general.
(b) Accidents involving certain violations.
(c) Accidents involving nonpassenger motor vehicles.

Sec. 111. Ineligibility for benefits.
(a) Converter.
(b) Intentional injury.
(c) Uninsured motorist.
Sec. 112. Other requirements.
(a) In general.
(b) Regulation and rates.
(c) Included coverage.
(d) Terms and conditions.
(e) Economic conditions adjustment.
(f) Calculation of work loss.
TITLE II—REVIEW PANEL AND PROCESS; ALTERNATIVE NO-FAULT PLAN
Sec. 201. Review panel.
(a) Establishment and membership.
(b) Terms of office and general provisions.
(c) Authorization of appropriations.
Sec. 202. Review process.
(a) Preemption.
(b) Certification by chief executive officer.
(c) Periodic report and recertification.
(d) Review panel review.
(e) Criteria.
(f) Judicial review.
Sec. 203. Alternative no-fault plan.
Sec. 204. Application and implementation of alternative no-fault plan.
(a) In general.
(b) Effective date.
(c) Termination date.
(d) Administration.
TITLE III—DEFINITIONS AND MISCELLANEOUS PROVISIONS
Sec. 301. Definition.
Sec. 302. Jurisdiction of Federal courts.
Sec. 303. Treatment of Federal motor vehicles.
(a) In general.
(b) Procedures.
(c) Definitions.

SEC. 2. FINDINGS.

The Congress finds and declares the following:

(1) Motor vehicle transportation contributes to the Nation's economy and welfare. The more than 100,000.000 motor vehicles in the United States operate in or affect interstate commerce.

(2) Since 1946 the Federal Government has expended more than $80,000,000,000 on the construction and improvement of highways for motor vehicle transportation.

(3) The human cost of motor vehicle transportation in the United States has been enormous. Since 1946 more than 1,250,000 individuals have been killed, and more than 10,000,000 individuals have been seriously injured, as a result of motor vehicle accidents.

(4) It is necessary and proper for the Congress, in the exercise of its authority to establish post roads and to regulate commerce among the several States, to assure that the victims of motor vehicle accidents in the United State receive adequate emergency medical services, medical treatment and care, medical and vocational rehabilitation services, and compensation for their economic losses.

(5) The traditional system for compensating motor vehicle accident victims is a fault system that denies a victim any benefits, unless he satisfies the following prerequisites:

(A) establishes that another person was at fault and that the other person's fault was a legal cause of the accident that resulted in the victim's injury;

(B) establishes his own freedom from fault, or his degree of fault, with respect to the accident;

(C) establishes the tangible and intangible damages caused him as a result of the other person's fault;

(D) obtains a settlement or prevails in a lawsuit, whenever the matters referred to in subparagraphs (A) through (C) are in dispute; and

(E) is able to collect damages, through liability insurance or other means, from the person at fault, or a person responsible for that person's conduct.

This traditional fault system denies more than half of the victims of motor vehicle accidents in the United States any benefits; is inefficient, incomplete, and slow; allocates benefits poorly; discourages rehabilitation; overburdens the courts; and does little if anything to minimize crash losses.

(6) Many States have modified their traditional fault systems to provide for the payment of some benefits to victims without regard to fault. These no-fault systems are improvements over traditional fault systems, but most of these systems are inadequate because they fail—

(A) to offset the cost of the no-fault benefits by an equivalent reduction in the utilization of the traditional fault system; and/or

(B) to provide sufficient no-fault benefits to meet the major needs of seriously injured victims.

The failure to provide for an equivalent reduction is likely to lead to premium increases, or decreases in the availability of insurance, for the consumers of motor vehicle insurance. The failure to provide sufficient benefits for seriously injured victims is likely to result in needless human suffering and public welfare expenditures.

(7) The remaining traditional fault systems and the inadequate no-fault systems are not coordinated with each other and lack the uniformity that is necessary to assure victims of substantially similar benefits and quality of treatment throughout the United States.

(8) The nationwide effect of the shortcomings summarized in paragraphs (5), (6), and (7) is that motor vehicle accident victims in the United States, in general, do not receive adequate emergency medical services and medical treatment and care, needed medical and vocational rehabilitation services, and efficient compensation for their economic losses.

(9) An adequate system for compensating motor vehicle accident victims is a no-fault system that—

(A) permits victims to recover compensation without first having to satisfy the restrictive and time-consuming prerequisites of the traditional fault system;

(B) provides for sufficient no-fault benefits to meet the needs of seriously injured victims; and

(C) assures the reduction in the utilization of the traditional fault system that is necessary to preclude increases in premiums, or decreases in the availability of insurance, which would otherwise follow.

An adequate no-fault system delivers benefits to all victims rapidly and fairly; is efficient; provides for emergency medical services that can save lives and for rehabilitation services that can restore victims to productive lives; removes an unnecessary burden on the courts; contains incentives for improving motor vehicle safety; and is a desirable replacement for a traditional fault system or an inadequate no-fault system.

(10) Direct Federal Government preemptive action is not necessary to achieve the replacement of traditional fault systems and inadequate no-fault systems by adequate no-fault systems. The replacement, and the uniformity among State laws that is necessary to assure accident victims substantially similar benefits and quality of treatment throughout the Nation, can be realized through the enactment by the Congress of basic standards for no-fault benefit plans and an alternative no-fault plan.

TITLE I—STANDARDS FOR STATE NO-FAULT BENEFIT PLANS

SEC. 101. STATE PLAN FOR NO-FAULT BENEFITS.

(a) AUTHORITY.—A State has the authority to establish at any time a plane for no-fault benefits for motor vehicle accident victims in accordance with the basic standards.

(b) APPROVED STATE PLANS.—A State plan for no-fault benefits for motor vehicle accident victims is in accordance with the basic standards, and shall be considered to be an approved State plan, if the Review Panel determines, pursuant to section 202, that the plan—

(1) provides for benefits in accordance with section 102;

(2) provides for restrictions on lawsuits in accordance with section 103;

(3) provides for insurance requirements in accordance with section 104;

(4) provides for obtaining no-fault benefits in accordance with section 105;

(5) provides for the availability of benefits in accordance with section 106;

(6) provides for conflict of law resolution in accordance with section 107;

(7) provides for consumer protection in accordance with section 108;

(8) provides for avoidance of duplication in accordance with section 109;

(9) provides for reimbursement by insurers in accordance with section 110;

(10) provides ineligibility requirements in accordance with section 111;

(11) provides certain other requirements in accordance with section 112; and

(12) does not include any provisions that are inconsistent, in whole or in part, with any of the foregoing provisions.

A provision in a State plan is in accordance with the applicable foregoing provision if it complies with the substance of that provision.

SEC. 102. BENEFIT LEVELS.

(a) MEDICAL EXPENSE BENEFITS.—An approved State plan shall provide for the payment of basic no-fault benefits for medical expense for each victim and may limit those benefits to—

(1) a total amount equal to $100,000; or

(2) a period of not less than 2 years, if the plan provides for—

(A) the payment of those benefits beyond that 2-year period upon receipt by the insurer of a certification from the entity or mechanism established by that plan pursuant to section 108(d), that additional benefits are necessary to sustain the life of a victim or to enable the victim to complete a program of medical or vocational rehabilitation services; and

(B) the payment of an aggregate amount of those benefits of not less than $250,000 to a victim entitled to the additional benefits specified in subparagraph (A).

(b) WORK LOSS BENEFITS.—An approved State plan shall provide for the payment of basic no-fault benefits for work loss to each victim and may limit those benefits to—

(1) a monthly amount equal to the lesser of—

(A) $1,000 multiplied by a fraction whose numerator is the average per capita income in that State and whose denominator is the average per capita income in the United States, according to the latest available statistics designated for the purpose by the Review Panel; or

(B) the disclosed amount, in the case of a named insured who, before the accident resulting in injury, voluntarily discloses has actual monthly earned income to his insurer and agrees in writing with the insurer that

the amount so disclosed shall measure work loss; and

(2) a total amount equal to 12 times the monthly amount determined pursuant to paragraph (1) (A) or (B), whichever is applicable.

(c) REPLACEMENT SERVICES LOSS BENEFITS.—An approved State plan shall provide for the payment of a reasonable amount of basic no-fault benefits for replacement services loss to each victim and may limit those benefits—

(1) to a daily amount equal to $20 multiplied by a fraction whose numerator is the average income in that State and whose denominator is the average per capita income in the United States, according to the latest available statistics designated for that purpose by the Review Panel; and

(2) to a period of not less than 365 days following the date of the accident resulting in injury.

(d) FUNERAL AND DEATH BENEFIT.—An approved State plan shall provide for the payment of a reasonable amount of basic no-fault benefits for loss due to death to the survivors of each victim and may limit those benefits to an amount equal to $1,000.

(e) DEDUCTIBLES.—An approved State plan shall provide that any insurer (other than a self-insurer) may offer—

(1) a deductible, not to exceed $200, or one week's actual earned income (if disclosed), from basic no-fault benefits (other than benefits for emergency medical services) for each victim who is a named insured; and

(2) a deductible, not to exceed an amount which the commissioner determines to be reasonable, for each victim who is a named insured and who sustains injury while operating, or riding as a passenger on, a motor vehicle having less than four wheels.

(f) TORT LIABILITY DAMAGE AWARDS.—An approved State plan shall require each person obligated to provide compulsory coverage to carry liability insurance for the payment of tort liability damages for injury in any case in which liability arises under section 103(b), and may limit that coverage to—

(1) $15,000 for each victim; and

(2) $30,000 for each accident.

An approved State plan shall require that each insurer (other than a self-insurer) make available coverage for the payment of tort liability damages for injury in excess of any limitation imposed by that plan under this subsection.

(b) SPECIAL REDUCTION IN BENEFIT LEVELS TO PRECLUDE PREMIUM INCREASES.—(1) A State which has an approved State plan may, by statute, authorize its commissioner, in accordance with the provisions of this subsection, to lower, for a specified period of time, the level of the benefits that are required by the provisions of the plan that comply with the substance of subsections (b), (c), and (f). Such a commissioner may take any such action if—

(A) he finds, by a preponderance of the evidence, after notice to interested persons and an opportunity for a hearing on the record, that the lower level is necessary to assure that the average cost of premiums for compulsory coverage is not greater than the average cost of adequate premiums for equivalent coverage (as adjusted for inflation) in that State; and

(B) the finding is based upon reliable actuarial evidence.

(2) As used in this subsection, the term "equivalent coverage" means—

(A) in a State that had no first-party benefits law in effect for motor vehicle accident victims before the date of the enactment of this Act, bodily injury liability coverage, uninsured motorist coverage, and medical payments coverage with limits equal to that carried by the average insured motorist in the State immediately before the date of adoption by that State of an approved State plan; and

(B) in a State that had some form of first-party benefits law in effect for motor vehicle accident victims before the date of the enactment of this Act, first-party economic loss benefits coverage and bodily injury liability coverage with limits equal to that required to be carried, or carried by the average insured motorist in the State immediately before the date of adoption by that State of an approved State plan.

(h) ADDED NO-FAULT BENEFITS.—An approved State plan shall require that each insurer (other than a self-insurer) make available coverages which will provide—

(1) benefits for medical expense in excess of any limitation under subsection (a), in reasonable increments up to a total of $1,000,000;

(2) benefits for work loss in excess of any limitation under subsection (b);

(3) benefits for replacement services loss in excess of any limitation under subsection (c);

(4) benefits for loss due to death in excess of any limitation under subsection (d); and

(5) basic no-fault benefits with respect to a motor vehicle having less than four wheels in the case of a State which treats differently or excludes such a vehicle from its approved State plan.

SEC. 103. RESTRICTIONS ON LAWSUITS.

(a) IN GENERAL.—An approved State plan shall provide that no claimant shall be entitled to maintain a civil action based on liability in tort against any person, with respect to an injury as to which basic no-fault benefits are payable, unless the person is or may be liable in tort in accordance with one of the exceptions set forth in subsection (b) and in that plan.

(b) EXCEPTIONS TO RESTRICTIONS.—(1) Except as provided in paragraph (2) of this subsection, an approved State plan shall provide, in accordance with applicable law, that a person may be liable in tort—

(A) for any loss which is in excess of any applicable limitation in accordance with section 102(a), 102(b)(2), or 102(c), and which is not compensated by added no-fault benefits;

(B) for—

(i) any loss which is in excess of the applicable limitation in accordance with section 102(d) and which is not compensated by added no-fault benefits; and

(ii) damages for noneconomic detriment which is sustained by a victim who suffers injury resulting in death or by any survivor of the victim as a result of that death;

(C) for noneconomic detriment which is not compensated by other benefits and which is sustained by a victim who suffers an injury resulting in—

(i) significant permanent scarring or disfigurement;

(ii) the permanent loss of an important bodily function;

(iii) other serious and permanent injury. As used in this subparagraph, "other serious and permanent injury" means an injury which results directly in a substantial and medically demonstrable permanent impairment that significantly affects the ability of the victim to resume his usual and customary daily activities; or

(iv) more than 180 continuous days of total disability. As used in this subparagraph, "total disability" means an injury which results directly in a medically demonstrable impairment that prevents the victim from performing all or substantially all of the material acts and duties which constitute his usual and customary daily activities;

(D) for any injury arising out of the maintenance or use of a motor vehicle with intent to injure himself or another person;

(E) for any injury arising out of a defect in a motor vehicle that was designed, manufactured, repaired, serviced, or otherwise maintained by that person in the course of his business (other than a defect that occurs while the vehicle is being operated in the course of the business) if the defect was caused or not corrected by an act or omission in the course of the business; or

(F) for any injury that is caused in whole or in part by any act or omission not connected with the maintenance or use of a motor vehicle by that person. (2) An approved State plan may provide for a longer time period than that specified in subparagraph (C)(iv), and may exclude any or all of the exceptions to restrictions on lawsuits specified in paragraph (3).

(c) TORT PENALTIES.—An approved State plan may provide for a mechanism to assess the individual responsibility of motor vehicle operators and a process or procedure for the imposition of tort penalties, to deter negligent and unsafe maintenance and use of motor vehicles in that State. Those tort penalties may include—

(1) the imposition of fines;

(2) the suspension or revocation of motor vehicle operators' licenses;

(3) compulsory driver education;

(4) orders to participate in programs designed to prevent driving while intoxicated;

(5) the impoundment of motor vehicle owned by those operators for specified periods; and

(6) any other penalty that is considered appropriate by the State.

No penalty imposed pursuant to the authority set forth in this subsection shall be paid or reimbursed, directly or indirectly, by an insurer.

(d) ATTORNEY'S FEES.—A defendant shall be awarded a reasonable attorney's fee by the court for defending a claim for liability in tort if the court determine that—

(1) the claim is fraudulent; or

(2) there is no reasonable foundation for believing that the claim falls within an exception to the restrictions on liability in tort set forth in subsection (b) and in the applicable approved State plan.

SEC. 104. REQUIREMENT OF INSURANCE.

(a) COMPULSORY COVERAGE.—(1) An approved State plan shall require each owner of a motor vehicle which is registered in that State to continuously provide and maintain compulsory coverage with respect to that motor vehicle, in accordance with the provisions of the plan. Each owner of a motor vehicle which is operated in that State by or with the express or implied consent of the owner shall continuously provide and maintain compulsory coverage, through endorsement or other means, while the vehicle is operated in that State, if that coverage is not provided or maintained under any other approved no-fault plan. Any other person may provide and maintain compulsory coverage with respect to any motor vehicle. The compulsory coverage shall assure the payment of all benefits required to be provided pursuant to any applicable approved no-fault plan, including the payment of any benefits required by such a plan but not required by the basic standards.

(2) The compulsory coverage required by paragraph (1) shall be provided by an owner of a motor vehicle—

(A) by entering into a contract of insurance with an insurer (other than a self-insurer); or

(B) by issuing a commitment to pay the required benefits under, and to meet the other requirements of, any applicable approved no-fault plan and, in the case of any owner that is not a government, by qualifying, pursuant to any applicable State law, as a self-insurer for that purpose by submitting to the appropriate State agency ade-

quate evidence of the commitment and of the owner's ability to make those payments and to meet those other requirements.

An owner of a motor vehicle or a self-insurer may also provide added no-fault benefits and other coverages in the same manner and as specified in the applicable contract of insurance or commitment.

(b) ADMINISTRATION.—An approved State plan shall provide for the administration and enforcement of the requirement set forth in subsection (a).

(c) AVAILABILITY.—An approved State plan shall provide that the commissioner shall, pursuant to any applicable State law, establish and implement, or approve and supervise, a program to assure that compulsory coverage is available on reasonable terms to each owner of a motor vehicle that is registered or operated in that State.

SEC. 105. OBTAINING NO-FAULT BENEFITS.

(a) ENTITLEMENT TO NO-FAULT BENEFITS.—(1) An approved State plan shall provide that a victim, any survivor of a victim, or any provider on behalf of a victim is entitled to basic no-fault benefits (unless the victim is ineligible for those benefits pursuant to section 111) under the plan if, on the date of the accident resulting in injury, the principal place of residence of the victim—

(A) is in that State, and—

(i) the injury is suffered in any State; or

(ii) the injury is suffered in Canada, Mexico, or Puerto Rico and the victim is an insured, as of that date, or an occupant of a motor vehicle for which compulsory coverage is provided; or

(B) is not in that State or any other State, and the injury is suffered in that State.

(2) An approved State plan shall also provide that such a victim, survivor, or provider is entitled to basic no-fault benefits in that State; and

(A) the accident resulting in injury occurs in that State; and

(B) the principal place of residence of the victim, on the date of the accident, is in a State that does not have an approved no-fault plan.

(b) SOURCE OF NO-FAULT BENEFITS.—(1) An approved State plan shall provide that if two or more obligations to pay basic no-fault benefits apply to an injury, the insurer liable to pay those benefits shall be determined in accordance with the priorities set forth in this subsection. The insurer liable to pay those benefits is the insurer providing—

1st; compulsory coverage to an employer, if the victim is an employee, or an employee's spouse or other relative residing in the same household as the employee, if the accident resulting in injury occurs while the victim is driving or occupying a motor vehicle provided or made available by that employee's employer in the course of his employment;

2d; compulsory coverage under which the victim is an insured;

3d; compulsory coverage covering a motor vehicle involved in the accident resulting in injury, if the victim is an uninsured occupant of that motor vehcle;

4th; compulsory coverage covering any motor vehicle involved in the accident resulting in injury, if the victim is not an insured;

5th; benefits under the program required by section 106.

For purposes of this section, a parked and unoccupied motor vehicle is not a motor vehicle involved in an accident unless it was parked so as to cause unreasonable risk of injury.

(2) An approved State plan shall provide that if two or more obligations to pay basic no-fault benefits apply equally to an injury under the priorities set forth in paragraph (1), the insurer against whom a claim is asserted first shall process and pay the claim as if wholly responsible. That insurer is thereafter entitled to recover contribution pro rata from any other such insurer for the basic no-fault benefits paid and for the costs of processing the claim involved. If contribution is sought among insurers responsible under the 4th priority in paragraph (1), proration shall be based on the number of involved motor vehicles.

(c) PAYMENT OF NO-FAULT BENEFITS.—(1) An approved State plan shall provide for the payment of no-fault benefits in accordance with this subsection.

(2) No-fault benefits, subject to section 109, are payable monthly as loss accrues. Loss accrues not when injury occurs, but as medical expenses, work loss, replacement services loss, or loss due to death is incurred.

(3) No-fault benefits are overdue, except as otherwise provided in this paragraph, if not paid by the applicable insurer—

(A) within 30 days after that insurer receives a submission of reasonable proof with respect to the loss for which those benefits are payable; or

(B) within 15 days after the close of each accumulation period if, upon receipt of an initial claim for no-fault benefits, the insurer designates accumulation periods not to exceed 31 days each for accumulating all such claims received within each such period. No-fault benefits for medical expense are not overdue with respect to any claim or portion of a claim that the insurer submits for arbitration, pursuant to section 108(d), within the applicable period specified in subparagraph (A) or (B), if the claim or any portion of the claim is disputed in good faith.

(4) An approved State plan may provide that an applicable insurer may require a victim to submit to any reasonable examination or re-examination, at times and places convenient to the victim, by medical experts selected by the victim from a list provided by the insurer, on such terms and conditions as are provided for in the plan. The cost of any such examination or re-examination shall be paid by the insurer. A written report of any such examination or re-examination, including the results of all tests, diagnoses, and conclusions, shall, upon request, be disclosed to the victim, to applicable providers, and, if the victim asserts that another person is liable in tort pursuant to section 103(b), to that other person.

(5) Unless the applicable insurer is otherwise requested by the victim involved, an obligation to pay any no-fault benefits for medical expense shall be discharged by an insurer by direct payment to the provider within the period required by paragraph (3), and no such provider may receive any additional amount therefor from any victim or survivor personally. Each such provider shall furnish to the applicable victim an itemized bill of the services rendered by the provider.

(6) No-fault benefits shall be paid without reduction for any benefits that are to be subtracted pursuant to section 109(b), unless those other benefits have been paid (or are payable) or have been provided before the date on which the no-fault benefits are overdue. An insurer making a payment for any such benefits shall have a right, without regard to the provisions of any other law, to recover from—

(A) the person who is obligated to pay or provide the benefits; or

(B) the claimant who actually receives those benefits.

(7) An insurer may maintain a civil action to recover any no-fault benefits which the insurer has paid as a result of an intentional or knowing misrepresentation of a material fact by a claimant, if it reasonably relied upon the misrepresentation in paying those benefits. An insurer may deduct the amount of any judgment obtained by it in such an action from any no-fault benefits which the insurer is required to pay to the same claimant.

(8) If an insurer rejects a claim for basic no-fault benefits, the insurer shall give written notice thereof to the claimant within 30 days after the date of receipt of the claim and proof of loss. The notice shall specify the reason for the rejection, inform the claimant of his right to obtain an attorney, as specified in subsection (d)(3), and inform the claimant of his rights pursuant to section 106.

(d) RECOVERY OF NO-FAULT BENEFITS.—(1) An approved State plan shall authorize the claimant to maintain a civil action against an insurer or the program required by section 106(b), in an appropriate court of that State, for the payment of overdue benefits and any applicable interest penalty. If no-fault benefits have not been paid to the claimant with respect to an injury, such an action shall be commenced within 4 years after the date of the accident resulting in that injury. If any no-fault benefits have been paid to the claimant with respect to an injury, such an action shall be commenced within 3 years after the date of the last such payment.

(2) An approved State plan shall require insurers to pay claimants an interest penalty on overdue payments of no-fault benefits. The amount of any such penalty shall be calculated, at the rate of not less than 18 percent per year on the overdue amount, from the date on which payment becomes overdue pursuant to subsection (c)(3) until the date on which payment is made.

(3)(A) An approved State plan shall provide for the payment of attorney's fees and other reasonable litigation costs in accordance with the provisions of this paragraph.

(B) If overdue no-fault benefits are recovered by a victim or any survivor in a civil action against an insurer, or if those benefits are paid by an insurer after that insurer receives notice that a victim or any survivor has retained an attorney, the insurer shall pay that attorney a reasonable fee, based upon the actual time expended by the claimant (at prevailing rates for the services of the attorney) and any other reasonable costs connected with those services. In any action brought against a claimant by an insurer, the court may award the claimant's attorney a reasonable fee, on the same such basis for defending the action, and the fee shall be paid by the insurer. No part of the no-fault benefits recovered or paid may be applied to, or used to pay in whole or in part, any attorney's fees for services connected with the recovery of no-fault benefits.

(C) An insurer shall be awarded a reasonable attorney's fee by the court with respect to a claim for no-fault benefits if the court determines that the claim, or any significant part of the claim, is fraudulent or so excessive as to have no reasonable foundation. That insurer may deduct the amount of that fee against any other no-fault benefits that the insurer is required to pay to the claimant involved.

SEC. 106. AVAILABILITY OF BENEFITS.

(a) IN GENERAL.—An approved State plan shall provide for the availability of basic no-fault benefits in accordance with the provisions of this section.

(b) ESTABLISHMENT OF PROGRAMS.—The Commissioner shall, pursuant to any applicable State law, establish and implement, or approve and supervise, a program to assure that basic no-fault benefits are available, with respect to any victim who is entitled to basic no-fault benefits under the approved State plan of that State, in any case in which—

(1) no other obligation to pay basic no-fault benefits applies to that victim or is

identifiable, provided that the victim is not ineligible for those benefits pursuant to section 111; or

(2) the insurer obligated to pay basic no-fault benefits with respect to that victim is financially unable to meet the obligation in full, unless those benefits are available through a State insolvency plan.

(c) ASSIGNMENT; NOTIFICATION.—The program required by subsection (b) shall provide for the prompt—

(1) assignment, to an insurer (other than a self-insurer) providing compulsory coverage in that State, of each case covered by subsection (b); and

(2) notification, to the claimant involved, of each assignment made under paragraph (1).

Each notice under paragraph (2) shall include the name and address of the insurer assigned, the name and business telephone number of an authorized claims representative of the insurer, and a statement as to applicable procedures and remedies. The insurer to whom a case is assigned under this subsection has the same rights, duties, and obligations as if it had issued compulsory coverage with respect to the victim involved. That insurer shall pay basic no-fault benefits on behalf of the program required by subsection (b), subject to reimbursement by the program. The program shall have a right of reimbursement for basic no-fault benefits paid through the program against any insurer legally obligated to pay those benefits.

(d) PARTICIPATION IN PROGRAM.—Each insurer providing compulsory coverage under the approved State plan of that State shall participate, on a fair and equitable basis of allocation, in the cost of the program established in subsection (b). Each insurer (other than a self-insurer) providing compulsory coverage in that State shall accept any case assigned to it under subsection (c).

SEC. 107. CONFLICT OF LAW RESOLUTION.

(a) IN GENERAL.—An approved State plan shall include provisions relating to conflict of law resolution in accordance with the provisions of this section.

(b) DETERMINATION OF BENEFITS.—The right of any claimant to obtain no-fault benefits, and the nature and extent of those benefits, shall be determined by the provisions of the approved no-fault plan that is in effect in the State in which the applicable victim is entitled to no-fault benefits, pursuant to section 105(a).

(c) CIVIL ACTIONS.—The right of a victim or any survivors to maintain a civil action based on liability in tort (other than an action pursuant to section 103(c)), and to recover any damages in such an action, with respect to any injury to which an approved no-fault plan applies, shall be determined by the local law of the State in which the victim is or was entitled to no-fault benefits.

(d) REIMBURSEMENT.—The right of any insurer to recover reimbursement for any no-fault benefits paid or required to be paid by an insurer shall be determined pursuant to the provisions of the approved no-fault plan that is in effect in the State in which the accident resulting in injury occurs.

(e) COMPLIANCE.—An owner of a motor vehicle who has complied with the requirements of compulsory coverage in any State shall be considered to have complied with the requirements of that coverage in any other State.

(f) COVERAGE REQUIREMENTS.—An insurer shall provide, and each contract of insurance for the payment of basic no-fault benefits shall be construed to contain, coverage sufficient to satisfy the requirements for compulsory coverage in any State.

SEC. 108. CONSUMER PROTECTION.

(a) RESTRICTIONS ON CANCELLATION, NONRENEWAL, AND MODIFICATION OF INSURANCE.—

(1) An approved State plan shall provide for restrictions on cancellation, nonrenewal, and modification of insurance in accordance with the provisions of this subsection.

(2) No insurer (other than a self-insurer) may cancel any compulsory coverage, except as authorized under paragraph (8), if—

(A) timely payments of all required premiums, or premium installments, for that coverage have been made; and

(B) each insured under that coverage has a valid license to operate the motor vehicle for which the coverage is provided.

(3) No insurer (other than a self-insurer) may fail to renew compulsory coverage because of the race, color, creed, national origin, ancestry, age, sex, religion, place of residence, marital status, or lawful occupation of an insured.

(4) No insurer (other than a self-insurer) may fail to renew compulsory coverage or increase the cost of that coverage solely because an insured has filed a valid claim for basic no-fault benefits.

(5) A self-insurer may not cancel or fail to renew compulsory coverage issued by it pursuant to section 104(a)(2)(B) unless it simultaneously provides compulsory coverage pursuant to section 104(a)(2)(A).

(6) If any insurer—

(A) cancels any compulsory coverage in violation of paragraph (2) or (5); or

(B) fails to renew any compulsory coverage in violation of paragraph (3), (4), or (5);

that cancellation or failure to renew shall not relieve that insurer of any obligation under the terms of that coverage.

(7) An insurer (other than a self-insurer) may, pursuant to any applicable State law, cancel or fail to renew any compulsory coverage because of fraud or other willful misconduct of an insured in entering upon the compulsory coverage or provide for reform of the terms of the compulsory coverage on the basis of mutual mistake of fact.

(8) An approved State plan may provide for a period, not to exceed 75 days from the date an insured first enters into compulsory coverage with a particular insurer, during which the insurer (other than a self-insurer) may, upon reasonable notice, cancel an insured's compulsory coverage on the basis of facts discovered as a result of investigating the insured during that period, except that the cancellation may not be based upon any ground specified in paragraph (3).

(b) CONSUMER INFORMATION.—An approved State plan shall provide that the commissioner shall establish and maintain a program designed to assure that purchasers of insurance are adequately informed with respect to the availability and comparative cost of compulsory coverage.

(c) FRAUD PREVENTION.—An approved State plan shall provide for an entity or mechanism to which reimbursement or payment is volving victims in that State and with respect to which reimbursement or payment is sought from or made by an insurer. Insurers providing compulsory coverage in the State shall assist and cooperate with the entity or mechanism, and those insurers may exchange information with respect to those claims and their prevention. An approved State plan may provide that any person who knowingly—

(1) submits a claim for no-fault benefits in violation of the provisions of an approved State plan or guidelines established under subsection (d); or

(2) assists, conspires with, or enables any other person to make such a submission or to commit such a violation;

shall be guilty of an offense under the laws of that State and shall be subject to any applicable criminal or civil penalties and also, where applicable, to suspension or loss of any applicable license, certification, or authority which entitles that person to practice in the State the profession or occupation in the course of which the violation was committed.

(d) ACCOUNTABILITY.—An approved State plan shall provide for an adequate and impartial entity or mechanism, which shall be empowered and directed to establish (and periodically review) prospective guidelines, for—

(1) evaluating and supervising—

(A) emergency medical services;

(B) medical treatment and care; and

(C) medical and vocational rehabilitation services;

which are supplied to, or provided for, victims in that State and with respect to which reimbursement or payment is sought from or made by an insurer;

(2) evaluating, with respect to a victim, the need for and the efficacy of medical expense items, and reviewing the condition and the future treatment and rehabilitation service needs of a victim; and

(3) assuring the accountability of providers for the quality of, and charges for, products, services, and accommodations; and for determining what constitutes "reasonably needed", "reasonable charges", and "reasonable value", as such terms are used in section 301(19).

The approved State plan shall also provide for the arbitration of disputes relating to the matters for which the guidelines are established.

(e) REHABILITATION SERVICES.—(1) An approved State plan shall include the requirements contained in this subsection with respect to medical and vocational rehabilitation services.

(2) An approved State plan shall provide for the vocational rehabilitation of victims. If the State has a State plan for vocational rehabilitation services under section 101 of the Vocational Rehabilitation Act of 1973 (29 U.S.C. 721), the approved State plan shall provide for that rehabilitation in a manner consistent with the State plan under that Act.

(3) An insurer obligated to pay basic no-fault benefits with respect to a victim who is seriously injured shall refer the victim to a qualified provider of medical and vocational rehabilitation services and shall simultaneously furnish the victim with a list of other qualified providers, and shall advise the victim of the benefits and value of those services. An insurer may similarly refer and advise any other victim.

(4) An insurer is not obligated to pay basic no-fault benefits for medical expense for medical and vocational rehabilitation services unless—

(A) the provider of the services is licensed or approved, by an appropriate agency or entity, as qualified to provide those services; and

(B) there is compliance with any applicable guideline established under subsection (d).

SEC. 109. AVOIDANCE OF DUPLICATION.

(a) IN GENERAL.—(1) An approved State plan shall establish, and the commissioner shall implement, a provision that fairly and equitably—

(A) eliminates any unintended duplication in the benefits otherwise available with respect to a victim or any survivors with respect to any injury; and

(B) passes on the cost savings which result from that elimination to all persons who would otherwise be entitled to receive those duplicative benefits, or utilizes the savings to defray the cost of other benefits.

(2) In any offer to provide benefits and in any contract providing for those benefits, when any person clearly and conspicu-

ously discloses the relationship between any additional benefits offered and the benefits available under compulsory coverage in a manner which would not mislead the average consumer, duplication which results shall not be considered unintended.

(b) REDUCTION FOR BENEFITS RECEIVED FROM GOVERNMENTS.—An approved State plan shall provide that all benefits (less reasonably incurred collection costs) that an individual receives pursuant to entitlement, or in entitled to receive, with respect to an injury, from—

(1) social security (except benefits under title XIX of the Social Security Act);

(2) workmen's compensation;

(3) temporary nonoccupational disability insurance that is required by a State; and

(4) any government (except the proceeds of government life insurance);

shall be subtracted in calculating basic no-fault benefits, unless the law authorizing or providing for those benefits makes them secondary to or duplicative of basic no-fault benefits.

(c) UNINSURED MOTORIST COVERAGE.—An approved State plan shall, to the extent necessary, provide for the amendment of any law of the State that requires the offering of uninsured motorist coverage to assure that no such uninsured motorist coverage shall—

(1) duplicate payment for any of the basic no-fault benefits available to a victim or any survivors with respect to any injury; and

(2) provide any payments or benefits for noneconomic detriment suffered by a victim, except to the extent that there is liability in tort pursuant to section 103(b) (2) and (3).

SEC. 110. RIGHT OF REIMBURSEMENT BY INSURERS.

(a) IN GENERAL.—Except as otherwise provided, an approved State plan shall provide that no insurer has or may exercise any right of reimbursement for any no-fault benefits paid or obligated to be paid by that insurer with respect to an injury—

(1) from any other insurer;

(2) from a victim; or

(3) from any person who may be liable in tort, pursuant to section 103(b), to a victim.

(b) ACCIDENTS INVOLVING CERTAIN VIOLATIONS.—(1) An approved State plan may grant an insurer a right of reimbursement from any other insurer for any no-fault benefits paid or obligated to be paid by that insurer as a result of an accident with respect to which there is an adjudication that the operator of a motor vehicle insured by the other insurer was guilty of manslaughter, negligent homicide, driving while under the influence of alcohol or a controlled substance, or any other act or omission which constitutes a felony under the laws of the jurisdiction involved, in connection with the operation of that motor vehicle.

(2) As used in this subsection, the term "adjudication" means any determination by a court of competent jurisdiction or by an administrative agency that a person is guilty of a crime or traffic violation described in paragraph (1), and includes a plea of guilty or nolo contendere to such an offense.

(c) ACCIDENTS INVOLVING NON-PASSENGER MOTOR VEHICLES.—An approved State plan may grant an insurer a right of reimbursement from any other insurer, based upon a determination of fault, for any no-fault benefits paid or obligated to be paid by that insurer as a result of an accident that involved two or more motor vehicles, at least one of which was of a type other than a passenger motor vehicle, if the commissioner in that State has designated that type as a type of motor vehicle whose owner is likely to receive unreasonable economic advantage or to suffer unreasonable economic disadvantage in the absence of the reimbursement.

SEC. 111. INELIGIBILITY FOR BENEFITS.

(a) CONVERTER.—An approved State plan shall provide that no-fault benefits are not payable with respect to any victim who is the converter of a motor vehicle and who suffers injury arising out of the maintenance or use of a motor vehicle that has been converted, except that this provision shall not apply to—

(1) a converter who is less than 15 years of age on the date of the accident resulting in injury; and

(2) a provider of emergency medical services for any such victim.

For purposes of this subsection, an individual is not a converter of a motor vehicle if he uses it in a good faith belief that he is legally entitled to do so.

(b) INTENTIONAL INJURY.—An approved State plan shall provide that no-fault benefits are not payable with respect to any victim who suffers injury arising out of the maintenance or use of a motor vehicle with intent to injure himself or another individual, except that a provider of emergency medical services for such a victim is eligible to receive no-fault benefits for medical expense. For purposes of this subsection and section 103(1)(D), an individual—

(1) intentionally injures himself or another individual if he acts or fails to act for the purpose of causing injury or with knowledge that injury is substantially certain to follow; and

(2) does not intentionally injure himself or another individual (A) merely because his act or failure to act is intentional or done with his realization that it creates a grave risk of harm; or (B) if his act or failure to act is done for the purpose of averting bodily harm to himself or another individual.

(c) UNINSURED MOTORIST.—An approved State plan may provide that if a victim—

(1) is the owner of a motor vehicle involved in the accident resulting in the victim's injury; and

(2) failed, as of the date of the accident, to provide and maintain compulsory coverage with respect to that motor vehicle;

no-fault benefits with respect to that victim shall be paid subject to such reasonable deductions or limitations on benefits as are specified in the plan, if those deductions or limitations are provided for in that plan in order to encourage owners of motor vehicles to provide and maintain compulsory coverage.

SEC. 112. OTHER REQUIREMENTS.

(a) IN GENERAL.—An approved State plan shall provide for each of the requirements set forth in subsections (b) through (f).

(b) REGULATION AND RATES.—The commissioner shall have exclusive authority, in accordance with applicable State law, to regulate insurers. The rates charged by insurers for compulsory coverage in a State having an approved State plan shall be established, determined, and modified only in accordance with the provisions of the applicable rating law of that State.

(c) INCLUDED COVERAGE.—A contract of insurance covering liability arising out of the ownership, maintenance, or use of a motor vehicle registered in a State is a contract for the payment of basic no-fault benefits, unless—

(1) the contract provides only tort liability coverages that are in excess of those required by the approved State plan of that State; or

(2) the commissioner determines, by regulation, that the contract provides motor vehicle bodily injury tort liability coverage only as incidental to some other basic coverage.

(d) TERMS AND CONDITIONS.—The terms and conditions of any contract, certificate, or other evidence of compulsory coverage (including any form or rating plan used by insurers) shall—

(1) be subject to regulation by the commissioner; and

(2) accurately reflect the status of the insured involved as a result of the measure of work loss, the election of a deductible, and eligibility for other benefits, as provided in sections 102(b)(1)(B), 102(e), and 109(b).

(e) ECONOMIC CONDITIONS ADJUSTMENT.—Beginning in 1980, and at 3-year intervals thereafter, any dollar figure used in any of the basic standards shall be adjusted to reflect economic conditions at that date, pursuant to formulae and statistics designated for that purpose by the Review Panel.

(f) CALCULATION OF WORK LOSS.—(1) The work loss of a victim shall be determined pursuant to the provisions of this subsection.

(2) The term "work loss" means—

(A) loss of income; and

(B) reasonable expenses of, or on behalf of, a victim for hiring a substitute to perform self-employment services or for hiring help, so as to enable the victim to mitigate his loss of income.

(3) The term "loss of income" means the gross income loss of a victim, as calculated pursuant to paragraph (4), (5), or (6), whichever is applicable, subject to paragraph (7) (or the gross income that would have been lost by a victim but for any income continuation plan that is a primary benefit source pursuant to section 109(a), as so calculated), reduced by—

(A) any expected reduction in the amount payable by the victim for purposse of Federal income taxation;

(B) 90 percent of any income which the victim earns from substitute work;

(C) income which the victim would have earned in available substitute work he was capable of performing but unreasonably failed to undertake; or

(D) any income which the victim would have earned by hiring an available substitute to perform self-employment services but unreasonably failed to do.

(4) The gross income loss of a victim whose income before the date of an accident resulting in injury was realized in regular increments shall be calculated by—

(A) determining his probable weekly income by dividing his probable annual income by 52; and

(B) multiplying that quantity by the number of workweeks, or fraction thereof, during which the victim was unable to perform work during the accrual period because of the injury.

(5) The gross income loss of a victim whose income before the date of an accident resulting in injury was realized in irregular increments shall be calculated by—

(A) determining his probable weekly income by dividing his probable annual income by the number of weeks he normally works; and

(B) multiplying that quantity by the number of workweeks, or fraction thereof, during which the victim was unable to perform, and would have performed, work during the accrual period, but for the injury.

(6) The gross income loss of a victim who is not employed when the accident resulting in injury occurs shall be calculated by—

(A) determining his probable weekly income by dividing his probable annual income by 52; and

(B) multiplying that quantity by the number of workweeks, or fraction thereof, if any, during which the victim would reasonably have been expected to perform work for income during the accrual period, but for the injury.

(7) The gross income loss of a victim shall be periodically recalculated and increased to reflect any increase in the victim's annual compensation that would predictably have occurred but for the injury.

(8) As used in this subsection—

(A) the term "probable annual income"

means, absent a showing that it is or would be some other amount, the following:

(i) 12 times the monthly gross income earned by the victim from work in the month preceding the month in which the accident resulting in injury occurs, or the average annual income earned by the victim from work during the years, not to exceed 3, preceding the year in which the accident resulting in injury occurs, whichever is greater, for a victim regularly employed at the time of the accident;

(ii) the average annual gross income earned by the victim from work during the years in which he was employed, not to exceed 3, preceding the year in which the accident resulting in injury occurs, for a victim seasonally employed or not employed at the time of the accident; or

(iii) the average annual gross income of a production or nonsupervisory worker in the private nonfarm economy in the State in which the victim has his principal place of residence during the year in which the accident resulting in injury occurs, for a victim who has not previously earned income from work;

(B) the term "weekly income" means income earned during a workweek; and

(C) the term "workweek" means the number of days an individual normally works in a consecutive 7-day period.

TITLE II—REVIEW PANEL AND PROCESS; ALTERNATIVE NO-FAULT PLAN

SEC. 201. REVIEW PANEL.

(a) ESTABLISHMENT AND MEMBERSHIP.—(1) There is established, in accordance with the provisions of this section, an independent instrumentality within the Department of Transportation, which shall be known as the Standards for No-Fault Benefits Review Panel.

(2) The Review Panel shall consist of five members, as follows:

(A) the Secretary or his delegate; and

(B) four individuals who shall be appointed by the President, by and with the advice and consent of the Senate, on the following basis:

(i) two, to be selected from a list of qualified individuals submitted to the President by the National Governor's Conference; and

(ii) two, to be selected from a list of qualified individuals submitted to the President by the National Association of Insurance Commissioners.

(3) Except as provided in paragraph (2)(A), no individual who is, at the time of appointment, an employee of, or a consultant to, the Federal Government or any agency, instrumentality, or other entity of the Federal Government, shall be appointed to or serve as a member of the Review Panel.

(4) As used in this paragraph—

(A) the term "list of qualified individuals" includes the names (including pertinent biographical data) of not less than six such individuals for each applicable vacancy; and

(B) the term "qualified individual" means an individual who is knowledgeable or experienced with respect to no-fault motor vehicle insurance, the basic standards, and the provisions of this Act.

(b) TERMS OF OFFICE AND GENERAL PROVISIONS.—(1) Each person who is appointed under subsection (a)(2)(B) to be a member of the Review Panel shall serve for a term of 4 years, except that, with respect to the members initially so appointed, the President shall designate two to serve for a term of 2 years, and two to serve for a term of 4 years. Successors to the members of the Review Panel shall be appointed in the same manner as the original members. Any individual appointed to fill a vacancy occurring before the expiration of any term of office shall be appointed for the remainder of that term.

(2) A majority of the members of the Review Panel shall constitute a quorum, but one or more of the members designated by the panel may hold hearings.

(3) The members of the Review Panel shall elect a Chairman of the panel from among its members.

(4) The Review Panel shall meet, at times and locations convenient to its members, at the call of the Chairman or upon the request of a majority of the members.

(5) If any member of the Review Panel disagrees with any action of the panel, the member may prepare a statement setting forth the nature of, and the reasons for, that disagreement. Any such statement shall be made available to the public by the panel.

(6) The Review Panel shall make available to the public, and revise as necessary, a statement of its organization, practices, and procedures, including the mailing address to be used for submitting certifications, reports, and recertifications.

(7) A member of the Review Panel who is an employee of the Federal Government or a State government shall serve on the panel without any compensation in addition to compensation received for his service as such an employee, but shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the panel. A member of the Review Panel who is not a Federal or State employee shall receive—

(A) the highest daily rate in effect, from time to time, for grade GS-18 of the General Schedule (5 U.S.C. 5332) when engaged in the actual performance of duties vested in the panel; and

(B) reimbursement for travel, subsistence and other necessary expenses incurred in the performance of those duties.

(8) The Review Panel shall have the power to perform such functions as may be necessary to carry out the purposes of section 202.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Review Panel to carry out its functions under this Act such sums as are necessary, not to exceed $500,000. Any sums appropriated under this subsection shall remain available until expended.

SEC. 202. REVIEW PROCESS.

(a) PREEMPTION.—Any provision of State law that would prevent the establishment and implementation in that State of a plan for no-fault benefits in accordance with the basic standards is preempted by the provisions of this Act.

(b) CERTIFICATION BY CHIEF EXECUTIVE OFFICER.—(1) If the chief executive officer of a State determines that the State has enacted a plan for no-fault benefits for motor vehicle accident victims that is in accordance with the basic standards, the chief executive officer may, at any time following that enactment, submit to the Review Panel a certification that the State has established a plan in accordance with the basic standards, together with a certified copy of the plan and any necessary supporting materials.

(2) Such a certification, and any recertification pursuant to subsection (c), shall be in the following form: "The State of (insert name) has enacted into law a plan for no-fault benefits for motor vehicle accident victims. I hereby certify (recertify) that I have caused this plan to be examined and have determined that it is in accordance with the basic standards of the Standards for No-Fault Motor Vehicle Accident Benefits Act.".

(c) PERIODIC REPORT AND RECERTIFICATION.—(1) If an approved State plan is in effect in a State, the chief executive officer of that State shall submit a report and recertification to the Review Panel every 3 years. The report shall evaluate the performance and the effect of the plan with respect to the State, in terms of—

(A) the effectiveness of the plan in rehabilitating and compensating motor vehicle accident victims;

(B) the cost of providing compulsory coverage under the plan;

(C) the impact of the plan on different sectors of society;

(D) the effect of the plan on the caseloads of the courts;

(E) the impact of the plan on competition within the motor vehicle insurance industry, particularly with respect to the competitive position of small insurance companies; and

(F) any other factors which the Review Panel, by rule, determines are relevant to the evaluation.

(2) If a chief executive officer determines that the approved State plan in effect in that State remains in accordance with the basic standards, he shall submit a recertification of the plan pursuant to subsection (b)(2). Such a recertification shall be accompanied by a report pursuant to paragraph (1), a certified copy of the plan (and any amendments to the plan), and the guidelines established pursuant to section 108(d). The Review Panel shall prepare annually, not later than March 1, a comprehensive report summarizing and containing its conclusions and recommendations with respect to the reports and plans received by it under this subsection. The Review Panel shall submit a copy of each such annual report to the chief executive officer of each State, the President, and the Congress.

(d) REVIEW PANEL REVIEW.—(1)(A) If the chief executive officer of a State certifies, or recertifies, that the State has enacted a plan for no-fault benefits for motor vehicle accident victims that is, or remains, in accordance with the basic standards, the Review Panel shall, within 90 days after the date on which it receives that certification or recertification—

(i) review the certification or recertification and the plan for no-fault benefits covered by it; and

(ii) take one of the actions described in subparagraph (B).

The Review Panel shall treat any certification or recertification submitted to it under subsection (b) or (c) as prima facie evidence that the plan for no-fault benefits covered by it is in accordance with the basic standards.

(B) Upon review under subparagraph (A), the Review Panel may—

(i) determine that the certified or recertified State plan is or remains in accordance with the basic standards and that the State involved has an approved State plan;

(ii) take no action, in which case the certified or recertified State plan shall be considered to be in accordance with the basic standards and that State shall be considered to have an approved State plan; or

(iii) determine, on the basis of substantial evidence, that the certified or recertified State plan is not in accordance with the basic standards and that the State does not have an approved State plan.

(C) If the Review Panel determines that a certified or recertified State plan for no-fault benefits is not in accordance with the basic standards, the Review Panel shall issue a declaration that the State does not have an approved State plan. A copy of the declaration shall be transmitted to the chief executive officer of the State involved, together with a statement of the reasons for the determination and an invitation to the State to submit a plan that is in accordance with the basic standards.

(2) If the chief executive officer of a State fails to submit to the Review Panel—

(A) within 2 years after the date of the enactment of this Act, a certification, pursuant to subsection (b), that the State has enacted a plan for no-fault benefits for motor vehicle accident victims that is in accordance with the basic standards; or

(B) within 180 days after it is required by the Review Panel, a recertification, pursuant to subsection (c)(2), that the State's plan for

no-fault benefits for motor vehicle accident victims remains in accordance with the basic standards;

the Review Panel shall, within 90 days after the end of the applicable period, issue a declaration that the State does not have, or no longer has, an approved State plan.

(3)(A) If the Review Panel issues a declaration, pursuant to paragraph (1)(C), that a State does not have an approved State plan, the chief executive officer of the State may submit to the Review Panel a new certification or recertification pursuant to subsection (b) or (c) at any time thereafter. The Review Panel shall review and act upon the new certification or recertification in the same manner and time period as an initial certification or recertification. The Review Panel shall withdraw its determination that the State does not have an approved State plan upon its determination, pursuant to paragraph (1)(B)(i), that the plan covered by the new certification or recertification is in accordance with the basic standards and is an approved State plan.

(B) If the Review Panel issues a declaration, pursuant to paragraph (2), that a State does not have an approved State plan, the Review Panel shall withdraw the declaration upon receipt of the required certification or recertification (and all other required materials) and upon its determination, pursuant to paragraph (1)(B)(i), that the plan involved is or remains in accordance with the basic standards and is an approved State plan.

(C) Pursuant to section 204, if the alternative no-fault plan is in effect in a State, on the date on which the Review Panel withdraws a declaration that a State does not have an approved State plan, then the State plan which is determined as of that date to be an approved State plan shall take effect 120 days after the date of that determination.

(D) At any time before the Review Panel acts pursuant to paragraph (1) (B) on a certification or recertification, the chief executive officer of the applicable State may withdraw the document without prejudice.

(e) CRITERIA.—The Review Panel shall determine that a certified or recertified State plan for no-fault benefits is in accordance with the basic standards or shall take no action, pursuant to subsection (d), only if the plan is in compliance with all the provisions set forth in section 101(b).

(f) JUDICIAL REVIEW.—(1) A declaration by the Review Panel that a State plan for no-fault benefits is not in accordance with the basic standards shall be subject to judicial review in the United States court of appeals for the circuit in which the State is located or in the United States Court of Appeals for the District of Columbia Circuit. Any such review shall be instituted only by the State involved and shall be commenced within 60 days after the date on which the declaration was issued. The provisions of section 204(b) shall apply and shall not be stayed pending any such review.

(2) If a State plan for no-fault benefits is found to be in accordance with the basic standards, pursuant to subsection(d)(1)(B)(i) or (d)(1)(B)(ii), the action of the Review Panel shall be subject to judicial review to the extent authorized by, and in accordance with, chapter 7 of title 5, United States Code, except that—

(A) section 705 thereof is not applicable;

(B) the appropriate court shall only hold unlawful and set aside such a determination on a ground specified in subparagraph (A), (B), (C), or (D) of section 706(2) thereof; and

(C) any such review shall be instituted within 30 days from the date on which such a determination was made public.

SEC. 203. ALTERNATIVE NO-FAULT PLAN.

The alternative plan for no-fault benefits for motor vehicle accident victims shall include each of the requirements for an approved State plan specified in sections 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, and 112. The benefits required to be provided under the alternative no-fault plan pursuant to the provisions of section 102 (a), (b), (c), (d), and (f) shall be the amount set forth in those provisions as the amount at which an approved State plan may limit the particular category of benefits.

SEC. 204. APPLICATION AND IMPLEMENTATION OF ALTERNATIVE NO-FAULT PLAN.

(a) IN GENERAL.—The alternative no-fault plan shall only become applicable and take effect in a State if the Review Panel issues a declaration, pursuant to section 202(d), that the State does not have an approved State plan. The alternative no-fault plan shall—

(1) take effect in that State on the effective date established in accordance with subsection (b);

(2) cease to be in effect in that State under the circumstances described in subsection (c);

(3) be implemented and administered pursuant to subsection (d); and

(4) constitute the law of that State for purposes of any judicial determination.

(b) EFFECTIVE DATE.—The alternative no-fault plan shall take effect in an applicable State one year after the date on which the Review Panel issues a declaration, pursuant to section 202(d) (1) or (2), that the State does not have an approved State plan unless, before that date, the Review Panel withdraws the declaration pursuant to section 202(d)(3). Notwithstanding any other provision of this Act, the alternative no-fault plan shall not take effect in any State before the third anniversary of the date of the enactment of this Act.

(c) TERMINATION DATE.—The alternative no-fault plan shall cease to be in effect in a State 120 days after the Review Panel determines that the State has an approved State plan.

(d) ADMINISTRATION.—(1) Whenever the alternative no-fault plan is in effect in a State, the plan shall be implemented and administered exclusively by the Secretary, unless the chief executive officer of that State certifies to the Secretary that the State—

(A) has authority, under the laws of the State, to carry out the administrative functions required by the plan; and

(B) intends to exercise that authority and implement and administer the plan.

Upon such a certification, the State shall implement and administer the alternative no-fault plan.

(2) If a State fails to issue a certification under paragraph (1), the Secretary may promulgate any regulations that are necessary to implement and administer the alternative no-fault plan in that State. There are authorized to be appropriated to the Secretary such sums as may be necessary for those purposes.

TITLE III—DEFINITIONS AND MISCELLANEOUS PROVISIONS

SEC. 302. DEFINITIONS.

As used in this Act, unless the context otherwise requires:

(1) The term "accident" means an untoward and unforeseen occurrence—

(A) arising out of the maintenance or use of a motor vehicle; or

(B) in the case of, and limited to, a pedestrian, arising out of the maintenance or use of a motor vehicle that is treated differently or excluded under paragraph (20).

(2) The term "alternative no-fault plan" means the no-fault plan described in section 203.

(3) The term "approved no-fault plan" means an approved State plan or the alternative no-fault plan.

(4) The term "approved State plan" means any plan for no-fault benefits for motor vehicle accident victims that the Review Panel determines is in compliance with all the provisions enumerated in section 101 (b).

(5) The term "basic no-fault benefits" means benefits, as specified in section 102 (a), (b), (c), and (d), provided without regard to fault in accordance with an approved no-fault plan.

(6) The term "basic standards" means all of the provisions enumerated in section 101 (b).

(7) The term "claimant" means a victim, a survivor, or a provider who makes a claim for no-fault benefits under an approved no-fault plan.

(8) The term "commissioner" means the commissioner of insurance of a State or the head of the department, commission, board, or other agency which is charged by the law of a State with the supervision and regulation of the business of insurance in that State, except that the term means the Secretary under the alternative no-fault plan if that plan is in effect in a State and is being implemented and administered by the Secretary.

(9) The term "compulsory coverage" means the insurance which every owner of a motor vehicle is required to provide and maintain under an approved no-fault plan, pursuant to section 104(a).

(10) The term "emergency medical services" means services necessary to mitigate injury to any victim during the period immediately following an accident (including communications, transportation, and treatment by medical and paramedical personnel).

(11) The term "government" means the Federal Government, any State, any political subdivision of a State, any instrumentality of two or more States, any agency, subdivision, department, or instrumentality of any government, any corporation or other association organized by a government for the execution of a government program and subject to control by a government, or any corporation or agency established under an interstate compact or international treaty.

(12) The term "injury" means bodily harm to an individual sustained in an accident and that individual's illnesses, disease, or death resulting from that bodily harm.

(13) The term "insured" means a named insured and any other individual who—

(A) is the spouse or other relative of a named insured or who is less than 18 years old and in the custody of (i) a named insured; or (ii) a relative of a named insured;

(B) is not a named insured under any contract of insurance providing compulsory coverage; and

(C) usually makes his home within the same family unit as a named insured even if he temporarily resides elsewhere.

(14) The term "insurer" means—

(A) a person who is authorized, pursuant to applicable State law, to provide compulsory coverage in the State;

(B) the owner of a motor vehicle who is providing compulsory coverage with respect to that motor vehicle in accordance with section 104(a)(2)(B); and

(C) the program under section 104(c).

(15) The term "loss" means economic detriment incurred as a result of an accident resulting in injury, consisting of, and limited to, medical expense, work loss, replacement services loss, and loss due to death.

(16) The term "loss due to death means the economic detriment incurred by any survivors as a result of the death of a victim. The term includes and is limited to—

(A) the loss of income of the victim, to the extent that it would probably have been contributed to any survivors, if that victim had not sustained the fatal injury;

(B) expenses directly related to the funeral and to the burial, cremation, or other form

of disposition of the remains of a deceased victim; and

(C) expenses reasonably incurred by any survivor, after the victim's death, in obtaining ordinary and necessary services in lieu of those which that victim would have performed for that survivor's benefit (other than to provide income) had he not sustained the fatal injury, reduced by expenses which the survivor would probably have incurred, but did not, by reason of the victim's death.

(17) The term "maintenance or use of a motor vehicle" means any activity involving or related to transportation by a motor vehicle, including occupying, entering into, alighting from, repairing, or servicing, except that the term does not include—

(A) conduct within the course of a business of repairing, servicing, or otherwise maintaining motor vehicles unless the conduct occurs off the business premises; or

(B) conduct in the course of loading or unloading a motor vehicle.

(18) The term "medical and vocational rehabilitation services" means any devices, equipment, facilities, therapies, procedures, or services that may—

(A) reduce, or contribute to reducing, the duration or degree of a victim's disability;

(B) restore, or contribute to restoring a victim's physical, psychological, or vocational functioning to the pre-accident level, or to a reasonable equivalent of that level; and

(C) enable, or contribute to enabling, a victim to function independently and to carry out the daily activities that were usual and customary for him before the accident resulting in his injury.

The term includes transportation and other services necessary to the foregoing. The term does not include educational services that are not related to vocational objectives of a victim.

(19) The term "medical expense" means reasonable charges incurred for, or the reasonable value (when no charges are incurred) of, reasonably needed and used products, services, and accommodations for—

(A) emergency medical services;

(B) medical treatment and care; and

(C) medical and vocational rehabilitation services.

The term does not include any charge for, or the value of, a room in any facility engaged in providing any such treatment, care, or services to the extent that the charge or value is in excess of a reasonable and customary charge for semiprivate rooms, unless private rooms are medically required. Nothing in this Act shall be construed as prohibiting an insurer from providing benefits for remedial religious treatment and care as benefits for medical expense.

(20) The term "motor vehicle" means a vehicle of a kind required to be registered under the laws relating to motor vehicles of the State in which the vehicle is principally located, except that an approved State plan may treat a motor vehicle having less than four wheels differently than it treats other motor vehicles for purposes of that plan, including partially or completely excluding such a vehicle from the requirements and benefits of the plan.

(21) The term "named insured" means an individual who is identified by name as an insured in a contract of insurance providing compulsory coverage.

(22) The term "noneconomic detriment" means pain, suffering, inconvenience, physical impairment, and any other nonpecuniary damage incurred as a result of an accident resulting in injury and which are elements of damage under the applicable tort law.

(23) The term "no-fault benefits" means basic no-fault benefits, added no-fault benefits, or both.

(24) The terms "owner of a motor vehicle" and "owner" mean—

(A) an individual who, or a corporation, company, association, firm, partnership, joint stock company, foundation, institution, society, union, club, church, or any other group that—

(i) owns or has title to a motor vehicle; or

(ii) is entitled to the use and possession of a motor vehicle, subject to a security interest in any other person;

(B) the Federal Government with respect to a Federal motor vehicle;

(C) any other government, to the extent that its vehicles are included in or covered by the approved no-fault plan for the State in which the government is located, that—

(i) owns or has title to a motor vehicle; or

(ii) is entitled to the use and possession of a motor vehicle, subject to a security interest in any other person; and

(D) a lessee of a motor vehicle having the right to possession of the vehicle under a lease with the option to purchase.

The terms do not include a lienholder or a secured party having an interest in, but not possession and use of, a motor vehicle.

(25) The term "passenger motor vehicle" means a motor vehicle other than—

(A) a vehicle having less than four wheels; or

(B) a truck not designed primarily to carry its operator or passengers.

(26) The term "person" includes a government.

(27) The term "provider" means a person who furnishes any product, service, or accommodation which constitutes a medical expense.

(28) The term "replacement services loss" means expenses reasonably incurred in obtaining ordinary and necessary services in lieu of those a victim would have performed, not for income, but for the benefit of himself or him family, if he had not suffered injury.

(29) The term "Review Panel" means the Standards for No-Fault Benefits Review Panel established in section 201.

(30) The term "Secretary" means the Secretary of Transportation.

(31) The term "self-insurer" means an owner or any person providing compulsory coverage pursuant to section 104(a)(2)(B).

(32) The term "State" means a State of the United States, the District of Columbia, Guam, or the Virgin Islands.

(33) The term "survivor" means an individual identified, in the wrongful death statute of the State in which a deceased victim had his principal place of residence on the date of the accident resulting in injury, as one entitled to receive benefits by reason of the death of that victim.

(34) The terms "victim" and "motor vehicle accident victim" mean an individual who suffers injury as a result of an accident.

(35) The terms "without regard to fault" and "no-fault" mean irrespective of fault as a cause of injury or as a prerequisite to compensation for injury.

(36) The term "work loss" has the meaning set forth in section 112(f)(2).

SEC. 302. JURISDICTION OF FEDERAL COURTS.

No district court of the United States shall have jurisdiction over any civil action for the payment of no-fault benefits unless the United States (or a Federal agency which can sue or be sued in its own name) is a party to the action.

SEC. 303. TREATMENT OF FEDERAL MOTOR VEHICLES.

(a) IN GENERAL.—Notwithstanding any other provision of law, a claim against the United States (or a Federal agency) for injury arising out of the maintenance or use of a Federal motor vehicle, or out of the maintenance or use of any motor vehicle by an employee of the Federal Government during the course of official business, shall be governed by the applicable approved no-fault plan. Compulsory coverage shall be provided for any Federal motor vehicle, whenever it is located or operated in the territorial area of any State, Puero Rico, Canada, or Mexico.

(b) PROCEDURES.—The Administrator of General Services shall promulgate, and may from time to time revise, regulations with respect to insurance covering a Federal motor vehicle, and administrative procedures to be followed in all claims against the United States (and a Federal agency) for no-fault benefits.

(c) DEFINITIONS.—(1) As used in this section, the term "Federal agency" means any department, agency, corporation, independent establishment, or other entity of any branch of the Federal Government.

(2) As used in this section and in section 301(24)(B), the term "Federal motor vehicle" means a motor vehicle which is owned or leased by a Federal agency and operated with its express or implied permission.

Mr. DURKIN. Mr. President, as my colleague from Washington pointed out, the bill which we introduce today has a long history before this body, 7,703 printed pages of testimony and many days of floor debate add up to 7 years worth of legislative activity. But during those 7 years about 316,000 persons were killed and millions seriously injured in motor vehicle accidents on our highways. Fewer than half of those victims recovered any portion of their economic losses. In addition to the trauma of their injuries, they and their families had to face the uncertainty surrounding litigation, while watching their savings and other financial resources dwindle. In the past, I have characterized the tort system as the "Trial Lawyers' Economic Relief System." Not supporting this bill is tantamount to financing special interest at the cost of the American consumer.

As a former insurance commissioner for the State of New Hampshire, I am familiar with what consumers want and need from insurance, with what frustrates and angers them. I am also aware of the intricate and difficult calculations which go into the business of providing insurance. An insurance commissioner gets an earful from both the public and the insurance industry, for he is responsible to both.

A consumer pays his premiums to make sure that he will be compensated in the case of an accident. What frustrates and angers him is the situation where he has paid his premiums over the years, yet seems to have purchased nothing—no assurance that his medical expenses or wage loss will be taken care of if he is incapacitated. He feels betrayed and swindled by the company he has paid all those premiums for all those years. If he recovers at all, he must deal not only with his own insurance company's lawyers to make his case, but also with his opponent's—that is, the other driver's—company. It should come as no surprise that the relationships established in such a climate tend not to be cordial. Somebody is bound to be dissatisfied, if not disgusted.

Insurance companies, large and small, are in the business of taking risks. They spend vast resources to calculate costs to the last decimal point; however, under the tort system they have no idea for

what or whom they are at risk. Therefore, they must make decisions based on the assumption that the worst will happen, that the insured will injure—and the insurer have to support—someone at the top of his or her earning power with numerous dependents. In dollar terms, that kind of risk management means high premiums for consumers.

This bill to provide basic minimum standards for State no-fault plans serves both the consumer and the accident victim better. The consumer gets what he has paid for—the assurance that he and his family will be cared for, should the misfortune of an automobile accident occur. The insurance company can make exact calculations because no-fault is a first-party system. The insurance company insures against the known risk of the insured with resulting lower premiums.

The insurance company deals directly with the person it insures, and therefore, must respond to the needs of the insured or lose his business. The incentives flow toward offering better service, faster claims service, for example.

This bill represents an improvement for the consumer over S. 354, the bill we considered in the last Congress, in that it offers a more consolidated and tougher consumer protection section. Not only does this bill embrace the systemic improvements of the no-fault concept—that is, comprehensive benefits paid to every victim promptly and efficiently—but it also include additional benefits for consumers. It assures equitable policies for nonrenewal, cancellation, and modification, ease of access to information about the availability and comparative cost of compulsory coverage, and the accountability of medical and rehabilitation services provided. It also provides that consumers will be protected against the fraud which has riddled some insurance programs. The grand jury investigations in Dade County and cases from New York City have proven that the consumer needs protection against the costs of fraudulent practices—the overall costs to the system which are transferred to the consumer with premium increases.

Another important change is that the elderly who live on reduced incomes, students, the poor, all of those who need it most, get a break under this bill. Under the tort system, they have been subject to underwriting procedures reminiscent of the Salem Witch Trials.

The poor suffer more than any other group from the deficiencies of the present liability system. Poor victims suffer most from the delays of the liability system because of their limited economic resources. Most compensation received by victims while the insurance companies are doing battle in and out of court from collateral sources of reparations, such as health insurance, and wage continuation systems. These resources are often not available to the poor victim.

Adequate medical benefits like the ones contained in this bill are of critical importance to poor people, because they may mean the difference between full rehabilitation and permanent disability. The affluent sometimes have other resources to obtain the treatment they need; the poor must depend on their no-fault coverage. The affluent may be able to pay medical bills and await reimbursements, whereas the poor have to find doctors and other health care providers willing to treat them and wait for future payment. This bill eliminates that discrepancy of treatment.

The poor will also fare better under a basic minimum standards no-fault system which allows tort suits for nonmedical expense damages only for serious accidents, rather than basing standing on the actual expenses of the victim. The dollar amount medical expense threshold which several no-fault States have now is particularly detrimental to the poor. Such medical expense thresholds have the potential of favoring the affluent, because of medical profession standards favoring fees set according to a patient's ability to pay. So, as usual, the poor are caught between the devil and the deep blue sea. They can hardly go to a private physician, whose skyrocketing bills will wreak great havoc with their budgets over the long term. On the other hand, if they go to a clinic or to a provider who offers services on an ability to pay basis, then they reach the tort threshold later than the affluent victim who has suffered the same injury. From the standpoint of fairness, the best choice of threshold is one which uses the severity of the injury rather than any dollar figure to determine which cases remain in the tort system. This bill offers just such a threshold.

Income loss is a major item compensable under a no-fault plan. Under this bill the insured person's actual income would control the premium cost. In other words, the person with a lower income would pay a lower premium, because the insurer knows in advance what the potential is for income loss. The same would apply for students, traditionally high premium payers. Our youthful drivers would pay lower premiums under this bill, because they would have minimum income loss, if injured. While they would be judged by the actuarial facts regarding accident frequency and severity, under this no-fault bill they would not face double jeopardy.

The loss-of-income section fits together with the coordination of benefits section to improve the lot of senior citizens, another group which has suffered under the tort system. Senior citizens living on social security benefits will receive their checks regardless of whether they have been in an automobile accident. This bill permits that unaffected income to be factored into their premiums; thus this bill avoids the consumer's picking up the tab for needless duplicative benefits.

Mr. President, this is an even-handed and carefully considered bill which represents the combination of enlightened and humane social policy with good business practice.

I have been involved personally with the no-fault concept for many years. The bill which we are introducing today has been vastly improved over earlier versions. In the 93d Congress, I testified before the Commerce Committee as New Hampshire's insurance commissioner, and made some recommendations to tighten the bill with respect to medical expense, and to modify it to reflect local economists in State plans. We have an interesting situation in southern New Hampshire with the so-called "bedroom communities" whose residents—numbering in the thousands—commute daily to Boston, Mass. Their needs vary distinctly from New Hampshire consumers who inhabit more rural areas. Yet I felt then and continue to feel now that those varying needs within a State can be better served by an insurance system which the State controls, administers, and regulates.

My opposition to Federal underwriting or regulating of automobile insurance remains unalterable. I was able to support S. 354 in the 94th Congress enthusiastically because it has been modified along the lines I had recommended in the previous Congress. The bill we are introducing today leaves control, administration, and regulation of insurance intact at the State level without overbearing Federal regulation.

I am satisfied as a former insurance commissioner that this system will work, that it is fiscally sound. The insuring public has lived through too many lean years. It deserves better. It will get better with this bill.

Mr. STEVENS. Mr. President, I once again cosponsor the Standards for No-Fault Motor Vehicle Accident Benefits Act introduced by Senator MAGNUSON. The chairman and I have come together before on many occasions to urge the passage of this critical legislation.

On March 31 of last year the Senate, by a narrow margin, voted to recommit the National Standards No-Fault Motor Vehicle Insurance Act. It was the third time in three successive Congresses that we have tried to reform the archaic, inefficient, and anticonsumer automobile accident victim compensation system in the United States; it was the third time that the Committee on Commerce had passed such legislation by overwhelming votes; it was the third time in three successive Congresses that the legislation had failed of enactment.

I hope that someday the American people realize how much they owe to the tenacity and determination of the Senator from Washington. No-fault, like the 200-mile law, will just be known as one of the Commerce Committee's goals that took a little bit longer and required a little bit more of that tenacity and determination.

The bill that is introduced today and that I am cosponsoring is more than just a reintroduction of the bill that was recommitted last year. We have examined the votes of the Senate seriously. In this case, staff was directed to take the legislation apart and put it together again—better than it was before. That has been done. This bill is easier to understand and also more precise.

Most importantly for me, however, and for many of my colleagues this bill executes completely my principal objective with respect to no-fault insurance legislation. It clarifies the relationship, with respect to the compensation of highway accidents, between the States and the Federal Government. Under this bill, the Federal Government has no role whatever except for the action of the

Congress in this act in setting certain basic standards. Everything operational will be done, under this legislation, by the States. The standards are just what they are called: Basic. We have laboriously studied the experiences of States under no-fault laws. As a result of this comprehensive examination Senator MAGNUSON's bill contains the essential basic standards needed if no-fault is to work for the benefit of consumers, who must pay insurance premiums, and victims, who need prompt emergency medical services, rehabilitation, and compensation for their economic losses.

Mr. President, I hope that this legislation will be acted upon quickly by the Commerce Committee, which has already conducted thousands of pages of hearings on the subject, and reported to the full Senate so that we may discuss this and other issues in the course of debate and Senate passage.

ADDITIONAL COSPONSORS

S. 312

At the request of Mr. BELLMON, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 312, to amend the Agricultural Act of 1970.

S. 664

At the request of Mr. BROOKE, the Senator from Rhode Island (Mr. PELL) and the Senator from Oklahoma (Mr. BELLMON) were added as cosponsors of S. 664, the Young Families' Housing Act.

S. 846

At the request of Mr. DOMENICI, the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of S. 846, the Water Resources Research and Technology Development Act.

S. 1140

At the request of Mr. HART, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 1140, the Federal Aid in Nongame Fish and Wildlife Conservation Act of 1977.

S. 1167

At his own request, Mr. DOMENICI and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of S. 1167, the Native Latex Commercialization Act.

S. 1315

At the request of Mr. DECONCINI, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 1315, the Bilingual Courts Act.

AMENDMENT NO. 190

At the request of Mr. CHURCH, the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from Wisconsin (Mr. NELSON), and the Senator from Montana (Mr. METCALF) were added as cosponsors of amendment No. 190, intended to be proposed to H.R. 3477, the Tax Reduction and Simplification Act of 1977.

AMENDMENT NO. 200, AS MODIFIED

At the request of Mr. DANFORTH, the Senator from Nebraska (Mr. CURTIS), the Senator from Wyoming (Mr. HANSEN), and the Senator from Tennessee (Mr. BAKER) were added as cosponsors of amendment No. 200, as modified, proposed to the bill (H.R. 3477), the Tax Simplification and Reduction Act of 1977.

SENATE RESOLUTION 148—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL EXPENDITURES BY THE SELECT COMMITTEE ON INTELLIGENCE

(Referred to the Committee on Rules and Administration.)

Mr. INOUYE, from the Select Committee on Intelligence, reported the following original resolution, which was referred to the Committee on Rules and Administration:

S. RES. 148

Resolved, That the Select Committee on Intelligence, in carrying out the duties and functions prescribed by S. Res. 400, Ninety-fourth Congress, agreed to May 19, 1976, as amended by S. Res. 4 of the Ninety-fifth Congress, agreed to February 4, 1977, is authorized from July 1, 1977, through February 28, 1978, to make expenditures from the contingent fund of the Senate.

SEC. 2. The expenses of the committee under this resolution shall not exceed $1,210,000, of which amount not to exceed $20,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1978.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SENATE RESOLUTION 149—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL EXPENDITURES BY THE COMMITTEE ON VETERANS' AFFAIRS

(Referred to the Committee on Rules and Administration.)

Mr. CRANSTON, from the Committee on Veterans' Affairs, reported the following original resolution:

S. RES. 149

Resolved, That, in holding hearings, reporting such hearings, and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate, the Committee on Veterans' Affairs, or any subcommittee thereof, is authorized from July 1, 1977, through February 28, 1978, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $198,843, of which amount (1) not to exceed $20,000 may be expended for the procurement of the services of individual consultants or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1978.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

SENATE RESOLUTION 150—SUBMISSION OF A RESOLUTION RELATING TO A STUDY ON TAX POLICY TOWARD THE TRANSPORTATION INDUSTRY

(Referred to the Committee on Finance.)

Mr. LONG submitted the following resolution:

S. RES. 150

Whereas, major expansion, improvement, and technological advancement of the commercial transportation system of the United States is required to insure that such system fulfills its role in achieving national transportation objectives; and

Whereas, it is expected that the Federal Government will continue to assist the private sector in financing the needed expansion, improvement, and advancement of that system through tax incentives and revenue measures designed to fund other Federal aid programs which are important in achieving national transportation objectives; and

Whereas, it is essential that actions of Congress concerning such tax incentives and revenue measures be based on a comprehensive and unified review of such tax incentives and revenue measures, and the programs which they finance, and such a review is not now available to the Congress; and

Whereas, the Department of Defense, Department of Transportation Policy Study Commission, and other departments and agencies of the Federal Government are now engaged in studying, investigating, and reporting on various aspects of commercial transportation requirements, policies, and programs: Now, therefore, be it

Resolved, That the Committee on Finance shall conduct a comprehensive study and review of present tax incentives and revenue measures relating to the commercial transportation system of the United States, and the Federal programs which such incentives and measures finance, including, but not limited to a study and review of the direct and indirect benefits, and the cost and impact, of the various methods and forms of providing transportation tax incentive to and raising revenues for transportation programs for the general public and individual transportation modes, agriculture, commerce, industry, and consumers in various regions of the United States.

SEC. 2. The Committee on Finance shall, within twenty-four months after this resolution is agreed to, report to the Senate the results of its study and review under the first section of this resolution together with its recommendations with respect to the methods and forms for tax incentives and revenue measures to finance a national transportation system which achieves the transportation objectives of the United States and is most equitable to the general public.

SEC. 3. In carrying out its responsibilities under this resolution, the Committee on Finance shall consult with the committees of the Congress with an interest in the matter under review and shall consult with the departments and agencies of the Federal Government which are studying and reporting on such matters.

Mr. LONG. Mr. President, there is no industry more important to the national economy than transportation. In a fundamental and crucial way, transportation enters into the cost of almost every economic transaction. In the past few years, Congress has enacted a whole

series of tax benefits and incentives which help assure the availability and efficiency of essential public transportation services. Some Federal incentives and aids date back to the Nation's earliest years. The policies and programs involving tax benefits, incentives and, in general, the use of Federal tax revenues in various ways in the interest of better transportation now amount to a very substantial and multifaceted Federal effort which has never had a unified and comprehensive review.

There is no doubt that major enlargements and improvements of the entire national transportation system will be required in the years ahead for the maintenance of a satisfactory rate of economic growth. It is, therefore, imperative that such a review be undertaken promptly if we are to proceed in a manner consistent with the national interest in a sound, dependable, and efficient transportation system.

I have found, both in my role as chairman of the Finance Committee and as surface transportation subcommittee chairman of the Commerce, Transportation, and Science Committee, that there are numerous unanswered questions which need to be resolved if we are going to have intelligent use of tax measures and moneys in this extremely important industry. No one doubts the crucial importance of transportation to any number of priority national goals. A faltering highway, navigation, rail, pipeline, or air system can fatally undermine some of our most significant national objectives.

To ascertain information not now available to the Congress, it is my intention to order a study by the Finance Committee leading to recommendations concerning Federal tax revenues used in transportation. Such an inquiry is important, I believe, in developing future transportation financing policy.

An efficient, expanding, and improving multimodal transport system significantly helps achieve major national objectives, including those relating to national defense, security and efficient use of our energy supply, economic growth and improved productivity, expanded employment opportunities, reduced inflationary pressures, a proper balance of trade, efficient distribution of ever more urgently needed food supplies, and improved quality of life. There is hardly any aspect of national activity on which transportation does not have an important effect. It is itself one of the largest of all the Nation's industries.

The Nation relies primarily on the private sector for its commercial transport services; but as with other major industries deeply affected with the public interest, the Federal Government has in the past and will continue in the future to perform functions that the private sector cannot perform and, at the same time, stimulate needed expansion, improvement, and technological advance through various incentives, aids and facilities deemed important to the achievement of national interest objectives served by the system.

This study, therefore, will develop a comprehensive and unified review of all Government programs involving tax benefits, incentives, and the direct and indirect use of Federal funds which affect the ability of transportation to function well. The purpose will be to investigate and study relevant direct and indirect measures, programs, benefits, costs, and impacts of various methods and forms of Federal revenue financing which, of course, affect the interests of agriculture, commerce, industry and consumers in the various regions of the Nation.

The suggestion has been made that congressional actions would be much sounder if all direct and indirect Federal incentives, aids, and facilities now benefiting those who use commercial transportation services were brought together in a single transport account. This idea has considerable merit. A combined transport account could enable Congress to be informed currently as to how any particular action fits into the overall transportation picture as actions are taken. Such information is not now available.

I believe that this is a particularly good time to begin a study on this subject because the Department of Defense, the Department of Transportation, the Department of Commerce, the Department of Agriculture, the National Transportation Policy Study Commission, and other departments and agencies are engaged in making various studies, investigations, and reports on various aspects of commercial transport requirements, policies, and programs.

I am hopeful that, following this study, the Finance Committee can report to the Congress its findings and recommendations as to what methods and forms or combination of methods and forms of Federal tax revenue financing of incentives, aids and facilities for the Nation's transportation system may be most equitable to the public in the achievement of national interest objectives.

We have been hearing a great deal recently about the various tax and other incentives and aids to the railroad system. We have general programs of financing for the highway system. Similarly, we have certain programs of Federal financing of airports, airlines, and airways.

We have been urged to review the present method of financing navigation improvement. There are advocates of imposing user taxes on the Nation's harbors, inland waterways, and Great Lakes. Some would single out only the inland rivers for such a tax. It is alleged that Federal investment in navigation is inequitable to competing modes. At the same time, we know that there are very substantial Federal commitments which have benefited and will continue to benefit the railroads. In short, there is a confusion of counsels, arising mainly from a ,lack of unbiased and relevant information.

With respect to the waterway user tax controversy, I have had my staff research a series of bills incorporating various waterway impositions previously proposed, directly or indirectly, by Members of Congress, executive agencies or other governmental bodies. I do not endorse any of these approaches at this time, but I do wish to list them as a means of highlighting the complexity of this issue. I bring to the attention of my colleagues the wide variety of legislative measures which have been advocated in only one area of transportation financing—that of the water mode.

These measures, if introduced as bills would, of course, be subject to the jurisdiction of the Finance Committee. They include the following:

One. Legislation proposed by former Transportation Secretary William T. Coleman, Jr., in December 1976—circulated to the executive agencies but not submitted to the Congress—to levy a uniform fuel tax on shallow-draft, Great Lakes and deep-draft shipping starting at 6 cents per gallon on diesel fuel and $1 per barrel on residual fuel oil, with the level of taxation to double after 3 years if an impact study revealed no deleterious economic repercussions. To this proposal has been added a provision deferring its effective date until the Interstate Commerce Commission certifies that competitive rail rates reflect fully distributed costs, in line with the recommendations of several study commissions, including President Truman's Water Resources Policy Commission, 1950, and the National Water Commission, 1973.

Second. Legislation offered in the 94th Congress by former Senator James L. Buckley of New York (S. 3126) to impose a fuel tax of 4 cents per gallon on commercial operators on the inland waterways, excluding the Great Lakes. A similar provision was offered on the Senate floor as amendment No. 2090 to the Tax Reform Act of 1976.

Third. Legislation advanced by former Transportation Secretary Alan S. Boyd in 1968 to levy a tax on the shallow-draft inland waterways starting at 2 cents per gallon and escalating at 2 cents per year until a tax rate of 10 cents per gallon is reached, with the tax to cover recreational as well as commercial usage. (Gasoline used in recreational craft is already subject to federal tax at an effective rate of 2 cents per gallon but tax revenues from this source are channeled into the Land and Water Conservation Fund).

Fourth. Legislation introduced in the 94th Congress by Representative TOM HARKIN of Iowa (H.R. 15613) to impose a tax of 5 cents per gallon on the fuel used in moving commerce on the inland waterways, including the Great Lakes.

Fifth. Legislation proposed November 26, 1974, by former President Ford and introduced in the 94th Congress by Representative JOE SKUBITZ of Kansas (H.R. 8590) to require "segment tolls" on 20 specified shallow-draft waterway segments at a level sufficient to recover all operation and maintenance costs and also to establish lockage fees for recreational craft.

Sixth. Legislation based on a proposal submitted to the Congress on January 19, 1977, by former Asistant Army Secretary Victor V. Veysey to require recovery of at least 50 percent of the Federal cost of constructing, operating, maintaining, rehabilitating and administering

each waterway segment—shallow-draft, Great Lakes, and deep-draft harbors and connecting channels—through a system of user taxes to be developed by the Secretary of the Treasury. Recreational and passenger craft as well as commercial vessels would be subject to user taxes. In addition, the legislation contains the stipulation that the act will not become effective until the Interstate Commerce Commission acts to regulate railroad rates "in such a way as to encourage the use of the waterways for any traffic that could move by that mode at the least economic cost to the Nation," as so recommended by the National Water Commission—1973—and other study groups.

Seventh. Legislation offered by Congressman FRED B. ROONEY of Pennsylvania, chairman of the Transportation and Commerce Subcommittee of the House Committee on Interstate and Foreign Commerce, in the 94th Congress (Title XI, H.R. 9802) which, as part of a plan to establish a multimodal transportation fund, would impose a tax upon the amount paid for transportation of property by rail, motor vehicle, or water in an amount equal to 5 percent of such amount.

Eighth. Legislation levying a railroad and marine diesel fuel tax as stipulated in the proposed Surface Transportation Development Act of 1975 advocated by the Illinois Department of Transportation which would impose a tax of 4 cents per gallon on diesel fuel used in rail and water transportation—the same rate as existing taxation of highway-related diesel fuel consumption. (In 1975 hearings on railroad revitalization, Congressman BROCK ADAMS of Washington, now Secretary of Transportation, indicated support for "all transportation units paying a similar type diesel tax * * *." In 1976, a special task force on transportation funding of the American Association of State Highway and Transportation Officials considered a uniform 4-cent-per-gallon tax on railroads and waterways, in addition to the present tax on motor vehicles, as one of two alternative proposals to finance the Federal share of an enlarged transportation program.)

Ninth. Legislation based on a transportation financing concept advanced during the 1975 hearings on railroad revitalization which would impose a ton-mile tax of one-half mill per ton-mile on railroad, highway, and waterway commerce.

Mr. President, there is, in addition, at least one other approach which would require all water resource program functions—reclamation and irrigation, water supply, flood control, navigation, et cetera—to operate on a full cost-recovery basis, in line with the specific recommendation of the National Water Commission—1973—the "identifiable users of project services insofar as is practicable and administratively feasible to bear their proportional share of development and operating costs of projects through systems of pricing or beneficiary charges such as special assessments, taxes, and fees."

The above nine bills are representative of the various proposals which have previously been put forward for imposition of certain taxes on waterways and other forms of transportation. In describing these measures, Mr. President, I wish to emphasize the wide range of alternative financing mechanisms which have been discussed in the past. It would be a serious mistake, I believe, to focus on any particular legislative proposals until after we have had an opportunity to examine the fundamental issues involved. The primary question to be resolved is this: What is the proper Federal role in providing transportation assistance in a manner which is equitable, fair and even-handed?

We cannot, of course, develop sensible tax and revenue financing policies which bear on this question until we have a comprehensive review of all direct and indirect incentives, aids, and facilities available to all modes. Ascertaining this information will be one of the objectives of this study.

It is my intention, Mr. President, that the information resulting from the study we expect to develop will lead to specific recommendations. We may find we want to continue and expand what we have done in the past; we may want to change certain of our present policies; we may want to develop new approaches.

In the course of this study, we will be seeking the views of the various Federal departments and agencies, the affected modes of transportation, shippers, and the wide variety of interests involved in providing and operating transport facilities, together with the views of State and local interests, including governmental entities and advisory groups that may be in a position to determine the practical impact and the value of public incentives and aids and the impact of tax and revenue financing methods in transportation.

Finally, Mr. President, I ask unanimous consent that a letter of December 13, 1976, which I addressed to then Secretary Coleman of the Department of Transportation, be placed in the RECORD. This letter was a request that the DOT study, under section 902 of Public Law 94–210, answer a number of specific questions relating to uses of Federal tax revenues in various programs to assist the several modes of domestic transport.

Unfortunately, the inquiry reached Secretary Coleman too late in the previous administration and too near the conclusion of the section 902 study for these specific items to be answered.

I ask unanimous consent that the letter be printed as part of my remarks in order to indicate some of the specific sorts of questions which the Finance Committee study will be designed to answer.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., December 13, 1976.

Hon. WILLIAM T. COLEMAN,
Secretary, Department of Transportation, NASSIF Building, Washington, D.C.

DEAR MR. SECRETARY: In the Rail Revitalization and Regulatory Reform Act of 1976 (Public Law 94–210), the Department of Transportation is charged in Section 902 with making a comprehensive study of the uses of federal tax revenues in various programs to assist the several modes of domestic transport.

As part of its continuing review of our tax laws, the Committee on Finance next session may be examining ways in which the various transportation modes benefit from aids, incentives and facilities which are financed out of federal tax revenues. In order to provide guidance to the Committee and to the Congress as a whole in analyzing relative benefits and advantages enjoyed by the waterway and rail transportation industries, your study should include the following information:

I. *Tax Expenditures:*

A. A compilation and analysis of the dollar amount of federal income tax incentives and concessions of individual railroads and the rail industry as a whole over the past five years, and how these benefits have been translated into low effective tax rates.

This will include types of tax concession, such as rapid amortization and accelerated depreciation and the investment tax credit, which are available to other forms of transportation and to other industries as well as to railroads, but which benefit the railroads and other capital intensive industries disproportionately. Such compilation and analysis should specifically include an accounting of railroad-generated tax savings which are allocated to or taken advantage of by parent or subsidiary companies.

B. An evaluation and projection of the tax savings which are expected to accrue to railroads each year for the next five years under the provisions of recently enacted tax reform legislation.

C. A similar compilation and analysis of tax incentives and concessions used by domestic water carriers.

II. *Government loans, guarantees, grants:*

A. A review of the experience under all government programs for loans, guarantees, and grants to railroads prior to the flow of government funds to faltering Northeast and Midwest roads in the 1970's. This would include rehabilitation loans after World War I, RFC financing, and government guarantees under the Transportation Act of 1958.

B. A comprehensive analysis of all government financial assistance programs for railroads since 1970. This would include the successive sums provided for the Eastern and Midwestern railroads prior to the 1976 Railroad Revitalization Act, as well as the various types and amounts of "railroad rehabilitation and improvement" financing provisions of that Act and the entire structure of financing provided in implementation of the Final System Plan, including later supplemental legislation.

C. As an adjunct to (B) above, an analysis of the capital structure and projected flow of funds and capital requirements of Conrail, to include a projection of the types of government capital which will be required under various assumptions over the next ten years.

D. A compilation and analysis of domestic navigation investment since 1824 and of the use made by domestic water carriers of Title XI construction loan guarantees for equipment financing and such other aids to water transport as are relevant to the domestic segment.

A compilation and analysis of the current value of the government land grants now held by railroads or their affiliates. This would include establishing the flow of income, present and projected, derived by railroads or their affiliates from non-transportation use of those lands, including oil and gas, coal, and other operations.

IV. *Railroad Retirement:*

An analysis of the Federal Government's contribution (directly and through tax benefits) to retirement, survivor, and disability

benefits for railroad employees, as compared to similar benefits for waterway employees.

V. *Passenger Operations:*

A. An analysis of the financial terms under which passenger operations were transferred from the railroads to AMTRAK, and other sources of support and the compensation paid by AMTRAK over the past five years and projected for the next ten years under appropriate assumptions for use of the railroads' right of way, including the financing of maintenance.

B. An analysis of the provisions of the Railroad Revitalization Act affecting passenger operations, including any arrangements for the share of joint freight-passenger costs in the Northeast Corridor to be borne by AMTRAK.

It may be that much or all of this data is already included in your study. If not, however, this information is vital to any fair comparative analysis of the various benefits received by waterway and rail transportation industries, and I trust you will be able to include it in your study before it is transmitted to Congress next year.

I would appreciate your advising me at your earliest convenience whether this will be possible.

Thanking you in advance, I remain

Sincerely yours,

RUSSELL LONG, *Chairman.*

AMENDMENTS SUBMITTED FOR PRINTING

PUBLIC OFFICIAL INTEGRITY ACT OF 1977—S. 555

AMENDMENT NO. 218

(Ordered to be printed and referred to the Committee on Government Operations.)

Mr. RIBICOFF (for himself and Mr. PERCY) submitted an amendment intended to be proposed by them jointly to S. 555, the Public Official Integrity Act of 1977.

FINANCIAL DISCLOSURE AMENDMENT

Mr. RIBICOFF. Mr. President, the distinguished Senator from Illinois (Senator PERCY) and I have joined today in the introduction of an amendment to S. 555. The Public Official Integrity Act of 1977.

This amendment would establish a financial disclosure requirement for all high level Federal officials similar to that which was adopted for Senators and Senate staff. In addition, the amendment prescribes procedures for review of these disclosure statements by each agency to determine the existence of actual or potential conflicts of interest, provides audit procedures and strict enforcement standards.

It is the intention of the Committee on Governmental Affairs to hold hearings May 3, 4, and 5, 1977, on S. 555 and related legislation. The Senator from Illinois and I anticipate that the amendment which we offer today will be used by the committee as a working draft in order to generate comment and discussion regarding the applicability of a financial disclosure requirement to all three branches of the Federal Government.

I ask unanimous consent that a summary of the provisions of the amendment be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF PRINTED AMENDMENT TO S. 555 ON FINANCIAL DISCLOSURE

(1) Public financial disclosure statements must be filed by:

(a) the President and Vice President;

(b) each Member of Congress;

(c) each justice or judge of the United States;

(d) each Presidential nominee;

(e) each candidate for federal office;

(f) each officer or employee paid at the rate of GS–16 or above; and

(g) each member of a uniformed service paid at grade 0–7 or above.

(2) The contents of the financial disclosure statement are identical to the contents of the financial disclosure statement required to be filed by Rule XLII of the new Senate Code of Official Conduct. Therefore, assets, liabilities and unearned income will be listed according to categories of value. There are no requirements for a code of conduct.

(3) The statements will be filed as follows:

(a) Members, officers and employees of the Senate with the Secretary of the Senate;

(b) Members, officers and employees of the House, with the Clerk of the House;

(c) Judges, and justices and all other members of the judicial branch with the Judicial Conference of the United States;

(d) Civil Service and Ethics Commissioners with the Comptroller General and;

(e) All other individuals with the Civil Service and Ethics Commission.

(4) The statements will be subject to random audit as follows:

(a) Members, officers and employees of the Senate and House of Representatives, justices and judges, the President, Vice President and the Civil Service and Ethics Commissioners by the Comptroller General;

(b) All other members of the judicial branch by the Judicial Conference of the United States; and

(c) All other individuals by the Civil Service and Ethics Commission.

(5) General enforcement and review responsibilities with respect to financial disclosure, codes of ethical conduct and other programs for the avoidance of conflict of interest shall be placed as follows:

(a) For Members, officers and employees of the Senate with a committee designated by the Senate;

(b) For Members, officers and employees of the House with a committee designated by the House;

(c) For judges, justices and all other members of the judicial branch with a committee designated by the Judicial Conference of the United States;

(d) For the Civil Service and Ethics Commissioner, the General Accounting Office; and

(e) For all other individuals, the Civil Service and Ethics Commission.

(6) Criminal penalties, not to exceed $10,000, or one year imprisonment, or both are established for willful failure to file or falsify financial disclosure reports. A civil penalty not to exceed $5,000 may be assessed against an individual for failure to file a financial disclosure statement.

(7) Employees at levels above GS–13 but below GS–16 (and certain other employees in responsible positions below GS–13) have to file the same financial disclosure statements as high level officials but the statement is only filed with their agency head and is kept confidential.

(8) The President is directed to designate an official in the Executive Office of the President to provide reports and information to the President concerning the administration of this Act and conflict of interest matters generally, and to review the financial disclosure statements of Presidential nominees.

(9) The Civil Service Commission is renamed the Civil Service and Ethics Commission and an Ethics Division within the Commission is created which is headed by a Director appointed by the President with the advice and consent of the Senate. The Ethics Division is responsible for administering, interpreting and enforcing laws, executive orders and regulations concerning financial disclosure, codes of ethical conduct and other programs for the avoidance of conflicts of interest (except with respect to the legislative and judicial branches of the government).

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977—H.R. 3477

AMENDMENT NO. 219

(Ordered to be printed and to lie on the table.)

Mr. MCCLELLAN (for himself, Mr. BUMPERS, Mr. MUSKIE, Mr. SPARKMAN, and Mr. ALLEN) submitted an amendment intended to be proposed by them to H.R. 3477, a bill to provide for a refund of 1976 individual income taxes and other payments, and to provide tax simplification and reform.

NOTICES OF HEARINGS

PUBLIC OFFICIAL INTEGRITY ACT OF 1977

Mr. RIBICOFF. Mr. President, I wish to announce that on May 3, 4 and 5, 1977, the Committee on Governmental Affairs will hold hearings on S. 555, "The Public Official Integrity Act of 1977," amendments thereto and related legislation, S. 113, S. 290, S. 383, and S. 673.

The hearings will be held in room 3302 of the Dirksen Senate Office Building and will begin each day at 10 a.m.

ETHICS COMMITTEE NOTICE: PROHIBITION OF STAFF POLITICAL FUND ACTIVITY UNDER RULE 49, EFFECTIVE MAY 1, 1977, AND REPORTS DUE THEREON

Mr. STEVENSON. Mr. President, I and Senator SCHMITT, for the Select Committee on Ethics, have notified each Senator of the provisions of rule 49, enclosing copies of necessary report forms. Rule 49 prohibits and controls political fund activity by Senate staff and takes effect May 1, 1977.

I ask unanimous consent that the text of our notification be printed in the RECORD.

There being no objection, the material was ordered to be printed in the Record, as follows:

U.S. SENATE,
SELECT COMMITTEE ON ETHICS,
Washington, D.C., April 22, 1977.

Re notification under rule 49 to designate staff for political fund activity before May 1, 1977.

U.S. Senate
Washington, D.C.

DEAR SENATOR: Senate Rule 49, paragraph 1, agreed to in S. Res. 110 as part of the Code of Official Conduct, takes effect May 1, 1977. It provides "no officer or employee of the Senate [including staff not paid by the Senate] may receive, solicit, be the custodian of, or distribute any funds in connection with any campaign for the nomination for election, or the election, of any individual to be a Member of the Senate or to any other Federal office."

Nevertheless, the new Rule permits a Senator to designate one or two, but no more, assistants to "receive, be the custodian of, or distribute" such funds, but *not* to "solicit" them, if these tests are met:

1. The designated employee must be on the personal staff and paid from "administrative and clerical assistants to Senators" funds (and therefore may not be a committee "S. Res. 60," Sergeant at Arms or Secretary of the Senate employee, for example).

2. One of the two designated employees—or the single employee if only one is named—must be in Washington, D.C.

3. The employee must be paid at an annual rate in excess of $10,000.

4. The employee must file "a financial statement in the form provided under Rule 42 for each year during which he is designated." This means the designated employee must: (a) file under new Rule 42 a public disclosure of the financial interests of himself, his spouse, dependents and other relatives, on any day his Senate employment ceases after October 1, 1977, and before May 15, 1978, or by May 15, 1978, if still employed, for the period October 1, 1977, until December 31, 1977, or the date of his departure; and (b) file a public statement of contributions and honorariums under old Rule 42 and 44 and a sealed statement of financial interests under old Rule 44, for the entire year 1977 on any day his Senate employment ceases after acecpting this designation or by May 15, 1978.

Rule 49 and its history emphasize that a designated employee may not solicit funds at all, nor spend much time on the political fund activity assignment. Senate Report 95-49 states: "The basic intent of the rule is to prohibit Senate employees from getting involved in the process of raising funds for a political campaign." It further states one reason for the exception for designated staff is that political funds "will often come to the Senator's office mistakenly," and that another reason is the allowed use under Rule 46 of political funds to pay necessary expenses requires a custodian or distributor of such funds on the Senator's staff. The report further states that designated staff "may only hold or accept contributions or deposit them with the appropriate campaign organization;" that the designated individuals "should not be spending much of their time in connection with receiving or handling political funds;" and that if work "engages a substantial portion of the individual's time, that person should go off the Senate payroll and go on the payroll of the campaign committee." In other words, designated staff may not solicit (even to the extent of inviting friends of a Senator to assist in buying his table at a national political dinner) or spend much time handling funds. We add the warning, as well, that, this Rule notwithstanding, it is unlawful to accept any contribution in a federal building.

The Rule 49 prohibitions do not apply to an office employee's performance of such routine clerical tasks as opening a letter which contains a contribution, distributing such mail to the designated employee of the Senator, or mailing the contribution from the Senator's State office to his Washington, D.C. Senate office.

We advise that compliance with Rule 49 requires the following action on your part:

1. Prior to May 1, 1977, and as new staff are hired: advise all staff subject to your supervision of the prohibitions in Rule 49, paragraph 1 (repeated in the enclosed form).

2. Prior to May 1, 1977: file the enclosed form, properly completed, with the Secretary of the Senate (attention: Office of Public Records, Room A-623, Immigration Building). Please note that staff previously designated for political fund activity under old Rule 43 will no longer qualify after April 30 unless redesignated on the enclosed form pursuant to this notice.

3. At any time you designate new staff to perform this activity, amend your designation on file with the Secretary of the Senate by completing and filing a new form with the Secretary.

Thank you for your assistance. If you have additional questions, please call the committee staff (4-2674).

Sincerely,

ADLAI E. STEVENSON,
Chairman.
HARRISON H. SCHMITT,
Vice Chairman.

ADDITIONAL STATEMENTS

INDIA'S CHOICE OF DEMOCRACY

Mr. SASSER. Mr. President, I ask unanimous consent to have printed in the RECORD the following remarks of a constitutent, Mr. M. S. Kanthi. I feel that his comments on the recent elections in India are informative and worthy of consideration.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

INDIA'S CHOICE OF DEMOCRACY

The recent elections to the sixth Parliament of India have indeed sprung many surprises, the most unexpected being the defeat of the Congress Party which ruled this country for thirty years. It is now clear that India is advancing toward a virtually two party system just as in the case of United States or Britain. If this trend is consolidated, it is indeed a most desirable thing in the evolution of this young and the largest democracy. The intense participation of the bulk of the entire nation in the elections, that such unprecedently heavy polling shows, is also a welcome indication of the awareness and alertness of the Indian electorate. For it does serve as a warning to its neighbors that no national government can take the people for granted and that even good intentions cannot make up for bad implementation. The illiterate people of India have unmistakably shown that the basic purpose of using their vote is to preserve human rights and guard civil liberties—both of which are sacred to their land. Indians have shown themselves to be clearly against Marxism and the repressionism of any form. All of these developments infuse a heartening confidence for the entire free world in that—impoverished and ordinary peoples of the developing world know how to apply their political prerogatives.

POSSIBLE AVENUES FOR CLOSER TIES BETWEEN THE UNITED STATES AND INDIA

United States and the peoples of the free world at large should rejoice and be inspired when the poor in India have reaffirmed their faith in the democratic ideals. India is a key country in Asia and its adherence to the basic principles of democratic ideals is a matter of great significance to the U.S. The areas of commonness that could be explored and initiated between these two democratic nations are as below:

(1) The new Prime Minister of India Mr. Morarji Desai has shown clear indications of cooling trend toward the Soviet Union and at the same time he has expressed hopes for strengthening relations with the West and the U.S. in particular. It is now left to the U.S. Presidency to take initiatives both economic and political to start a new era of friendship based on basic principle of freedom—which is the foundation of both these nations.

(2) More U.S. Senators could start making open pronouncements of appreciation and admiration of India's peaceful reaffirmation in democratic ideals.

(3) Few prominent Senators (who are active in South Asian relations) could visit India and assess its needs and aspirations for a better economic life.

(4) New joint ventures between the U.S. and India could be negotiated covering vast areas of industry, education and culture.

(5) U.S. can take initiative in assisting India to check its fast growing population.

(6) Amongst the industrialized nations of the 'Third World' India ranks the top most in its capacity to produce most of the modern machinery—being so U.S. could use this as a base to preserve freedom in other Asiatic nations.

(7) U.S. could use India's leadership as a mediator to solve unsettled problems like the Cyprus and the North South Dialogue being held at Geneva at regular intervals.

(8) It is more meaningful for the U.S. to adopt a policy of friendship and strong alliance toward India. It is only through such closer ties with other democratic nations that the moral of the U.S. foreign policy could be enhanced.

(9) The new Prime Minister of India has indicated that he intends to check the proliferation of nuclear weapons. To this end President Carter should feel more delighted to see that the sixth nuclear power like India is in line with his thinking.

Preserving freedom and by making India a viable country—U.S. would have enhanced the cause of freedom around the world. Other nations of the 'Third World' would no doubt carefully watch the success/failure story of India and the role U.S. plays. All who love freedom are safer today than before the Indian elections. The U.S. Congress, the Senate and President Carter can take pride that —India's new government brings to this ancient land the claim of democracy is valid once again, and the proof was in nearly 200 million secret ballots.

TWENTIETH ANNIVERSARY OF THE METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS

Mr. MATHIAS. Mr. President, 20 years ago, when President Eisenhower was just starting his second term and the space age had not begun, the Metropolitan Washington Council of Governments was established.

COG was formed on April 11 of that year, and I am proud to call its anniversary this month to the attention of our distinguished colleagues. I have been privileged to serve as a member of COG since my early years in Congress.

This organization was founded not under Government orders, not because of the lure of Federal dollars, but because of the vision and awareness—and the initiative—of the local officials of Metropolitan Washington.

It is a source of pride to me that one of my colleagues in the Maryland General Assembly, former State Senator Edward S. Northrop, of Montgomery County, presently chief judge of the U.S. district court, was one of three elected officials who led the effort to form a regional organization of local elected officials.

COG is the areawide association of the Washington region's 16 major local governments. Its members are those officials who compose the governing bodies of these cities and counties, the elected

chief executives, and the area members of the Maryland and Virginia Legislatures and of the U.S. Senate and House of Representatives.

Through their COG, these officials have worked together over the past 20 years toward solutions to such regional problems as growth, transportation, paying for Metro, inadequate housing, water supply, air and water pollution, and crime.

Members of COG have not solved all of the region's problems over these 20 years, but we have helped to make life better. We have pioneered the efforts to provide more and better housing at a cost which our police officers, school teachers, and Government workers can afford. For this, our cities and counties have received additional millions of dollars in Federal bonuses.

COG showed the way to coordinated air pollution ordinances which are beginning to reduce some of our pollutants, and it is COG which declares air pollution alerts to notify our citizens when the air is becoming unhealthy for some people.

COG is bringing new effectiveness to the regional program to establish the area's first coordinated emergency medical services system, just as it successfully developed agreements enabling police and fire departments to aid each other in emergencies.

Our own Council of Governments is one of several hundred in the Nation. I was privileged to address the annual conference of their organization, the National Association of Regional Councils, last year. I am pleased to be able to say that the Washington COG is clearly one of the Nation's most advanced, most effective regional councils.

I am also proud, Mr. President, that COG, established with the leadership of one Maryland citizen, Chief Judge Northrop, is observing this anniversary year with another distinguished Marylander, Neal Potter of the Montgomery County Council, as its president.

Mr. President, I know colleagues in this body are happy to join me in this salute to the Metropolitan Washington Council of Governments on its 20 years of valuable and productive service to the government of the Washington area and all their citizens.

CALIFORNIA'S FORGOTTEN VICTIMS WEEK

Mr. CRANSTON. Mr. President, this week California, under the leadership of the California District Attorneys Association, will give special attention to the victims of violent crime—our "forgotten victims."

"California's Forgotten Victims Week" April 25–29, has been proclaimed by Gov. Jerry Brown pursuant to a joint resolution of the State legislature. The purpose is to educate and motivate the public and the government to respond to the plight of the victims and witnesses of crimes, and to seek improvement in the criminal justice system.

I applaud this effort and commend Assemblyman Alister McAlister who took the lead in introducing the resolution in the assembly. The resolution was cosponsored by 96 legislators and had the support of many State officials and agencies.

The victims of crime are society's forgotten victims. We daily deplore crime, yet for unfathomable reasons society turns its back on the innocent victims. The treatment of victims of crime is a national shame.

Some in society go so far as to intimate that the victim may have been at fault for the crime, not the assailant. Rape is a worst form of assault. Yet, many victims of rape have testified that although the trauma of rape was awful, it was exceeded by humiliation and neglect showered upon the victim by law enforcement officers, hospitals, the courts, and the public.

The elderly are particularly vulnerable victims of violent assault. Yet the aged victim is often ignored, blamed for walking alone on a public street, and left to public welfare agencies for assistance.

If the victim of a crime hopes to find satisfaction in the courts, he or she is normally doomed to disappointment. At some point in the process the victim usually concludes that society is not at all concerned with his welfare.

Mr. President, a new balance must be struck in favor of the rights of the victims of a crime, and of those witnesses and individuals who aid victims of crime.

We are neglecting one of the fundamental aspects of the administration of criminal justice: We are failing to meet the needs of the victim for compassion, compensation, and restoration of the personal dignity which were torn away by the act of criminal assault.

The arrest, conviction, and punishment of the criminal is only part of the process of dealing with crime. From the victim's point of view it may not be the most important part.

Our police, prosecutors, court officials, and emergency medical personnel should be encouraged to take the time and effort to show the victim of a violent crime the compassion that all of us feel. This may call for an increase in human and financial resources. There should be a nationwide system of compensating the victims of crime similar to California's successful program.

Finally, we should aid the victim of violent crime in regaining his health, and the sense of personal dignity and well-being which often are destroyed by criminal attacks.

I am very encouraged, Mr. President, that California's Forgotten Victims Week will be a week of action, not mere formal observance.

During this week law officials will meet with the public and with other criminal justice agencies to discuss means of easing victim stress and reducing the inconveniencing of witnesses in court. Special attention will be given to the problems of crimes against the elderly. Efforts will be made to establish better coordination among the many separate local programs which attempt in one way or the other to improve court conditions for witnesses and victims of crime.

California's own program of financial assistance to victims of crime will be stressed.

Mr. President, these are worthy activities and I wish the supporters of Forgotten Victims Week much success. I ask unanimous consent that the text of the California Legislature's joint resolution declaring California's Forgotten Victims Week be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. HAYAKAWA. Mr. President, today marks the beginning of a week Californians have devoted to recognizing the plight of victims of violent crimes and to urging citizens everywhere to recognize their responsibilities in restoring effectiveness to the administration of justice. April 25 through 29, California's Forgotten Victims Week, has been officially proclaimed by the California State Legislature and duly endorsed by Governor Brown. Many other public officials, including delegation members, district attorneys, State officials, and mayors, have given their support in similar proclamations and endorsements.

In bringing this week to the attention of our fellow colleagues, I, too, wish to endorse the principles and ideals of California's Forgotten Victims Week. The people of my State do well to remind us that a victim's plight is all too often overlooked and forgotten in the administration of justice. Much has been said in these Chambers about the rights of criminals to a fair trial. How often do we hear about the rights of their victims? We must remember the innocent victims and their families who suffer in silence through long and demanding court proceedings knowing, in most cases, their lives will never be the same.

I applaud the efforts of my constituents to devote their time and attention this week to forgotten victims.

I ask unanimous consent that the text of the State legislature resolution proclaiming this special week be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it so ordered.

(See exhibit 1.)

EXHIBIT 1

RELATIVE TO "CALIFORNIA'S FORGOTTEN VICTIMS WEEK"

Whereas, It is the duty of all citizens and institutions to play positive roles in improving the plight of victims of violent crime and their survivors and to restore effectiveness in the administration of justice; and

Whereas, According to the National Institute of Law Enforcement and Criminal Justice in Washington, D.C., older citizens in this country suffer more crime than almost any other group and seldom fully recover, financially, physically, or psychologically; and

Whereas, The criminal epidemic has been projected as likely to affect, directly or indirectly, one of every three Californians in 1977, with the poor and minority citizens more likely to be victims than most other groups; and

Whereas, "California's Forgotten Victims Week" is being observed to provide a framework for two broadly based educational programs to be simultaneously conducted in Sacramento and Los Angeles during the week of April 25 through April 29, 1977; and

Whereas, Assistance has been solicited and is expected from the Law Enforcement Assistance Administration, the Los Angeles Witness Project, the Office of Criminal Justice Planning, the National District Attorneys As-

sociation, the California District Attorneys Association, the California Peace Officers Association, the California Sheriffs Association, the California Police Chiefs Association, the Sacramento County District Attorney's Office, the Los Angeles County District Attorney's Office, the California Commission on the Status of Women, the California Chamber of Commerce, the California Labor Federation, the California Office of Aging, and the League of California Cities, with business, labor, and professional associations expected to assist; and

Whereas, The Members desire to take this opportunity to encourage the Honorable Edmund G. Brown Jr., Governor of the State of California, to officially proclaim April 25–29, 1977, as "California's Forgotten Victims Week"; now, therefore, be it

Resolved by the Joint Rules Committee of the Senate and the Assembly, That the Members extend public recognition to the observance of "California's Forgotten Victims Week," April 25 through April 29, 1977, and urge the citizens of the state to become aware of their responsibilities to restore effectiveness of the administration of justice and the need to improve the plight of victims of violent crime and their survivors; and be it further

Resolved, That a copy of this resolution be transmitted to Governor Edmund G. Brown Jr., and that suitably prepared copies be transmitted to the Law Enforcement Assistance Administration, the Los Angeles Witness Project, the Office of Criminal Justice Planning, the National District Attorneys Association, the California District Attorneys Association, the California Peace Officers Association, the California Sheriffs Association, the California Police Chiefs Association, the Sacramento County District Attorney's Office, the Los Angeles County District Attorney's Office, the California Commission on the Status of Women, the California Chamber of Commerce, the California Labor Federation, the California Office of Aging, and the League of California Cities.

LASTING PEACE IN THE MIDDLE EAST

Mr. PACKWOOD. Mr. President, I know many of our colleagues share my belief that one of the most critical objectives of U.S. foreign policy should be the establishment of a lasting peace in the Middle East—a peace which guarantees the sovereignty, territorial integrity, and political independence of Israel and all other States in this troubled area.

The question, of course, is how can this goal most readily be achieved. Prof. Hans Morgenthau, long one of America's most distinguished political scientists and theorists, has written an extremely illuminating examination of the various military, political, and philosophical beliefs that influence the delicate balance in the Middle East. In his analysis, he recommends strongly that current U.S. policy should be directed toward guaranteeing Israel the defensible, recognized borders that are so necessary to Israel's survival.

Because many Senators may not have had an opportunity to read Professor Morgenthau's article, Mr. President, I ask unanimous consent that it be printed in the RECORD for their review.

I also ask unanimous consent that a memorandum from the American Israel Public Affairs Committee be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INDEFENSIBLE BORDERS—THE THREAT TO ISRAEL'S SECURITY

(By Hans J. Morgenthau)

Israel lives because it has been able to maintain itself against those who have tried to destroy it. It owes something to aid received from the United States and to support from Jews throughout the world. It owes nothing to United Nations resolutions or the preferences of the great powers. Had either prevailed, Israel would no longer be around. It has survived because it demonstrated that it could not be destroyed.

This stark and simple reality not only explains the history of the State of Israel but also foreshadows its future. More particularly, it is responsible for the change in Arab strategy that, at least for the time being, has moved the focus of the Middle Eastern conflict from the battlefield toward the conference table. The shift is due to the experience of four defeats in war suffered by the frontline Arab states. The government of Egypt, certainly, cannot be insensitive to the likelihood that a fifth such attempt at the elimination of Israel will end in still another failure.

Consequently, the Arab states have chosen diplomacy as the continuation of warfare by other means in order to achieve their ultimate goal: the destruction of the state of Israel. Since Israel cannot be forced militarily to retreat from defensible frontiers, it must be induced to do so by diplomatic pressure—backed by world public opinion so-called, especially as manifested in the United Nations. After this is accomplished, the next step is a matter of logical necessity. For when Israel is no longer able to defend itself, it will be at the mercy of its Arab neighbors.

If this analysis is correct, then the much-discussed present and future intentions of those neighbors are irrelevant. True, unlike fanatics and lunatics, nations do not allow goals incapable of attainment to misdirect their foreign policies for any length of time. But when what appeared to be unattainable yesterday becomes attainable today, intention will follow opportunity. The Arabs have abandoned their objective of driving the Israelis into the sea because it has proved to be beyond their capability. Once Israel is reduced to an indefensible blot on the map, however, the temptation to administer the *coup de grâce* will be irresistible. That is clear from the deeply ingrained and frequently murderous hatred which traditionally marked Arab treatment of the Jewish population of Palestine, long before the establishment of the State of Israel in 1948.

(It should be noted in passing that current speculations about Russian intentions similarly miss the point. Are the Russians satisfied with nuclear equality, or do they aim at superiority? Their position in this respect is very much like ours. Both of us are at present satisfied with equality, for that is the best both of us can get. But this does not preclude either of us from welcoming superiority if there were a way to achieve it.)

It is therefore both futile and misleading to listen anxiously for voices of "moderation" from Arab heads of state, let alone the Palestine Liberation Organization (PLO). These voices have been, as it were, very moderate in their moderation, and they have fallen far short of accepting Israel as a legitimate member of the community of nations. Moreover, the rhetoric address to the Western world differs significantly, in tone as well as substance, from what the Arab leaders are telling their own peoples. At home, unyielding animosity is the order of the day. How thin the veneer of Arab moderation actually is can be measured, too, by the ceaseless anti-Israel propaganda the Arab states indulge in within and outside the United Nations.

Take, as one example among many, the operations and report of the United Nations Committee on the Exercise of the Inalienable Rights of the Palestine People, established by the 1976 General Assembly at the instigation of the PLO. The report questioned retroactively the legality of the 1947 partition that officially created Israel, and hence the Jewish State's right to exist. Nevertheless, Arab speakers praised its mildness and even "magnanimity,' dismissing its call for the dismemberment of Israel as a "linguistic nuance." The then United States Ambassador, William Scranton, declared the report "unfair," "senseless" and "totally devoid of balance, with conclusions that are unworkable and recommendations which prejudge the outcome of negotiations."

The bifurcation of Arab propaganda would make it extremely difficult for the Arab governments to embark upon a policy of conciliation and compromise vis a vis Israel. If they were to move toward recognition of Israel's legitimacy as a sovereign nation, they would be condemned out of their own mouths as traitors to the Arab cause.

The likelihood of such a development, though, is remote. The Arab leaders have been emphatic in denying the possibility of peace with Israel in this generation, regardless of the concessions Israel might offer. The best that can be expected is a cessation of the state of war—that is, an ill-defined, precarious, intermediate stage between peace and war. The scales might indeed tilt toward peace, the peace of the cemetery, if Israel were weakened to the extent that it was unable to defend itself.

That is the crucial issue of the pre-conference negotiations: How much can Israel afford to concede to the Arabs without jeopardizing its very survival? There is only one standard by which this question can be answered: the preservation of adequate military power. For just as the Arabs have chosen for the time being to pursue their ends through diplomacy because they have found it too risky to challenge Israel militarily again, so they will choose peaceful coexistence with Israel if they find this to be their only rational choice.

It is obvious that in this scheme of things the United States occupies a key role. Its position has from the outset been self-contradictory. On the one hand, the United States has supported Israel politically, economically and militarily to the point where its existence has been assured. On the other hand, it has intervened in the four Middle Eastern wars to save the Arab states from complete military collapse. In other words, long before Henry Kissinger started to become the advocate of Arab interests in Jerusalem as he was the advocate of Israeli interests in the Arab capitals, the United States was pusuing an "evenhanded" policy in the Middle East, assuring the survival of Israel and preventing it from becoming the military master of the region. But more will be expected from Washington in the negotiations now planned.

To suit American policy, a peace settlement must meet three requirements: the satisfaction of Arab aspirations, the chance for Israel to preserve itself in the midst of hostile Arab states, and the maintenance of a balance of power between Israel and the Arab states. The simultaneous fulfillment of these requirements would tax the ability of a Kissinger and is probably beyond the ken of his successors. They are likely to be concerned more with legal documents recognizing the right of Israel to exist, or at the very least not expressly denying that right, than with Israel's military security. In these circumstances, Israel will be asked to give up territories essential for its defense in exchange for assurances recognizing its new, indefensible frontiers as inviolate. Israel will be legally guaranteed what it has to give

up in reality; the security of its future. A bargain falling short of this result would not be accepted by the Arab states.

And failure to bring it about would conjure up two consequences that in different ways would put in jeopardy the wider interests of the United States. The frontline Arab states have consciously exchanged the American for the Russian card. They are free, and will be encouraged by the Soviet Union, to reexchange these cards when they have concluded that the American is no better than the Russian one. The reappearance of the Soviet Union as active factor in the Middle East, hostile to Israel, would not only ruin all attempts at a negotiated settlement but would also place new emphasis upon the alternative, always lurking ominously in the background, of war.

Secondly, also always lurking in the background is the ability of the oil-producing Arab states to impose another oil embargo. This would greatly embarrass the United States and could plausibly threaten the ruin of some of its allies. It is of course apparent, in spite of disclaimers to the contrary, that Western dependence on Arab oil weakens the hand of the United States in negotiations with the Arab states. The threat of another embargo does not need to be articulated; it is inherent in the objective situation. It is the check that in this game of bluffs and counterbluffs, threats and counterthreats, remains firmly in the hands of the Arab states.

Finally, although President Jimmy Carter's statements in support of Israel have been as emphatic as those of his predecessor, the new Administration does not, any more than President Ford's did, present a united front on behalf of Israel. Since the establishment of the State of Israel, a group within the State Department, now strengthened by backing from the military and influential sectors of public opinion, has endeavored to check and, if possible, undermine, the Presidential support for Israel. The recent maneuvering to cancel the sale of concussion bombs to Israel, at the center of which appears to have operated the National Security Advisor to the President, continues an old tradition: If you cannot stymie a policy through head-on opposition, manipulate its executors in such a way as to frustrate their policy by making it appear you are actually supporting them.

The substitution of legal recognitions and promises for tangible military advantages is likely to be the main weapon friends of the Arabs, and even well-meaning by unwitting friends of Israel within the American government, will use to bring Israel to terms. In particular, one ought to watch out for the effort to change defensible frontiers guaranteed by Israel's military might for indefensible frontiers guaranteed by the United States either alone or in concert with other powers. History shows that such guarantees do not withstand the pressure of contrary national interests.

Imagine another Middle Eastern war following a settlement that has left a weakened Israel depending upon great-power guarantees. Is it likely that these guarantors of the status quo will take up arms on behalf of Israel against its Arab neighbors? And even if the answer to that question were in the affirmative, military aid would be too late to save the status quo. Thus to be serious about the survival of Israel means not only to indulge in the rhetoric praying homage to it, but to pursue a policy that actually serves this purpose.

[From the American Israel Public Affairs Committee, Mar. 15, 1977]

MEMORANDUM—DEFENSIBLE BORDERS FOR ISRAEL: KEY TO PEACE

Since 1948, the absence of defensible, recognized borders has encouraged Arab aggression against Israel and postponed a genuine peace settlement. UN Security Council Resolution 242, the only plan for a Mideast peace which has been accepted by both Israel and the Arab states asserts: ". . . a just and lasting peace in the Middle East . . . should include . . . Termination of all claims or states of belligerency and respect for and acknowledgement of the sovereignty, territorial integrity and political independence of every State in the area and their right to live in peace within secure and recognized boundaries free from threats or acts of force." Israel's desire for secure and defensible borders should be supported by the United States in its quest for a durable peace.

THE FACTS

1. The pre-June 1967 borders were merely armistice lines. They were never recognized by the Arab states as permanent international boundaries and were repeatedly penetrated by acts of Arab aggression. Located close to Israel's population centers, the pre-June 1967 lines promised an easy victory to would-be Arab attackers. Before 1967, all Israeli government buildings in West Jerusalem—including the Israeli Knesset (Parliament)—were within easy mortar range of Jordanian forces in nearby East Jerusalem. Jordan's army on the West Bank was but nine miles from the Mediterranean Sea, poised to cut Israel in two in less than an hour. Eighty percent of Israel's population was concentrated nearby, and all of Israel's cities were within artillery range.

2. In 1948, the armies of five Arab nations stormed across Israel's UN-mandated boundaries at the moment of Israel's birth. Those attacks were repelled and Armistice lines were drawn in 1949. From 1953 onward, the Sinai and the West Bank were used by terrorists to hit Israeli civilian settlements and murder hundreds of people. From 1950 until 1967, Israeli farmers and settlements in the Huleh Valley were regularly shelled and fired upon by Syrian forces on the Golan Heights above.

3. In the mid-1960's, Syria and Jordan began a project to divert two of the three sources of the Jordan River—the Baniyas and Hasbani rivers—which were controlled by Syria. This action was initiated in order to deny Israel its major source of water. Adjustments in the Golan borders are needed to eliminate both this threat and Syria's potential of shelling northern Israel from the commanding position of the Heights.

4. The Egyptian blockade at Sharm el-Sheikh of the Gulf of Eilat was a major factor leading to the outbreak of two wars—in 1956, and 1967. In May 1967, the Egyptian presence at Sharm el-Sheikh at the tip of the Sinai peninsula allowed Egypt's President Nasser to order a blockade of Israel's access to Asia and Africa through the Straits of Tiran—a clear act of war under international law. Five Egyptian divisions massed in the Sinai and Gaza ready to strike at Israel, while two Syrian and two Jordanian divisions were poised in the Golan and West Bank, respectively. A peace settlement must affirm clearly that the Straits comprise an international waterway, and Egypt's ability to again blockade must be eliminated by Israeli control and presence at Sharm e-Sheikh.

5. Before 1967, Israel did not have any strategic depth. Egyptian aircraft based in Gaza were less than five minutes flying time from Tel Aviv. Today, Egyptian aircraft are 30 minutes from Israeli cities, and Israel's air defense is much more capable of defending Israel's population and of responding to any surprise attack. Before 1967, Israel lacked a strategic buffer of warning space in the event of an attack. Israel, unlike its Arab adversaries, depends not on a large standing army, but primarily on mobilization of a reserve citizens' army. Despite the vaunted fighting skills of the Israel Defense Forces, Israel requires at least 48 hours mobilization time to mount a credible defense. Israel is economically incapable of keeping reserve forces on active duty for a prolonged period of time, or of calling up reserves frequently. During the 1973 Yom Kippur War, it was the strategic depth afforded by the Sinai and Golan which allowed Israeli forward units to hold off vastly superior Egyptian and Syrian forces while the Israeli Army mobilized and deployed. With the range of today's surface-to-air missiles now in Arab hands, a return to the 1967 borders would allow Egypt, Syria, and Jordan to control almost all of Israel's airspace. A hair-trigger situation would be created by a return to the pre-1967 lines, making a new war more likely and U.S. involvement more probable.

6. There is an extreme asymmetry of the two sides. Israel's 3.5 million citizens are surrounded by 134 million Arabs; Israel's 28,500 square miles (which include the administered territories) are surrounded by the Arabs' 5,300,000 square miles. Israel's military victories over the Arab states have not threatened their very existence as sovereign states or the lives of their civilian population. In contrast, military defeat of Israel would mean the physical extinction of a large part of its population and the political elimination of the Jewish state.

CONCLUSIONS

Clearly then, the issue of defensible borders is a concern for both Israel and the United States. But truly secure and defensible borders must be agreed borders, pointing thus to the need for direct, face-to-face negotiations to build trust and move towards reconciliation. Recent history has shown that geography is still the best guarantee of a nation's own security rather than paper assurances and third party guarantees. The fact that this is an era of long-range missiles does not mean that territory is no longer significant. A country can only be conquered when its territory is invaded by foot soldiers and tanks. Defensible borders for Israel can be the bulwark against war and the cornerstone of peace at the same time, increasing and promoting security by their presence.

WATER POLLUTION

Mr. MUSKIE. Mr. President, recently our distinguished colleague from Iowa, JOHN CULVER, addressed the Association of Metropolitan Sewerage Agencies, AMSA, at its annual legislative meeting in Washington, D.C. This association consists of the operators of the municipal wastewater treatment facilities of our major metropolitan areas.

In his speech, Senator CULVER underscored the need to continue our national commitment to clean our waters while recognizing that some changes may be in order. And he stressed the accomplishments we have made to date.

The Subcommittee on Environmental Pollution, which I chair, will soon begin oversight hearings and legislative consideration of the Federal Water Pollution Control Act Amendments of 1972. This will be an indepth examination designed to find ways to improve the ambitious clean water program on which we are embarked.

The subcommittee is fortunate that JOHN CULVER is a member. His intelligence, diligence, and far-sightedness will be invaluable to our deliberations.

I believe Senator CULVER's remarks present an important examination of the dynamics of our water pollution control program, and I commend his speech to our colleagues. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech

was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR JOHN CULVER

It is a privilege to meet with you members of the Association of Metropolitan Sewerage Agencies for this early morning fireside chat. I am happy to be here and want to thank Ron Linton and Lee White for inviting me.

It would be impossible to find a group of people more thoroughly aware of the importance of adequate supplies of clean, fresh water to our country and to the world than you who are gathered here this morning. Despite the acute drought conditions we are experiencing in this period, energy still ranks ahead of water as a glamor issue in the public's concern.

As you know, they are in the process of setting up a House Select Committee on Energy to help implement the President's energy proposals, and apparently Speaker Tip O'Neill is having a regular stampede of Members who want to be on the committee. When asked how many had applied, one of Tip's assistants replied—"435."

Yet, it is ironic that any scientific long range projections of priority global problems would put the possibility of severe water shortages at the top of the list. Moreover, many of our available energy sources are dependent on adequate water supplies.

It is interesting to note that Kuwait, which is one of the OPEC countries awash with oil, has virtually no fresh water supplies and depends heavily on desalinized sea water.

I note that you have some highly qualified professional staff members from Congress on your program who will deal with specifics of legislation coming up before the 95th Congress. For my own part, I would like to deal with some of the broader aspects of water pollution control policy that underly the legislative job we have ahead of us.

The whole problem area is awesomely massive, complex and technical. It would be nice we think at times, to retreat into the past, the "good old days" when life was less complicated and on a smaller scale. There is a considerable following now for E. F. Schumacher's philosophy of "small is beautiful." We can learn some useful things from this philosophy, but the realities are that while small may be beautiful, big is here to stay and to be dealt with.

In pollution control, as in other major areas of public policy, I am an ardent believer in the imperative need to develop long range foresight capability. Futurists deal with what they call "alternative futures," based not on certainties but on highly likely possibilities. Obviously the future is not always a direct continuation of the past. If nuclear war or some other world disaster strikes or if we experience a revolution of new breakthroughs in technology, then all bets are off.

But much of what will take place in the years ahead can be foreseen by careful study and planning and many crises can be avoided before they roll over us from the blind side.

I know that when I talk about the need for developing foresight expertise and exercising the discipline of long range planning, I am getting into an area in which you people live and have your professional being. I know, for example, that you are interested in an ongoing struggle for longer range funding to permit longer range planning, and this aspect of your problems will be carefully considered by the Congress.

Although America is still a comparative oasis among other countries in a world of spreading global shortages, it is clear to all of us that in the third century of our republic, we must develop new attitudes and new methods in the management of our natural resources.

In the first 200 years, we proceeded along developmental lines that were roughly the same from the beginning—aggressive geographical expansion, unlimited economic growth, lavish use of resources, and unplanned use of space and energy. Now we must proceed in a more rational, disciplined, and foresighted way if we are to continue the good life.

The environmental laws, written primarily by the subcommittee on environmental pollution on which I serve are an important beginning. Their commitment to the future is staggering in its scope—but it must be met. We have all been part of the problem; we must all be part of the solution.

The '76–'77 drought has gone a long way to awaken the public awareness to the seriousness of the water problem. Americans in the far west have always been concerned about water shortages, but we in the midwest and eastern states have taken our water supplies for granted as a limitless resource.

The suggestion some citizens made to the President during this past winter—that we should load snow from upstate New York on flat cars and ship it to the drought areas—may have been naive and impractical, but it shows the awakening of some elementary awareness to the problem.

However, even with this winter's drought that has made water scarce in most areas of our nation, most Americans probably see this shortage as a temporary problem only. However, scientists warn that the present situation could represent the early phase of a major climate shift that could continue for years or could at least recur more frequently than in past decades.

As you professionals well know, and as the American people should begin to realize, although water is one of the most abundant materials on earth, almost 99 percent of it is inaccessible for human use. Nor have we yet made any major technical breakthrough to convert these sources of water—such as the oceans, icebergs and polar snowcaps—to human use.

In the meantime both domestic and industrial demand for water keeps increasing at an accelerated rate. For instance, it is estimated that producing a ton of steel requires 40,000 gallons of water, and making a ton of paper requires 250 tons of water.

You all know the story of the critical point to which the deterioration of the nation's waters had come at the beginning of the present decade. By 1971, 29 percent of the country's lakes and rivers were polluted, according to a council on environmental quality report.

The response of Congress came in the form of the 1972 Federal Water Pollution Control Act amendments (P.L. 92–500), one of the most important and far-reaching laws ever enacted.

While congressional efforts prior to 1972 had failed to keep water pollution from increasing both in outright tonnage and in lethality to man and aquatic species, the 1972 legislation represented a landmark in one strategy to control discharges of effluent into our waterways. It also marked a fundamental re-thinking of our national pollution control policy. Instead of selective enforcement against the worst offenders, all polluters were to be regulated under a nation-wide permit program. And major funding was authorized for municipal treatment construction grants in order to carry out the mandate of the legislation.

There is no doubt we have made significant progress under the changes mandated in 1972 in cleaning our water—from both industrial and municipal sources—and I commend you members of the association for your part in this.

We have cleaned up major waterways that once were dead. For example, the Rouge River in Detroit used to be choked with a mounting tide of sewage, chemicals, waste oils, acids and paper sludge, and a quarter-inch thick coating of oil covered the shoreline. Now the water qualty in the river has improved so much that you can fish from it in front of Cobo Hall.

In contrast with these successes, we have also had a substantial number of set-backs, lags and delays. The Potomac River is still a national disgrace and New York Harbor remains stagnant. Eighty-one per cent of over 200 lakes recently studied by the E.P.A. are in an advance state of eutrophication.

In the Implementation of P.L. 92–500, some mid-course corrections are undoubtedly in order. But the commitment and objectives are still sound.

As a member of the Senate Subcommittee on Environmental Pollution, I intend to participate in a thorough examination of the specific provisions of this program in the months ahead. This has always been the firm commitment of Senator Ed Muskie, who chairs the subcommittee, and Chairman Randolph.

I can assure you that the subcommittee will be willing to work with you and other experts in the field about the mechanics of the program. In order to preserve the central legislative intent, the subcommittee has resisted piecemeal amendments that have been offered up to this point.

The constraints of the Federal budget are more stringent than perhaps ever before, but I believe the recent decision by the committee to authorize $4.5 billion annually for fiscal years 1977 and 1978 demonstrates our desire to maintain a strong level of Federal funding. I know that many cities have a backlog of projects ready to go. The Metropolitan Sanitary District of Greater Chicago, for instance, has $1.3 billion in construction plans for sewer runoff tunnels, approved and awaiting Federal funds.

The difficulties in keeping faith with America in controlling the pollution of our fresh waters remain enormous. The nation has many other priority needs and the competition for public funds will be of unmatched ferocity. The nation is struggling to get back on the expressway to economic recovery, and it is necessary to seek a careful balance between the needs of economic growth and of environmental protection.

But one thing is clear. For the benefit of ourselves and of generations to come, we cannot abandon our commitment to clean water USA.

SENATOR PELL TO RECEIVE GOVERNOR'S ARTS AWARD

Mr. JAVITS. Mr. President, later this month, one of our colleagues will receive recognition in his home State which he most richly deserves. On April 29, Senator CLAIBORNE PELL will be presented with the Governor's Arts Award for 1977 by the Rhode Island Council on the Arts. Anyone familiar with Federal support of cultural activity need not be told of the leadership and diligence which CLAIBORNE PELL has provided as the chairman of the Arts and Humanities Subcommittee since its inception over a decade ago. While I have labored for almost three decades to first establish and then enhance the Federal support for cultural activities, I look upon my collaboration with Senator PELL in 1965 as being one of the greatest legislative hallmarks in this vital area which reaches the life of every American.

The Rhode Island Council on the Arts is making this presentation in conjunction with its 10th anniversary celebration. I think it is noteworthy to examine the growth of artistic and cultural activity over the last decade which has been markedly stimulated by the crea-

tion of the National Endowment for the Arts and the subsequent establishment of State Arts Councils. This success has been characterized by cooperation from all levels of Government and private sources. I believe this was stated best by NEA Chairman Nancy Hanks in her congressional testimony of November 12, 1975: At this time, Chairman Hanks stated:

One of the most remarkable achievements of the past ten years is that unprecedented partnerships have been forged between all sources of support for cultural activity. Of course, the situation could be better. But, we are developing a method of encouraging the arts that is totally unique and better than any in the world.

Another achievement has been a major strengthening of what might be called our "cultural base," both individual (our artists) and institutional—in both numbers and quality.

There is a tremendous development of talented artists all over the country. This is particularly noticeable in the craft arts, the folk arts, the poets and writers, the photographers, musicians, architects. There are still major concentrations in New York and on the West Coast, and probably always will be.

There has been an incredible expansion in the number of activity of cultural institutions.

Today, there are more than 50 resident professional theaters instead of approximately 15 a decade ago.

The 60 resident professional dance companies have increased from a mere 10, ten years ago. There is every reason to believe that one of the reasons for this phenomenal growth is the level of interest raised in dance by the national Dance Touring Program.

Regional film centers did not really exist ten years ago. There are now approximately 25. Film as a major art form has been given growing emphasis.

Orchestra and opera company seasons have expanded to meet the needs of their communities.

Museums have increased in number and especially in the quality of their offerings and community services.

There are numbers of community cultural centers that did not exist ten years ago.

Communities and campuses all over the country have art centers.

There are many literary magazines, though all struggling—that bring the brilliance of our young writers to ever-broadening readership.

The members of these Committees of the Senate and House, and your colleagues who are members of the Appropriations Committees, should be aware that people all over this country rightly believe that the support and encouragement of the Congress of the United States is importantly responsible for the situation as I describe it today.

The National Endowment for the Arts has acted as an essential catalyst in making this decade of growth and its potentials possible. The members of the National Council on the Arts are very pleased with the programs which are in operation now and which are summarized for you in Chapter V of this testimony, "The Past and Present." We believe that these programs are working well. They are under constant review by the panels and Council, they are receiving a continuing positive reaction from our constituencies, both artistic and public, and they should be continued.

Growth in the arts can be measured by the interest expressed by the population. This country over the last decade has experienced a virtual explosion of interest in cultural affairs. Data compiled by NEA show this increase most graphically. I ask unanimous consent that a table prepared by the Endowment be printed in the RECORD to illustrate the growth of cultural organizations over the decade 1965–75.

Mr. President, I should like to add my commendations to the people of the State of Rhode Island in honoring their senior Senator for his contribution to the arts. I am sure that this award, only one of many which Senator PELL has received marking his dedication and success in this vital field, will simply serve to inspire the gentleman from Rhode Island to further successful efforts in increasing opportunities for cultural activities to the citizens of his home State and of the Nation.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ESTIMATED GROWTH IN SELECTED CULTURAL FIELDS, 1965–75

Field	Number in 1965	Number in 1975	Number supported by arts endowment
State arts agencies	12	55	55
Community arts agencies	175	900	29
Museums	1,700	1,880	413
Art	(320)	(350)	(321)
Science	(270)	(290)	(58)
History	(640)	(705)	(17)
Combination	(470)	(535)	(17)

Independent presses	200	350	67
Total, number of groups	2,711	4,403	1,139

BEA ROSENTHAL IS HONORED

Mr. RIBICOFF. Mr. President, Beatrice Holt Rosenthal of Waterford, Conn., has devoted her life to public service.

An energetic, imaginative, and highly intelligent woman whose taste for colorful hats always signalled her presence at any gathering, Bea Rosenthal enjoys a unique place in Connecticut's politics and human events.

She is admired and respected and held in deep affection by persons of all political persuasions.

Bea represents the very best in what I believe to be a typical American tradition of citizens who take an active part in local and State politics. These men and women give much of themselves and ask for little in return. Their satisfaction comes in doing a good job—for their community, State, Nation, and political party.

A hard working, enthusiastic Democrat, Bea Rosenthal's positions in her party have ranged from being town chairman of her hometown of Waterford to being national committeewoman from Connecticut.

While she has demonstrated a strong sense of loyalty to the Democratic Party, Bea Rosenthal's more basic loyalty is to the principle of striving to make the democratic ideal a reality.

By her actions and demonstrated good will toward all, Bea Rosenthal has earned the reputation for being a person who, although she may be an opponent, plays according to the rules of civility and decency. She is respected by Republicans and Independents, as well as Democrats, for being a woman of principle.

As one Republican leader has remarked about Bea:

I learned more from Bea Rosenthal about politics than I ever did from any Republican.

Bea Rosenthal's interests are not limited to politics. She has made major contributions in Connecticut in support of many community projects, devoting her talents to improving education, health care, medical research, and the arts.

Bea Rosenthal is one in a million. There will never be another like her.

Some 600 persons from southeastern Connecticut and throughout the State took part in a well deserved tribute to Bea Rosenthal in Norwich on April 15, 1977.

The New London Day commented on the significance of this tribute in an editorial of April 15, 1977. The Day reported on the event itself in an article on April 16, 1977. Mr. President, I ask unanimous consent that the editorial and the article be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A DAY FOR BEA

This might properly be known as Bea Rosenthal Day in Southeastern Connecticut. We cannot think of another woman in our midst who so richly deserves the tribute she will receive at a gathering tonight of sincerely appreciative friends and neighbors at the Norwich-Sheraton.

Beatrice Holt Rosenthal is perhaps best known to the public as a most effective political leader on the local, state and national levels. Most recently, she was an influential member of the Democratic National Committee from Connecticut. Indeed, she was held in the highest esteem by four Presidents—Roosevelt, Truman, Kennedy and Johnson—for whom she worked tirelessly here and around the nation.

And a lot of us also associate her with those distinctive, colorful and becoming hats she herself fashioned. Hats are great conversation pieces but it is what's under them that counts.

The tribute tonight has little to do with politics or with hats, in or out of the ring. It was arranged almost overnight by an ad hoc committee who define themselves as Republicans, Democrats and people of no particular political persuasion.

It represents long-overdue recognition of Bea's leadership in such diverse humanistic fields as children's welfare, education, health programs, retardation, mental illness, aid for the blind and the deaf, historic preservation, libraries, the arts—the list of worthwhile causes which have benefitted by her loving attention and her remarkable mind is all but endless. In some way or another over a period of more than 50 years, she has

touched the lives of virtually everyone who reads these words.

There is much, too, that is not widely known. For Bea Rosenthal, daughter of a college president, member of a family which settled Woodstock, Conn., and widow of Capt. Josseph S. Rosenthal, a former commanding officer of the old Coast Guard Training Station in Groton, did not confine herself to formal good works. Her compassion raised the spirits of countless individuals beset with reversals.

All of this was and is being done by Mrs. Rosenthal without being asked and without material reward. A woman of grace and modesty to match her spirit, she is, to put it simply, a great lady whose works for humanity are beyond calculation. She is a model for the best that is in all of us.

They say 500 persons will be there tonight. Many more will count themselves there in spirit. But there isn't a hall in this world large enough to accommodate all those who are in her debt.

MORE THAN 600 PAY HOMAGE TO 'BEAUTIFUL BEA' ROSENTHAL

(By David L. Heckerman)

NORWICH.—What the world needs more of, they said time and again here Friday night, is people like "Beautiful Bea."

"Lovely Bea," they said, has spent her lifetime fueling the engine of democracy, broadening the scope of culture and strengthening the foundation of humanitarianism.

Without Bea, they said, our lives would be much the poorer.

The object of this testimony and more was Beatrice H. Rosenthal of Waterford—Southeastern Connecticut's 76-year-old *grand dame* of politics, the arts and human-service programs.

A glittering audience of more than 600 persons paid $15 a head to crowd into the ballroom of the Norwich Sheraton to smile at Mrs. Rosenthal and say nice things about her.

The assemblage included leaders of business, the professions, the theater, charitable enterprises, historical societies and agencies benefitting the handicapped. Also present was just about every Democrat in the state who cares about his standing in Southeastern Connecticut.

"Bay-atrice"

Gov. Ella T. Grasso was there to pay tribute to "my frend, Bay-atrice."

"Bay-atrice has the gift of selfless love," Mrs. Grasso said. "We have all been the beneficiaries of her largesse."

Former Gov. John N. Dempsey spoke for 10 minutes in his most laudatory tones.

"Nowhere was a more worthy tribute ever paid to an individual in Connecticut than the one we pay to Bea tonight," Dempsey said.

Congressman Christopher J. Dodd remembered that Mrs. Rosenthal was among his first callers after the deaths of his father and mother. State Sen. Richard F. Schneller suggested that his political career might never have gotten off the ground without her.

Republican leader Emma E. Lincoln praised Mrs. Rosenthal's political skills.

"I learned more from Bea Rosenthal about politics than I ever did from any Republican," Mrs. Lincoln said.

Other speakers—there were 13 in all who went on for 130 minutes—traced her political career from the time she became Democratic town chairman in Waterford in 1958 to last year when she stepped down as Democratic national committeewoman

They also mentioned the leadership roles she played with the Mystic Oral School, Waterford Country School, Norwich Hospital, Eugene O'Neill Memorial Theater, Goodspeed Opera House, the Heart Fund, the Cancer Society and the Cystic Fibrosis Association, among other organizations.

SHE DID IT ALL

Away from the podium, people in the crowd talked about her ability to thrive in either the most sophisticated fund-raising settings or in the smoke-filled back rooms of politics.

Bea Rosenthal can smile and be sweet when the situation calls for it, but also can maneuver in the background or attack her opponents bluntly and forthrightly when necessary, they said.

Her allies are "dear boys" and "dear girls," but her political enemies are inevitably "wretched people."

Someone recalled that she had been among the party loyalists invited to Hyannisport in 1960 to watch the first televised Kennedy-Nixon debate in the company of Jacqueline Kennedy. Her comments afterwards were typical.

"Kennedy was flawless," she said. "Nixon not only looked like a dead rat but he acted like one."

Among her allies Friday night, Mrs. Rosenthal showed all her charm and social skills. She circulated among the crowd while dinner was being served touching hands and shoulders and whispering thanks in many an ear.

Later, after the speech-making, she kept her remarks brief.

"My life has been so enriched," she said. "I only wish I had worked harder."

GERALD FORD SPEAKS ON FOREIGN POLICY

Mr. GRIFFIN. Mr. President, recently former President Gerald R. Ford delivered the first John Sherman Cooper lecture at the University of Kentucky.

I ask that the text of his remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY GERALD R. FORD

It is an honor and a very special privilege for me to deliver the first John Sherman Cooper Lecture at the University of Kentucky.

To know John Sherman Cooper is to know one of the finest statesmen this country and the Commonwealth of Kentucky have ever produced.

As a serious student of government, and as an able lawyer, Senator Cooper devoted much of his time and thought to the search for a proper balance of powers—particularly in foreign policy—between the executive and legislative branches of government.

How should the powers of the executive and legislative branches be coordinated, especially in the field of foreign policy?

I address this question tonight as one who has been honored to serve at both ends of Pennsylvania Avenue over the past thirty years.

In the years just following World War II, there was a remarkable degree of national consensus about the role America should play in the world.

We held the noble conviction that since we alone had emerged virtually unscathed by the destruction of war—since the war had in fact made us the most formidable military and economic power on earth—we had a special responsibility to build a new and better world from the ruins of the old.

This national consensus was made possible by such men as Senator Arthur Vandenberg, my own political mentor, who championed bipartisanship in foreign affairs and helped cement with President Truman a common bond of purpose between the legislative and executive branches of government.

Underlying every Presidential initiative was a broad foundation of support in the United States Congress. Even in the case of Vietnam, the SEATO treaty was approved by the Senate 82 to 1 in 1955, and the Gulf of Tonkin Resolution was passed in the Senate 88 to 2, and in the House of Representatives 414 to 0, in 1964. But as that frustrating war went on year after year, our national unity was shattered, and with it the essential foreign policy coordination between President and Congress.

Old assumptions were challenged. Long-standing commitments were called into question. Bipartisanship in foreign affairs gave way to deep divisions within the parties themselves.

Members of Congress who came to oppose the war would also come to oppose the Presidents who prosecuted the war.

In the end, they would argue that the Presidency itself had grown too powerful, that a usurpation of powers by the President from the Congress was chiefly to blame for our disillusioning involvement in Vietnam.

These concerns found legislative expression in the War Powers Resolution of 1973.

This resolution claimed for the Congress unprecedented power in the conduct of foreign policy, at the same time holding the President in strict account for his own actions in international affairs.

The arrangements which the Constitution makes for the conduct of foreign policy involve a complex interplay between the legislative and executive branches.

Congress is given the power to declare war and to raise an army and navy. The Senate is given the additional power of advice and consent in the ratification of treaties and the appointment of ambassadors and other officials, including the Secretaries of State and Defense.

The President is made Commander-in-chief and head of state. By fundamental definition, the chief executive is also given the power to execute American foreign policy.

It was not intended that these powers be consolidated in the interest of efficiency, but rather that they be separated in the interest of democracy.

Coordination between the two branches was obviously to be encouraged. The brilliant system of checks and balances which the Founding Fathers devised was not meant to breed constant, paralyzing confrontation between the President and Congress of the United States.

The War Powers bill seeks by simple legislation to codify the military powers of the President, spelling out exactly what he can and cannot do, and how, and under what circumstances, to defend the United States and its citizens from international danger.

The resolution also grants to the Congress powers which tend to make it superior to the executive branch, as in the provision that Congress may order the withdrawal of troops within 60 days by a concurrent resolution not subject to Presidential veto.

Furthermore, the resolution requires consultation with Congress in military emergencies. No President with common sense would dream of neglecting this aspect of his obligation. But can it be mandated by law? And what does it mean Finally, there is a question of how closely this Resolution would involve the Congress in the actual execution, as opposed to the general direction, of foreign policy, particularly in times of crisis.

Does the consultation provision require the approval of the Congress before executive action is taken? What if the President and Congress disagree? Which of these separate but equal powers would prevail in such a confrontation?

These arguments of constitutionality can

be more than matched by arguments of workability.

The United States was involved in six military crises during my Presidency: the evacuation of U.S. citizens and refugees from DaNang, Phnom Penh and Saigon in the spring of 1975, the rescue of the Mayaguez in May, 1975, and the two evacuation operations in Lebanon in June, 1976.

In none of those instances did I believe the War Powers Resolution applied, and many members of Congress also questioned its applicability in cases of protection and evacuation of American citizens.

Furthermore, I did not concede that the Resolution itself was legally binding on the President on constitutional grounds.

Nevertheless, in each instance, I took note of its consultation and reporting provisions, and provided certain information on operations and strategies to key Members of Congress.

It is my view that when the President as Commander-in-chief undertakes such military operations, he would inevitably take the Congress into his confidence in order to receive its advice and, if possible, insure its support.

This type of consultation makes common sense and certainly strengthens trust between the executive and legislative branches. But it is to be distinguished from the detailed information and time limits imposed by the War Powers Resolution.

Once the consultation process began, the inherent weakness of the War Powers Resolution from a practical standpoint was conclusively demonstrated.

When the evaculation of DaNang was forced upon us during the Congress' Easter recess, not one of the key bipartisan leaders of the Congress was in Washington.

Without mentioning names, here is where we found the leaders of Congress: two were in Mexico, three were in Greece, one was in the Middle East, one was in Europe, and two were in the People's Republic of China. The rest we found in twelve widely scattered States of the Union.

This, one might say, is an unfair example, since the Congress was in recess. But it must be remembered that critical world events, especially military operations, seldom wait for the Congress to meet. In fact, most of what goes on in the world happens in the middle of the night, Washington time.

On June 18, 1976, we began the first evacuation of American citizens from the civil war in Lebanon. The Congress was not in recess, but it had adjourned for the day.

As telephone calls were made, we discovered, among other things, that one Member of Congress had an unlisted number which his press secretary refused to divulge. After trying and failing to reach another Member of Congress, we were told by his assistant that the Congressman did not need to be reached.

We tried so hard to reach a third Member of Congress that our resourceful White House operators had the local police leave a note on the Congressman's beach cottage door: "Please call the White House."

When a crisis breaks, it is impossible to draw the Congress into the decisionmaking process in an effective way, for several reasons.

First, they have so many other concerns: legislation in committee and on the floor, constituents to serve, and a thousand other things. It is impractical to ask them to be as well versed in fast-breaking developments as the President, the National Security Council, the Joint Chiefs of Staff, and others who deal with foreign policy and national security situations every hour of every day.

Second, it is also impossible to wait for a consensus to form among those congressional leaders as to the proper course of action, especially when they are scattered literally around the world and when time is the one thing we cannot spare. Again, we should ask what the outcome would be if the leaders consulted do not agree among themselves or disagree collectively with the President on an action he considers essential.

Third, there is the risk of disclosure of sensitive information through insecure means of communication, particularly by telephone. Members of Congress with a great many things on their minds might also confuse what they hear on the radio news in this day of instant communication with what they are told on a highly classified basis by the White House.

Fourth, the potential legal consequences of taking executive action before mandated congressional consultation can be completed may cause a costly delay. The consequences to the President, if he does not wait for Congress, could be as severe as impeachment. But the consequences to the Nation, if he does wait, could be much worse.

Fifth, there is a question of how consultations with a handful of congressional leaders can bind the entire Congress to support a course of action—especially when younger Members of Congress are becoming increasingly independent.

A survey reported by Congressional Quarterly last November indicated that an overwhelming majority of the Congress believed the legislative branch had an inadequate role in the international crises I have mentioned.

Sixth, the Congress has little to gain and much to lose politically by involving itself deeply in crisis management.

If the crisis is successfully resolved, it is the President who will get credit for the success. If his efforts are not successful, if the objectives are not met or if casualties are too high, the Congress will have seriously compromised its right to criticize the decisions and actions of the President.

Finally, there is absolutely no way American foreign policy can be conducted or military operations commanded by 535 Members of Congress on Capitol Hill, even if they all happen to be on Capitol Hill when they are needed.

Domestic policy—for housing, health, education or energy—can and should be advanced in the calm deliberation and spirited debate I loved so much as a Congressman.

The broad outlines and goals of foreign policy also benefit immensely from this kind of meticulous congressional consideration.

But in times of crisis, decisiveness is everything—and the Constitution plainly puts the responsibility for such decisions on the shoulders of the President of the United States.

There are institutional limitations on the Congress which cannot be legislated away.

Yet since the Mayaguez incident, there has been talk of putting more teeth into the War Powers Resolution, intensifying congressional participation in actual crisis management.

There have also been attempts to introduce the Congress into sensitive negotiations with foreign nations.

The Jackson-Vanik Amendment to the Trade Act of 1972, proposed to liberalize emigration from the Soviet Union by legislative decree had precisely the opposite effect.

The Congressional restrictions on military assistance to Turkey after the latest Cyprus crisis prove how determined—and how wrong—the Congress can be, and how cumbersome diplomacy by rigid legislative dictate can be.

Where, then, does the balance of powers lie?

It cannot lie in a constant rivalry for power. As Eugene Rostow has written this "would tend to convert every crisis of foreign policy into a crisis of will, of pride and of precedence between Congress and the President."

The balance must lie, instead, in a frank recognition of the basic strengths and weaknesses of both the executive and legislative branches of government, in the institutional capabilities and limitations imposed by the Constitution and by common sense.

The bitter experiences of Vietnam and the national atmosphere in the last decade have encouraged, I believe, too much tampering with the basic machinery by which the United States Government has run successfully for the past two hundred years.

We must not abandon the wisdom of the ages in the passion of a moment.

If we have disagreements of policy, let us resolve them as matters of policy, rather than escalating them into constitutional confrontations.

Tragically, in recent years, the bases of trust, cooperation and civility between the legislative and executive branches of our government have been eroded.

In their place, there has been an attempt to build new and permanent structures on the shaky ground of mutual suspicion.

This is no way for the government to serve the American people. It is, instead, the sure way to division at home and danger abroad.

We need to seek once again a common ground on which the President, the Congress and the American people can proudly and firmly stand through crisis and calm.

We must decide again, as a Nation, what is important to us, what goals we will set, what dangers we will risk, what burdens we will bear, in our dealings with the wider world.

The Congress has the responsibility to do now what it does best—debate these great issues, openly, freely and thoroughly—and help us find a new path on which we all may travel together.

The new Administration—free of the burden of war, unfettered by mistakes of the past—has an historic opportunity to lead America to a new age in foreign policy: an age in which the goals and commitments we hold precious as a Nation may be fulfilled through the quiet, beneficent strength that commands respect and invites cooperation.

All this will not be easy. The world is very different now than it was thirty years ago. We are different, and our problems and aspirations more complex.

But we are still Americans who love our country, who cherish peace and freedom in the world.

Let us in the months ahead open a constructive dialogue among the American people, the Congress and the President, leaders past and present, so we can preserve the bulwark of our strength—the Constitution—and find the mechanisms and the spirit that have made America what it is today—free and dedicated to a better world for all peoples.

THE QUESTION OF SEALED BIDS

Mr. CHURCH. Mr. President, on Friday, I introduced legislation on behalf of myself and Senators McCLURE, HATFIELD, PACKWOOD, MELCHER, and HANSEN, to repeal section 14(e), the so-called sealed bid provision, of the National Forest Management Act of 1976, and to create an advisory committee to study Forest Service timber sale procedures.

This legislation has recently been reported by the House Forestry Subcommittee, which has spent a great deal of time studying this problem.

For the past few months, section 14 (e) has been a thorn in the side of Northwest communities which are economically dependent upon a steady supply of national forest products. This sec-

tion, originally intended by Congress to obviate collusive practices in bidding, has been misinterpreted by the Forest Service from the start.

Many concerned citizens have been in touch with me since this whole controversy began last October. They are worried that the Forest Service's definition of what constitutes a collusive practice may include normal discussion among timber operators—for example, as to the marketing of different types of trees to mills or plants that can most efficiently utilize them, as recognized by the Forest Service appraisal process. They are also concerned about the three different bidding policies adopted by the Forest Service, because they constitute such major departures from prior procedures.

These concerns center directly around the way in which the Forest Service has interpreted section 14(e) to mean that sealed bidding must be used on most timber sales, regardless of whether collusive practices are suspected or not.

Although it has been revised twice, the present Forest Service approach still does not provide the degree of flexibility that may be necessary to protect community stability. The intent of Congress has not been followed. It was those traditional methods of bidding for national forest timber were to continue, except that the Secretary could use a variety of methods, including sealed bids, where there was reason to believe collusion was taking place.

Traditionally, national forest materials have been sold primarily by oral auction in the Northwest. Oral auction methods allow those timber operators who depend extensively upon the national forests to bid against their competitors directly at the time the sale is made. Oral bidding is often necessary to assure that community sawmills will have enough timber to continue operation and provide the jobs upon which local logging communication depends.

Mr. President, the legislation I am introducing today would allow a return to traditional bidding methods until such time as a study of Forest Service timber sale procedures can be completed. Throughout this whole controversy, one thing has been clear: Not enough is presently known about which timber sale procedures best protect the public interest.

The bill establishes within the Department of Agriculture a 17-member advisory committee to study Forest Service timber sale procedures. The study is to include, among other things, the means by which national forest timber is put up for sale, appraised, bid upon, and the factors affecting pricing of such timber. The study will result in recommended procedures by which the Forest Service will sell timber in a manner which will provide for community stability and fully recognize the diversity of geographical location, climate, species and other factors.

The recommendations, which would be presented to the Secretary of Agriculture and Congress, are to be completed by January 1, 1979, and the advisory committee would be abolished at that time.

Mr. President, this bill will allow a return to traditional timber sale methods, while at the same time provide us with recommendations for future sale procedures.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1360

A bill to establish an Advisory Committee on Timber Sales Procedure appointed by the Secretary of Agriculture for the purposes of studying, and making recommendations with respect to, procedures by which timber is sold by the Forest Service, and to restore stability to the Forest Service timber sales program and provide an opportunity for congressional review

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ESTABLISHMENT

SECTION 1. There is hereby established an Advisory Committee within the Department of Agriculture to be known as the Advisory Committee on Timber Sales Procedures (hereinafter referred to as the "Committee").

PURPOSE OF COMMITTEE

SEC. 2. (a) The Committee shall study the procedure by which the Forest Service sells timber. Such study shall—

(1) include, but not be limited to, a study of the methods and conditions of sale including among other things the means by which such timber is put up for sale, appraised, bid upon, and the factors affecting pricing of such timber; and

(2) be made for the purpose of providing its independent recommendations with respect to establishing procedures by which the Forest Service will be able to sell timber in a manner which will provide for community stability and will fully recognize the diversity of geographical location, climate, species and other factors, and will be, over the long term, the most beneficial to the public interest and provide the most stable return to the Federal Government while maintaining diversity in terms of sizes, types, and locations of operations and facilities which process timber.

(b) It is the sense of Congress that the advice and recommendations of the Committee should be the result of the Committee's independent findings and judgment.

MEMBERSHIP

SEC. 3. (a) The Committee shall be composed of seventeen members appointed by the Secretary of Agriculture (hereinafter referred to as the "Secretary") within thirty days from the date of enactment of this Act, as follows:

(1) Four members who represent those segments of the timber industry which purchase timber from the Forest Service;

(2) Four members from labor organizations representing workers engaged in the processing of timber; and

(3) Nine members from the general public who otherwise have a significant interest in the use of timber resources.

(b) The Secretary shall appoint a Chairman of the Committee.

PAY AND TRAVEL EXPENSES

SEC. 4. (a) (1) Except as provided in paragraph (2), members of the Committee shall serve without pay.

(2) Members of the Committee who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the Committee.

(b) While away from their homes or regular places of business in the performance of services for the Committee, members of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5 of the United States Code.

MEETINGS

SEC. 5. The Secretary shall provide that the Committee shall meet as soon as practicable after all the members are appointed and shall meet as often thereafter as the Secretary determines is necessary to complete, in a timely fashion, the report required by section 7.

STAFF

SEC. 6. The Secretary shall provide an adequate number of employees from the Department of Agriculture to assist the members of the Committee in performing their duties.

REPORT

SEC. 7. The Committee shall transmit to the Secretary and to the Committee on Agriculture of the United States House of Representatives and the Committees on Energy and Natural Resources and Agriculture, Nutrition, and Forestry of the United States Senate a final report not later than January 1, 1979. The report shall contain a detailed statement of the findings and conclusions of the Committee, together with such recommendations as it deems appropriate.

TERMINATION

SEC. 8. The Committee shall cease to exist on the date on which the report is transmitted under section 7.

BID METHODS

SEC. 9. Subsection (e) of section 14 of the National Forest Management Act of 1976 (Public Law 94-588, 90 Stat. 2959; 16 U.S.C. 472(e)) is hereby repealed, and subsections (f) through (i) of said section are redesignated respectively as subsections (e) through (h).

WALLACE AWARD—HON. FRANCIS L. KELLOGG

Mr. JAVITS. Mr. President, I would like to call the attention of my colleagues to the address of the Honorable Francis L. Kellogg, Senior Advisor of the U.S. Mission to the United Nations, on his receipt of the Wallace Award at the annual American-Scottish Society dinner on March 30. Mrs. Javits also offers her congratulations.

Frank Kellogg has served his country admirably during his remarkable career, serving as Special Assistant to the Secretary of State for Refugees from 1971 to 1975, and currently as President of the U.S. World Wildlife Fund.

I ask unanimous consent that the text of his remarks before the American-Scottish Society be printed in the RECORD, as well as my telegram of congratulations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS BY THE HONORABLE FRANCIS L. KELLOGG

The Wallace Award is named in honor and memory of Sir William Wallace, famous Scottish patriot and leader who died in 1313 A.D. He has been known throughout history for his outstanding attributes of character, courage, ingenuity and integrity. The Wallace Award is presented annually to several leading Americans of Scottish descent or birth who have made a significant contribution or rendered distinguished service to the United States. Since 1970, twenty-five such citizens have been so honored.

Madam President, Mr. Chairman, fellow Wallace awardees, Your Excellencies, distinguished guests:

As an Assistant Chief of Protocol, how else would you have expected me to commence these few remarks?

Let me begin by saying if I had not been chosen to receive the honored Wallace Award, I could have written a fabulous speech. Losers usually are more eloquent because their fires burn hot and passion is the stuff for fine rhetoric.

So instead let me resort to a quotation.

I do not recall a more thrilling opening to any book than the lines with which Bertrand Russell, now 95, begins his autobiography:

"Three passions, simple but overwhelmingly strong, have governed my life: The longing for love, the search for knowledge, and the unbearable pity for the suffering of mankind. These passions, like great winds, have blown me hither and thither, in a wayward course, over a deep ocean of anguish reaching to the verge of despair."

Bertrand Russell expresses the waywardness of man's destiny. I feel indeed fortunate because my life has been—like most Scotsmen, I would believe—disciplined and ordered—necessarily "compartmentalized"—business, a concern for mankind, most particularly refugees, and the conservation of endangered species and wild places.

I wish time permitted me to dwell for a moment on each—not in the first person singular—but because each is so vital to all our lives.

The position of Special Assistant to the Secretary of State for Refugees was unique—the focal point of the United States Government for worldwide human concern and emergency relief—a tangible expression of goodwill on the part on the American people for the oppressed and less fortunate on this "unburnt cinder."

Like Bertrand Russell, it took me 'round our planet to every continent. Aside from human deprivation and despair, refugees are the "eye of the storm" in international affairs and all too frequently the cause of civil uprising or warfare. Examples are too obvious to need more than a mention: India and Pakistan, Cyprus, civil war in the Sudan . . . the Palestinians . . . In addition to being at the keystone of American foreign policy—which is, of course, maintenance of world peace, there is the infinitely complex logistical challenge of bringing food, hospital supplies and medicine, shelter—human needs—to the homeless in many troubled far away places.

In my five years as Special Assistant I administered the expenditure of more than one-half billion dollars for refugee relief.

Yes, Bertrand Russell, soul-searching but infinitely rewarding . . .

The World Wildlife Fund represents "passion" with which I have been overwhelmingly involved for nearly two decades. The Fund, which has been called the United Nations of Conservation, recently held its Fourth World Congress in San Francisco. As Dillon Ripley said at the opening plenary: "Conservation of nature is inevitably involved with the problem of world stability and peace." So perhaps a concern for refugees and human rights is not so far removed from a dedication to conservation.

Indeed only ten days ago the President of the United States said before the United Nations: "We must use our collective natural resources wisely and constructively. Today our oceans are being plundered and defiled" . . .

And a moment later . . .

"The basic thrust of human affairs points toward a more universal demand for fundamental human rights . . . the United States is the global forum dedicated to the peace and well-being of every individual—no matter how weak or how poor."

I regret to report we are losing the race to save our world. Sir Peter Scott said during the World Wildlife Congress, "I think that disaster lies ahead unless we change course . . . the future of all life on earth depends on earth care . . . on the respect and reverence that we feel collectively for our planet, the Blue Planet, so far the only home of our species."

I have talked overlong but let me say in closing I refuse to feel, as a World Wildlife colleague described himself: "like a peacock in the garden of an 18th Century British Manor house—ornamental but useless."

So I accept this high honor as a new challenge. The Wallace Award may yet be the incentive that will keep me honed to a fighting edge!

Thank you.

WASHINGTON, D.C.,
March 29, 1977.

Hon. FRANCIS KELLOG,
American Scottish Foundation,
St. Regis Hotel,
New York, N.Y.:

Congratulations from Marion and me on receiving the distinguished Wallace Award. You have richly earned it by your national and international services to our people, to the plight of refugees and to the basic cause of human rights throughout the world. Love to Mercedes and please also present my respects to Lady Malcolm Douglas-Hamilton and to all present.

JACOB K. JAVITS,
U.S. Senator.

ARMS CONTROL

Mr. HUDDLESTON. Mr. President, one of the most pressing problems facing this Nation and the world is that of arms control, both on the strategic and conventional levels.

While we must always maintain a credible deterrent strength and force sufficient to protect our interests, we must also be aware that the proliferation and advancement in arms which allows growing numbers of nations to possess a wide assortment of weapons capable of raising any local conflict to a highly sophisticated level is destabilizing and a threat to involving unintended nations in local disagreements.

The total value of conventional arms transferred worldwide in 1975, according to the Arms Control and Disarmament Agency, was approximately $9.7 billion.

This may not seem particularly significant in view of the fact that total world exports of commodities in 1975 are estimated at $869 billion.

The situation takes on a different hue, however, when one looks at the items involved and the pattern of their distribution. When we talk of conventional arms transfers, we talk of a wide variety of items including ammunition, tactical guided missiles and rockets, military aircraft, naval vessels, armored and nonarmored military vehicles, military communications and electronic equipment, artillery, infantry weapons, small arms, and other ordnance, parachutes, and uniforms.

Perhaps the point is more vividly illustrated by the compilation in the GAO report of June 1976 which shows the number of various systems which were sold in recent years by the United States under the Foreign Military Sales Act:

Major U.S. items ordered under FMS

Item	Fiscal year 1973	1974	1975
A-4 aircraft	50	82	61
F-5 aircraft	117	59	72
Submarines	10	17	4
Destroyers	17	31	13
Armored personnel carriers	539	3,458	735
Tanks	---	1,177	211
Hawk missiles	1,490	100	312
TOW missiles	12,868	3,780	4,724

A second trend which is important to note is that while the sales prior to 1969 were concentrated in the developed countries, during the more recent years, such sales have shifted to the Middle East and Africa, where a number of potentially tumultuous situations persist.

For many years, Congress failed either to secure adequate information regarding proposed sales or to provide a means whereby it might prevent conventional arms sales programs from being used in a manner with which it disagreed. This has, to a significant extent, been modified by the 1974 Foreign Assistance Act, especially by section 36(b), which provided Congress not only with information prior to the issuing of letters of offer, but also provided a mechanism for disapproval of both cash and credit sales. This provision was amended and strengthened in the Arms Export Control Act of 1976.

I recently requested the Congressional Research Service to summarize the experience under section 36(b), and I think the result is both illuminating and instructive. Following is the summary which Dr. Herbert Y. Schandler, specialist in national defense, prepared:

First. How many proposed sales has Congress been notified of since enactment of section 36(b)?

Answer:

Fiscal year 1975	39
Fiscal year 1976	56
Fiscal year 1977	57
Total	152

Second. Have all notifications been published in the CONGRESSIONAL RECORD?

Answer. Since the passage of this legislation, Senator SPARKMAN, chairman of the Committee on Foreign Relations, has entered all such notifications, with classified portions deleted if appropriate, in the CONGRESSIONAL RECORD.

Third. How many of the proposed sales have been the subject of congressional hearings?

Answer. The following proposed sales have been the subject of congressional hearings:

House of Representatives, 94th Congress, 1st session:

First, arms sales to Ethiopia;

Second, training of foreign military forces by U.S. civilian contractors;

Third, sale of Hawk missiles to Jordan;

Fourth, sales to Saudi Arabia; and

Fifth, sales of Sidewinder to Kuwait.

Ninety-fourth Congress, 2d session:

First, sales to Saudia Arabia;

Second, sales of AWACS to NATO;

Third, sales of C–130 aircraft to Egypt;
Fourth, sale of auxiliary submarine to Peru;
Fifth, sale of certain ships to Venezuela; and
Sixth, sale of naval vessels.
Senate, 94th Congress, 1st session:
First, sale of Hawk to Jordan.
Ninety-fourth Congress, 2d session:
First, sale of AWACS to NATO;
Second, sale of C–130 aircraft to Egypt;
Third, sale of F–16 to Iran;
Fourth, sale of Maverick to Saudi Arabia; and
Fifth, sale of naval vessels.

Fourth. How many of the proposed sales have been disapproved by Congress?

Answer. No sales have been disapproved by Congress. However, informal consultations between the Congress and the administration have resulted in modifications to administration proposals in the case of the sale of Hawk surface-to-air missiles to Jordan and of Sidewinder air-to-air missiles and Maverick air-to-ground missiles to Saudi Arabia.

Fifth. How many of the proposed sales have actually been the subject of a vote in either the House or the Senate?

Answer. None.

Sixth. Is there any pattern to the timing of the notifications?

Answer. During fiscal year 1976, the first full year that the provisions of the law applied, the notifications were spread throughout the year with no seeming pattern, as follows: July—3; August—1; September—5; October—8; November—5; December—6; January—4; February—12; March—4; April—2; May—3; June—3. During the transition quarter, July 1–September 30, 1976, however, 57 notifications were provided, one more than in the entire previous fiscal year.

Seventh. Have justifications presented generally indicated the scope and extent of sales anticipated by the administration?

Answer. Administration justifications have generally detailed the scope and extent of anticipated credit sales.

There has been little testimony as to anticipated cash sales. The International Security Assistance and Arms Export Control Act of 1976 (P.L. 94–329, June 30, 1976), however, adds the following section to the Arms Export Control Act:

SEC. 25. ANNUAL ESTIMATE AND JUSTIFICATION FOR SALES PROGRAM.—(a) The President shall transmit to the Congress, as a part of the presentation materials for security assistance programs proposed for each fiscal year, a report which sets forth—

(1) an estimate of the amount of sales expected to be made to each country under sections 21 and 22 of this Act, including a detailed explanation of the foreign policy and United States national security considerations involved in expected sales to each country;

(2) an estimate of the amount of credits and guarantees expected to be extended to each country under sections 23 and 24 of this Act;

(3) a list of all findings which are in effect on the date of such transmission made by the President pursuant to section 3(a)(1) of this Act, together with a full and complete justification for each such finding explaining how sales to each country with respect to which such finding has been made will strengthen the security of the United States and promote world peace; and

(4) an arms control impact statement for each purchasing country, including: (A) an analysis of the relationship between expected sales to each country and arms control efforts relating to that country, and (B) the impact of such expected sales on the stability of the region that includes the purchasing country.

(b) not later than thirty days following the receipt of a request made by the Committee on Foreign Relations of the Senate or the Committee on International Relations of the House of Representatives for additional information with respect to any estimate submitted pursuant to subsection (a), the President shall submit such information to such committee.

(c) the President shall make every effort to submit all of the information required by this section wholly in unclassified form. In the event the President submits any such information in classified form, he shall submit such classified information in the addendum and shall also submit simultaneously a detailed summary, in unclassified form, of such classified information.

Certainly, the provision of the information and the printing in the CONGRESSIONAL RECORD of the proposed sales in excess of the specified amounts has alerted Congress to the specifics of what it has approved through authorizations and appropriations for the military sales program. Although there have been no disapprovals, the fact that a number of hearings have been held and that several disapproval resolutions have been introduced indicates that Congress is exercising oversight responsibilities in this area. This is an appropriate move and one which I believe is healthy in our system of government.

While information has also been made available on an expanded basis regarding commercial export sales which are regulated under licensing procedures of the international traffic in arms regulations, Congress has not moved either to limit these sales or to create a means of exercising disapproval at a certain sales level. Since they are private sales, less stringent requirements have been imposed upon them.

During this session of Congress, we will have to reauthorize the foreign military sales program. I am certain that the Foreign Relations Committee which did such a fine job previously will make similarly effective proposals this year. It is my hope, however, that they will seek to emphasize several things: First, we need to make it clear that it is U.S. policy to restrict conventional arms sales throughout the world. This will require cooperation by many nations. There is some truth in the argument that it does little good for the United States to restrict sales because other nations are ready and eager to make the sales anyway.

Second, we have to look very closely at the possible need for cumulative limits for individual countries. The reviews of individual sales which result from the 1974 legislation, as amended in 1976, do not allow for adequate congressional evaluation of overall sales by the United States to a single country within a year or over a period of several years. And, the ability to disapprove sales on a proposal-by-proposal basis makes it difficult to determine what the total amount of sales to a single country is going to be and to determine how the various separate sales fit together.

Third, we need to review our very sophisticated weapons system to determine whether there are some such systems which are so advanced and potentially destabilizing to certain areas of the world that they should be made available outside the United States, or perhaps outside the NATO countries, only by joint decision of Congress and the executive.

Fourth, we need to reassess sales policy to insure that such sales are in conformity with U.S. policy interests. Past experience with arms impact statements has not been good; but we should not abandon this approach, only strengthen it. Well prepared statements could give Congress a renewed basis for analysis and evaluation.

Finally, we should review commercial sales to insure that they are made in such a manner that items do not fall into the hands of terrorist groups.

FLORA KAREL TEMPLETON

Mr. ANDERSON. Mr. President, on May 1, Flora Karel Templeton of 3117 Irving Avenue South, in Minneapolis, will celebrate her 100th birthday. Mrs. Templeton was born on May 1, 1877, in Kewaunee, Wis. She married Charles L. Templeton there in 1910, then moved to Minneapolis in 1911 where she has lived ever since.

Mrs. Templeton still occupies the home she and her husband purchased in 1918.

Mr. Charles Templeton died several years ago and Flora now lives with her daughter, Mrs. Karel Hannon, and her granddaughter, Elizabeth Hannon.

Flora Templeton's father, John Karel, of Chicago and Kewaunee, was general counsel to Russia during the administration of President Grover Cleveland.

Her brother, John C. Karel, Jr., served as a municipal judge in Milwaukee for 30 years, and in the 1920's was a Democratic candidate for Governor of Wisconsin. Mrs. Templeton's grandson, John C. Hannon currently serves in the Foreign Service in the U.S. Embassy in Moscow.

Mr. President, I know my colleagues join me in extending congratulations and best wishes to Flora Karel Templeton on her 100th birthday.

REFUNDABLE INVESTMENT TAX CREDIT

Mr. KENNEDY. Mr. President, during the consideration by the Senate of H.R. 3477, the pending tax bill, I plan to offer a refundable investment credit amendment in order to improve the business tax incentives in the bill. The amendment will be offered as a substitute for the portion of the bill containing the 12-percent investment credit. The refundable credit will be available in addition to the Senate-passed jobs tax credit, so that firms qualifying for the jobs credit will also be eligible for the investment credit.

As the bill now stands, firms must choose between either a 2-percent increase in the present 10-percent invest-

ment credit or the newly proposed jobs tax credit. But many firms that need help the most will not receive any current benefit from either of these measures. No firm can qualify for either of the two tax credits, unless it incurs some tax liability. And even firms with some tax liability may be ineligible for the benefits, or for the full amount of the benefits, because of the limitations that apply to both credits.

The amendment guarantees that virtually every firm will receive some stimulus from the tax package. The amendment achieves this result by providing for partial—one-third—refundability of the present 10-percent investment tax credit. A firm will calculate the amount it would receive if the credit were fully refundable, and receive a refund equal to one-third of that amount—the one-third level was chose to produce the same $1.2 billion revenue effect as the 12-percent investment credit.

Refundability of the investment credit means that firms which suffered losses during the recession, new businesses with large initial expenses, and rapidly expanding firms will be able to obtain some benefit from the credit.

I believe these are the firms on which the Senate should focus its tax stimulus effort at this time, rather than the large corporations with comfortable profit margins, which can make capital investments without further Federal financial aid.

The current investment credit is a $10.6 billion a year Federal subsidy for business. Refundability will make the credit a more equitable and more efficient method of assistance to investment.

Mr. President, I ask unanimous consent that the text of the amendment and a brief summary and description of it may be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TEXT OF REFUNDABLE INVESTMENT CREDIT AMENDMENT

On page 89, lines 8 and 9, strike out "At the election of the taxpayer, there" and insert in lieu thereof "There".

On page 89, beginning with line 12, strike out through line 5 on page 90.

On page 90, line 6, strike out "'(c)" and insert in lieu thereof "'(b)".

On page 103, beginning with line 3, strike out through line 22 on page 104 and insert in lieu thereof the following:

(d) Refund of Portion of Investment Credit.—

(1) Paragraph (3) of section 46(a) (relating to limitation based on amount of tax) is amended to read as follows:

"(3) LIMITATION BASED ON AMOUNT OF TAX.—

"(A) Notwithstanding paragraph (1) and except as provided in subparagraph (B), the credit allowed by section 38 for the taxable year shall not exceed—

"(i) so much of the liability for tax for the taxable year as does not exceed $25,000, plus

"(ii) for taxable years ending on or before the last day of the suspension period (as defined in section 38(j)), 25 percent of so much of the liability for tax for the taxable year as exceeds $25,000, or

"(iii) for taxable years ending after the last day of such suspension period 50 percent of so much of the liability for tax for the taxable year as exceeds $25,000.

"(B) If the amount determined under paragraph (1) for the taxable year exceeds the limitation imposed by subparagraph (A) for the taxable year, and the excess is attributable (in whole or in part) to the amount determined under subparagraph (B) of paragraph (1), then the amount of the credit allowed by section 38 for the taxable year shall be increased (over the amount of the limitation imposed by subparagraph (A)) by an amount equal to so much of the excess so attributable as does not exceed the smaller of—

"(i) 50 percent of so much of the liability for tax for the taxable year as exceeds $25,000, or

"(ii) one-third of the amount of the excess so attributable.

"(C) In applying clause (iii) of subparagraph (A) to a taxable year beginning on or before the last day of such suspension period and ending after the last day of such suspension period, the percent referred to in such subparagraph shall be the sum of 25 percent as the number of days in such year after the last day of the suspension period bears to the total number of days in such year. The amount otherwise determined under this paragraph shall be reduced (but not below zero) by the credit which would have been allowable under paragraph (1) for such taxable year with respect to suspension property but for the application of section 48(h) (1).".

(2) Paragraph (1) of section 46(b) (relating to general rule for carryback and carryover of unused credits) is amended by inserting after "subsection (a)(1)(B)" the second time it appears the following: "shall be reduced by the amount of any overpayment made under the last sentence of section 6401 (b) and, as so reduced,".

(3) Section 6401(b) (relating to amounts treated as overpayments) is amended by adding at the end thereof the following sentence: "Except in the case of an organization which is exempt from the tax imposed by chapter 1, there shall be considered as an overpayment the amount by which one-third of the amount determined under paragraph (2) of section 46(a) exceeds the amount determined under subparagraph (B) of section 46(a)(3).".

(4) The amendments made by this subsection shall apply to—

(A) property to which subsection (d) of section 46 of the Internal Revenue Code of 1954 does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1976, but only to the extent as a basis thereof attributable to construction, reconstruction, or erection after such date and before January 1, 1981,

(B) property to which such subsection (d) does not apply, acquired by the taxpayer after December 31, 1976 and before January 1, 1981, and placed in service by the taxpayer before January 1, 1981, and

(C) property to which such subsection (d) applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of section 46 of such Code) with respect to qualified progress expenditures made after December 31, 1976, and before January 1, 1981.

On page 114, line 3, strike out "The amendmendments" and insert in lieu thereof "Except as otherwise provided in this section, the amendments".

SUMMARY OF KENNEDY REFUNDABLE INVESTMENT CREDIT AMENDMENT

A. DESCRIPTION OF THE REFUNDABLE CREDIT

The proposed amendment will delete the 2 percent optional increase in the present 10 percent investment tax credit, and replace it with a partially refundable investment credit. The refundable investment credit will be available to all taxpayers in addition to the jobs tax credit already approved by the Senate. Thus, a business that increased its employment and increased its capital investment in machinery and equipment could receive the benefit of both tax credits. By contrast, under the Senate bill, a firm must choose either the jobs credit or the 12 percent investment credit, but not both.

The amendment provides that one-third of the 10 percent investment credit would be refundable. The revenue cost is $1.2 billion a year, or the same revenue effect as the 12 percent credit it replaces. As a result, adoption of the amendment would produce no net revenue change in the bill.

B. HOW DOES THE KENNEDY AMENDMENT CHANGE PRESENT LAW?

Under present law, a taxpayer can take the 10 percent investment credit in an amount equal to no more than 50 percent of the taxpayer's tax liability. Any credit in excess of this amount is disallowed in the current year (even though the investment has been made in that year) but can be carried back three years, or forward for seven years to offset past of future tax liability.

A taxpayer who has no tax liability for the year gets no current benefit from the investment credit even though he has made qualified investments.

C. HOW A REFUNDABLE CREDIT WORKS

Example 1: Assume that during the recession years 1974–75, a firm suffered substantial net operating losses, which will be carried forward through 1979. As a result, this business will not incur any tax liability for 1977. However, in 1977 the firm is experiencing a recovery and buys new machinery and equipment costing $1 million. The firm would qualify for a 10 percent investment credit equal to $100,000. Under present law, the firm would receive no tax benefit at all. By contrast, under the proposed amendment, the business would receive a 1977 tax refund of $33,333 (⅓ of $100,000). The remaining $66,667 of investment credit would be carried forward, as under present law.

Example 2: Assume a firm that is rapidly expanding would incur a 1977 tax of $100,000 on its income. It buys machinery and equipment costing $2 million. Under present law, it can use the investment credit to offset only 50% of its tax liability. Therefore, in 1976, it can use only $50,000 of its available $200,000 investment credit. Under the proposed amendment, it could take an additional $50,000 credit in 1977 (one-third of the remaining $150,000).

D. WHO DOES THE REFUNDABLE CREDIT HELP?

The refundable investment credit primarily helps new firms, firms hard hit by the recession and firms making large current capital investments compared to tax liability.

New firms frequently do not incur any tax liability for the first several years they are in business, since their large start-up costs often exceed their income. Nonetheless, these firms must make significant investments in machinery and equipment. It is no help to these firms to tell them that they will get an investment credit seven years from now. They need financial assistance now to help pay for the costly machinery and equipment that they require in order to get started in their operations. The current 10% investment credit does not provide that assistance. Increasing the current credit to 12% is even more restrictive, since firms bumping against the present limits will be unable to use the additional 2%. But a partially refundable credit can give new firms immediate cash to help offset costs of vital plant machinery and equipment.

Other firms, over the past three years, have suffered losses due to the severe recession in the economy. These losses resulted not from

mismanagement, but from poor economic conditions over which they had no control. However, for tax purposes, these losses will reduce or eliminate their tax liability during 1977 and 1978. An additional 2% investment credit is of no help to these firms; it merely increases the carryover of already unusable investment credits. A refundable investment credit will provide needed immediate stimulus for these firms to make capital investments.

Many rapidly expanding firms are already at or above the 50% limit on the current investment credit. These are profitable businesses with tax liabilities. However, increasing the investment credit is equally useless to many of them, because their investment tax credits already exceed the 50% limit. However, these firms are still expanding their capital investments; they are precisely the firms that should be provided encouragement. The refundable investment credit provides that incentive.

E. WHY IS A REFUNDABLE CREDIT PREFERABLE TO AN INCREASE IN THE 10-PERCENT CREDIT?

As discussed above, the refundable credit helps a large class of businesses that get no help at all from an increase in the current investment credit. According to Treasury estimates, only 68 percent of the eligible investment credits at the 10 percent level for 1977 will actually be claimed on 1977 returns. If the credit goes to 12 percent, only 56 percent of the credits would be claimed, as more and more firms become trapped by the limits of the credit.

In addition, increasing the current 10 percent credit to 12 percent provides a windfall to firms that were going to invest in any event. A 2 percentage point increase is a drop in the bucket for firms that are already using the 10 percent credit in full. Two-thirds of the present 10 percent credit goes to the top 0.1 percent of corporations; a 2 percent increase in the credit will have no effect on the capital investment programs of these corporate giants.

On the other hand, the refundable credit could provide substantial and measurable benefits for firms that are presently receiving no investment credit at all.

The business incentive program in the tax bill is a temporary measure. It is therefore necessary to get the maximum benefit for scarce federal tax dollars in 1977 and the following three years. The carry-forward provisions in current law are of little help in this result—now is when we need the capital investment, not seven years from now. Refundability of the investment credit insures the maximum input into the economy during the period of time when the federal stimulus should be felt most directly.

F. THE REFUNDABLE CREDIT MAKES THE INVESTMENT CREDIT MORE EQUITABLE

The investment credit is the major program by which the federal government provides financial assistance to industry. Because of its present limitations, however, the program is inequitable. Two firms can make identical investments, yet one of them may receive the investment credit currently and one may not.

When General Motors buys a $100,000 machine, it pays only $90,000 because of the investment credit. It makes no sense to say that American Motors must pay the full $100,000 for the same machine. Yet this is precisely the discrimination caused by current law, which favors wealthy firms at the expense of less affluent and struggling firms.

It is safe to say that if the investment credit program were run as a direct subsidy program through the Commerce Department, no one would try to condition the subsidy for capital investment on the amount of a taxpayer's income tax liability to the Treasury. Instead, two taxpayers who made a $100 investment would receive a $10 Commerce Department check, regardless of their tax situation. The refundable amendment moves us in the direction of this more rational system.

G. THE REFUNDABLE CREDIT IS TEMPORARY

The refundable investment credit will be available during the next four years. Congress will have an opportunity to see how the refundability feature works, before deciding whether to make it a permanent feature of the tax system.

H. PRECEDENTS FOR REFUNDABLE CREDITS

There are several precedents for the proposed refundable investment tax credit:

1. In 1975, under Senator Long's leadership, Congress enacted the first refundable credit—the $400 earned income credit for low income workers.

2. In 1976, the Senate adopted refundable energy tax credits to encourage the goal of energy conservation. The provisions were later dropped in the conference with the House.

3. In 1976, the Senate also voted to make the child care credit refundable, but the refundable feature was dropped in the conference with the House.

4. In 1974, the Treasury, under Secretary Simon, proposed that the then existing 7 percent investment tax credit be made refundable.

5. On April 7, 1977, Senator Long introduced S. 1270, a bill to make the investment credit refundable on a permanent basis.

There are thus ample precedents for adopting refundable credits in the tax system. It is entirely proper for the Senate, as a matter of sound economic policy and sound tax policy, to make the investment credit refundable.

I. REVENUE EFFECTS

The one-third refundable credit amendment will cost an estimated $1.2 billion a year. Therefore, it exactly substitutes for the $1.2 billion revenue loss that would result from increasing the 10 percent investment credit to 12 percent. As a result, the amendment produces no net revenue loss in the bill.

(This concludes additional statements submitted today.)

CONCLUSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, has morning business been closed?

The ACTING PRESIDENT pro tempore. Morning business has not been concluded. Is there further morning business? If not, morning business is closed.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume the consideration of H.R. 3477, which the clerk will state.

The legislative clerk read as follows:

A bill (H.R. 3477) to provide for a refund of 1976 individual income taxes and other payments to reduce individual and business income taxes and to provide tax simplification and reform.

The Senate resumed the consideration of the bill.

Mr. ROBERT C. BYRD. Mr. President, Mr. DANFORTH, is to be recognized, I believe, under the order previously entered.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Missouri (Mr. DANFORTH) is recognized.

Mr. JAVITS. Mr. President, will the Senator yield to me to suggest the absence of a quorum?

Mr. DANFORTH. I yield.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Missouri.

Mr. DANFORTH. Mr. President, on Friday, the senior Senator from New York (Mr. JAVITS) and I presented at some length the principal arguments in favor of our forthcoming amendment on a permanent tax cut for middle- and low-income taxpayers.

During that afternoon presentation and previously in the media, some questions were raised as to the validity of a permanent tax cut at this time. So today, what I will do is begin examining the reasons given in opposition to the permanent tax cut and subjecting them to the light of day and to the clearest possible presentation in refutation.

First, it was suggested on Friday that this amendment—this proposed permanent tax cut—would do nothing to affect the so-called marriage penalty which is now present in the existing tax laws. That statement is simply not true.

In the Finance Committee during the hearings on this bill that is now before us, a lengthy amount of discussion was directed at the so-called marriage penalty and various alternative propositions were placed on the blackboard and were discussed in detail by staff of the Finance Committee and of the Joint Committee on Taxation.

Members of the committee had various alternatives presented to them for dealing with the marriage penalty and, in fact, the Finance Committee devised its own version of the standard deduction.

It had as its effect both a simplification of the present law and a moderation of the marriage penalty.

The amendment that has been proposed by Senator Javits and me takes into account the changes made by the Finance Committee. Those changes in the standard deduction are incorporated in our amendment. Our amendment simply adds to the changes effected by the Finance Committee in the standard deduction an additional permanent tax cut aimed at middle- and low-income taxpayers.

Therefore, it is simply not true to say that our amendment does nothing to affect the marriage penalty. It does precisely the same amount as the bill that is pending before us does without the amendment.

A second argument that was made last Friday against this amendment is that somehow, at least theoretically, our amendment discriminates against low-income taxpayers with respect to the benefit an individual receives from the personal exemption.

This is a very theoretical argument but it deserves explanation and then refutation. The argument is, in substance, as follows:

In computing his taxable income, each taxpayer now receives a personal exemption of $750. If a taxpayer is in a high tax bracket, that exemption is worth more to him than it is to a taxpayer in a lower tax bracket. For example, if a taxpayer is in the highest tax bracket, that is, 70 percent, the value of a $750 personal exemption to him is 70 percent of $750. If a taxpayer is in the lowest tax bracket, which is 14 percent, the value of the standard deduction is 14 percent of $750. So it is argued that the personal exemption means more to a person in the higher bracket than to a person in the lower bracket.

(Mr. DECONCINI assumed the chair at this point.)

Mr. DANFORTH. The argument continues, as I understand it, that if the tax rate on the lower income taxpayers is reduced from 14 percent to 12 percent, the value of the personal exemption to that taxpayer is reduced from 14 percent of $750 to 12 percent of $750.

This is indeed an interesting theoretical argument, but it is a purely theoretical argument. It has nothing whatever to do with the real concern of taxpayers at all levels. That is not abstract theory but dollars available after the Government has finished the job of exacting taxes.

The issue before the Senate now is quite simply the issue of dollars. How many dollars will a taxpayer have after he finishes paying his taxes? The greatest dollar effect of the amendment proposed by Senator JAVITS and myself is targeted at taxpayers with adjusted gross incomes between $10,000 and $15,000 a year, low-income and middle-income taxpayers.

The value of the tax cut proposed by us for them ranges between $247 and $263 a year for a family of four.

Far from being an amendment which would discriminate against the middle-income and low-income taxpayers, our proposed amendment is aimed at furnishing maximum benefits to low-income and middle-income taxpayers. The 74.1 percent of the tax benefit contained in this amendment would be for taxpayers with adjusted gross incomes of under $20,000 a year. While 74.1 percent is for taxpayers under $20,000 a year, only 2.2 percent of the benefit is targeted for taxpayers with adjusted gross incomes of over $50,000 a year.

So much, Mr. President, for the argument that this amendment discriminates against the low-income taxpayers. It does quite the contrary. It provides the greatest benefit for low-income taxpayers because, as pointed out last Friday, these people in the middle-income and low-income brackets are suffering the most from the ravages of inflation combined with high tax rates.

As pointed out on Friday afternoon concerning taxpayers with adjusted gross incomes between $15,000 and $20,000 a year for a family of four, people in income groups where it is very difficult for them to make ends meet under today's conditions, when these people, for every extra $1 they make as family income, lose 45 cents to 50 cents by virtue of taxes or by virtue of inflation, then the time is long past due for tax relief which is targeted specifically at them.

While the argument that is made against this proposal is theoretical, it is important to note that people who have to pay their food bills today cannot pay those food bills with theory; and people who have to pay their utilities in the year 1977 cannot pay their utility bills with theory. They pay their bills with dollars. The whole point of this amendment is to provide, after taxes, more dollars in the hands of the typical taxpayer.

The third argument that has been made against this amendment is that it is inflationary. As a matter of fact, this argument is also fallacious because the proposal that we have made would have almost no effect whatever on the cost of living. According to Chase Econometrics, which is in the business of projecting the future of the economy on the basis of economic models, the effect of this proposal for a permanent tax cut on the Consumer Price Index would be to raise the Consumer Price Index by 0.1. That means, for example, that if the Consumer Price Index is 175.0 before this amendment becomes law, it would be increased from 175.0 to 175.1 by virtue of the amendment, almost an insignificant effect, almost no effect whatever, on the rate of inflation.

Unlike the proposed rebate, which, fortunately, has been withdrawn by the administration, a permanent tax cut does not result in a sudden flood of money into the marketplace. Instead of the sudden influx with the great pressure that places on demand, this would be a permanent tax cut with a steady flow of increased demand and, therefore, much less of an inflationary effect than would be the case with a rebate.

On revenue losses, after adjusting for reflow by virtue of the fact that the economy is stimulated by a permanent tax cut, revenue losses after such adjustment in 1977 would be only $1.8 billion. In 1978, that would be increased to approximately $7.1 billion. However, it is important to note that each year the Federal Government makes between $6 and $7 billion a year because of inflation. That is to say, without any act of Congress at all, without any increase in tax rates, inflation itself places taxpayers in higher tax brackets than they were in the previous year.

If for the typical taxpayer his income is increased not to produce any better standard of living but only to adjust for the effects of inflation, only to keep up with inflation, that taxpayer has no additional real income, but the taxpayer does have additional paper income and, therefore, is placed in a higher tax bracket than he was in the preceding year. As a result of such increases in the tax rates without any act of Congress, the Federal Government makes between $6 and $7 billion a year on inflation.

What we are saying is that the revenue loss for 1978 would be $7.1 billion. However, the Federal Government would be making up between $6 and $7 billion of that $7.1 billion as a result of inflation.

The way we are operating now, Mr. President, is that we in Congress are using inflation to fight inflation. We are reducing the deficits that we create by allowing inflation to put taxpayers in higher brackets so that we can extract more and more of their earnings from them. Under present circumstances, the only beneficiary of inflation is the Government itself.

A third criticism of the proposed amendment which would give a permanent tax cut for middle- and low-income taxpayers is that much of the stimulus would come in 1978 rather than 1977. This, of course, is true. Whereas, with a rebate or a refund, all of the money can be refunded in 1977, a permanent tax cut begins in the last part of 1977, and then extends into 1978 and succeeding years. This, I believe, is a plus, not a minus, in this proposal, because the President has withdrawn the idea of the rebate on the theory that the economy is somewhat, at least, on the upswing in 1977. Yet, the projections of some economists indicate that, while we might be on the upswing in 1977, that recovery cannot be sustained and, in fact, we are facing a renewal of the recession in 1978. Chase Econometrics predicts that, by the fourth quarter of 1978, unemployment will reach 8.85 percent. Even if this is greater than reality, the fact of the matter is that no economist that I know of has predicted a total end to the recession by the end of 1978. No economist has predicted a recovery in gross national product or a recovery in unemployment rates which would place us at the stage where we were, say, in the latter part of the 1960's.

Therefore, it seems that a tax stimulus package which did more than the quick fix approach of the rebate, but which would provide a gradual influx of money into the marketplace, would offer the maximum amount of stimulus precisely when we shall be needing it most—namely, in the latter half of 1978.

At the time when the rebate was still under consideration, I called Paul Samuelson, I suppose one of the best-known economists in the country and a professor at Massachusetts Institute of Technology, and asked him about his views on the rebate and on the possibility of a permanent tax cut. He said to me that a shift in the stimulus from 1977 to 1978 would be a very desirable thing; that this would place the stimulus precisely at the time that it would be the most needed.

Another factor also has to be brought into consideration at this point. That is, what is stimulus? Is it simply a matter of how many dollars we have in our pocket at a given moment, or is it the total confidence of the American people in the economy? If one reads the newspapers, there is a great amount of emphasis placed by economists and by people who take public opinion polls on the question of confidence of the consumers. The $50 rebate, when it was proposed, was not a popular proposal. It came under fire from all kinds of people. Especially, it came under fire from the

public at large, from a great cross-section of America, who viewed it as nothing more than a gimmick.

A permanent tax cut is not a gimmick. A permanent tax cut is not $50 which is provided once, and that is that. A permanent tax cut says to the consumer, "We are reducing your taxes in 1977 and also in 1978 and on into the future."

It is that kind of knowledge as to what a person's condition is going to be in future years that provides that individual—even now, even before receiving the money in the future, or being allowed the tax break in the future—with the kind of confidence in the ability to plan his or her life which is necessary to go out and make the consumer purchases on the durable items which are so important if we are going to have the real recovery that the American people need.

Finally, I suppose the most often voiced criticism of the permanent tax cut at this time goes to the question of its timing. It is said that this is not the time for a permanent tax cut. It is said that the American people waited a long time and they can continue to wait for the tax cut that we are calling for. It is said, and as a matter of fact, that they should wait because tax reform is on the way and if we are going to have tax reform, we have to accompany that tax reform with a permanent tax cut at that time.

To that, I say, what reform are we talking about? What is the meaning of the term, "tax reform"? Have we been told what the administration has in mind by way of permanent tax reform, or what the House Ways and Means Committee or the Senate Committee on Finance have in mind by way of permanent tax reform? Tax reform is a phrase that has been used over and over again to justify a delay in tax reduction. Yet nowhere has it been specified what this mysterious tax reform is to be. What is it to consist of?

Some people talk about simplification of the Internal Revenue Code. What simplifications do they have in mind? Do they have in mind doing away with the deduction of interest on mortgages or charitable contributions? That would be simplification, but it would not be desirable and it would be rejected, I think, by the vast majority of the American people.

The last time Congress talked about tax reform was in 1976 when it came out with a bill of 1,000 pages or so, which was reported in the press to be one of the most obscure, technical, confusing bills ever passed by Congress, and it was supposed to be reform.

So we are told that, some time down the road, we are to have this wonderful thing called tax reform, and we should delay a tax reduction so we can get it. But nowhere have we been told what tax reform is in the wind. We are told to wait, but we are not told how long we are supposed to wait.

Someone pointed out last Friday afternoon that the time that it took between the initial idea that was behind the Tax Reform Act of 1978 until the time it was signed into law by the President was 3 years and 7 months. Are we supposed to wait 3 years and 7 months between now and when we can offer some tax reduction to middle- and low-income people?

Then it is said that when we get tax reform, that is supposed to be coupled with some kind of tax reduction. Does this mean that we have a commitment of tax reduction for middle- and low-income taxpayers; and if so, who made that commitment? Has the administration committed itself to a rate reduction for low-income taxpayers? Has anybody in Congress committed himself or herself to a tax reduction for middle- and low-income taxpayers? We are talking now, in this amendment, about a rate reduction for middle- and low-income taxpayers which could begin now, not at some future date.

I am not aware that anybody has committed himself, and certainly not the administration, to tax reduction in the future or to any precise amount of tax reduction, or to tax reduction for this particular group of taxpayers.

It is not sufficient that some future tax reduction be aimed at people who do not need it, or be aimed at creating more loopholes rather than less loopholes, or be aimed at cushioning the blow of reform for people who do not need the cushion. The great need in America today is for the middle-income taxpayer and the low-income taxpayer, and the time has come to act now.

Then there is the question of whether or not this mysterious reform—we do not know what it is—is so much worth waiting for that we are willing not only to put off tax reduction today but also to deny people who are today out of work the kind of jobs that could be provided by the stimulus proposal.

Again taking the proposed rate reduction alone, which is a part of this amendment, it is estimated to create, by the end of 1977, 150,000 additional jobs; by the end of 1978, 350,000 additional jobs. Combined with the change in the standard deduction which is incorporated in this proposal, what we are talking about by the end of 1977 is 225,000 additional jobs; by the end of 1978, 600,000 additional jobs.

So why should these people, who could be put to work by this kind of stimulus, be told, "No, you are not supposed to have jobs now, because we are going to do something wonderful for you in the future. We are going to have tax reform. Do not ask us any more questions, please, because if you do, we will not tell you what we mean by tax reform. We will not tell you who is going to get the reductions, if any, that come out at that time."

Because we need more jobs now, because we have not yet come out of the woods with respect to our economic problems, because the extent of recovery that we are hopefully undergoing now is as yet unknown, because we are basing our most optimistic projections on figures for 1 month, we have to move on the problem of unemployment now.

My principal objection to the bill as it is now before us is not that it is a bad bill but that it is too little. I am terribly concerned that what we have done is to put the problem of unemployment on the back burner; that we have moved to another more exciting subject, the energy problem; and that we have taken the position that we had better wait on doing something effective for those who are now out of work.

This amendment would put people to work, and it would do so by saying to people who are in the middle- and low-income tax brackets, "We are going to offer some relief to you, and we are going to do it now."

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SCHMITT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, the distinguished Senator from Missouri has described to you the nature of amendment No. 200 to H.R. 3477, and has indicated many of the detailed reasons why such an action by Congress would be appropriate at this time.

I wish to associate myself very closely with his remarks and to expand, to some degree, on more general aspects of the macroeconomic situation that we face in this country today.

Macroeconomics generally, I take it, refers to the economics of the country as a whole versus the economics of a house in the country.

It is interesting that as I travel through New Mexico and occasionally in other parts of this country, the average homeowner and homemaker tend to understand better why we have inflation than does the Government itself, because they understand what happens when you spend beyond your means.

It is clear from the recent recess, as it has been for some months if not years, that the two most critical economic problems facing the average American are inflation and unemployment. Inflation is probably a worse problem because it affects the entire country. Unemployment as bad as it is, affects individual Americans but not across the board. They are very closely tied to each other, as I will discuss.

I believe the President took the correct action when he withdrew his support for the $50 rebate as it had been proposed earlier to Congress. However, the withdrawal of that support did not make the basic problems of inflation and unemployment go away.

The $50 rebate was probably the best example I can imagine of what not to do in our present economic situation.

History shows clearly that most of the $50 each person would have received probably would have been used to pay an old bill or for basic necessities. As important as paying those bills and providing for necessities is, as near as I can tell during the recent recess most people realized that such an act by the Federal Government would accelerate the inflationary pressures they feel and will feel in the future and would lose far more than the $50 in the long run.

The $50 rebate would have increased

the spending power within our society, but it would also have increased the Federal deficit by somewhere between $11 billion and $12 billion, thereby increasing the Federal deficit without any long-term increase in demand or productivity. More inflation would have been the inevitable result.

At present, the economy seems to be recovering from the downturn of recent months, and it could well be that with this kind of economic stimulus we should learn to leave well enough alone.

However, the economy very clearly is inadequate for a large number of people and for many of the purposes to which this country is dedicated.

Inflation is the biggest economic problem that faces Americans, that faces the country, and that faces the world. There is very little disagreement on this fact.

Unemployment is a direct consequence of modern inflation. Thus a reduction in inflation deserves the priority attention of Congress just as does a reduction of unemployment.

Although it may be hard for the average working American to see it in his or her own life, our inflation is the result of too much money in the country as a whole and too little productive work. The government is distributing money at a much greater rate than the people create basic goods and services for which that money can be spent. This causes a steady increase in prices.

There are two ways by which Government gets the money it spends; both ways cause increased unemployment in the private sector. It taxes and it borrows. Taxation reduces the amount of money that would be saved or reinvested in a home or business. Borrowing reduces the amount of money in banks and other financial institutions which the private sector would borrow to invest in homes and businesses. Thus, both taxation and borrowing by the Government reduces the availability of money that the private sector could invest to create new jobs.

Much is also being made of governmental stimulus spending to create public service jobs. However, in creating public sector jobs, the Government eliminates private sector jobs in many cases. Since the bureaucracy is very inefficient and costs a great deal to run, this process eliminates more potential jobs than are created. Also, the public sector jobs produce much less than private sector jobs in terms of goods and services for the money spent, causing even more inflationary pressure.

Mr. President, I should add at this point, to repeat something that I have said before on this floor, that the single greatest complaint that my constituents have in New Mexico, and I believe that constituents throughout the country have when they talk to their Senators or Representatives, is the complaint about the impersonal nature of Government and of the bureaucracy. And this impersonal nature directly reflects the inefficiency with which our Government is operating in many, many ways.

But taking money in taxes and borrowing is still not enough to pay for all the programs Congress creates. In order to have an even greater supply of money in the economy, the Federal Reserve System creates money either by adjusting the amount of credit people can get or by creating new money to buy back Federal securities from the private sector. This process would not hurt us if the rate of increase in credit and new money equaled the rate of increase in the production of goods and services. However, in recent years the rate of increase in credit and money has far outstripped the rate of increase in productivity, and we have seen a rate of inflation somewhere around 6 percent—higher, unfortunately, about a year ago—and now we see signs in the wholesale price index of double-digit inflation returning.

Eventually, when the Federal Reserve System tries to control inflation, it does so by reducing credit, increasing interest rates and restricting its purchase of securities. When these actions are taken, money for investment drops off even further and new jobs are not created at a rate to match the constant increase in the labor force.

Obviously, a more realistic reaction by Government must be to gradually and simultaneously reduce both taxes and Government spending, so that money can be returned to the private sector where it can be used in the creation of real jobs and more goods and services. Control of the money supply is a prerequisite for any stabilized economy; however, that supply must match the real availability of goods and services.

Mr. President, I am supporting the permanent tax cut as proposed in amendment No. 200 primarily because I think that the people of this country will respond to a permanent and predictable increase in their available income by raising the demand for major goods, which, in turn, as the inventories for such goods are depleted, will increase the demand for new production and, therefore, for increased employment.

There is considerable historical precedent for such happening, although, as with most historical precedents, that can be debated. I hope that in the course of this debate relative to H.R. 3477 and amendment 200, we in Congress will grodually come to grips with the reasons why there is unemployment of various kinds and what it takes to do something about this very bad problem.

However, in the process of passing a permanent tax cut which will decrease the revenues available to the Government and therefore increase the deficit to some degree, we must do everything we can to decrease Government spending by a comparable amount; and in this regard I commend the President for his campaign promises to increase the efficiency of Government and, by so doing, to decrease its cost.

As Government reorganization takes place, with the approval of Congress, I hope that our prime consideration in that approval will be to increase efficiency and therefore decrease costs. In this process, I am sure that any inflationary pressure that might come from a permanent tax cut such as we are discussing will be mitigated. But I think it is important that as we discuss the problems of reducing unemployment we understand that our unemployment is composed of two basic types, one of which will be affected in a very positive way by the tax cut and the increase in demand that will come from that cut, and the other of which is going to take even more special measures.

The first type of unemployment is the so-called cyclical unemployment, which is basically unemployment that relates to the ups and downs of our basic economy. We should add to that the type of unemployment that will result in a static economy from just the yearly increase in the labor force. It is this cyclical unemployment and new labor force unemployment that is most affected by the lack of capital investment. Capital investment is stimulated by demand, by consumer confidence, and by the availability of risk capital for that investment, but it is depressed by overregulation of the economy and of business, and of personal lives. It is depressed by the judicial hassles that one gets into in trying to do business in this country today, and just living in this country today. It is depressed by inflation. For example, as the price of owning a home or buying a home increases, there is less incentive to buy homes, and therefore a decrease in the incentive to invest capital in a home.

Maybe one of the most critical long-term depressions on the rate at which we invest capital will be our inability to come to grips with the energy crisis. I am sure that particular question will be debated for some great length of time in this session of Congress.

The other form of unemployment is commonly called structural unemployment, but really means those individuals who, through basically no fault of their own, cannot find a job in our economy no matter how well that economy is doing.

It is this type of unemployment that is going to take some very special measures, which I am sure will be discussed further as we debate H.R. 3477.

I hope that we will target some special efforts to train the structurally unemployed so that they can, in fact, participate in the economy as it expands under the helpful influence of amendments like amendment No. 200, which would give us a permanent tax cut.

But I mention as preliminary to the debate that it is in the heart of our educational system where we find the true roots of the problem of the structurally unemployed. It is the 16-year-olds who find there are not jobs available for them in our economy. Our educational system is failing us and failing the society as a whole.

Mr. President, I hope that this body will realize why the American people feel greatly inhibited by the level of Federal taxation.

They watch as inflation takes its toll by raising them into progressively higher income brackets without any real increase in take-home pay.

I think one of the best things we can do for the American people at this stage of our slow and gradual economic recovery is to give them the opportunity to spend more of their income and take away some of the opportunity for the

Government to spend that income for them.

I can only speak for the people of New Mexico, but I think it would be hard to find any significant number of those who would say that the Government can spend their money better than they can spend it themselves.

As this debate over the permanent tax cut goes on, I think we are going to find an increasingly larger interest among our constituents for the kind of permanent stimulation that they would offer to our economy if afforded the opportunity to spend these dollars week after week, month after month and year after year.

With the passage of the Danforth-Javits amendments, however, we are not relieved of our responsibility to insure that all of the gains that would be realized by such a tax cut are not lost because we in the Congress did nothing to reduce the level of outlays by the Federal Government and to take permanent steps to reduce the impact of the Federal Government on the daily lives of individuals in this country, an impact that is not only financed through taxes, but is extended through the ever presence of that government into almost every activity that we undertake.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MORGAN). Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, essentially what is before us now is the tax stimulus bill as it was reported by the Finance Committee. The amendment which will be offered by Senator JAVITS and myself would offer a rate cut for middle income and low income taxpayers.

In the hearings before the Finance Committee substantial discussion was given to the so-called marriage penalty, which means that under the law as it is presently written, it sometimes makes more sense to be single than to get married in that you have a higher standard deduction if you aggregate the standard deductions for two single people than for a married couple. Therefore, the Finance Committee addressed itself at some length to doing something about the standard deduction, both to simplify the present law, which we did do, and to lessen the amount of the marriage penalty.

However, what we did in dealing with the marriage penalty was to increase the standard deduction for married people and to reduce it somewhat for single people. The result of this is that under the bill as it was reported by the Finance Committee there are some people who will be paying higher taxes as a result of what we did than they are now paying.

As a matter of fact, an estimated 1,725,000 Americans are going to end up paying more taxes under the bill before us now as a result of what we did to correct the so-called marriage penalty in the standard deduction.

With the proposal which has been offered by Senator JAVITS and myself, amendment No. 200, as modified, no taxpayer will be paying more taxes than he or she is now. The people who are going to be paying more taxes under the bill as it came from the Finance Committee are single people, single taxpayers with adjusted gross incomes of $13,750 or more. Under the present bill, these people will actually be paying more taxes in the future than they are paying today.

Under the proposal Senator JAVITS and I have offered in amendment No. 200, as modified, this group of taxpayers will not be paying more taxes, but all taxpayers, in fact, will be paying less in taxes.

Of the single people with adjusted gross incomes of $13,750 or more, who are these people? Well, of course, all kinds of people in all age brackets are single, but especially the people who will be affected by this are people who have just gotten out of college, who have just begun their careers, who do not yet have jobs which pay them large incomes. Oftentimes, they have worked their way through college. They have incurred debts in order to complete their education. They have their initial startup expenses in life.

So many people whom I have interviewed for employment in my office in the Senate—and before that, when I was attorney general of Missouri—are just getting out of law school, young people complaining about how hard it is to get started in life and start providing for a family if they are married. This group, of course, is not the married group. These are the single people who are trying to get established and get their feet on the ground.

We are saying through the bill as it now stands before us: "We have a surprise in store for you because we are not getting rid of, though we are at least mitigating the so-called major penalty; but guess how we are doing it. We are going to increase taxes on you who are single."

So I think this is a further reason, among the number of persuasive reasons, for going with the amendment that Senator JAVITS and I have proposed.

This is simply not the time in our country's history, given the present unstable state of the economy, to say to any group of taxpayers, and especially to younger people who are trying to get going, "You are going to have to pay more taxes, not less." I do not think that group would view it as tax reform. I think they would view it as a penalty they are not able to pay.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I ask unanimous consent that the name of the Senator from Nebraska (Mr. CURTIS) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, the debate upon this amendment of Senator DANFORTH and myself has extended through a weekend which had some extremely portentous developments respecting the economic issues which are here concerned. This weekend saw a very drastic revision of the economic facts upon which the administration has based its position on this tax bill.

In this connection, I ask unanimous consent to have printed in the RECORD an article detailing these facts, published in the Wall Street Journal.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REVISED U.S. ECONOMIC FORECAST INDICATES SLOWER GROWTH, HIGHER INFLATION FOR 1977

WASHINGTON.—Despite all of its optimistic talk recently about the economy, the Carter administration has scaled down the official economic forecast for 1977.

The Office of Management and Budget published a revised forecast that projects slightly slower economic growth, sharply higher inflation and about the same unemployment rate. The new forecast reflects the effects of the severe winter weather and the continued drought in the West, the Budget Office said, adding that the "overall adverse effects" of the weather have proved "small and temporary" so far.

Budget Director Bert Lance insisted that "the economic recovery is proceeding along the general lines expected in February," when the first Carter economic forecast was made, and is doing so without some of the original stimulus measures proposed and in the face of continuing lower-than-expected federal expenditures.

But the official administration optimism, which first surfaced when the President decided earlier this month to kill the $50-a-person tax rebate, isn't shared by many government economists. For example, just before the revised forecast was published last Friday, one senior analyst said, "there's plenty of cause to be worried about the rest of the year."

Specifically, the revised forecast calls for:

A 4.9% gain in 1977 in "real" gross national product, the total output of goods and services adjusted for inflation, compared with the 5.4% gain projected in February. In 1978, the administration expects a 5.6% gain in real GNP, up from the 5.4% forecast in February.

A 6.7% increase in the consumer price index from December 1976 to December 1977, up sharply from the 5.3% forecast earlier. The comparable 1978 increase is expected to be 5.6% compared with the 5.2% forecast earlier.

An average unemployment rate this year of 7.2 percent, compared with the 7.1 percent forecast earlier; the Budget Office noted that unemployment "is still estimated to fall below 7 percent by the end of calendar year 1977." In 1978, unemployment would average 6.4 percent, compared with a February forecast of 6.3 percent, and is projected to fall to nearly 6 percent by year-end.

As expected, the Budget Office also published revised federal budget figures that narrow the projected federal deficit for fiscal 1977, ending Sept. 30, to $48.7 billion from the February estimate of $68 billion. Of this $19.3 billion reduction, $12.2 billion comes from the administration's withdrawal of the tax rebates and business tax incentives, $6.1 billion from lower-than-expected federal

spending and $1 billion from an increase in anticipated federal revenue.

The projected deficit for fiscal 1978 was widened to $57.9 billion from $57.7 billion. The administration has always stated its economic growth goal as a 5.75 percent to 6 percent rise in real GNP as measured from the fourth quarter of 1976 to the fourth quarter of 1977. Administration officials now say that the goal is for growth of slightly under 5.75 percent.

The concern of many government analysts who question the administration's optimism is that consumer spending won't be able to continue supporting the recovery and that there aren't any strong signs of a major upturn in business spending on plant and equipment. Moreover, these analysts say, the President's new energy program may have the effect, at least in the short run, of turning businessmen's capital investment plans even more cautious.

In that event, says a top economist, the big worry is economic performance in 1978.

Mr. JAVITS. Mr. President, Budget Director Lance, though insisting that the "economic recovery is proceeding along the general lines expected in February"—to wit, February last—went on to revise the very material forecasts—and I assume he was referring to the third concurrent resolution on the budget for fiscal year 1977, to which I will return—though he said that generally it is going along as anticipated, what he then gave as a revised forecast was drastically different from what was anticipated in February.

For one, we scaled down the real growth rate—that is, the real gross national product—from 5.4 percent, which was a gain for 1977 fiscal year, projected in 1977, to 4.9 percent.

Mr. President, people should not be confused about those figures. That is a 10-percent drop. When you apportion 10 percent to a $1.6 trillion-plus economy, that is an enormous figure and represents an enormous revision in every prospect which an economy as great as ours has.

Also, Mr. President—and this is not an inconsiderable fact—it gives signals to the whole world, all of which, except for three countries—the United States, the Federal Republic of Germany, and Japan—is in a downtrend economic situation.

The rest of the world has exhorted those three countries to stimulate their economies. Germany and Japan have been very reluctant to do that and have not done it yet. Whether they are waiting for our lead or whether our lead will bring them on, I do not know, but they have not done it.

When our country, which has the leading economy on Earth, announces this reduction in our forecast, this is very major news to everybody in the world who is interested in the economic situation, let alone the economic situation in the United States.

Another revision was a very sharp increase in the Consumer Price Index—that is, in the inflationary rate. It is now estimated that that rate will hold at 6.7 percent, as against the previous forecast of 5.3 percent. That is in the area of 20 percent. For an economy of this size, that is an enormous concession to inflation and represents a real shock to the wage earners in terms of their calculation as to what will be their real income based on the wages and salaries they receive.

Also, it represents a very important escalation in our argument that, at the worst, this revision of individual income tax rates should be taken as a readjustment to the higher brackets in which wage earners have been cast without improving or increasing in any way their actual living opportunities, living standards. Simply by the erosion of inflation, this gives them more of the same and is a cause for very deep concern that the economy is not being stimulated in the way which was contemplated in February.

Then, to add the crowning blow, we have even a slight increase in the average unemployment rate forecast for this year. We already have a very serious and completely unacceptable unemployment of 7 million Americans, and we had hoped for even a marginal decrease in that. It is now assumed that we are unlikely to do better than to have a 7.7-percent average unemployment rate, with the hope that the actual figure by the end of calendar 1977—to wit, December—will fall below 7 percent.

Even the forecasts for next year do not give us much hope. With all of next year's forecast, it is 6.4 percent, and possible a fall to nearly—not even below, but nearly—6 percent by the end of the year.

Mr. President, these three critically depressing facts are almost irrefutable proof that we have to do more in the way of the right kind of stimulus to the economy than we are doing on the basis of this bill, with the President's $50 tax rebate now omitted.

Our argument on this side never was with the amount of the stimulus; it was with the method of the stimulus. That is why we propose the permanent personal income tax cut. We felt that to borrow $11.5 billion in order to hand out checks to millions of taxpayers, based upon surveys which have been made, presents the near certainty that it simply would be used to pay old bills or would be put in the bank or, even if used for shopping, would make a difference of somewhere between 30 and 90 days; and then you would be back exactly where you were. That was the reason for our opposition. We felt that readjusting the opportunities for maintaining the living standards of the American people through reducing the brackets in which they fell was the way to go. It seems to me that we are fully sustained now by the obviously more realistic look, having had one quarter's experience, which the administration has taken at the economic facts.

Mr. President, as to the fiscal policy—as to the Government income and the Government outgo—again it seems to me that we are very strongly sustained. The fact is that we all want a balanced budget; that we want no deficit; and that the only excuse for a deficit is either to maintain the national security, to maintain a very basic justice in our society, or to stimulate the economy for a better day next year or the year after that.

The last was the policy along which we were engaged in this whole venture of a tax bill.

Now, Mr. President, we find that that deficit has very materially been reduced by some $19 billion not only by the withdrawal of the tax rebate, which I discussed a minute ago, but also by the expectation of much lower expenditures than we contemplated, and by a slight increase, $1 billion, in anticipated Federal revenues.

It shows that we can within the compass of our advanced planning do exactly what this amendment recommends, to wit, reduce the permanent personal income tax rates.

We are sustained further, Mr. President, by the comparable projection of the deficit for 1978. This deficit is estimated to be $57.9 billion absent the kind of stimulus which this tax cut would give and, it seems to me, therefore, that the material—now, that also estimates the situation as a tax bill without rebate but without the personal income tax cuts, and shows a deepening requirement for stimulating the economy rather than a lighter one.

In short, if we are going to have a much bigger deficit in 1978 on the administration's approach to it, then by all means the case for endeavoring to stimulate the economy so it materially reduces that deficit—and we know from history that individual income tax cuts ever since the end of World War II have resulted in bringing in more rather than less revenue and in giving a feeling of confidence to our people, a willingness to invest, a feeling they do not have to go out and deal only with short-term problems, that our country continues to have as we have always had the deep faith it has in a very long-term future, and that Congress is cognizant of the tax problems of the people, and when it can, as it can, by virtue of these deficit figures give the people an opportunity to improve their tax situation, that it will do so.

It seems to me that again the administration's own findings confirm the argument which we make, to wit, that the deficit this year, much smaller than we had contemplated, affords us the opportunity to make this investment in ourselves, and that the deficit next year makes it essential that we make an investment in ourselves which will materially improve the economic and fiscal situation in our country.

This will mean increased economic activity which this will engender. This is especially true as the two elements which make up the rather dimmer prospects for 1978 are a failure of capital investment, the very thing I am talking about now, to come up to any optimum figure, and also the weakness of consumer demand. Both of those things are expressly targets for the kind of amendment which we have called for.

In addition, Mr. President, we are very, very deeply concerned about the fact that economic performance in 1978, absent some affirmative constructive and statesmanlike action such as the one we recommend in our amendment, will very materially lag even below the estimates which are made at this time, in the spring of 1977, with an enormous amount of justification as I find from discussions with many of the country's

leading economists to sustain that proposition.

A few other things: In February of 1977 we adopted the third budget resolution, Mr. President, and the committee reported in its report No. 95–9—that is the Budget Committee on this particular proposition, at page 4 the following:

On February 9, 1977, the Committee ordered reported a third concurrent resolution on the budget which took these various proposals into account.

To wit, the various proposals from the President, leading economists, business and financial experts, et cetera.

Without exception, the expert testimony and many of the reports from other standing committees recommended economic measures at least as stimulative as those provided for in this third budget resolution.

The third budget resolution took into account the stimulation of an expenditure of over $11.5 billion in the so-called $50 rebate, and what the committee was talking about was the global effect of that impact of buying power rather than the specific details as to how it went out to the public.

The Budget Committee continued:

The committee believes that the fiscal stimulus recommended in this resolution will make it possible for the economy to resume a vigorous recovery in 1977 and make substantial progress toward the Congress' longer-term goals.

Let us see what they specified as their longer-term goals and compare them with the revised goals of the administration.

I go back to the report, page 4:

Real GNP should expand at a rate of 5½ to 6 percent during 1977 and bring employment to 7 percent or less by the end of the year.

Now, the forecast is for a real growth rate of under 5 percent, 4.9 to be exact, rather than 5½ to 6, and the forecast for unemployment, though it continues to be hopefully in the very last month less than 7 percent, is nonetheless calculated for the year at an average of 7.2 percent.

In short, Mr. President, the downward revision indicates that the absence of a constructive kind of stimulus such as we argue for would be extremely damaging, and even the Budget Committee contemplated some kind of rate reduction, and this is what they said at page 5 of this report:

The committee's recommended revenue floor would permit enactment of up to $12 billion of the tax relief as proposed by the Carter administration—

Then I go on to quote again from the same sentence:

or enactment of permanent tax reductions or other forms of temporary tax relief of comparable amount.

In short, they themselves contemplated exactly the situation for which we are contending.

Now, Mr. President, there are other aspects of the report of the Budget Committee which are also very interesting. They forecast at page 7 a deficit of $50.6 billion for fiscal 1977 in their second budget resolution, and in their third budget resolution they adjusted that figure to $68.2 billion for fiscal 1977.

Our amendment is calculated at an expenditure on the order of magnitude of $4 billion in fiscal 1977, coming very, very handily and very easily within the expected deficit figures and the budgetary figures which they had contemplated.

In addition, they dismissed in their report any really inflationary aspect in the utilization of this figure. They said, for example, at page 12:

The temporary inflationary effects of these supply difficulties should not be allowed to impede the implementation of appropriate fiscal and monetary policies.

Then they took account of the problems we had had this winter, and said, at page 12 again:

... the effects of the winter provide an additional reason for personal tax relief at this time.

They dismissed the idea that the ordinary rate of consumption would give us the rate of economic recovery we needed, and they said, at page 11:

... consumption is unlikely to lead to economic recovery except to the extent that it is stimulated by the increased disposable income resulting from a tax reduction.

Indeed, as you read this report, it was very clear that they themselves were rather unsure about the rebate, even though this is the report of the majority, and very favorable to the administration, as we would fully expect. They themselves constantly raise the issue of a different kind of approach, to wit, a cut in the personal income tax rate.

Now, Mr. President, some other evidence which it seems to me is critically important. I am the ranking Republican member this year—we change from House to Senate and back again every 2 years, but this year I am the ranking member—of the Joint Economic Committee. It is extremely interesting to see how the Joint Economic Committee, which is supposed to be the "think" committee of the House and the Senate, reacted to the same situation in its report on the economic report of the President, which was issued March 10, 1977. I would like to refer to that because it is so interesting.

They said, at page 42:

In short, the economy is presently at least one full year behind the time table previously recommended by this Committee and others for recovery from the 1974-1975 recession. The present year offers no prospect of regaining this lost ground.

Then they go on as follows, on the same page, skipping one sentence that is technical in nature:

The loss of output during 1976 just from falling short of the recommended recovery path amounts to about $43 billion or an average of about $200 per person for each individual living in the United States.

This was their feeling. And they go on to further point out what would be the consequences of not reducing personal income taxes. This time they add relevance to the extension of the cuts which are also contained in this bill, which were continued last year, which amount to about $18 billion; but what they say about it, which is the principle involved in this discussion, bears just as much upon the amendment which we are recommending to the Senate.

They said, on page 83—they pointed out that there would be a sharp rise in the effective tax rate if we did not continue these cuts, and they said:

Such a sharp rise in the effective tax rate would seriously erode the growth of consumers' real after-tax incomes and restrict the growth of the private economy.

That is exactly what we contend, Mr. President: that putting the taxpayer, simply because of the money amount involved, without regard to his real purchasing power, into the higher bracket into which he has been put, and therefore taking out of his pay envelope the higher number of dollars, would meet exactly this test, to wit: It represents a sharp rise in the effective tax rate, seriously eroding the growth of the consumer's real after-tax income, and restricting the growth of the private economy.

In fact, Mr. President, we have all seen and been alarmed by recent figures which indicate that there is really, when you take the average family in the United States, for the first time in a very long while a diminution in the real purchasing power, to wit, the real living standard, of that family, by about 3 percent—literally a reversal of everything we consider to be almost sacred in the American economic system.

Here again, I find in the report of the majority of the Joint Economic Committee confirmation for the proposition for which we are contending. They say, at page 84 of their report, to which I have generally referred—by the way, they themselves were deeply concerned about the rebate as being a proper way in which to approach this matter, and I would like to read that paragraph, because it is very interesting and important as it leads into the basic point which I shall make in a moment.

I read from pages 83 and 84:

Most of us have supported the tax rebate this year—

This is the majority; I do not support it, and did not support it, but I go back to the quotation:

Most of us have supported the tax rebate this year for lack of a better alternative to stimulate the economy quickly. But, we do not wish to see the rebate repeated in 1978. Tax rebates have the disadvantage that a lower proportion tends to be spent than would occur if the tax change were permanent. A related defect is that rebates have little secondary effect on business investment because businessmen are aware that the rebate-induced rise in consumer spending is only temporary.

And so on.

Mr. President, that also has a very direct bearing upon the concept of stimulating the economy, in a real as well as in a psychological way, by cutting the permanent personal income tax rates.

Now they go on with this rather important passage on page 84:

The large increase in the share of personal income taxes in GNP which would occur under the Administration's proposed budget for fiscal year 1978 should be avoided. This will require a tax reduction somewhat larger than just the extension of the present personal tax credits. In the First Concurrent

Resolution on the Budget for fiscal year 1978 Congress should make provision for this larger personal tax reduction.

The tax reduction could be achieved, they go on to say, by temporarily lowering the tax rates, by enlarging the personal credit, or in other ways. To quote the remainder of the paragraph:

In designing the specifics of the tax reduction, every effort should be made to ensure that it meets distributional objectives as well as fiscal policy requirements and that it does not introduce any new obstacles to tax reform in 1979.

Incidentally, what we are advocating here meets exactly every one of those tests and I think they are very worth detailing, because there is nothing like an analysis of points of view which are established before the political situation really gets hot, as it is now.

First, they say every effort should be made to insure that a tax cut meets distributional objectives.

By that I assume they mean justice and equity of distribution to the various participants in that tax cut.

Our tax cut starts at a peak of 14 percent of taxes at the point in the scale of taxable income which stands at $8,000. Then it goes down to as little as 1 percent of taxes at the point of those who pay taxes on $30,000. From then on, it is meaningless in terms of any real effect. But it seems to me that meets distributional tests in that the overwhelming weight of the tax cut comes in the bracket of those who are the best customers, the most likely to buy the things which represent investment and which represent big ticket items, being in the bracket from $8,000 to $20,000 of taxable income.

I think we meet very accurately the distribution test.

Second, that it meets fiscal policy requirements.

It seems to me that we certainly have met that test admirably well. The contemplated deficit was about $68 billion. That deficit is now, in round figures, estimated at about $20 billion less, to wit, $48 billion. Our permanent tax cut, even on a full year basis is several billion dollars less than that. It is something estimated in the area of $12 billion.

Three, that it does not introduce any new obstacles to tax reform in 1979.

Mr. President, that is one issue to which I would really like to address myself, because that is very much at the heart of this debate.

I do not think, in my honest opinion—I can be argued with, but I have been around here a little while—that there is anything less than an extremely decisive majority in the Senate for a permanent personal income tax rate cut.

But what is in the minds of enough people to make the difference between a decisive majority and a skinny majority, or perhaps no majority at all, is whether or not it suits better those who advocate tax reform to sweeten it—to use a popular word—with this tax cut when tax reform comes along.

I have practiced politics a long while, it is not only a great democratic exercise assuring our freedom, but also a great game in which very brilliant men of vast experience are engaged. Normally, we would say, "Fine, that's just part of the game in which we're all engaged and, after all, there's some privilege in being in the majority and there's some penalty we have to pay for being in the minority."

The only difficulty is that it is not only politically we would be paying it. It is in the interests of our country that we would be paying it, and for the following reasons:

First, we already know energy is going to take up most of this session. The minimum required, based on history and tax reform measures, is somewhere between 1 and 3 years.

Let us assume it is just 1 year, Mr. President—a very conservative assumption, indeed.

We have already been told energy has to dominate this session. We have no time, for example, for welfare reform and many of our cities may well go broke because that has been deferred on the calendar.

So, Mr. President, given at the very basic minimum tax reform by toward the end of 1978, before it gets in here and the President recommends it, we have hearings, we spend a minimum of 6 weeks fighting about it, maybe another 6 weeks in conference, maybe another 6 weeks to get that conference report approved.

In all of that time, Mr. President, Rome will be burning while we fiddle, because the President now opines that 1978 will not be as good a year as 1977. So that reduction will come in the very year which could have been avoided if we had acted in time in 1977. It seems to me that is a very powerful argument in our national interest and the interest of thousands of people who would not otherwise be unemployed.

Next, Mr. President, is the sweetener argument. What kind of tax reform is this going to be? Is it going to be a tax reform that can stand on its own feet? Or is it going to be a tax reform in which with every bit of tax reform a lollipop has to be given to induce people to do it, even though it is not a good tax reform at all and may make the tax code far more unjust after than before?

We have had lots of examples of that, Mr. President. I think our people should be alerted and warned against the need of having a sweetener in the tax reform, because it cannot stand on its own feet as a desirable reform in the interests of the American people in simplifying the tax code and distributing more justly the tax load, which already most of the American people in simplifying the tax code and distributing more justly the tax load, which already most of the American people consider to be backbreaking.

Mr. President, it seems to me, aside, as I say, from gamesmanship, to wit, Democrats versus Republicans, that in the highest national interest that argument must yield.

It must yield, because this is the timely moment and the President's own estimates, own forecasts, own people, and own plans, say it is the timely moment and that next year we may be in the soup if we do not act at once.

Indeed, that is their estimate, their projection, their prediction, in terms of unemployment, gross national product, as well as inflation.

Second, that woe be to us if we have a tax reform that has to have a big sweetener in order to get us to swallow it, because otherwise it would be too bitter and we would cough it up and we just would not take it.

Mr. President, it seems to me that that is a very strong argument for acting now rather than not for acting now.

It would be highly desirable if the President had said, instead of just, "I withdraw the $50 rebate, it isn't a very good idea, I believe the American people are entitled to have their brackets adjusted, because we have a progressive income tax in terms of the impact upon them of inflation."

By the way, this particular amendment does not even quite do that. Generally, overall, it reduces taxes about 7 or 7.5 percent, and the adjustment required is somewhat higher than that. But at least it makes a very good effort in that direction and does have some substantial results in that direction.

But, Mr. President, we do not live in that kind of society and the President did not feel he wanted to do that. Perhaps the President himself, eminent, distinguished as he is, and as much as we wish him the best of everything, because that is, after all, the future of our country, may also have had in mind the idea of sweetening to get tax reform which he will propose by having a tax cut in his pocket which can accompany that tax reform.

Mr. President, that is not necessarily what we ought to decide, looking at the highest interests of the United States. I deeply believe, Mr. President, on the contrary, that what we have to decide is with the President's own figures, the anticipations of the Budget Committee and the Joint Economic Committee, the broad opinion of distinguished economic and business thinkers dictates that this is precisely the time and precisely the occasion to adjust the personal income tax rates of Americans who are paying taxes in the true middle-income bracket. Therefore, the proposal which we shall make in the form of an amendment should be adopted by the Senate.

Mr. CHAFEE. Will the Senator yield for a question?

Mr. JAVITS. I yield.

Mr. CHAFEE. I would like to ask the distinguished Senator from New York if he will amplify a bit on two parts which seem to me to be the heart of this issue, which I thoroughly support: Namely, that it will stimulate the economy by encouraging those who receive a tax cut to start into long-range purchases of the type that will foster increased production and thus greater employment, and the second point made which seems to be so valid, the fairness that it is going to achieve in our individual income tax rates, because those who have been moved from a lower bracket into a higher bracket due to inflation achieve no greater relative income advance, because they are in higher brackets and thus have a greater portion of their income taken by the income tax.

As I understand, in 1956, 3 percent

of the American taxpayers were in the 30-percent bracket. Currently, 30 percent of the American taxpayers are in the 30-percent bracket. Thus, those who are in the lower half of our income range, we might call it, are paying a far greater proportion of taxes than they formerly were. Is that correct?

Mr. JAVITS. That is entirely correct. The savings which are incorporated, roughly in the order of magnitude of $225 to $250 per taxpayer, apply to taxpayers in relatively low-income ranges. That is to say $8,000 a year to $12,500 a year. When we realize that for a family of four their aggregate income is $6,400 a year or less, they are in the poverty level. We cannot call such people affluent. Yet so large are the taxes for that group that even a modest cut such as the one we are describing in terms of their rates will reduce their taxes so materially, in the area, as I say, somewhere between 6 and 7 percent and 12 and 14 percent.

Mr. CHAFEE. I would like to return to the points the Senator from New York made in connection with tax reform. We are all told to postpone this action, because the administration is going to come forward with a tax reform proposal in the fall.

The Senator pointed out that this Senate is going to wrestle with the energy program starting soon and that will take up well up into the summer, I presume.

Mr. JAVITS. Easily.

Mr. CHAFEE. Then we get to the question, are we going to get to the so-called tax reform? I feel, and I know the Senator shares these views, that we should get on with the tax cut for the American public, both for the reasons which have been cited before, the stimulation for the fairness of those who have been forced into higher brackets although their net take home pay in the value of their dollars has decreased, and also I think we want to get on with this, because I do not see what else is going to be done.

Mr. JAVITS. The Senator is 100 percent correct. We are deeply indebted to my collaborator, Senator DANFORTH, a member of the Finance Committee who proposed the amendment which we will propose to the Finance Committee, who traced the history in terms of time lapse of the 1976 Tax Reform Act. Let us remember that when we talk about tax reform allegedly we just had a tax reform, dealing with the maximum tax, the minimum tax, in many other ways dealing with tax shelters, et cetera. It was a very, very complex law. As a matter of fact, only about a week ago in the New York Sunday Times a good deal of the financial section was taken up with the problems which had arisen, with the fact that in many cases regulations had not come out yet, with the fact that interpretations from the courts would take some years in order to deal with a specified section of that reform.

As Senator DANFORTH so eloquently pointed out:

> That reform commenced in February 1973 with hearings before the Ways and Means Committee.
>
> He said on page 11882 of the RECORD:
>
> It took from February 1973 until October 1976, 3 years and 7 months, to enact into law what turned out to be the Tax Reform Act of 1976.

So to pretend for a minute that it is going to serve the national interest to defer what we are trying to do in this amendment until there is tax reform is simply asking us to guess absolutely blind and wild. In 1, 2, and 3 years the economic situation unquestionably will be radically different from anything we can see now. Indeed, the economic situation was so radically different between February and April that President Carter, who had passionately pleaded for the rebate in February—this is the one thing he was going to stand on, the one thing that was going to do wonders for the American people—said in April, after saying that in February, that consumer confidence had now returned, the consumer was buying, and it was unnecessary to give the $50 rebate.

Then we get these revised figures which I have just given from the Director of the Budget, Mr. Lance, of the Office of Management and Budget, again radically revising the whole forecast.

Again I repeat, when we say a 10-percent revision in this economy, we are talking about over $100 billion in GNP. We have a gross national product of $1 trillion, which is $1,000 billion. It will probably be more in dollar figures in 1977.

So the Senator is absolutely right. First, it will take a long time, and second, as they say in the theater, what will be the situation then can only be dimly perceived darkly. That is hardly a standard by which to deal with the national interests of the people of the United States.

Mr. CHAFEE. I thank the Senator very much. I believe his arguments have been persuasive. I have seen the senior Senator from Virginia hang on to every word. I believe we have him tilting. I think probably the only thing we need to make this thing completely successful is to put that magic word "reform" before it. That gives it a mythical quality that all can support. A tax reform seems to have a better savor to the American public and to the Senators than just the mere words "tax reduction."

Mr. JAVITS. I thank my colleague. I hereby dub our amendment the tax reform individual tax rate reduction of 1977.

Mr. CHAFEE. I think with that we can proceed to a vote and to success.

Mr. JAVITS. Mr. President, I thank my colleague.

Mr. President, I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MELCHER). The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—H.R. 3477

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Wednesday, at 11 a.m., the Senate proceed to debate the amendment which will be offered by Mr. DANFORTH and Mr. JAVITS; that there be a 2-hour limitation for debate on that amendment, to be equally divided between Mr. LONG, the manager of the bill, and Mr. JAVITS and Mr. DANFORTH, the authors of the amendment, with 1 hour to Mr. LONG and 1 hour to Mr. JAVITS and Mr. DANFORTH; that at 1 p.m. on Wednesday a vote occur up or down on the amendment.

Mr. JAVITS. Mr. President, reserving the right to object—and I shall not object; I agree thoroughly with what is being done—I just want to be sure that we understand the ground rules.

A vote up or down means that the unanimous-consent agreement includes the fact that we will not have a motion to table.

Second, I hope the leader will add to the unanimous-consent agreement that this amendment may be offered at the proper place in the bill which is before us, which is at page 32, in connection with the standard deduction, rather than where it would come under the present parliamentary situation, where we are just at the table of contents.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object—and I am sure there will not be objection—one of the principals on our side who is involved in this matter, Mr. BELLMON, is on his way to the floor of the Senate and will be here momentarily.

I ask the majority leader if he has any plans for the disposition of the remainder of this bill.

Mr. ROBERT C. BYRD. Yes. If we could get the agreement to vote at 1 p.m. on Wednesday on the Javits-Danforth amendment, it would be my desire to recess shortly and to convene the Senate at 2 p.m. tomorrow; that on tomorrow and during tomorrow afternoon, other amendments would be called up and disposed of, if there be such; that debate, when other amendments are not pending, could go forward on the Javits-Danforth amendment and on other amendments which are expected to be called up after the Javits-Danforth amendment is disposed of.

I would hope that on Wednesday, the Senate could stay in late, that on Thursday it could stay in late, and that on Friday it could stay in late, if necessary, to dispose of the bill at the close of business Friday. That is merely expressing the hope. That, as I see it, would be about the only way I could respond to the query by the distinguished minority leader.

Mr. BAKER. I thank the majority leader. That is most hopeful. The schedule for the remainder of the week would appear to be fairly clear, then.

While I do not anticipate that the majority leader is asking for orders on other amendments or a certain time to vote on Friday on final passage, I express the similar hope that we could dispose of other amendments and finish this bill this week, if unexpected circumstances do not arise.

Mr. President, I see the distinguished Senator from Nebraska, the ranking member of the Finance Committee, in the Chamber, and I take it that his arrangement is satisfactory to him.

Mr. CURTIS. The arrangement is satisfactory.

There are some amendments in the so-called minority package that we may be able to discuss tomorrow, but which I think appropriately should be offered for a vote after the disposal of the question of a permanent tax cut.

I also express the expectation that if the Danforth-Javits amendment prevails, then we can immediately go ahead with the other minority items of the package. If the Danforth-Javits amendment should be turned down, then there is the possibility that some other form of permanent tax cut might be offered.

In any event, it will be the position of the Senator from Nebraska to move ahead on the bill, because those of us on the Finance Committee have been involved in it for a long time and we would like to finish it.

Mr. BAKER. Mr. President, reserving the right to object, I thank the Senator from Nebraska for pointing out that in the event the Danforth-Javits amendment were not adopted, there might be other amendments to follow on the same subject. It is my hope that it will prevail. I understand that to be the case.

Mr. HANSEN. Mr. President, reserving the right to object—and I do not intend to object—I wish to observe that the minority has proposed a package of amendments, including one which is part of a proposal I intend to offer, which would take title XX of last year's bill, which includes a number of conservation objectives, which I do intend to offer. I presume that it meets fully with the intentions of the majority leader that, while my entire amendment is not part of the minority proposal, I would have an opportunity between now and Friday, if we were to conclude the bill by then, offer it.

Mr. ROBERT C. BYRD. Yes.

Mr. JAVITS. Mr. President, Senator CURTIS and Senator CHAFEE desire to be joined as cosponsors.

Mr. BAKER. Mr. President, the senior Senator from Oklahoma (Mr. BELLMON) has advised me that this arrangement is satisfactory to him. So far as I know, there is no objection on this side.

Mr. CHAFEE. Mr. President, will we be taking up the amendments in the chronology of the bill? Is that the way we will proceed?

Mr. ROBERT C. BYRD. I think there are some Senators who have amendments that could be called up tomorrow afternoon. I would hope they would proceed to do that.

The only thing I am trying to do at this point is to get a definite time limitation for debate on the Danforth-Javits amendment and a time for a vote up or down.

Mr. LONG. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. LONG. We are agreeing, by unanimous consent, to vote on the Danforth-Javits amendment. We are simply agreeing that we will vote on that amendment, to be added at the appropriate place in the bill, which is agreed to by unanimous consent.

After we have voted on that amendment, I believe that we will be able to agree on our procedure thereafter. I think we will probably ask consent that the bill simply be regarded as original text, so that Senators can offer their amendments in whatever order they wish after that.

Mr. ROBERT C. BYRD. I thank the distinguished manager of the bill.

The PRESIDING OFFICER. Without objection, the unanimous-consent request is agreed to.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader, the distinguished manager of the bill, the distinguished Senator from Nebraska, the ranking member of the committee, and all other Senators who have had a part in bringing about this unanimous-consent agreement.

ORDER FOR RECESS UNTIL 2 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 2 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RESUMPTION OF CONSIDERATION OF H.R. 3477 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized on tomorrow, the Senate resume consideration of the Tax Reduction and Simplification Act of 1977.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM TUESDAY UNTIL 10:30 A.M. ON WEDNESDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on tomorrow it stand in recess until the hour of 10:30 a.m. on Wednesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS ON WEDNESDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Wednesday, after the two leaders or their designees have been recognized under the standing order, there be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR NO ROLLCALL VOTES PRIOR TO 4 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that if any rollcall votes are ordered on amendments tomorrow or on motions, with the exception of any motion related to the securing of a quorum, that such rollcall votes not occur before the hour of 4 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR RECORD TO REMAIN OPEN UNTIL 5 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all Senators may have until 5 p.m. today for the purpose of introducing bills, resolutions, petitions, memorials, and statements in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar, all of which, I believe, have been cleared.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Reserving the right to object, and I shall not object, all of the nominations on the Executive Calendar are cleared for consideration on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE JUDICIARY

The assistant legislative clerk read the nominations of Howell W. Melton, of Florida, to be a U.S. district judge for the middle district of Florida and William M. Hoeveler, of Florida, to be a U.S. district judge for the southern district of Florida.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed.

DEPARTMENT OF JUSTICE

The assistant legislative clerk read the nominations of George J. Mitchell, of Maine, to be U.S. attorney for the district of Maine for the term of 4 years; and Leonel J. Castillo, of Texas, to be Commissioner of Immigration and Naturalization.

Mr. HATHAWAY. Mr. President, it is with a great deal of pleasure that I note the President's nomination of George Mitchell, of South Portland, as U.S. attorney for Maine.

I have known my good friend, George Mitchell, for a number of years and I am fully confident that he will faithfully serve the citizens of Maine with the same high distinction he has demonstrated in the past in service to our State.

George Mitchell comes to his new post with an extensive background of experience in his profession of law. He has worked as a trial attorney in the Department of Justice. He is currently a partner in the law firm of Jensen, Baird, Gardner, Donovan & Henry in Portland and

he has served effectively as the assistant county attorney of Cumberland County, vigorously prosecuting a number of criminal cases before the Superior and Supreme Courts of Maine.

Mr. Mitchell is also no stranger to the political process. For 3 years, he worked here in the Senate staff as the executive assistant to my colleague, the senior Senator from Maine, Mr. MUSKIE. He has served ably as the chairman of the Maine Democratic State Committee, as a Democratic national committeeman for Maine and as a member of the executive committee of the Democratic National Committee. In 1974, George Mitchell was the Democratic nominee for Governor of the State of Maine.

George Mitchell enjoys the confidence and support of the many citizens of Maine who know of his outstanding work for our State. He is an excellent choice for the demanding job of U.S. attorney for Maine. His exemplary record of service to his profession and the people of Maine is substantial evidence of the quality of his work and the high integrity of George Mitchell.

I heartily support the nomination and I hope my colleagues in the Senate will quickly and unanimously approve his confirmation.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed.

DEPARTMENT OF STATE

The assistant legislative clerk read the nomination of W. Tapley Bennett, Jr., of Georgia, to be the U.S. Permanent Representative on the Council of the North Atlantic Treaty Organization, with the rank and status of Ambassador Extraordinary and Plenipotentiary; Robert F. Goheen, of New Jersey, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to India; and Samuel W. Lewis, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Israel.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

DEPARTMENT OF DEFENSE

The assistant legislative clerk read the nominations of Russell Murray II, of Virginia, to be an Assistant Secretary of Defense; Deanne C. Siemer, of New York, to be General Counsel of the Department of Defense; Edward Hidalgo, of the District of Columbia, to be an Assistant Secretary of the Navy; and Alan J. Gibbs, of New Jersey, to be an Assistant Secretary of the Army.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER. The President will be so notified.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, does it not follow that the pending business, which now is the Tax Reduction and Simplification Act of 1977, will automatically be the pending business on tomorrow, following the recognition of the two leaders under the order entered, and on Wednesday at the close of morning business, under the order entered?

The PRESIDING OFFICER. The majority leader is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

RECESS UNTIL 2 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 2 p.m. tomorrow.

The motion was agreed to; and, at 3:34 p.m., the Senate recessed until Tuesday, April 26, 1977, at 2 p.m.

NOMINATIONS

Executive nominations received by the Senate April 25, 1977:

DEPARTMENT OF DEFENSE

Percy Anthony Pierre, of the District of Columbia, to be an Assistant Secretary of the Army, vice Edward Alan Miller.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

William Antonio Medina, of Maryland, to be an Assistant Secretary of Housing and Urban Development, vice Thomas G. Cody, resigned.

TRUST TERRITORY OF THE PACIFIC ISLANDS

Adrian Paul Winkel, of Maryland, to be High Commissioner of the Trust Territory of the Pacific Islands, vice Edward E. Johnston, resigned.

DEPARTMENT OF STATE

Mabel Murphy Smythe, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Cameroon.

Lowell Bruce Laingen, of Minnesota, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malta, to which office he was appointed during the last recess of the Senate.

Donald R. Norland, or Iowa, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Botswana, to which office he was appointed during the last recess of the Senate.

Donald R. Norland, of Iowa, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Lesotho, to which office he was appointed during the last recess of the Senate.

Donald R. Norland, of Iowa, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Swaziland, to which office he was appointed during the last recess of the Senate.

Malcolm Toon, of Maryland, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Union of Soviet Socialist Republics, to which office he was appointed during the last recess of the Senate.

IN THE AIR FORCE

The following officer to be placed on the retired list in the grade indicated under the provisions of section 8962, title 10 of the United States Code:

To be lieutenant general

Lt. Gen. Robert E. Hails, xxx-xx-xxxx FR (major general, Regular Air Force), U.S. Air Force.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Robert C. Mathis, xxx-xx-xxxx FR (major general, Regular Air Force), U.S. Air Force.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Bennie L. Davis, xxx-xx-xxxx FR (brigadier general, Regular Air Force), U.S. Air Force.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Richard L. Lawson, xxx-xx-xxxx FR (colonel, Regular Air Force), U.S. Air Force.

The following officer to be placed on the retired list in the grade indicated under the provisions of section 8962, title 10 of the United States Code:

To be lieutenant general

Lt. Gen. Winton W. Marshall, xxx-xx-xxxx FR (major general, Regular Air Force), U.S. Air Force.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 25, 1977:

DEPARTMENT OF JUSTICE

George J. Mitchell, of Maine, to be U.S. attorney for the district of Maine for the term of 4 years.

Leonel J. Castillo, of Texas, to be Commissioner of Immigration and Naturalization.

DEPARTMENT OF STATE

W. Tapley Bennett, Jr., of Georgia, to be the U.S. Permanent Representative on the Council of the North Atlantic Treaty Organization, with the rank and status of Ambassador Extraordinary and Plenipotentiary.

Robert F. Goheen, of New Jersey, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to India.

Samuel W. Lewis, of Texas, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Israel.

DEPARTMENT OF DEFENSE

Russell Murray II, of Virginia, to be an Assistant Secretary of Defense.

Deanne C. Siemer, of New York, to be General Counsel of the Department of Defense.

Edward Hidalgo, of the District of Columbia, to be an Assistant Secretary of the Navy.

Alan J. Gibbs, of New Jersey, to be an Assistant Secretary of the Army.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Howell W. Melton, of Florida, to be U.S. district judge for the middle district of Florida.

William M. Hoeveler, of Florida to be U.S. district judge for the southern district of Florida.

WITHDRAWAL

Executive nomination withdrawn from the Senate April 26, 1977:

Alex P. Mercure, of New Mexico, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice Kenneth E. Frick, resigned, which was sent to the Senate on March 30, 1977.

HOUSE OF REPRESENTATIVES—*Monday, April 25, 1977*

The House met 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Teach me to do Thy will; for Thou art my God; Thy spirit is good; lead me into the land of uprightness.—Psalms 143: 10.

O Lord and Master of us all in the midst of the troubles of these trying times we pause before the altar of Thy presence seeking the assurance of those whose mind is stayed on Thee.

Keep us steady with the faith that behind all the fears and frustrations of the present age there is the greater good of Thy purpose for all mankind in which we can believe and to which we must be loyal if we are to walk with confidence into the days that lie ahead.

Strengthen in us all noble impulses. Increase in our minds the spirit of wisdom, in our motives the spirit of understanding and in our motions the spirit of good will that through this land of free and faithful people the nations of the Earth may be blessed. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries.

ALL-VOLUNTEER ARMY POINTS TO NEED TO FUND A STANDBY DRAFT MECHANISM

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, the House concludes today its consideration of the military procurement and research and development authorization bill. And yet, there has been and probably will be, little or no discussion regarding the ultimate future effects of our All-Volunteer Armed Forces, which in my opinion has dangerous implications to this country if not changed or modified in the near future. Not only is it proving incredibly and unexpectedly expensive, but it has two additional possibly devastating consequences.

First, I fear that we will see the development of a large, professional military elite, possessing a "Seven Days in May" mentality which is an ominous signal to our "citizen" democracy.

Second, an All-Volunteer Army has begun to create a professional management and professional nonmanagement dichotomy in our armed services which will ultimately lead to the creation of formal collective bargaining procedures in our armed services—something which very few Members I believe would want to happen.

While it is not feasible to reinstate the draft at this time, or even create a system of universal service in lieu thereof, I believe it is time to appropriately fund a standby draft mechanism and study the full implications of the future of our All-Volunteer Army, including its impact on our reserve system. The report from the Armed Services Committee, on pages 22 and 23 seems to agree.

I urge the Members of this body to give this problem their serious attention.

COMMUNIST REGIME IN SOUTH VIETNAM MARKED BY WHOLESALE DENIALS OF BASIC HUMAN RIGHTS

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, Saturday, April 30, 1977, marks the second anniversary of the Communist military conquest of South Vietnam. Systematic and wholesale denials of basic human rights have marked the Communist regime and it is apparent that the rights of the Vietnamese people are being sacrificed for the ideological ends of their current rulers. New reports tell of "re-education" camps, another name for concentration camps, in which 300,000 Vietnamese are being cruelly and unjustly held captive.

Conditions in Vietnam are so bad today, a longtime resident who has since left that now-wretched country was reported by the New York Times as describing Vietnam as a land of "widespread misery, constant surveillance, incessant propaganda, endless indoctrinations, arbitrary arrests, executions, imprisonments and exile * * * where an arrogant bureaucracy reaches into every corner of life, where books are burned, citizens are denounced, and informers thrive."

There is no freedom of speech, of the press, of assembly. In short, the Communist government of Vietnam is infinitely more repressive than any other government in that nation's history.

Despite these facts, there has been relatively little notice made in the Congress or in the media of these atrocious conditions. Many of those who in the past eloquently and persistently criticized partial infringements of freedom under previous governments in South Vietnam are curiously silent about the total denial of freedom under communism.

I believe that this House should be on record as deploring the denial of human rights in Vietnam today. I will therefore, later this afternoon, introduce a resolution calling upon the President to issue a proclamation designating Saturday, April 30, 1977, to be Vietnam Memorial Day, in honor of the millions of Vietnamese now suffering in abject slavery and in honor of the 55,000 Americans who were killed by Communist aggressors.

HOSPITAL COST CONTAINMENT ACT AND CHILD HEALTH ASSESSMENT PROGRAM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–129)

The SPEAKER laid before the House the following message from the President of the United States; which was read and referred to the Committees on Interstate and Foreign Commerce and Ways and Means, and ordered to be printed:

To the Congress of the United States:

This country spends more on health care than any other nation—$160 billion this year, almost nine percent of our Gross National Product. We have the finest medical facilities and highly skilled, dedicated health professionals. Yet many of our people still lack adequate medical care, and the cost of care is rising so rapidly it jeopardizes our health goals and our other important social objectives.

I am transmitting to the Congress two major pieces of legislation to improve our health care system: The Hospital Cost Containment Act of 1977 to hold down rising health care costs, and the Child Health Assessment Program (CHAP) to improve health services for children of low-income families.

I. Hospital Cost Containment Act of 1977.

First, I am today proposing legislation which will limit the growth of the major component of health cost in-

creases—rising hospital expenditures. The Hospital Cost Containment Act will restrain increases in the reimbursements which hospitals receive from all sources: Medicare, Medicaid, Blue Cross, commercial insurers, and individuals. The limit will be set using a formula which not only reflects general inflation, but also extends to hospitals an additional allowance for improving their quality of care. Based on current trends, the limit for fiscal year 1978 will be approximately nine percent.

The legislation will also impose a limit on new capital expenditures for acute care hospitals. The program will fix a national level for such expenditures below that of recent years and allocate new capital spending among the states by formula. With the assistance of local planning agencies, each state will determine which facilities merit new capital expenditures.

Specifically, the Hospital Cost Containment Act of 1977 will:

—Limit the in-patient reimbursements of acute care hospitals, excepting new hospitals, federal hospitals and Health Maintenance Organization (HMO) hospitals.

—Provide an automatic formula to adjust the nine percent limit for moderate changes in expected patient load. The formula will contain strong incentives to discourage unnecessary hospitalization.

—Include an adjustment for hospitals which provide wage increases to their non-supervisory employees.

—Provide an exceptions process for the small percentage of hospitals which will undergo extraordinary changes in patient loads or major changes in capital equipment and services. The program will require the Department of HEW to respond to any application for an exception within 90 days.

—Disallow in the computation of a hospital's base cost any unwarranted expenditures made in anticipation of the implementation of the program.

—Allow states which operate cost containment programs, and are capable of meeting the federal program's criteria, to continue their own regulatory approaches.

This program will save about $2 billion in fiscal year 1978—over $650 million in the federal budget, over $300 million in state and local budgets, and almost $900 million in private health insurance and payments by individuals. In fiscal year 1980, total savings will exceed $5.5 billion.

These savings will slow a devastating inflationary trend, which doubles health costs every five years. This year health care will cost an average of over $700 for every man, woman, and child. Each worker's share of our Nation's health bill will require more than a month's work.

For the federal budget, rising health spending has meant a tripling of health outlays over the last eight years. Without immediate action, the Federal government's bill for Medicare and Medicaid—which provide health care for our elderly and poor citizens—will jump nearly 23 percent next year, to $32 billion.

Rising health costs attack state and local governments as well. State and local Medicaid expenditures have grown from $3 billion in 1971 to $7 billion in 1976, forcing cutbacks which harm the low income recipients of the program.

Unrestrained health costs also restrict our ability to plan necessary improvements in our health care system. I am determined, for example, to phase in a workable program of national health insurance. But with current inflation, the cost of any national health insurance program the Administration and the Congress will develop will double in just five years.

Finally, uncontrolled medical care spending undermines our efforts to establish a balanced health policy. Medical care is only one determinant of our people's health. The leading cause of death for Americans under 40 is motor vehicle accidents. The leading causes of death for older Americans—heart disease and cancer—are directly related to our working conditions and our eating, drinking, smoking, and exercise habits. We can better confront these broader health problems if we can limit the increase in soaring medical care costs.

Containing hospital cost increases is of central importance. Hospitals absorb 40 cents from each of our nation's health care dollars, and the cost of hospital service is rising faster than the cost of other health services. As in recent years, our country's total hospital bill this year will climb 15 percent—to $64 billion.

Since 1950, the cost of a day's stay in the hospital has increased more than 1,000 percent—over eight times the rise in the Consumer Price Index. Today, the average hospital stay costs over $1,300; just 12 years ago, a slightly shorter stay cost less than $300. This relentless increase places a severe burden on all of us—and strikes hardest at the poor and the elderly.

To control escalating hospital costs, some have proposed to cap Medicare and Medicaid expenditures. Such a federal spending limit would encourage hospitals to reduce their services to low-income and elderly patients and to recoup rising expenses by increasing their charges to all other Americans. In contrast, the legislation I am proposing today reduces the growth in federal Medicare/Medicaid expenditures without imposing such severe new burdens on other purchasers of health services.

This legislation is not a wage-price control program. It places no restrictions on the hospital's ability to determine its charges for any particular service. It places no limit on the size of any wage demand or settlement. The program establishes an overall limit on the rate of increase in reimbursements, permitting doctors and hospital administrators to allocate their own resources efficiently, responding to local needs and individual circumstances.

This proposal relies heavily on the initiatives of the private sector. For it to succeed, businesses, unions, and insurers, working with providers, must continue to pursue innovative techniques for reducing the cost of high-quality health care. The private sector's response to the challenges of cost containment will help decide its future role in our health care system.

The federal sector must also hold down the costs of its own hospitals. The Administration will carefully review the operating and capital expenditures of federal health facilities, to insure that unwarranted increases do not occur. Further, we will eliminate unnecessary federal regulations which lead to increased costs for all hospitals.

Our hospital cost containment system is transitional. It is intended to flow directly into a long-term prospective reimbursement system, which will not accept a hospital's base cost as given. The long-term system will be able to analyze and compare base costs and provide greater incentives to those hospitals which are most efficient. The Congress and the Administration are already at work on this long-range system.

At the same time, I am committed to strengthening competition in the health industry. For example, we should encourage HMOs and other organizational arrangements which give providers an incentive to reduce costs, and we should encourage consumers to become more aware of the charges of different providers.

Finally, all of us—consumers and providers—must work together to reduce the unnecessary use of hospital facilities and services. By cutting down excessive utilization we can help preserve our valuable resources.

II. Child Health Assessment Program (CHAP).

The second piece of legislation I am proposing today, the CHAP Program, will replace Medicaid's Early and Periodic Screening, Diagnosis and Treatment Program (EPSDT) for children. The CHAP legislation, which calls for new expenditures of $180 million, will:

—Raise from 55 percent to over 75 percent the average federal payment to the states for health care provided to children whose health needs are assessed under the program.

—Extend benefits to children under age six whose family income level makes them eligible for assistance but who do not meet additional state eligibility requirements.

—Encourage states to assure the availability of comprehensive health providers for low-income children.

—Assure continuity of treatment by providing care for children six months after the family's eligibility for assistance otherwise terminates.

—Improve the federal program enforcement mechanism.

Like the cost containment program, the CHAP legislation is a crucial first step. Other children's health programs also require significant improvement, and the Administration will take steps to meet these needs. But the CHAP program is urgently needed to assure that more low-income children receive regular, high-quality primary and preventive care.

Currently, twelve million children are eligible for Medicaid, yet the EPSDT program is reaching only two million. Further, only slightly more than half of all children screened actually receive treatment for conditions that are identified. The CHAP program will assist the states in rectifying these deficiencies.

I call upon the Congress to act favorably on both of our new health initiatives.

JIMMY CARTER.

THE WHITE HOUSE, *April 25, 1977.*

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated, and after those motions to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

GERALD R. FORD BUILDING

Mr. MINETA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2210) to name a certain Federal building in Grand Rapids, Mich., the "Gerald R. Ford Building."

The Clerk read as follows:

H.R. 2210

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal building located at 110 Michigan Avenue, Northwest, in Grand Rapids, Michigan, is hereby designated as the "Gerald R. Ford Building". Any reference in any law, regulation, document, record, map, or other paper of the United States to such building shall be considered to be a reference to the Gerald R. Ford Building.

The SPEAKER. Is a second demanded?

Mr. WALSH. Mr. Speaker, I am not opposed to the bill, but I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from California (Mr. MINETA) will be recognized for 20 minutes, and the gentleman from New York (Mr. WALSH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. MINETA).

GENERAL LEAVE

Mr. MINETA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill H.R. 2210, now under consideration.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. MINETA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Gerald Ford was elected to Congress in 1948, and reelected for the succeeding 12 Congresses. In 1965, he was selected by his colleagues as the minority leader of the House. He served as minority leader until nominated to fill the vacated Vice Presidency on December 6, 1973. His years in Congress were marked by qualities of determination and leadership.

With the resignation of former President Nixon in August 1974, he assumed the Presidency on August 9, 1974, at a most difficult time in our Nation's history. During his 2½ years as President, this country saw a continuation of Gerald Ford's honesty and courage that won the respect of his constituents in Michigan and of his colleagues in the House of Representatives.

In view of the fact that Gerald Ford dedicated 28 years of his life to public service, it is indeed a fitting tribute to pay to the 38th President of the United States by naming the Federal building located at 110 Michigan Avenue in Grand Rapids, Mich., the "Gerald R. Ford Building." This building is the only federally owned building in Grand Rapids and was constructed in 1972.

Mr. Speaker, I have no further requests for time and reserve the balance of my time.

Mr. WALSH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, President Ford served in this House with great distinction for many years.

Later, President Ford took over the direction of this country at a time when the Nation's morale was at an all time low and faith in our Government was almost nonexistent.

Under his wise leadership, faith was restored in our Government, the Nation rallied from a severe economic recession, and confidence was restored in our way of life.

This is a small honor indeed to pay to this very able and honest gentleman and I am pleased to recommend this action to my colleagues.

Mr. Speaker, at this time I yield such time as he may consume to the gentleman, from Arizona (Mr. RHODES), the distinguished minority leader.

Mr. RHODES. Mr. Speaker, I thank my colleague, the gentleman from New York (Mr. WALSH), for yielding.

Mr. Speaker, I am very much in favor of this bill of course. I think the fact that the former President of the United States and our former colleague will be recognized in this way and have a building in his own hometown named for him is certainly just and proper. I hope the bill will be passed and that the GSA will thus be instructed to name the building as provided by this legislation.

Mr. BIAGGI. Mr. Speaker, I rise in full support of H.R. 2210, legislation which will designate the Federal building in Grand Rapids to be named in honor of its famous and beloved native son, our former President and distinguished colleague, Gerald R. Ford. It is only appropriate that we bestow such a high honor on Gerald Ford, a man who dedicated some 30 years of his life to Federal service.

For 25 years, the people of Grand Rapids were ably served in the House of Representatives by Gerald Ford. His career in the House included an 8-year term as minority leader. Throughout his years in the House, Jerry Ford gained the respect and admiration of his colleagues because of his unending dedication to the job and the people who elected him.

In 1973, the House lost a Member, but the American Nation gained an inspirational leader and statesman when Gerald Ford was nominated to be Vice President. One short year later, he became the 38th President of the United States during one of the most turbulent and troublesome periods in our Nation's history. As he did throughout his public life, Jerry Ford assumed his challenges with calm, honest, and strong leadership and purpose. As a result of Gerald Ford, the American Nation recovered from the ravages of Watergate and regained its national unity and direction.

The legacy of Gerald Ford will endure for years to come. Naming a Federal building in his honor will represent far more than a ceremonial gesture. It will serve as an inspiration for all those in Federal service to model their careers in the tradition of Gerald Ford.

I am honored to support this legislation and urge its expeditious consideration and passage by Congress. It is an important demonstration of our respect and affection for this exemplary American. The people of Grand Rapids, those of us who had the privilege of serving with him in the House, and the American people are indebted to Jerry Ford and wish him years of good health. Let us pay this important debt of gratitude to Gerald Ford. He is more than worthy of this honor.

Mr. JOHNSON of California. Mr. Speaker, I rise in support of H.R. 2210. Gerald Ford devoted over 25 years to serving the people of Michigan in the House of Representatives. I had the privilege of serving in the House with Gerald Ford for 15 years. That service was characterized by his good sense and sound judgement. As minority leader, his record speaks for itself. He distinguished himself not only as an effective leader but as a brilliant legislative tactician: able to bring reason and compromise to some of the most difficult issues of our time.

I believe it is a fitting tribute to pay to the 38th President of the United States. Through unprecedented events in our Nation, Gerald Ford found himself taking on the responsibilities of first the Vice Presidency and then the Presidency.

During his 10 months as Vice President and 2½ years as President, this country saw a continuation of Gerald Ford's honesty and loyalty to the Nation that have marked his 28 years of life time to public service.

I am pleased to join in recognizing the contribution Gerald Ford has made to our Nation and in paying tribute to him by designating this building in his home town of Grand Rapids in his honor.

Mrs. HOLT. Mr. Speaker, I join in urging enthusiastic support of H.R. 2210

to name a Federal building in Grand Rapids, Mich., the "Gerald R. Ford Building." I cannot think of a more fitting action by the U.S. Congress than to accord this well-earned honor upon our former President, former Vice President, former minority leader, and indeed a most affable former colleague of this House.

Gerald R. Ford is one of those great Americans who responded with solemn propriety to the clarion call from his Nation to assume its highest position of leadership and he acquitted his awesome duties and responsibilities with courage, steadfastness, and foresight. It is only gradually and somewhat belatedly that Americans everywhere are beginning to appreciate the true accomplishments of this dedicated and unpretentious man. I am sure that the citizens of Grand Rapids, Mich., will be proud of having a Federal building in their hometown named after a former Congressman of theirs who was elected and reelected to serve the Fifth District of Michigan for 13 consecutive terms before he became Vice President and subsequently President of the United States.

Mr. WEISS. Mr. Speaker, I oppose H.R. 2210 to name a Federal building after Gerald R. Ford.

My opposition is twofold: 2 years ago the former President indicated he did not approve the idea and my own belief that this is an inappropriate way of honoring a living person.

Mr. Ford pocket-vetoed a similar bill on January 4, 1975; apparently preferring not to be honored in this manner. In this regard, it would appear as a greater honor to the man, to follow his wishes by not enacting the bill. One might even construe enactment to mean a dishonor since he wished the building not to be named for himself anyhow.

Furthermore, naming buildings after the living is an ill-conceived notion in the first place. Supposing it was learned at a later date that the former President had done something very frivolous; then the structure would be in ill-repute; just as, for example, a building named after President Nixon might be considered today.

It is more befitting a man who is living to honor him by a portrait or statue; something that is more lively and poignant—rather than to enshrine and memorialize him in the naming of a building.

Mr. WALSH. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

Mr. MINETA. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. MINETA) that the House suspend the rules and pass the bill H.R. 2210.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

Mr. MINETA. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from the further consideration of the Senate bill (S. 385) to name a certain Federal building in Grand Rapids, Mich., the "Gerald R. Ford Building," an identical bill to H.R. 2210, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 385

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal building located at 110 Michigan Avenue, Northwest, in Grand Rapids, Michigan, is hereby designated as the "Gerald R. Ford Building". Any reference in any law, regulation, document, record, map, or other paper of the United States to such building shall be considered to be a reference to the Gerald R. Ford Building.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 2210) was laid on the table.

RE-REFERRAL OF EXECUTIVE COMMUNICATION 1259 FROM COMMITTEE ON POST OFFICE AND CIVIL SERVICE TO COMMITTEE ON GOVERNMENT OPERATIONS

Mr. NIX. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of Executive Communication No. 1259 and that such communication be re-referred to the Committee on Government Operations.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

TAX AND LOAN ACCOUNTS

Mr. MITCHELL of Maryland. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5675) to authorize the Secretary of the Treasury to invest public moneys, and for other purposes.

The Clerk read as follows:

H.R. 5675

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized, for cash management purposes, to invest any portion of the Treasury's operating cash for periods of up to ninety days in (1) obligations of depositaries maintaining Treasury tax and loan accounts secured by a pledge of collateral acceptable to the Secretary of the Treasury as security for tax and loan accounts, and (2) obligations of the United States and of agencies of the United States: *Provided,* That the authority granted under this section shall not be construed as requiring the Secretary of the Treasury to invest any or all of the cash balance held in any particular account: *Provided further,* That the authority granted under this section shall not be construed as permitting the Secretary of the Treasury to require the sale of such obligations by any particular person, dealer, or financial institution.

SEC. 2. (a) Section 5(k) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(k)) is amended by adding after "Bank" in the first sentence thereof the following: "shall be a depository of public money and" and by striking the period at the end thereof and inserting the following: ", including services in connection with the collection of taxes and other obligations owed the United States, and the Secretary of the Treasury is hereby authorized to deposit public money, in any such Federal savings and loan association or member of a Federal home loan bank, and shall prescribe such regulations as may be necessary to carry out the purposes of this subsection.".

(b) Section 402(d) of the National Housing Act (12 U.S.C. 1725(d)) is amended by adding the following at the end thereof: "Insured institutions shall be depositaries of public money and may be employed as fiscal agents of the United States. The Secretary of the Treasury is authorized to deposit public money in each insured institution, and shall prescribe such regulations as may be necessary to enable such institutions to become depositaries of public money and fiscal agents of the United States. Each insured institution shall perform all such reasonable duties as depositary of public money and fiscal agent of the United States as may be required of it including services in connection with the collection of taxes and other obligations owed the United States.".

(c) Banks, savings banks, and savings and loan, building and loan, and homestead associations (including cooperative banks) created under the laws of any State and the deposits or accounts of which are insured by a State or agency thereof or corporation chartered pursuant to the laws of any State may be depositaries of public money and may be employed as fiscal agents of the United States. The Secretary of the Treasury is authorized to deposit public money in any such institution, and shall prescribe such regulations as may be necessary to enable such institutions to become depositaries of public money and fiscal agents of the United States. Each such institution shall perform all such reasonable duties as depositary of public money and fiscal agent of the United States as may be required of it including services in connection with the collection of taxes and other obligations owed the United States.

SEC. 3. (a) Subsection (c) of section 6302 of the Internal Revenue Code of 1954 (relating to use of Government depositaries) is amended—

(1) by striking out "or trust companies" and inserting in lieu thereof ", trust companies, or domestic building and loan associations"; and

(2) by striking out "and trust companies" and inserting in lieu thereof ", trust companies, and domestic building and loan associations".

(b) Subsection (e) of section 7502 of the Internal Revenue Code of 1954 (relating to mailing of deposits) is amended by striking out "or trust company" each time it appears and inserting in lieu thereof ", trust company, or domestic building and loan association."

(c) The amendments made by this section shall apply to amounts deposited after the date of the enactment of this Act.

The SPEAKER. Is a second demanded?

Mr. STANTON. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. MITCHELL of Maryland. Mr. Speaker, I yield first to the gentleman from Oregon (Mr. ULLMAN) the chairman of the Ways and Means Committee.

Mr. ULLMAN. Mr. Speaker, I thank the gentleman for yielding and commend the gentleman as chairman of the subcommittee of the Committee on Banking, Finance, and Urban Affairs for bringing out this legislation. It is a matter that does contain material under the jurisdiction of the Ways and Means Committee. The committee met and considered the bill and the portions that have to do with taxes are approved by the Ways and Means Committee. Let me just quickly summarize what they do.

Mr. Speaker, this bill, H.R. 5675, makes three changes in present law. The first one relates to the Treasury Department's tax and loan accounts and the two others relate to new classes of depositories for those accounts.

INVESTMENT AUTHORITY

The first section of the bill gives the Secretary of the Treasury authority to invest temporarily excess cash from its operating balances. The investments may be made in short term, less than 90-day, obligations issued by the banks which hold Treasury tax and loan account deposits. Investments also may be made in outstanding issues of the Federal Government and its agencies. The need for this change in law goes back a few years.

Under present law, depositories which are included in the Treasury tax and loan system receive deposits from business of withholding of income taxes, social security taxes, other taxes and proceeds from the sale of U.S. savings bonds. These funds are held by the bank until withdrawn by the Treasury Department. The depositories have free use of the moneys before they are withdrawn and may use them to earn income and, in return, the depositories perform certain services for the Treasury Department free of charge. The bank earnings usually exceeded their costs of servicing deposits. The institutions currently eligible to be depositories are commercial banks, mutual savings banks, and federally chartered credit unions.

In a study of the tax and loan account system which was completed in 1974, the Treasury Department estimated that the system reduced the Federal Government's potential earnings as a depositor and overcompensated banks for their costs in handling the tax and loan accounts. In an effort to reduce its earnings loss, the Treasury Department began to shift a large portion of the deposits to the Federal Reserve System sooner than had been its practice before 1974. By changing the timing of this transfer, the Treasury Department indirectly increased its earnings opportunities, since the Federal Reserve invests its excess funds in Federal securities, and the earnings in excess of its costs are returned to the Treasury Department.

This procedure, however, complicated the Federal Reserve's role of controlling the money supply in the banks and in the hands of the public. As the tax and other payments were made from individual accounts to the banks and then withdrawn from the banking system for deposit in the Federal Reserve, the money supply was reduced. The Federal Reserve then had to buy securities from the banks in order to offset the reduction in the money supply. Subsequently, as the Treasury Department sent out checks in payment of its obligations, salaries of Federal employees, and benefit payments under various programs, the money was returned to the banking system, and the Federal Reserve found it necessary to sell securities to the banks in order to offset the increase in the money supply.

In order to capture for itself the earnings that exceed the service costs on the deposits and to reduce the complications in the already difficult job of controlling the money supply, the Treasury Department asked Congress to authorize a new system under which the Treasury could invest its excess operating cash balance in obligations of the banks in which the excess cash is deposited. In exchange for the services performed by the banks as depositaries, the Treasury Department will pay service fees.

Under the authority made available in this bill, the balance in a tax and loan account that has not been drawn down at the end of the business day will be available to the depositary bank for its use. In return, the depositary will pay interest on the deposit to the Treasury Department. The interest paid on the deposits will be related to the Federal funds or other market rate. Institutions which do not choose to participate in the investment program will forward unused balances at the end of the day to its district Federal Reserve bank.

This bill only authorizes the Secretary of the Treasury to invest the excess balances in the tax and loan accounts. The Secretary already has authority to pay fees to the depositaries for the services they perform, and request has been made for an appropriation of $8.3 million for payment of fees in fiscal year 1978. Treasury estimates that the net effect of the new program will be net interest earnings of $50 to $100 million.

The Treasury Department and the Committee on Banking, Finance and Urban Affairs have been concerned that the new system for tax and loan accounts may produce an adverse impact on minority banks and small banks. To ease what is believed to be primarily a transitional problem, the Treasury Department proposes to phase in the program for such banks over a 5-year period. The Committee on Banking, Finance and Urban Affairs has endorsed the proposed transitional arrangement. The Committee on Ways and Means has expressed in its report that it has no objection to this arrangement.

SAVINGS AND LOAN ASSOCIATIONS

The second section of the bill extends the opportunity to be a tax and loan account depositary to savings and loan associations. This new authority is extended to savings and loan associations created under authority of the Federal Home Loan Bank Board, or insured by the Federal Savings and Loan Insurance Corporation. In addition, eligibility to become a tax and loan account depositary is extended to banks which perform the services of a savings and loan association that have been chartered under the laws of a State and that are insured by a State agency or a corporation chartered by a State to insure accounts in these State banks.

INTERNAL REVENUE CODE

The third section of the bill amends the Internal Revenue Code and provides conforming amendments to allow deposits in payment of periodic tax obligations to be made into accounts of domestic building and loan, and savings and loan associations which become tax and loan account depositaries. Deposits to tax accounts now are credited as payment in fulfillment of tax obligations for withholding of income tax on wages and salaries, social security payroll taxes, and other tax payments so long as the deposit, or the postmark on a mailed deposit, conforms with the statutory time schedule. The amendment adds domestic building and loan associations—a general term including all savings and loan associations—to the list of eligible depositaries which now includes incorporated banks and trust companies.

Mr. Speaker, the bill provides the appropriate authority needed by the Treasury Department to facilitate the efficient operation of the tax and loan account system. I urge the House to adopt the bill.

Mr. CONABLE. Mr. Speaker, will the gentleman yield?

Mr. MITCHELL of Maryland. I am delighted to yield to the gentleman from New York.

Mr. CONABLE. Mr. Speaker, I would like to associate myself with the remarks of the distinguished chairman of the Committee on Ways and Means.

I also support this measure as drawn. I trust at further stages in the legislative process it will not be changed in any way.

Mr. Speaker, I rise in support of H.R. 5675, which would make certain amendments in Federal law relating to the Treasury tax and loan account system.

At present, depositaries in the tax and loan system receive deposits in connection with withholding of income taxes, social security taxes, certain other tax and proceeds from the sale of savings bonds. The depositaries have in the past had free use of these moneys until they are withdrawn by the Treasury Department. In return, certain services have been performed for the Treasury Department by the depositaries without charge.

H.R. 5675 would provide that the Treasury Department could invest excess operating cash balances for periods not to exceed 90 days in depositaries' obligations which are adequately secured by collateral and in certain obligations of the United States. H.R. 5675 also provides that in the future the Treasury Department will reimburse depositaries for

services provided in connection with handling tax and loan accounts. It is estimated by the Treasury Department that the net effect of H.R. 5675, balancing increased interest earnings on tax and loan deposits against the fees which will be paid to depositaries, will be an annual revenue gain of $50 to $100 million.

H.R. 5675 would also authorize the inclusion of domestic building and loan associations as fiscal agents and depositaries in the tax and loan account system. At the present time commercial banks, mutual savings banks and federally chartered credit unions are eligible to serve as such depositaries. In appearing before the Committee on Banking, Finance and Urban Affairs the savings and loan associations testified that they are already performing many of the services performed by commercial banks and that many business firms maintain savings accounts with them. Their position is that there is no reason they cannot also perform the services incident to serving as Federal depositaries.

H.R. 5675 would also make certain conforming changes to the Internal Revenue Code of 1954, as amended. Specifically, the bill amends section 6302c, which relates to the use of and qualification as Government depositaries, and section 7502(e), which relates to deposits of taxes by mail. When deposits of taxes are timely made in qualified depositaries, the deposit is accepted as fulfillment of the obligation. With regard to mailing dates, when a deposit is mailed to a qualifying depositary, the date of mailing is treated as the date of deposit.

I believe that the amendments to the law made by this bill are reasonable and worthwhile ones which will result in a substantial revenue gain to the Treasury Department. I urge its enactment.

Mr. MITCHELL of Maryland. Mr. Speaker, the provisions of H.R. 5675 attempt to make our Treasury tax and loan system more efficient and equitable than it has ever been since 1917. Clearly, these interests are important to all of us; and in this regard, I wholeheartedly support H.R. 5675. Let me now review briefly the three major issues which this legislation involves. The first is the proposed investment authority; the second is the inclusion of saving and loan associations in the T.T. & L. system. The third concerns minority-owned banks.

Mr. Speaker, the investment authority granted in section 1 of H.R. 5675 is long overdue. For 60 years, American taxpayers have been losing billions of dollars while large commercial banks have been able to invest Treasury tax and loan account funds in earning assets.

Consider, for instance, that from 1964–1976, the average annual T.T. & L. balances totaled $54.4 billion—on which no interest was earned—see table 1. Applying the average Federal funds rate of 5.93 percent for the 1964–1976 period—see table 2—to the $54.4 billion, the gross amount of interest income lost to the Treasury during the last 13 years is estimated to be $3.2 billion. Even after deducting a generous Treasury estimate of $64 million per year as compensation to the banks for free services they provided the Treasury in connection with the T.T. & L. accounts, we find that taxpayers have been forced to forfeit earnings of approximately $2.4 billion.

Mr. Speaker, a 1974 Treasury study also points out that in 1972 the annual earnings to banks exceeded the expenses of handling these accounts by $170 million. While T.T. & L. balances have recently been reduced significantly so that they currently comprise only 20 percent of Treasury's total operating cash, taxpayers are still losing millions.

Mr. Speaker, the advantages of the investment authority granted in H.R. 5675 are threefold:

First. It will promote efficient government cash management practices and at the same time enable Treasury to earn at least $50–$100 million of net revenues.

Second. It permits equitable compensation to depository institutions for services they render to the Treasury. Under the new system, depositories will be compensated for services which they now render free of charge. Compensable services will include maintaining T.T. & L. accounts, processing Federal tax deposits, and issuing and redeeming U.S. savings bonds.

Third. Finally, by allowing Treasury to use accounts in commercial banks as their working balances rather than shifting cash in and out of Federal Reserve banks, as in recent years, this legislation will insulate bank reserves from volatile transfers of funds between the public and the Treasury, thereby facilitating the smooth conduct of monetary policy.

It is, thus, amply clear that the investment authority granted in H.R. 5675 is in the public interest—in the interest of equitable treatment of depository institutions, increased potential revenues to the Government, and smoother money management. Now let me turn to the second major issue which this legislation involves; that is, inclusion of S. & L.'s in the T.T. & L. system.

Mr. Speaker, one of the greatest inequities of our current tax and loan collection system is the exclusion of savings and loan associations as depositary institutions. H.R. 5675 would correct this situation. Section 2 of the bill authorizes federally insured S. & L.'s, as well as those insured by States and corporations chartered by states to act as public depositaries and members of the T.T. & L. system.

I include the following:

TABLE 1.—*Average annual Treasury tax and loan account balances*

[In billions of dollars]

	Average balance
1964	$4,747
1965	5,431
1966	4,324
1967	3,775
1968	4,191
1969	4,329
1970	4,022
1971	5,146
1972	5,648
1973	5,644
1974	3,913
1975	1,853
1976	1,394
Total	54,417

TABLE 2.—*Average annual Federal funds rate, 1964–76*

[In percent]

	Rate
1964	3.49
1965	4.06
1966	5.09
1967	4.22
1968	5.64
1969	8.18
1970	7.18
1971	4.67
1972	4.42
1973	8.69
1974	10.55
1975	5.86
1976	5.05
Average 13-year period Federal funds rate	5.93

The U.S. League of Savings Associations, in a statement submitted for the record, has endorsed this legislation, and in regard to section 2, stated that—

> Tax and loan accounts can potentially help moderate the economic swings which affect deposit flows to savings associations and consequently funds available for mortgage lending. Skillful management can no doubt utilize tax and loan deposits to keep funds flowing to home borrowers in times of slack savings performance.

In addition, Mr. Speaker, several other reasons mentioned in the Banking Committee's report on H.R. 5675 indicate why S. & L.'s should be brought into the T.T. & L. system. Briefly, these reasons include:

First. Thrift institutions such as mutual savings banks are already included in the system.

Second. Federally chartered credit unions were made eligible to act as depositaries under 12 U.S.C. 1767.

Third. Those S. & L.'s that issue savings bonds are not currently compensated for their services because they are not members of the T.T. & L. system.

Fourth. Nearly all of the services performed for Treasury by commercial banks are also provided by S. & L.'s.

Fifth. S. & L's already have the authority to and do make short-term investments.

Sixth. Under the proposed new system, S. & L.'s would be treated equally with other depositary institutions.

Seventh. In order to receive T.T. & L. deposits, eligible S. & L.'s would have to pledge collateral. If individual S. & L.'s cannot pledge collateral, they cannot receive these funds. This, therefore, covers the issue of assurances on the financial condition of eligible S. & L.'s.

Clearly, these interests are important to all of us; and in this regard, I wholeheartedly support section 2 of H.R. 5675.

Mr. Speaker, one of the significant aspects of the implementation of the investment authority granted in H.R. 5675 is its impact on the Nation's 83 minority-owned banks. In testimony before the Domestic Monetary Policy Subcommittee on March 9, representatives of the National Bankers Association, while supporting this legislation, emphasized that without a program to soften the immediate impact of the proposed payment of interest on T.T. & L. deposits on minority-owned banks, recent efforts which they have made to strengthen their development by attracting hitherto inter-

est-free T.T. & L. deposits would be undermined. Treasury's position on this potentially adverse impact buttresses the NBA's concerns. Our hearings record shows that Treasury favors establishing "special demand deposit" balances in minority-owned banks which would be based on the average T.T. & L. balance in such banks during a selected base year. These special deposits would be available to the minority-owned banks on an interest-free basis. However, over a 5-year period, special deposits would be decreased by 20 percent annually and thereby phased out. Both Treasury and the NBA agree that this method will adequately cushion the immediate impact of the proposed T.T. & L. investment authority embodied in H.R. 5675.

Both the Banking, Finance and Urban Affairs, and the Ways and Means Committees' reports on the bill expressly approve of the implementation of "special demand deposit" balances for minority-owned banks. As fiscal Assistant Secretary of the Treasury David Mosso stated before my Subcommittee on Domestic Monetary Policy, and the Ways and Means Committee last week, such a procedure could not be adopted by the Department "without a clear indication in the law or legislative history that such an arrangement reflects the intent of Congress." So far, the legislative history on H.R. 5675 without reservation supports the adoption of the 5-year phaseout program for minority-owned banks. Thus, passage of H.R. 5675 will, without objection, reflect this intent.

With respect to small banks, Treasury has agreed to adjust its investment and call procedures in consideration of the relative inaccessibility of small banks to money markets.

In conclusion, Mr. Speaker, let me affirm that this history is intended to prevent the viability of minority-owned and small banks being undermined by implementation of the investment authority in H.R. 5675, which as has been amply documented, will generate annual net revenues of $50–$100 million to the Treasury, provide for more equitable compensation to institutions now providing services free to the Treasury, and finally facilitate the smooth conduct of monetary policy.

Mr. Speaker, I yield to the distinguished gentleman from Ohio (Mr. STANTON).

Mr. STANTON. Mr. Speaker, I rise in support of this proposal to enable the Federal Government to invest otherwise idle Treasury tax and loan balances and thus produce interest earnings on behalf of the American taxpayer.

First of all, let me congratulate the chairman of the House Banking, Finance and Urban Affairs Committee and the chairman of the committee's Subcommittee on Domestic Monetary Policy for bringing us this legislation in what I consider to be noncontroversial form.

This is an excellent piece of legislation, Mr. Speaker. It is long overdue. It will strike a blow for the taxpayer. It will enable the Treasury Department to convert its tax and loan funds from idle accounts to earning assets while paying banks for services performed. In addition, the bill will authorize savings and loan associations to be public depositories for such funds, as are banks, credit unions, and mutual savings banks. The S. & L.'s and the housing interests believe this will open up a new source of funds for housing mortgages.

The Treasury Department has sought this legislation for 2½ years; and I personally have strongly supported it since its inception. There is no question that millions of dollars have been lost in revenue over the years because the Federal Government has not been keeping its Treasury tax and loan funds in interest-bearing accounts.

Similar legislation passed the House on December 15, 1975. It was approved 391 to 0. Unfortunately, the Senate bill was defeated by one vote after numerous extraneous amendments were attached to it.

Hopefully, the other body will exercise oppropriate restraint this year and will refrain from any action which will jeopardize the final enactment of this most worthwhile legislation.

Mr. MITCHELL of Maryland. Mr. Speaker, I yield 4 minutes to the gentleman from Ohio (Mr. MOTTL), who worked like a Trojan last year to get the legislation through.

Mr. MOTTL. Mr. Speaker, slightly more than 2 years ago I made my first speech from the floor of this House. At that time I spoke of the possibility of saving our taxpayers millions of dollars a year by requiring the Treasury Department to invest its tax and loan accounts in interest-bearing accounts at commercial banks.

Under the leadership of our late, great colleague, Wright Patman, Chairman HENRY REUSS, my Ohio colleague, JOHN SEIBERLING, and myself, this House passed such legislation in December, 1975, by a unanimous vote of 391–0. Unfortunately, our colleagues in the Senate failed by a single vote to pass this vital legislation.

Today we again have the rare opportunity to increase the public revenue of the United States without imposing any burdens upon the American taxpayer. The need for this legislation is self-evident.

Since 1917 the Treasury Department has been keeping vast amounts of its tax and loan accounts in non-interest-bearing accounts at commercial banks. Over the past 60 years, billions of dollars in possible revenue has been lost on the money it kept at commercial banks. As recently as January 1974, the average daily balance in the tax and loan accounts exceeded $5.7 billion. If invested at a reasonable 5-percent rate of interest, this would have brought in an additional $285 million to the public revenue.

I am happy to report that as a result of our active interest in the tax and loan accounts during the 94th Congress, the Treasury Department has wisely transferred a majority of its tax and loan accounts funds to Federal Reserve bank interest-bearing accounts. In 1976 alone this procedure resulted in millions of dollars of additional revenue for taxpayers.

The Treasury Department should be commended for changing their procedure, but at this time it still is retaining an average monthly balance of $1.529 billion in non-interest-bearing accounts at commercial banks. This money could be earning millions of dollars in revenue if it were managed wisely and invested prudently.

H.R. 5675 is needed to make it known to the Treasury Department that it is the intent of Congress that the Treasury Department has the duty to maximize the utilization of the public revenue. This additional investment could earn another $89 million a year for the taxpayers. Without this legislation there is nothing to prevent a future Secretary of the Treasury from reverting to the unproductive system of the past and depositing all the tax and loan accounts funds into non-interest-bearing accounts.

This legislation must be passed, and it must be enacted soon. Each day we delay costs the American people thousands of dollars in possible revenue. By enacting this legislation we can set an example for sound, responsible fiscal management of the Nation's revenue.

I would further like to commend Chairman MITCHELL and Chairman ULLMAN for their expeditious handling of this important bill.

Mr. STANTON. Mr. Speaker, I yield such time as he may consume to the gentleman from Idaho (Mr. HANSEN), the ranking minority member of the subcommittee.

Mr. HANSEN. Mr. Speaker, I would like to add to the remarks of the committee's ranking member.

Over the last 2½ years, the Government has lost some $260 million of potential earnings annually on tax and loan accounts. H.R. 5675 would give the Treasury Department an option which is being exercised by State and local governments across the length and breadth of our land to the enrichment of their governmental treasuries. It simply involves the investment of excess operating balances, otherwise idle funds.

In the absence of the authority H.R. 5675 would give them, Treasury Department officials have been resorting to a stop-gap way of recouping earnings on Treasury balances. This is done by keeping as much cash as feasible in the Federal Reserve banks where it is invested and returned to the Treasury in the form of Federal Reserve System earnings, and through the imputed value of services provided by commercial banks maintaining tax and loan accounts. This policy was adopted in 1974. Before 1974, about 80 percent of treasury operating cash was held in tax and loan accounts and 20 percent in Federal Reserve banks. Since 1974, the proportion has been just about reversed. And still the system is

very unsatisfactory and results in a loss of revenue.

Treasury's present system of cash management makes it impossible to insulate the Nation's monetary system from the impact of irregular Treasury cash flows.

In addition, the procedures now being used cause confusion and uncertainty in the money markets, making it harder for the Federal Reserve System to achieve its monetary goals. The likelihood is that this has resulted in higher interest rates and an adverse impact on the economy.

It is impossible under the present system of investing tax and loan account funds to make the maximum possible amount of interest. The reason is that to call money from the tax and loan accounts as quickly as might be wished for earnings purposes would disrupt Federal Reserve monetary policy. For monetary policy and other reasons we believe the present system of handling tax and loan accounts should be changed and so we come, Mr. Speaker, to H.R. 5675, which would correct the current situation and give the Treasury the authority to invest Treasury operating cash directly with each tax and loan depository. This would be in lieu of calling the balances immediately into the Federal Reserve banks and would solve the problems Treasury encounters under present procedures. H.R. 5675 also would permit the Treasury to invest directly in Government securities when that would be more advantageous to the Government. If enacted this bill will result in a net gain of $50 to $100 million a year in interest at current rates.

Mr. Speaker, the authority contained in H.R. 5675 is badly needed by the Treasury Department and would benefit all of our taxpayers. I, therefore, urge its passage by this House.

Mr. MITCHELL. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Oklahoma (Mr. STEED).

Mr. STEED. Mr. Speaker, I want to take this opportunity to congratulate the chairman of the subcommittee for bringing this legislation here today. As chairman of the Subcommittee on Appropriations for the Treasury Department, I will state that we are going to be ready for markup on Wednesday of this week, so this legislation comes at a very opportune time. The Treasury will have to make some changes in the budget in order to comply with the rules under this legislation.

We think it is a very wise step and a very progressive step. Unlike so many times when legislation comes before the House, this bill will serve to simplify their bookkeeping, improve their program for bond sales and bond transactions, and their other financial transactions with banks throughout the country. Actually, it is estimated, when fully operational, this legislation today will net the Federal Treasury about $150 million per year.

So, Mr. Speaker, I think we can all be very happy that we are making this progress in the legislation being offered today.

Mr. SEIBERLING. Mr. Speaker, I rise in strong support of H.R. 5675, to authorize the Treasury to invest excess operating cash for periods up to 90 days. Legislation for this purpose, which I introduced in the 94th Congress with more than 100 cosponsors, received the unanimous approval of the Banking Committee and the House in 1975. I am pleased that the leadership has expedited consideration of this bill in the 95th Congress.

Mr. Speaker, not many people know what initially happens to the tax money that is withheld from their paychecks. I am sure it would come as a shock to many to learn that it goes into accounts in commercial banks, where it sits without earning a penny of interest while the banks reap profits on it from the interest they charge.

The primary purpose of the tax and loan account system is to provide an efficient tax collection mechanism for the Treasury, and to minimize the potentially disruptive effect of Treasury cash operations on the banking system and the Nation's economy. It has performed this useful function ever since it was set up in 1917. Ostensibly, the Government has allowed banks to hold these accounts without paying interest to compensate them for various banking services they perform for the Government. There is no longer any question that many banks are being overcompensated for their services. Treasury now recognizes that fact, and has drawn down the balances in the tax and loan accounts substantially and placed them in Federal Reserve banks. However, this system is unacceptable to the Federal Reserve Board on a permanent basis, because it tends to complicate the Federal Reserve's monetary policy.

The bill before us today would restore equity to the tax and loan account system by providing the taxpayer a return on his tax deposits and allowing banks to use surplus funds. It would give the Treasury authority to invest these surplus funds on a daily basis in interest-bearing obligations of depositaries maintaining tax and loan accounts. In effect, banks would borrow this money from the Treasury each day. The bill does not specify a particular rate of interest to be charged by Treasury. The depositary institution will pay interest at an effective rate tied to the Federal funds or the rate on repurchase agreements. In addition, the bill is designed to ease the impact of Treasury's new investment authority on minority and small banks. For minority banks, Treasury will establish "special demand deposit" balances, which will be noninterest bearing and will be phased out after 5 years. For small banks, many of which handle tax and loan accounts simply as a service to their customers, the Treasury will make allowance in its investment and call procedures, since such banks do not have access to the money markets which larger banks do. Finally, in the interests of equity, the bill permits savings and loan associations to participate in the Treasury's tax and loan system.

Mr. Speaker, the Treasury Department has estimated that the investment authority in H.R. 5675 would net the government $50 to $100 million in additional revenues in 1978, after the banks are paid for their services. Although the Treasury has taken action to minimize the loss of these tax dollars through the tax and loan account system, this issue still warrants congressional attention. The present system has cost the taxpayers millions of dollars in lost revenues. It is high time to put the Government's handling of tax funds on a more business like basis, and I strongly urge House passage of H.R. 5675.

GENERAL LEAVE

Mr. MITCHELL of Maryland. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Maryland (Mr. MITCHELL) that the House suspend the rules and pass the bill H.R. 5675.

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3 of rule XXVIII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

UNITED STATES-CANADIAN RECIPROCAL FISHERIES AGREEMENT

Mr. MURPHY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5638) to amend the Fishery Conservation Zone Transition Act in order to give effect during 1977 to the Reciprocal Fisheries Agreement between the United States and Canada.

The Clerk read as follows:

H.R. 5638

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Fishery Conservation Zone Transition Act (Public Law 95-6; 91 Stat. 14-16) is amended by adding at the end thereof the following new section:

"SEC. 5. RECIPROCAL FISHERIES AGREEMENT BETWEEN THE UNITED STATES AND CANADA.

"(a) CONGRESSIONAL APPROVAL.—The Congress hereby approves the Reciprocal Fisheries Agreement between the Government of the United States and the Government of Canada (hereinafter in this section referred to as the 'Agreement'), as contained in the message to Congress from the President of the United States dated February 28, 1977. The Agreement shall be in force and effect with respect to the United States during the period beginning March 1, 1977, and ending at the close of December 31, 1977.

"(b) APPLICATION.—During the period when the Agreement is in force and effect with respect to the United States—

"(1) vessels and nationals of Canada may

fish within the fishery conservation zone, or for anadromous species and Continental Shelf fishery resources beyond such zone, but only pursuant to, and in accordance with, the provisions of the Agreement; and

"(2) title II of the Fishery Conservation and Management Act of 1976 (relating to foreign fishing and international fishery agreements) and section 307 of such Act of 1976 (relating to prohibited acts) shall not apply with respect to fishing within the fishery conservation zone, or for anadromous species and Continental Shelf fishery resources beyond such zone, by vessels and nationals of Canada which is pursuant to, and in accordance with, the provisions of the Agreement.

"(c) FISHING STATISTICS.—(1) Any person who—

"(A) owns or operates any fishing vessel which—

"(i) is a vessel of the United States, and

"(ii) engages in fishing to which the Agreement applies; or

"(B) directly or indirectly receives, or may receive, fish to which the Agreement applies in the course of a commercial activity in quantities determined by the Secretary to be sufficient to assist in the carrying out of his paragraph,

shall submit to the Secretary such statistics (including, but not limited to, catch data) regarding such fishing or such receipt of fish as are necessary to fulfill the obligations of the United States under article XIII of the Agreement. The Secretary, after consultation with the Secretary of State, shall issue such regulations as are necessary and appropriate to carry out the purposes of this paragraph. Section 303(d) of the Fishery Conservation and Management Act of 1976 (relating to the confidentiality of statistics) shall apply with respect to all statistics submitted under this paragraph.

"(2) Any violation of paragraph (1), or of any regulation issued pursuant to paragraph (1), by any person shall be deemed to be an act prohibited by section 307 of the Fishery Conservation and Management Act of 1976. Any person who commits any such violation shall be liable to the United States for a civil penalty as provided for in section 308 of such Act of 1976. Sections 309 (relating to criminal offenses) and 310 (relating to civil forfeiture) of such Act of 1976 shall not apply with respect to any such violation.

"(d) DEFINITIONS.—As used in this section, the terms 'anadromous species', 'Continental Shelf fishery resources', 'fishery conservation zone', 'fishing', 'fishing vessel', 'Secretary', and 'vessel of the United States' shall have the same respective meanings as are given to such terms in section 3 of the Fishery Conservation and Management Act of 1976.".

The SPEAKER. Is a second demanded?

Mr. RUPPE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from New York (Mr. MURPHY) is recognized for 20 minutes, and the gentleman from Michigan (Mr. RUPPE) is recognized for 20 minutes.

Mr. MURPHY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the fishery zone of the United States was extended from 12 to 200 miles on March 1 of this year. The act that provided for this extension—known as the 200-Mile Fishery Zone Act—provides that no foreign vessel can fish within 200 miles of our shores unless the foreign nation concerned has signed a Governing International Fishing Agreement with the United States, better known as a GIFA, and such nation has secured a permit for each of its vessels planning to fish in such waters and has paid the appropriate fees associated with the issuance of such permits.

Mr. Speaker, since the passage of this act in April of last year, there have been 10 GIFA's entered into with the United States. Due to the difficulties encountered in negotiating these GIFA's and to the delay in submission of these GIFA's by the President to the Congress for consideration and to the resulting delay in the submission of applications for permits to be issued pursuant thereto, it became necessary to provide a one-time relief only to certain procedural requirements of the act in order to allow foreign fishing to continue uninterrupted in the 200-mile fishery zone of the United States with those nations which had signed GIFA's.

Mr. Speaker, by the passage of House Joint Resolution 240 and H.R. 3753 earlier this year congressional approval was given to GIFA's entered into with Poland, Russia, Romania, Taiwan, South Korea, Spain, Japan, East Germany, Bulgaria, and the European Economic Community.

Mr. Speaker, the primary necessity for H.R. 5638 arises from the need to protect our U.S. fishery in the Canadian waters which is imperiled because of the extension of Canada's fishery jurisdiction to 200 miles on January 1 of this year. The U.S. fishery in the Canadian fishery zone is valued at approximately $15 million and approximately $9 million in the disputed boundary area, over which jurisdiction is claimed by both countries.

Mr. Speaker, in order to protect our fishery in Canadian waters and in order to allow Canada to continue its fishing activities in our waters, a Reciprocal Fisheries Agreement was entered into between the United States and Canada on February 24 of this year. It should be noted that the agreement is for 1977 only. Another agreement will have to be entered into for future years.

Mr. Speaker, because of the uniqueness of this agreement, it is not considered to be a GIFA within the terms of our 200-Mile Fishery Zone Act. Therefore, in order to allow it to come into effect, it becomes necessary to waive certain requirements of the act and give congressional approval to the agreement. This would be accomplished by the passage of H.R. 5638.

Mr. Speaker, this is the same relief that was provided to other nations that entered into agreements with us and I wholeheartedly support the passage of this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. RUPPE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Fishery Conservation and Management Act of 1976 which established an exclusive U.S. 200 mile fishery zone took effect on March 1, 1977. The act provides that no foreign fishing is authorized within the 200 mile fishery zone unless such foreign fishing is authorized by a Governing International Fishery Agreement and the foreign vessels seeking to fish in the zone have secured valid permits.

In the past 2 months, the Congress has considered and approved Governing International Fishery Agreements with Russia, Bulgaria, Romania, Japan, the European Economic Community, Spain, Korea, East Germany, Poland and Taiwan. The legislation we are considering today, H.R. 5638, expresses congressional approval of the recently negotiated Fisheries Agreement with Canada. The Canadian Agreement is not a true Governing International Fishery Agreement. It is a Reciprocal Fisheries Agreement in that it protects the right of U.S. fishermen to fish in Canadian waters while, at the same time, regulating Canadian fishing in the U.S. zone. In this regard, it should be noted that in 1976 the value of the U.S. catch in Canadian waters was $15 million. The value of the Canadian catch in U.S. waters, however, was only $11.5 million.

The Canadian Reciprocal Agreement only applies to fishing conducted in 1977. I emphasize this point because the agreement under consideration today does not resolve the salmon interception problem which is of great concern to my friends in Washington, Oregon, and California. Nor does the agreement resolve the question of where the maritime boundary between the United States and Canada is located. These questions must be addressed, and it is my hope that the U.S. Fisheries Agreement for 1978, which will be submitted for congressional review later this year, will address these problems.

With respect to the 1977 fishing season, the reciprocal agreement before us today complies with the underlying and fundamental principles of the Fishery Conservation and Management Act of 1976. The agreement also protects the rights of U.S. fishermen to operate in Canadian waters. Therefore, I urge that my colleagues approve the agreement by adopting H.R. 5638.

Mr. LEGGETT. Mr. Speaker, the purpose of H.R. 5638 is to waive certain requirements of the Fishery Conservation and Management Act of 1976, better known as the 200-Mile Fishery Zone Act, in order to permit fishermen of the United States and Canada to continue fishing off the coasts of each Nation during the period from March 1, 1977, to December 31, 1977.

Mr. Speaker, the need for this legislation arises from the fact that the United States and Canada entered into a Reciprocal Fisheries Agreement on February 24, 1977, which would allow the nations and vessels of each country to continue fishing in the fishery zone of the other and without the necessity of obtaining permits for their vessels.

Mr. Speaker, this agreement is not considered to be a GIFA, within the terms of the 200-Mile Fishery Zone Act.

Also, unlike the previous agreements entered into with the United States, it is unique since it covers fishing by each nation off the coast of the other. Therefore, in order for the nationals and vessels of each nation to continue fishing in the fishery zone of the other, it becomes necessary to waive the procedural requirements of the act and to give congressional approval to the agreement, which would be accomplished by the passage of H.R. 5638.

Mr. Speaker, briefly explained, H.R. 5638 would give congressional approval to the agreement; it would make the agreement effective from March 1 to December 31, 1977; it would authorize Canadian nationals and vessels to fish within the fishery zone of the United States, notwithstanding the requirements of title II of the 200-Mile Fishery Zone Act and the prohibition provisions of such Act, provided such fishing is carried out in accordance with the agreement; it would require any person of the United States engaging in fishing in Canadian waters to which the agreement applies or any person of the United States receiving any fish caught in such waters to provide the Secretary of Commerce such statistics regarding such fishing or such receipt as the Secretary may require; and it would authorize the assessment of a civil penalty against persons failing to provide such statistics.

Mr. Speaker, H.R. 5638 has the strong support of the administration, in particular, Secretary Vance and Secretary Kreps, and it has strong bipartisan support of the members of the Committee on Merchant Marine and Fisheries. The fishermen of our country in general support the agreement and the enactment into law of this legislation would result in no additional cost to the Federal Government.

Mr. Speaker, before concluding, I might point out that opposition to this agreement was voiced by some of the commercial salmon trollers fishing off the west coast of the United States at hearings held by my subcommittee in San Francisco on the 14th and 15th of this month. Their primary concern centered around the fact that Canadian salmon trollers might begin fishing in our fishery zone on April 15 when the earliest our trollers could fish within our own zone, pursuant to a fishery management plan prepared by the Pacific Management Council, would be May 1.

Mr. Speaker, because of this concern, I immediately called Ambassador Ridgeway, of the State Department, and Dr. White, of the Commerce Department, and alerted them of the possibility that Canadian troll fishermen might begin fishing in our waters before May 1 and both of them assured me that they would get in touch with the Canadian authorities and request their fishermen not to commence fishing for salmon within our waters before May 1. These requests went out, but they were too late—a number of Canadian vessels had already left port and had begun fishing for salmon off our coast that weekend.

Upon my return to Washington, when I learned about these vessels fishing for salmon in our waters, I again called Ambassador Ridgeway and Dr. White and both of them assured me that they would insist that the Canadian authorities get those vessels out of our waters immediately and stay out until May 1.

Mr. Speaker, I am delighted to report that the situation has now been corrected and those vessels ceased fishing and left our waters on April 19. I would like to include in the RECORD at the conclusion of my statement letters from the Departments of State and Commerce verifying this fact.

Mr. Speaker, I urge the prompt passage of H.R. 5638.

The letters referred to follow:

DEPARTMENT OF STATE,
Washington, D.C., April 21, 1977.

Hon. ROBERT E. LEGGETT,
House of Representatives.

DEAR MR. LEGGETT: I am writing in reference to telephone conversations that you and members of the staff of the Committee on Merchant Marine and Fisheries had with State Department officials on April 19, 1977 concerning Canadian trollers fishing off the Pacific Coast of the United States before May 1, 1977.

At the request of the Department of State, the Canadian Government on April 16 informed Canadian trollers that although U.S. federal regulations have not been adopted, U.S. trollers are not being permitted to fish off the Coast of Washington State before May 1, 1977, and conveyed the U.S. request that the Canadian trollers discontinue further fishing in these waters. The Department has been informed by the Canadian Embassy that pursuant to this notification the Canadian trollers have left U.S. waters.

As emergency regulations to give effect to the plan of the Pacific Regional Fishery Management Council will be in effect as of April 26, there is no longer any question as to the application of the U.S. regulatory regime to Canadian trollers. I trust this will put to rest the concerns that were raised during the interim period before the management plan came into effect.

Sincerely,
DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION,
Rockville, Md., April 21, 1977.

Hon. ROBERT L. LEGGETT,
Chairman, Subcommittee on Fisheries, Wildlife Conservation and Environment, House of Representatives, Washington, D.C.

DEAR MR. LEGGETT: Dr. White has requested me to contact you regarding the status of Canadian troll fishing off the coasts of Washington and Oregon. Attached find a message which was transmitted by the Canadian Government to all Canadian trollers who normally fish off the coast of the United States. This message was delivered to me on April 17, 1977 by Dr. Michael Shepard, Associate Director-General for Fisheries and Environment in Ottawa. Mr. Shepard assured me that this message was sent through the troller's representative to all Canadian trollers. This action was the result of strong representations by this agency and units in the Department of State urging the Canadians to refrain from fishing before May 1st.

The response was direct and favorable. On April 18th our surveillance flights indicated a number of Canadian trollers more than 12 miles off our coast. However, on our flight on April 19th after the message was delivered there were no Canadian fishermen observed off our Coast. I think it is obvious that the Canadian government was responsive to our request and their efforts to control their fishermen were effective.

I hope this information clarifies this matter and clears the way for final action on the Canadian agreement.

Sincerely,
DAVID H. WALLACE,
Associate Administrator for Marine Resources.

Attachment.

MESSAGE

(From Dr. Michael Shepard, Associate Director-General, Fishing Services Directorate, Ottawa, Canada, to David H. Wallace, NOAA via telephone, April 17, 1977)

Although U.S. federal regulations have not been adopted, U.S. has requested that Canadian trollers refrain from fishing in the U.S. zone prior to May 1, 1977. U.S. considers that presence of Canadian troll fleet in the U.S. zone at this time could jeopardize U.S. acceptance of reciprocal fisheries agreement.

Mr. MURPHY of New York. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from New York (Mr. MURPHY) that the House suspend the rules and pass the bill H.R. 5638.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

INTERNATIONAL TRADE COMMISSION AUTHORIZATION, 1978

Mr. VANIK. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6370) to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential appointment of the chairman and vice chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes.

The Clerk read as follows:

H.R. 6370

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION OF APPROPRIATIONS.

Subsection (e) of section 330 of the Tariff Act of 1930 (19 U.S.C. 1330(e)) is amended—

(1) by inserting "(1)" immediately before "For"; and

(2) by adding at the end thereof the following new paragraphs:

"(2)(A) There are authorized to be appropriated to the Commission for necessary expenses for fiscal year 1978 not to exceed $11,522,000.

"(B) Nothing in subparagraph (A) shall authorize appropriations for more than—

"(i) four employees for each commissioner (other than the commissioner who is the chairman of the Commission) who serve as the personal staff of the commissioner; and

"(ii) six employees who serve as the personal staff of the Chairman of the Commission.

"(3) There are authorized to be appropriated to the Commission for each fiscal year after September 30, 1977, in addition to any other amounts authorized to be appropriated for such fiscal year, such sums as may be necessary for increases authorized by law in salary, pay, retirement, and other employee benefits.".

SEC. 2. QUALIFICATIONS FOR APPOINTMENT OF COMMISSIONERS; APPOINTMENT OF CHAIRMAN AND VICE CHAIRMAN; ADMINISTRATION OF THE COMMISSION.

(a) IN GENERAL.—Section 330 of the Tariff Act of 1930 (19 U.S.C. 1330) is amended—

(1) by striking out the second sentence in subsection (a) and inserting in lieu thereof the following: "No person shall be eligible for appointment as a commissioner unless he or she is a citizen of the United States and is knowledgeable about the problems affecting the international trade of the United States. Persons shall be appointed as commissioners on the basis of their maturity, experience, integrity, impartiality, and good judgment, and their willingness to administer the duties and responsibilities of the Commission in a manner consistent with its historic function as an impartial adviser to both the President and the Congress. Any commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office."; and

(2) by amending subsection (c) to read as follows:

"(c) APPOINTMENT OF CHAIRMAN AND VICE CHAIRMAN; ADMINISTRATION OF THE COMMISSION.—

"(1) The President shall appoint, by and with the advice and consent of the Senate, one of the commissioners as chairman and one as vice chairman. The chairman and the vice chairman shall not be members of the same political party. The vice chairman shall act as chairman in case of the absence or disability of the chairman. During any period in which there is no chairman or vice chairman, the commissioner having the longest period of continuous service as a commissioner shall act as chairman. The term of office of the chairman and the vice chairman shall be three years; except that the term of office of the chairman and the vice chairman first appointed by the President under this paragraph shall expire on June 16, 1980. No commissioner may be appointed as chairman after serving as vice chairman for two full terms.

"(2) No commissioner shall actively engage in any business, vocation, or employment other than that of serving as a commissioner.

"(3) A majority of the commissioners in office shall constitute a quorum, but the Commission may function notwithstanding vacancies.

"(4) The chairman of the Commission shall be responsible for initiating, and the Commission shall be responsible for approving, and may initiate, administrative action in the following areas:

"(A) the employment and discharge of key personnel (other than personnel referred to in subsection (e)(2)(B), the employment and discharge of which shall be the responsibility of the individual commissioner concerned),

"(B) external relations, and

"(C) the budget of the Commission.

The chairman of the Commission shall be responsible for all other administrative matters of the Commission.".

(b) EFFECTIVE DATES.—The amendments made by subsection (a) of section 330 of the Tariff Act of 1930 (except subsection (c)(1) thereof) shall take effect on the date of the enactment of this Act. The amendment made by subsection (a) to section 330(c)(1) of the Tariff Act of 1930 shall take effect on the ninetieth day after such date of enactment.

SEC. 3. HARMONIZATION OF TRADE STATISTICS.

Section 484(e) of the Tariff Act of 1930 (19 U.S.C. 1484(e)) is amended by striking out "production," and inserting in lieu thereof the following: "production and programs for achieving international harmonization of trade statistics,".

The SPEAKER. Is a second demanded?

Mr. STEIGER. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Ohio (Mr. VANIK) will be recognized for 20 minutes, and the gentleman from Wisconsin (Mr. STEIGER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. VANIK).

Mr. VANIK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 6370 authorizes up to $11,522,000 in appropriations for the International Trade Commission for fiscal year 1978. Additional sums are also authorized to be appropriated as are necessary for increases authorized by law in salary, pay, retirement, and other employee benefits.

The ITC submitted a budget request to the Congress of $12,187,000. Your committee recommends a reduction of $655,000 in that budget and suggests three areas where the savings could occur—travel, printing expenses, and Commission self-initiated studies.

Last year, we reported that the International Trade Commission had some severe management problems. The House passed a bill which would have provided some administrative changes in the way the ITC operated, but the bill failed of enactment. While there have been some improvements in the past year, the International Trade Commission is still poorly run. As a result of some management problem a major Civil Service Commission investigation has just been completed, and a number of corrective personnel actions will be required.

To try to remedy the overall situation, the authorization bill would make a number of changes in the organization of the Commission.

H.R. 6370 provides that rather than the present system of rotating chairmanships, the President shall appoint the Chairman and Vice Chairman, by and with the advice and consent of the Senate, for a term of 3 years with a limit of two full terms for each Commissioner. The President may remove a Commissioner only for cause. The Chairman and Vice Chairman shall not be members of the same political party. This year's bill is similar to last year's in providing that the Chairman of the Commission shall be responsible for administrative matters of the Commission, except that the Chairman shall be responsible for initiating and the Commission shall be responsible for approving and may initiate administrative action in the following areas: The employment and discharge of key personnel, external relations, and the budget of the Commission.

The bill amends the language regarding a person's eligibility to be appointed as Commissioner so as to specify more experience in the field of trade and to emphasize the qualities an appointee to the Commission shall possess.

The bill limits the size of the Commission's personal staffs so as to prevent proliferation of personal staff size.

Finally, on a slightly different subject, the bill amends the 1974 Trade Act to insure that programs for achieving international harmonization of trade statistics shall proceed as an integral part of the statistical program to achieve comparability among statistics on imports, exports, and domestic production.

We believe that these changes will result in a better operating ITC; we will be closely monitoring the progress the ITC makes in improving its day-to-day administration.

The committee is directing the Commission to report within 6 months on action taken to:

First. Complete the reorganization of the Commission staff in conformity with Civil Services rules;

Second. Delegate administrative matters and delegate to the staff operational responsibilities consistent with the responsibilities assigned to the organization units under the reorganization so that Commissioners may concentrate on substantive issues; and

Third. A code of personal conduct with respect to employment of staff, travel, speaking engagements, prohibition on political speeches and partisan political activity, and other matters concerning personal conduct of Commissioners and staff in the interest of enhancing the public perception of the Commission as an objective, factfinding agency with a quasi-judicial role in carrying out the trade policy of the United States.

Finally the committee is requesting that the Commission's reports with respect to synthetic organic chemicals be continued through 1980.

Mr. Speaker, I urge the House approval of H.R. 6370.

Mr. STEIGER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in view of the overwhelming interest shown by our colleagues in this bill, it is, I recognize, sometimes futile to take the time of the House to talk about a bill of this character.

The bill is important. The ITC is assuming a position of greater and greater importance, and an increasing number of cases are brought to them by domestic

industries asking the ITC to take a look at whether or not there is the threat of harm or harm from products coming into the United States.

Mr. Speaker, the work of the ITC is such that it plays a profoundly important role in not only assessing what happens to domestic industry, but in terms of the kind of recommendations that they make that affect our relationship with our trading partners.

The committee report is an excellent report. I would urge the Members to look carefully at the analysis that has been made of the International Trade Commission by the Subcommittee on Trade in its oversight responsibility. That report ought not to be lightly dismissed. The Commission at this point is almost a disaster. I can think of only one other example of an agency that is in worse trouble than the ITC, and that is the Equal Employment Opportunity Commission. Unfortunately, we do not have oversight of the EEOC, so we are dealing now with just the ITC.

However, Mr. Speaker, if I had my preference and if I could redo everything—and I think this would be no surprise to the members of the Subcommittee on Trade—that I would, frankly, abolish the ITC and start by doing what I think is right and doing what I think would solve the problem.

Mr. Speaker, this bill represents a legitimate, good-faith compromise in our efforts to correct the problems of the ITC. I do not want the House to think that this is going to be the end of all its problems because in the other body there are those who are protective of their turf on ITC; but I have no hesitancy in saying to the President of the United States or to the ITC or to the other body that it is high time we shaped up or shipped out.

Mr. Speaker, this bill is an effort to achieve that result, and I hope the House will overwhelmingly pass the legislation. Furthermore, I will say, Mr. Speaker, that I hope the other body does not delay. If they disagree with what we have done, fine; let us go to conference and try to determine how best to solve the problems of the ITC; but I do not think our trading interests, our domestic industries, the Congress, the President, or the ITC can any longer afford to sit by and see that Commission bogged down in a debate over whether to use a blue cover or a red cover or whether to double-space or single-space, spending all of this time in that kind of trivia, which is absolutely asinine.

Therefore, Mr. Speaker, I urge support for the bill, and I hope it will be passed overwhelmingly. Similarly, I hope that this vote will be a message for those downtown that this House or, at least, this one Member, is not going to sit idly by and see us continue to have a good independent commission destroy itself when, in fact, I think we have a chance, via this vehicle, to help strengthen the role and the work of the International Trade Commission.

Since the passage of the Trade Act of 1974, the International Trade Commission has been the center of much public and private controversy. This controversy has been rather substantial ranging from criticism of certain Commissioner's public conduct to suggestions of Commission mismanagement. This kind of exposure is not the kind for which public respect and confidence are won. And it is this very public respect and confidence which goes a long way in determining the ITC's effectiveness as an independent, quasi-legislative body.

Last Congress, the ITC appropriation bill passed by this body contained several measures which would have addressed the Commission's problems as they stood at that time. At conference the measure was merged with the Tax Reform Act of 1976, but was subsequently sacrificed in the interest of expediting passage of the Tax Reform Act. Since that time the situation at the Commission has not improved.

Mr. Speaker, H.R. 6370 addresses the continuing problems at the ITC instituting certain key structural changes which the Ways and Means Committee is confident will permit the ITC to discharge its statutory responsibilities with greater effectiveness and efficiency. First, a change is made in the term of and method for designating the Chairman and Vice Chairman. The bill provides that the President will appoint the Chairman and Vice Chairman, by and with the advice and consent of the Senate, for a term of 3 years with a limit of two full terms for each Commissioner. The Chairman and Vice Chairman cannot be members of the same political party. Presently, the Chairmanship rotates on an 18 month basis.

Further, the bill establishes a so-called strong chairman. Under this formulation, the Chairman will be responsible for all administrative matters of the Commission, except that the Chairman shall be responsible for initiating and the Commission shall be responsible for approving, and may itself initiate administrative action in the following areas: the employment and discharge of key personnel, external relations, and the budget of the Commission. Currently, responsibility for administrative matters falls on the full Commission. As the Commissioners have frequently been evenly divided, the Commission has in the past been stalemated on several important administrative matters.

In addition, the bill amends the eligibility requirements for the position of Commissioner specifying more experience in the trade field.

Finally, and quite unrelated to appropriations and structure, H.R. 6370 provides further assurance that programs for achieving international harmonization of trade statistics will proceed as a part of an ongoing program, mandated under the 1974 Trade Act, to achieve comparability among import, export and domestic production statistics.

Mr. VANIK. Mr. Speaker, I concur in the remarks made by my colleague, the gentleman from Wisconsin (Mr. STEIGER) the ranking Republican member on the Subcommittee on Trade, and wish to thank him for his excellent cooperation during the hearings on the legislation and the markup on this very important legislation.

Mr. VANIK. Mr. Speaker, I have no further requests for time, and I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion offered by the gentleman from Ohio (Mr. VANIK) that the House suspend the rules and pass the bill H.R. 6370.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on the motion on which further proceedings were postponed, H.R. 5675.

TAX AND LOAN ACCOUNTS

The SPEAKER. The unfinished business is the question of suspending the rules and passing the bill H.R. 5675.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from Maryland (Mr. MITCHELL) that the House suspend the rules and pass the bill, H.R. 5675, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 384, nays 0, answered "present" 1, not voting 48, as follows:

Mr. Bingham with Mr. Goodling.
Mr. Edwards of California with Mr. Florio.
Mr. Long of Louisiana with Ms. Mikulski.
Mr. Ryan with Mr. Jenrette.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO SIT THIS WEEK DURING THE 5-MINUTE RULE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations may be permitted to sit this week while the House is proceeding under the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PRINTING AS HOUSE DOCUMENT OF REPORT OF SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS OF COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. HAWKINS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 246 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 246

Resolved, That there shall be printed as a House document the report by the Subcommitte on Oversight and Investigations of the Committee on Interstate and Foreign Commerce of the House of Representatives, Ninety-fourth Congress, second session, entitled "Federal Regulation and Regulatory Reform".

SEC. 2. In addition to the usual number of copies, there shall be printed one hundred and seventy copies of the report referred to in the first section of this resolution for use by the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce.

With the following committee amendment:

Strike all after *"Resolved,"* and insert in lieu thereof the following:

That there shall be printed as a House document the report by the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce of the House of Representatives, Ninety-fourth Congress, second session, entitled "Federal Regulation and Regulatory Reform".

SEC. 2. In addition to the usual number of copies, there shall be printed six hundred eighty three copies of the report referred to in the first section of this resolution for use by the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce.

Mr. HAWKINS. Mr. Speaker, this resolution was reported by the Committee on House Administration without any opposition. It calls for printing of 682 additional copies at a cost of $9,425.61.

The committee amendment was agreed to.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF REPORT RELATING TO PROCUREMENT OF ADP RESOURCES BY THE FEDERAL GOVERNMENT

Mr. HAWKINS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 363 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 363

Resolved, That there shall be reprinted for the use of the Committee on Government Operations two thousand copies of the report entitled "Administration of Public Law 89-306, Procurement of ADP Resources by the Feneral Government".

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING AS A HOUSE DOCUMENT THE DEDICATION CEREMONY OF THE PORTRAIT OF HON. MELVIN PRICE, CHAIRMAN, COMMITTEE ON ARMED SERVICES

Mr. HAWKINS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 379 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 379

Resolved, That the transcript of the proceedings in the Committee on Armed Services of February 16, 1977, incident to the presentation of a portrait of the Honorable Melvin Price to the Committee on Armed Services be printed as a House document with illustrations and suitable binding.

SEC. 2. In addition to the usual number there shall be printed two thousand copies of such document for the use of the Committee on Armed Services.

With the following committee amendment:

Strike all after *"Resolved,"* and insert in lieu thereof the following:

That the transcript of the proceedings of the Committee on Armed Services of February 16, 1977, incident to the presentation of a portrait of Hon. Melvin Price to the Committee on Armed Services be printed as a House document with illustrations and suitable binding.

SEC. 2. In addition to the usual number, there shall be printed 2,000 copies of such document, of which 200 copies shall be case bound, for the use of the Committee on Armed Services.

The committee amendment was agreed to.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING 20,000 ADDITIONAL COPIES OF SUBCOMMITTEE PRINT OF SUBCOMMITTEE ON CONSUMER AFFAIRS OF COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS ENTITLED "GIVE YOURSELF CREDIT: GUIDE TO CONSUMER CREDIT LAWS"

Mr. HAWKINS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Concurrent Resoltuion 162 and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 162

Resolved by the House of Representatives (the Senate concurring), That twenty thousand additional copies of the subcommittee print of the Subcommittee on Consumer Affairs of the Committee on Banking, Finance, and Urban Affairs entitled "Give Yourself Credit: Guide to Consumer Credit Laws" shall be printed for the use of the Subcommittee on Consumer Affairs and the Committee on Banking, Finance, and Urban Affairs.

With the following committee amendment:

Strike all after *"Resolved by the House of Representatives (Senate concurring),"* and insert in lieu thereof the following:

That there shall be printed as a House document the report by the Subcommittee on Consumer Affairs of the Committee on Banking, Finance, and Urban Affairs entitled "Give Yourself Credit: Guide to Consumer Credit Laws."

SEC. 2. In addition to the usual number of copies, there shall be printed 20,000 copies of the report referred to in the first section of this concurrent resolution for use by the Subcommitee on Consumer Affairs of the Committee on Banking, Finance, and Urban Affairs.

The committee amendment was agreed to.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING AND BINDING OF EDITION OF SENATE PROCEDURE AND PROVIDING THE SAME SHALL BE SUBJECT TO COPYRIGHT BY THE AUTHOR

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the Senate joint resolution (S.J. Res. 44) to authorize the printing and binding of an edition of Senate Procedure and providing the same shall be subject to copyright by the author, and ask for its immediate consideration.

The clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The clerk read the Senate joint resolution, as follows:

S.J. RES. 44

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be printed and bound for the use of the Senate one thousand five hundred copies of a revised edition of Senate Procedure, to be prepared by Floyd M. Riddick, Parliamentarian Emeritus of the United States Senate, to be printed for distribution to the Members of the Senate.

SEC. 2. That notwithstanding any provision of the copyright laws and regulations with respect to publications in the public domain, such revised edition of Senate Procedure shall be subject to copyright by the author thereof.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PERSONAL EXPLANATION

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, due to business in my congressional district, I was compelled to be absent on Friday, April 22, 1977. I therefore missed rollcall votes Nos. 145 and 146 and would like to announce how I would have voted had I been present.

Rollcall vote 145. House agreed to the Journal of Thursday, April 21. Passed 326 yeas to 8 nays. I would have voted "yea."

Rollcall vote 146. An amendment to H.R. 5970, the Department of Defense authorization bill, that sought to prohibit procurement of the airborne warning and control system aircraft (AWACS) unless NATO agrees to purchase these aircraft. Rejected 135 ayes to 222 noes. I would have voted "no."

DEPARTMENT OF DEFENSE AUTHORIZATION FOR FISCAL YEAR 1978

Mr. BENNETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 5970) to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Florida (Mr. BENNETT).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 5970, with Mr. ROSTENKOWSKI in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Friday, April 22, 1977, title III had been read. Pending was an amendment offered by the gentleman from California (Mr. DELLUMS).

Mr. WHITE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, initially, a few clarifying points are necessary. I do not want to challenge the accuracy of the gentleman's figures because these figures vary according to the time of the year and how they are calculated, but I do want to make sure the RECORD is correct on this point.

The gentleman suggested that over 30,000 military personnel were reduced overseas since this time last year. That is not accurate. Based upon Department of Defense press releases, which I have in my hand, and which are available generally, U.S. troop strength overseas in foreign countries declined by less than 5,000 in calendar year 1976.

Specifically, on December 31, 1975, there were 454,000 U.S. military personnel in foreign countries. On December 31, 1976, there were 449,218 military personnel overseas, a difference of 4,782. This decline is a result of a reduction of over 10,000 personnel assigned to Thailand. Obviously, there were other pluses and minuses, but as far as major actions, any reduction last year results primarily from the situation in Thailand.

The actual numbers are not the crux of this issue in any case, but to suggest that the thrust of the gentleman's amendments in the past have foretold actual occurrences is not wholly accurate.

However, the substance of this amendment, which is what we need to debate, greatly concerns me. The amendment would reduce active duty military strength by 50,000 personnel of which 17,000 are to come from troops stationed overseas.

This amendment mandates a general reduction in troops overseas and military strength overall not based upon a specific change in U.S. policy but simply to save money. Now I am not opposed to saving money, but the net effect of any funds saved in this way would be disastrous. An action of this sort will clearly signal to the world that the U.S. Congress will not support the existing commitments this Nation has made and indictate an isolationist attitude prevails.

If such a reduction were to be made, it

would be infinitely better, and more responsible, to address specific commitments of the United States so that at least, if such a reduction prevailed, the world would understand the basis for the action.

I agree with the author of this amendment that the only way to save money through such a proposal is to deactivate troops, not bring them back to the United States. If troops are withdrawn from overseas and restationed in the United States, large additional resources will be consumed for additional military construction to house these forces and to provide the transport for them necessary when they are to be redeployed.

The gentleman is not proposing that these troops be returned to the United States. His proposal is to reduce active military strength by 50,000. His proposal would reduce active duty forces by a number equivalent to 3 of the 16 Army divisions at a time when the U.S. active duty military strength is at its lowest level since 1950.

I hope the Members of the House appreciate that the author of this amendment never once suggested that the military requirement for these troops is invalid. His argument is apparently that these personnel should be eliminated without regard to what is required for national security.

The Military Personnel Subcommittee examined in some detail the requirements for manpower under the plans which have been established by the civilian leadership of this Nation and the Joint Chiefs of Staff. I can assure the Members of the House that based upon our review and as outlined in the committee report, this country is today seriously short of the manpower which will be required if our security is threatened. The amendment would aggravate this deficiency.

Further, if reductions are to be made in Korea—the United States of America is committed to consult with Japan first, and this amendment would violate that agreement.

If reductions are to be made in Europe by this amendment, this unilateral reduction would seriously disrupt our negotiations for mutual balance of force reductions.

Mr. Chairman, this amendment would be damaging to the current position and security of this Nation and I urge it not be supported.

Mr. DOWNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. DOWNEY. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I thank my distinguished colleague for yielding.

I would like to respond very specifically to a statement made by the gentleman from Texas (Mr. WHITE), who was previously in the well, with respect to the number of troops we have stationed overseas, and I would simply suggest to my distinguished colleague, who is a member of the committee, that my figures are not dreamed up by the gentleman from California but the source of these figures is the Department of Defense.

First of all, with respect to the number of troops as of 1976, these are indeed Department of Defense figures, and I will give them to the gentleman. They appear on the second page of this paper. This is what it shows:

Total outside the United States: 462,850. And the way they arrived at this figure is as follows:

In the Far East, 132,050; in Latin America, 15,800; in Europe, 295,700; and in other areas, 19,300.

If the gentleman will add those figures up, he would find that they come to 462,850 troops.

Figures published by the Department of Defense for the year 1975 show 497,000 troops stationed overseas. A simple mathematical calculation would determine that over 30,000 troops have indeed been reduced from our total troops overseas or stationed outside the United States, other than those stationed afloat and those stationed in U.S. territories and possessions. That figure is in fact over 30,000.

I would simply like to raise one additional point.

Again using Department of Defense figures, in 1973 the total overseas forces were 635,000; 1977, 462,850. That is a total reduction of 172,150 troops.

The point the gentleman from California was trying to make in offering this amendment was simply that while the Congress of the United States has not seen fit to take a policy position with respect to the question of the stationing of our troops overseas, the Pentagon has indeed done just that.

Mr. Chairman, I am simply saying, as a very simple argument, that we should leave to the Department of Defense those matters that are specifically military matters. We have a constitutional duty as part of the policymaking process of this country, and I am simply saying to the U.S. Congress, let us not, in debate, invade the province of the Department of Defense with respect to specific military measures. Instead, let us, in fact, deal with policy considerations. Mr. Chairman, the figures show that we have reduced our forces. Last year I offered an amendment to reduce our oveseas land-based troops by 47,000. That means in my amendment now we would reduce our overseas forces by 17,000 since the Petagon has already reduced the figure by 30,000 troops.

In addition, I would like to save more money. Many Members of Congress last year, the year before, and the year before that said that we ought to have those troops overseas; they are not overseas. I am saying that if they are not overseas, why are we going to bring 30,000 troops back here?

If we are going to bring them back home, let us deactivate them, thereby saving the American taxpayer a substantial amount of money. This is one of the important problems.

Therefore, if the gentleman from California and the gentleman who spoke previously in the well have different figures, maybe it is because the Pentagon has given them different figures; but I certainly did not dream these figures up.

Mr. WHITE. Mr. Chairman, will the gentleman yield?

Mr. DOWNEY. I yield to the gentleman from Texas.

Mr. WHITE. Mr. Chairman, the fact is that there is a difference in troops overseas, generally, and those in foreign countries. We have other bases overseas, in our possessions or our territories or our States; and this is the difference between the figures the gentleman has used and what I have suggested.

Second, it is not for this Congress to dictate foreign policy. If, indeed, this Congress determines that some essential, fundamental need of this country is not being met, then we can act; but in the meantime, we should not hamstring the Commander in Chief and the State Department who are traditionally and constitutionally the ones who should determine the foreign policy of this Nation.

The CHAIRMAN. The time of the gentleman from New York (Mr. DOWNEY) has expired.

(On request of Mr. DELLUMS and by unanimous consent, Mr. DOWNEY was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. DOWNEY. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, may I say to the gentleman from Texas (Mr. WHITE) that the gentleman from California is clearly aware of the distinction with respect to the labeling of troops abroad.

I would repeat that the total outside of the United States is 462,850. Troops stationed in U.S. possessions and territories beyond that figure come to 23,700, and those stationed afloat are 58,300; so the gentleman from California has made that distinction.

I am simply saying, in response to the last statement the gentleman made, that we should not dictate foreign policy; I would not characterize action of the U.S. Congress as one branch of the triad of Government as dictating foreign policy. I am simply saying that we should be equal partners in the establishment of policy and in the establishment of programs.

Mr. Chairman, I would find it difficult to understand how the gentleman can characterize our action as dictating foreign policy.

Mr. JOHNSON of Colorado. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I want to speak on behalf of the amendment, but mainly with respect to the reduction of troops overseas and specifically in Korea.

I realize that the amendment does not specify withdrawal of troops from Korea. However, I realize also that if we pass

the amendment, that is probably where the reduction will come about.

Mr. Chairman, we tend to keep troops overseas and follow the policy that has been followed for years without really too much analysis.

I have been doing some reading recently. I would like to draw the attention of the Members of the body to "Foreign Relations of the United States, 1949," which has just been declassified.

In it it points out that on February 21, 1948, the Joint Chiefs of Staff—the Chairman of the Joint Chiefs at that time was Admiral Leahy; General Bradley, General Vandenberg, and Admiral Denfeld were also on the Joint Chiefs—stated in 1948 that the United States had little strategic interest in maintaining its troop strength in Korea. At that time we had about 7,500 troops there.

Then the National Security Council—and this, too, has just been declassified. It is too bad it was not declassified at that time, if it had been probably the tragedy in Korea might not have occurred. But the National Security Council stated that it was an immediate objective to withdraw the 7,500 troops from Korea by May 10, 1949.

Subsequently, we all know the history, we were involved in Korea from 1950 to 1953 with 33,000 men killed and 103,000 wounded. Between 1946 and 1978, we have and will have given them $6 billion in economic aid and $7.3 billion in military assistance for a total of over $13 billion.

What is the relative strength of North Korea and South Korea now and why do we need to retain the present 40,000 troops we have there? That is the issue we really should be addressing ourselves to.

Let us take a look at the relative strength of North Korea and South Korea. South Korea has a population of 34.6 million people. North Korea has a population of 16.2 million people, less than half.

North Korea has a total armed services, active, of 495,000. South Korea has a total armed services, active, of 595,000.

The estimated gross national product in 1974, which are the latest figures available, if they are accurate, show that South Korea has $17.2 billion while North Korea has $4.8 billion.

Total reserves:

South Korea has 1,148,000 people. North Korea is reported as having nothing by the Congressional Research Division.

North Korea has 40,000 security forces and border guards, plus a civilian militia of 1,800,000.

The paramilitary forces of South Korea: A local defense militia, 750,000 homeland defense reserve forces.

By any measure South Korea is far stronger than North Korea. There is not any comparison between the two.

The gross national product, the amount of military aid that has been given, the populations and in the relative strengths of their armed forces all favor South Korea by a wide margin.

The military justification has really not changed since 1948. As a matter of fact, the gentleman from Texas (Mr. MAHON); the chairman, in 1974, had commissioned the staff of the Committee on Appropriations to look into our forces in Korea. That report is available to the Members of this body if they ask for it. That report stated that political considerations predominate as the reasons for our continued presence in Korea.

Obviously the geography has not changed since 1948 where the Joint Chiefs of Staff stated what is obviously apparent, that we do not have any strategic interest in Korea. So why do we maintain our 40,000 troops there which constitute less than 10 percent of their total ready force as hostages?

It is said by a lot of different people, and there are different arguments that have been raised, that we do it so as to insure the Koreans and the Japanese that we intend to maintain our presence in Asia. That is the crux of the matter.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. JOHNSON of Colorado was allowed to proceed for 2 additional minutes.)

Mr. JOHNSON of Colorado. Mr. Chairman, I think we all know that the American people will not tolerate our fighting another land war in Korea so why do we not accept that fact and get on with the graduated withdrawal of our troops that we have been talking about for a number of years?

What political considerations are there regarding Korea? We have expended vast amounts of money to maintain a government that tolerates no dissent, that throws everyone in jail who disagrees with their politics. We have done this to maintain a government—and I use the words very carefully—to maintain a government that has taken advantage of and has cast grave shadows upon the integrity of present and past Members of this body.

Is this why we keep our troops in Korea? Is that what all the sacrifices we have made since 1950 are all about?

I think it is time we made it clear that we are serious about the withdrawal of our troops from South Korea.

President Carter has campaigned on the promise to withdraw, and we should reaffirm that intention by adopting the gentleman's amendment. We have provided South Korea with every military and economic assistance that any ally could be expected to provide. I think it is time we made it quite clear that we never again will have American infantrymen involved in combat in Korea.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding.

I think that Secretary Vance the other day gave other reasons for continued action on our part, or at least a presence, in South Korea—it is not to maintain a government which does not respect human rights—not for any of the reasons which the gentleman cited, but for some stability in that area of the Pacific, for some recognition of our obligations which still are in force.

I should like to ask the gentleman, a question. According to my understanding of the figures given by the sponsor of the amendment, there would be a cut of some 99,000 troops; is that correct?

Mr. JOHNSON of Colorado. No, no.

Mrs. FENWICK. We would be going from 462,850 to 363,850. Those were the figures given by the sponsor.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. JOHNSON of Colorado was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

There are different categories of troops. There are American land-based troops overseas, troops stationed in U.S. possessions, and troops stationed afloat. What my amendment would do would be to require 17,000 American troops to be withdrawn from our overseas land-based troops. It would require that a total of 50,000 troops be cut from our total end strength. The result would be bringing 17,000 home and deactivate them, and also deactivate 30,000 already home.

Mrs. FENWICK. If the gentleman from Colorado would yield further, as I read it, no more than 363,850 may be assigned to active duty on land outside the United States. The figures the gentleman gave were 462,850, making the deduction to 99,000.

Mr. DELLUMS. If the gentleman from Colorado would yield further, 462,850 total overseas forces.

Mrs. FENWICK. Right, and under the amendment no more than 363,850 could be assigned to active duty overseas.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SIKES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. I hear it has been said that military forces from Communist Cuba now in Angola serve a stabilizing purpose. What they are doing is insuring the continuation of a Communist regime which is in power through conquest; a conquest which they made possible. Little is being said and nothing done here about placing the Congress on record in opposition to the presence of those forces. No one seems particularly concerned with action or words which might remove Cuban and other Communist forces from those nations where their presence is strongly objected to by the majority of the populace. American forces are not overseas in a single nation for the purpose of helping to maintain in power a government that is there by conquest. They are there as a stabilizing influence toward world peace and, if necessary, they are

there to help repel aggression committed against nations who are friendly to our country. They give confidence to those who seek to resist a Communist takeover.

Mr. Chairman, the presence of American forces abroad is probably the most important single contributor to continued peace in the world. American forces abroad help to insure a continuation of peace. When American Forces are moved out, a vacuum often is created, and in more cases than not, the Communists move in. I do not think we want that to happen in Korea or anywhere else where American forces now are found. I do not want it to happen. I do not believe the Congress wants it to happen. I am confident the American people do not want it to happen. American forces abroad are a small investment for peace. If we move our troops out, we are inviting trouble for the free world. We are providing the Communists new opportunity to continue their goal of world conquest and they are moving fast enough and much too successfully without the help this amendment would give. Remember one nation after another is falling into their orbit; yesterday, parts of Zaire by conquest; today Ethiopia.

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from Idaho.

Mr. SYMMS. Mr. Chairman, I thank the gentleman for yielding. I compliment the gentleman on his statement. I happen to agree with him.

I would just say to the gentleman from California, who has offered this amendment very sincerely for the last 4 years that I have been here in the Congress, and it has always been voted down, I think the best way to make this a reality would be to pass President Carter's energy proposal and then we would have to bring all those troops home to enforce it.

Mr. TREEN. Mr. Chairman, I rise in opposition to the amendment and I move to strike the requisite number of words.

Mr. Chairman, as I understand it the amendment would do two things: it would cut the total authorized strength level by 50,000 in numbers, and it would also mandate that our land forces overseas be lowered by 17,000 spaces. If that is correct—and I see the gentleman from California indicates it is—I would like to make three comments about it.

First of all, I think the motivation of some who would ordinarily support this would be based on the belief that it would reduce the cost of our Defense Establishment, and, of course, if we adopt the amendment in toto to reduce the forces by 50,000, it would do that.

But for those who feel we should perhaps reduce the number of overseas forces because the resulting cost would be less, let me say the best evidence is that it really would not cut the costs just to bring forces back home, because the costs of maintaining the troops here in the United States would have to be borne.

Second, the forces we have, the ground forces we have in South Korea, are there for specific purposes. They are there to augment the area in which the South Korean Army and Air Force are weak. We have three tactical air squadrons and one Army division which is heavy on artillery, and this is one of the areas in which the South Koreans are specifically weak. So we have to look not just at the numbers on both sides but also at the missions and roles of our forces in that area.

Third, I would like to make this comment. During the Presidential campaign, Jimmy Carter, now President Carter, criticized the Ford administration for taking actions in the Pacific without full consultation with our principal allies in the area and specifically for not consulting with Japan. Candidate Carter said: "I intend to do this when I become President."

President Carter has said to the Japanese that he intends to consult with them before we move toward a reduction of forces in South Korea.

I would suggest to the Members that if we unilaterally make that decision here on the floor—and that I think would be the effect of this amendment because I do not think we could realistically reduce our land forces in Europe, that is, the troops would have to come out of Korea—it would be a very destabilizing thing to do. It would handicap President Carter in what I think is a very genuine and sincere and correct position on his part, that before we do anything over there to cause grave concern to the Japanese we should fully discuss it with them.

I as a member of the Personnel Subcommittee assure the members of that committee and of this body that I will work for a reduction in the numbers of both Reserve and Active Forces and for bringing troops home when we can, but at this particular juncture we should avoid that and let the President come to us with his recommendations.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield briefly?

Mr. TREEN. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I think the gentleman has made here a thoughtful presentation. I would simply like to speak to a couple of points.

One, the gentleman is correct that to bring troops simply back home and station them here would not result in saving. Using the Pentagon figures, it costs between $14,000 and $15,000 per troop, excluding transportation costs, in order to have troops stationed overseas. So if we are going to save money we would in fact not only have to bring the troops home but also deactivate them. That is precisely the motivation of the gentleman from California. It will give a one-time saving to the American taxpayer of $750 million and annually a saving of $950 million.

Mr. TREEN. That is if we make the 50,000-troop cut.

Mr. DELLUMS. Right.

One comment the gentleman mentioned is that we are augmenting the South Korean forces in areas where they are weak. I think that is an excellent argument for our justifying an air wing in South Korea but certainly it does not go to the question of having over 40,000 American troops stationed in South Korea.

Mr. TREEN. I do not think there are 40,000 Army Forces in question, and my point was that it is the artillery that they need.

Mr. KREBS. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, somehow the year, 1952, seems like yesterday to me, but yet it is so many years back. This happens to be the year when I, like many Americans, was drafted. I remember those days in 1952 and the 2 years that preceded that day in June 1950 when the Korean war broke out, that we were told we were fighting with the rest of the free world for democracy in Korea.

Now, fortunately, I have not heard a single person stand up here on either side of this issue and continue telling us that we are still fighting for democracy in Korea, because the fact is that our troops are stationed in Korea, whether we like to admit it or not, whether this is really our intent or not, and I submit it is not our intent; but it is the result, nevertheless, that we are in Korea today for only one purpose, that is to maintain one of the most vicious, one of the most corrupt regimes in the post-World War II era.

I really do not think it has helped to enhance the image of the United States to find ourselves still at this late stage of the game, not only on the same side with South Korea but actively supporting her through the maintenance of over 40,000 of our troops, in this year, 1977, when all of us, regardless of political philosophy, have been talking about human rights and the need to protect human rights.

Nevertheless, we have heard Members stand up here this afternoon and tell us how important it is that we maintain these troops in Korea.

Now, I maintain that the best thing we can do for the United States, for the image of the United States, for the strength of the United States among the nations of the world, is to vote for this amendment and to signal to the rest of the world that we mean what we say when we talk about human rights; that we, indeed, are embarking on a course that I submit is long overdue. By this vote we are going to tell the rest of the world that we have learned something from the mistakes of the post-World War II era and that we are, indeed, going to fight for human rights, regardless of whether violations of such rights occur in the Soviet Union, in South Africa, in Rhodesia or in South Korea.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. KREBS. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, this amendment would reduce the total active forces by 50,000 spaces. We are not dealing in the amendment just with the re-

duction of troops in Korea, so when the gentleman urges a vote for this amendment, he is urging a vote for a 50,000 reduction. That, of course, does not go to the question of human rights at all; but I suggest we might have a look at what the human rights situation is in North Korea.

I suggest further that is not the main issue here. The issue is the security of the United States and the strength of its alliances with those friendly countries in the Pacific Basin. Those are the considerations, I think, of paramount interest here. I do not say the issue of human rights in South Korea is not important, but I think it is a different issue. I do not think we should cloud the issue of American security with that kind of side issue.

Mr. KREBS. Mr. Chairman, I appreciate that explanation; but I would like to remind the gentleman that the opponents of this particular amendment are those who for approximately 27 years have urged us to continue maintaining troops in Korea. Only last year it was argued that the reason we have our troops in South Korea is to see to it that the South Koreans are not encouraged to attack North Korea. Apparently this argument has not been used this year; but regardless of the niceties of the issue, the time has come to start reducing the troop level in South Korea.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think the issue here today really is this: Whether we are going to provide some kind of stability and some kind of certain signal to the rest of the world; or whether we are not. This Congress has, in fact, been following the advice of both gentlemen from California over the past 4 or 5 years (Mr. DELLUMS and Mr. KREBS). It is only in the last couple of years that we have suddenly realized we cannot continue to demobilize our military forces and pull back from the rest of the world and still expect to have any real influence. So, in the last couple of years the Congress has refused to approve these various troop reduction amendments that have come up, whether the Dellums amendment, the O'Neill amendment, or whatever the amendment may be; and we have held firm in an effort to provide some stability in the world.

I think everybody, even the gentleman from California (Mr. DELLUMS), recognizes the need for stability in NATO. And certainly, the President of the United States recognizes the delicacy of the situation in Korea. In fact, he has indicated that he wants to consult with our allies before he makes any move on withdrawing troops from Korea.

So the question is, are we going to reverse the decisions that have been taken previously to hold the line, to end this disruptive and constant turbulance in our Armed Forces when we insist on reducing them year after year, when nobody knows how many spaces are available, and instead we have tried to give a clear and certain signal not only to our allies, but also to our potential enemies.

That, I think, is the basic question. A reduction of 50,000 troops today would be totally unacceptable. The signal we would be giving would be that we are getting tired and getting out of the picture. Is this the time when we want to give that kind of signal? At a time when the Soviets refuse to discuss a very reasonable proposal for disarmament proposed by the President of the United States? At a time when we have a war in Zaire; when we are being kicked out of Ethiopia; and when we are losing friends in other parts of the world?

I think what we need to do today is to hold firm. In the last couple of years, under the leadership of Senator NUNN, we have converted many of our support troops into combat troops; but we have not reduced the overall total. I think today we ought to make it clear that we still stand firm in that position. We are not going to reduce our total Armed Forces, until and unless the other side shows some indication that they are reducing theirs.

Ms. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment. I want to commend the gentleman from California for offering his amendment.

One of the things I understand about the amendment is that it does not dictate that these forces come just from South Korea. Is that correct?

Mr. DELLUMS. That is correct.

Ms. SCHROEDER. I have several other questions about the amendment which have been raised by some of the prior speakers. I would like to yield at this time to the gentleman from California for clarification of those questions.

Mr. DELLUMS. Mr. Chairman, members of the Committee, this shall be the last time that I will speak on the floor on this particular amendment today. I would simply like to say, first of all, using the Pentagon's own figures in constant dollar terms, that by the year 1980 it is anticipated that we will be spending on our military budget between $147 billion and $150 billion. By the year 1985, it is projected—using Pentagon figures again—that we will be spending in the neighborhood of $200 billion.

If the Members will agree with me that we do not, and certainly the American people do not, wish to—by the year 1985—be spending $200 billion on military every year, given the rising cost of other human programs and problems which we have ignored, then it seems to me that this is the moment when we should begin to build into our foreign policy some kind of flexibility.

This amendment, again, would provide for a reduction of 17,000 troops overseas, and require a total in-strength reduction of 50,000, because that would allow us to save troops. I remind my colleagues that there is no such thing anymore in this world as a free commitment. If we have a commitment out in the world, and those figures I gave concerning the $200 billion are based on the status quo commitments, there is no such thing as a free commitment.

The bottom line of any foreign policy of any nation, stripped of all the glamour, is simply this: Who are you willing to kill, and who are you willing to die for?

Take South Korea as an example; are we prepared to kill the North Koreans, or are we prepared to die for the South Koreans? That is the basic question. If the answer is no, then I would suggest that we have the responsibility to vote in favor of this amendment because I think we have to build flexibility and reality into our policies.

I raised this question with former Secretary of Defense Schlesinger: "What is the purpose of the American deployment of over 40,000 troops in South Korea?"

His response was:

> There is no military justification, but we are in South Korea to provide a political presence.

My question is, what is so sacrosanct about 40,000? Could not an air wing or squadron provide a political presence? What is so sacrosanct about 40,000, which costs us a substantial amount of money at a point in time when those resources are desperately needed to be redirected to the much needed priorities of the country?

Mr. Chairman, I have one additional comment. Someone raised the specter of Cuba being some place to stabilize the world, and we are not here talking about them withdrawing. My only response to that is simply that this is the Congress of the United States. We are not citizens of Cuba. We have a responsibility to formulate policy in the United States. We have a responsibility to debate policy and arrive at a consensus.

The gentleman from California is not trying to raise the question of weakening the United States. I live here. I do not wish to be bombed out of my bed, nor my family or my children. That is absurd. What I am simply saying is: Let us adopt a policy that makes sense. We must move away from the heavy expenditure of our resources, for we must begin to play a different role in the world. The day of being the gunrunner of the world and the police officer of the world is over.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DELLUMS).

The question was taken; and on a division (demanded by Mr. DELLUMS) there were—ayes 17, noes 64.

Mr. DELLUMS. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. One hundred and eleven Members are present, a quorum.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from California (Mr. DELLUMS) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 88, noes 301, not voting 44, as follows:

[Roll No. 148]

Frenzel	Patten	Zeferetti

The Clerk announced the following pairs:

On this vote:

Mr. Edwards of California for, with Mr. Zeferetti against.

Mr. Badillo for, with Mrs. Boggs against.

Mr. Moss for, with Mr. Price against.

Mr. Rangel for, with Mr. Shipley against.

Mr. Anderson of California for, with Mr. Rooney against

Mr. Bingham for, with Mr. Holland against.

Messrs. DERRICK, HANSEN, RUNNELS, and DENT changed their votes from "aye" to "no."

Mr. OTTINGER changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this time to engage the gentleman from New York (Mr. STRATTON) in colloquy regarding language in the committee report. It would probably have been more appropriate to have been able to do this while we were discussing title I, but the gentleman was very busy at that time, and I did not wish to distract him from his work.

On pages 36 and 37 of the committee report is discussed the subject of Army tank programs and, in particular, the retrofitting of the M–60 tank is discussed. The committee points out it has disapproved the request of some $36.5 million to begin retrofitting M–60A1 tanks with the M–60A3 fire control system because the committee feels such action would be costly and counterproductive. The committee goes on to point out that, and I quote:

Not only would the eventual cost exceed a billion dollars, the Army would still not have addressed the principal weakness of the M60 which made it necessary to develop the XM–1 in the first place—its lack of survivability.

In view of this language, I feel it necessary to clarify the intent of the committee since it has come to my attention that a highly advantageous and cost-effective advanced hydropneumatic suspension system has been developed for the M–60 tank which would substantially increase the survivability of the M–60 through significantly increasing its maneuvering speed and through permitting the M–60 to utilize its fire power while on the move, whereas now it is accurate and effective primarily only when stopped.

The retrofitting of the M60 with this suspension system would cost approximately $28,000 per tank, but utilization of such system would extend the track life of the M60 to approximately 4,000 miles as compared with its present 2,000 mile life and the cost of replacing the track system on the M60 is roughly comparable to the cost of such retrofitting.

In short, I wish to be assured that if the tests which are presently ongoing prove that from the standpoints of survivability, better utilization of fire power and extension of track life, the retrofitting of M60 tanks with the new hydropneumatic suspension system is cost-effective that the committee would not want the language in the report to preclude any consideration by the Army of such retrofitting.

I can quite concur with the committee in its desire to assure that the Army will not spend great sums of money on the retrofitting of the M60 tank with respect to changes in either its fire power, engine, or what have you when the same would not be cost-effective, but I would vehemently oppose having this language extrapolated and extended to prohibit the retrofitting of such tanks with a suspension system which is highly cost-effective if the latter proves to be true.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I am pleased to respond to the gentleman from Michigan and wish to assure him that the language to which he refers, on pages 36 and 37 of the committee report, is addressed specifically to the particular type of fire control mechanism which the committee had in mind, but it does state the general view of the committee, which is that while we are concentrating on building the XM–1 as a modern main battle tank and feel that it should be fielded as quickly as possible, we are hesitant to see the Army spend any great

sums of money on retrofitting the M60. Because most of those retrofits, as in the case mentioned in the report, are bound to be expensive and bound to take precious resources away from what ought to be our number one tank.

I have not had a chance and the committee has not had a chance to consider the particular suspension system that the gentleman refers to. I am not sure whether it would be cost effective or not.

Certainly it would be fairly expensive. But if the system was indeed cost effective, in other words, if the improvement in the M60 in relation to the cost was very substantial, then I am sure the committee would not object to it. If the Army should come before the committee we would certainly look this proposal over from that point of view. So we are ruling out anything which would be genuinely cost effective but we do feel that as a general rule we ought to be concentrating on the XM–1.

Mr. BROWN of Michigan. I thank the gentleman for his comments.

The CHAIRMAN. There being no further amendments to title III, the Clerk will read.

The Clerk read as follows:

TITLE IV—RESERVE FORCES

SEC. 401. (a) For the fiscal year beginning October 1, 1977, and ending September 30, 1978, the Selected Reserve of each Reserve component of the Armed Forces shall be programed to attain an average strength of not less than the following:

(1) The Army National Guard of the United States, 382,000;

(2) The Army Reserve, 211,300;

(3) The Naval Reserve, 93,600;

(4) The Marine Corps Reserve, 32,400;

(5) The Air National Guard of the United States, 92,500;

(6) The Air Force Reserve, 52,000;

(7) The Coast Guard Reserve, 11,700.

(b) The average strength prescribed by subsection (a) of this section for the Selected Reserve of any Reserve component shall be proportionately reduced by (1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at any time during the fiscal year; and (2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at any time during the fiscal year. Whenever such units or such individual members are released from active duty during any fiscal year, the average strength prescribed for such fiscal year for the Selected Reserve of such Reserve component shall be proportionately increased by the total authorized strength of such units and by the total number of such individual members.

SEC. 402. (a) Part III of subtitle A of title 10, United States Code, relating to training, is amended by adding after chapter 105 the following new chapter:

"Chapter 106.—EDUCATIONAL ASSISTANCE FOR ENLISTED MEMBERS OF THE SELECTED RESERVE OF THE READY RESERVE

"Sec.

"2131. Educational assistance program: establishment; amount.

"2132. Eligibility for educational assistance.

"2133. Termination of assistance; refund by member.

"2134. Reports to Congress.

"§ 2131. Educational assistance program: establishment; amount

"(a) To encourage enlistments in units of the Selected Reserve of the Ready Reserve, the Secretary of each military department, under regulations prescribed by the Secretary of Defense, and the Secretary of Transportation, under regulations prescribed by him with respect to the Coast Guard when it is not operating as a service in the Navy, may establish and maintain a program to provide educational assistance to enlisted members of the Selected Reserve of the Ready Reserve of the armed force under this jurisdiction.

"(b)(1) An educational assistance program established under subsection (a) shall provide for payment by the Secretary concerned of 50 percent of the educational expenses incurred by a member for instruction at an accredited institution. Expenses for which payment may be made under this section include tuition, fees, books, laboratory fees, and shop fees for consumable materials used as part of classroom or shop instruction. Payments under this section shall be limited to those educational expenses normally incurred by students at the institution involved.

"(2) To receive assistance under this section, a member must be eligible for such assistance under section 2132 and must submit an application for such assistance in such form and manner as the Secretary concerned shall prescribe and be approved for such assistance by the Secretary concerned.

"(c) Educational assistance may be provided to a member under this section until the member completes a course of instruction required for the award of a baccalaureate degree, or the equivalent evidence of completion of study, by an accredited institution, but the amount of educational assistance provided a member under this section may not exceed $500 in any twelve-month period, nor a total of $2,000.

"(d) For purposes of this section, the term 'accredited institution' means a civilian college, university, or trade, technical, or vocational school in the United States (including the District of Columbia, Puerto Rico, Guam, and the Virgin Islands) that provides education at the postsecondary level and that is accredited by a nationally recognized accrediting agency or association or by an accrediting agency or association recognized by the Commissioner of Education, Department of Health, Education, and Welfare.

"§ 2132. Eligibility for educational assistance

"(a) To be eligible for educational assistance under section 2131, a member must not be serving on active duty for more than thirty days and must—

"(1) be an enlisted member of the Selected Reserve of the Ready Reserve of an armed force;

"(2) have initially enlisted as a Reserve for service in a unit of the Selected Reserve of a Reserve component after September 30, 1977;

"(3) never have served in an armed force before such enlistment;

"(4) at the time of such enlistment have executed an agreement as prescribed by subsection (b);

"(5) be a graduate from secondary school;

"(6) have completed the initial period of active duty for training required of such member;

"(7) if the member is assigned to a unit, be participating satisfactorily in training with such unit; and

"(8) have served less than eight years as a Reserve.

"(b)(1) An agreement referred to in subsection (a)(4) shall be in writing and shall provide that if the member accepts educational assistance under section 2131, the period of enlistment of such member shall be automatically extended by two years and if the member is discharged for the purpose of accepting an appointment as an officer, the member shall remain a member of the Ready Reserve until the eighth anniversary of such enlistment.

"(2) A member who enlists after September 30, 1977, but before regulations to carry out this chapter are promulgated shall be eligible for educational assistance under section 2131 if he is otherwise eligible for such assistance under subsection (a) and if he executes an agreement as described in paragraph (1) not later than one year after the date on which regulations to carry out this chapter are first promulgated.

"(c) Educational assistance being provided a member under section 2131 may be continued to a member who otherwise continues to qualify for such assistance if such member—

"(1) is discharged in order to accept an immediate appointment as an officer in the Ready Reserve; or

"(2) is no longer a member of the Selected Reserve, if such member is a member of the Ready Reserve and has served at least six years in the Selected Reserve of the Ready Reserve.

"§ 2133. Termination of assistance; refund by member

"(a) Educational assistance being provided a member under section 2131 shall be terminated if—

"(1) the member fails to participate satisfactorily in training with his unit, if he is a member of a unit;

"(2) the member is separated from his armed force, unless he is separated in order to accept an immediate appointment as an officer in the Ready Reserve;

"(3) the member completes eight years of service; or

"(4) the member receives financial assistance under section 2107 as a member of the Senior Reserve Officers' Training Corps.

"(b) A member who fails to participate satisfactorily in training with his unit, if he is a member of a unit, shall refund the amount of all educational assistance received by such member under section 2131 unless the failure to participate in training was due to reasons beyond the control of the member. Any refund made by a member under this subsection shall not affect the period of obligation of such member to serve as a Reserve.

"§ 2134. Reports to Congress

"The Secretary of Defense shall submit a report to the Congress every three months stating the number of members of the Selected Reserve of the Ready Reserve receiving educational assistance under this chapter at the time of such report and listing each unit of the Selected Reserve of the Ready Reserve to which any such member is assigned at the time of such report. The first such report shall be submitted not later than December 31, 1977.".

(b) The tables of chapters at the beginning of subtitle A of title 10, United States Code, and at the beginning of part III of such subtitle are amended by inserting after the item relating to chapter 105 the following new item:

"106. Educational Assistance for Enlisted Members of the Selected Reserve of the Ready Reserve ---------- 2131".

SEC. 403. (a)(1) Chapter 5 of title 37, United States Code, is amended by inserting after section 308a of such chapter the following new section:

"§ 308b. Special pay: reenlistment bonus for members of the Selected Reserve

"(a) An enlisted member of a reserve component who—

"(1) initially enlisted in a reserve component under the delayed enlistment program for the active forces;

"(2) has completed less than ten years of service as a member of a reserve component; and

"(3) reenlists or voluntarily extends his enlistment for a period of three years or for a period of six years in a designated military skill, or in a designated unit, in the Selected Reserve of the Ready Reserve of an armed force;

may be paid a bonus as provided in subsection (b).

"(b) The bonus to be paid under subsection (a) shall be—

"(1) an initial payment of—

"(A) $450, in the case of a member who re-enlists or vo.untarily extends his enlistment for a period of three years; or

"(B) $900, in the case of a member who reenlists or vo.untary entends his enlistment for a period of six years; and

"(2) a subsequent payment of $150 upon the completion of each year of the period of such reenlistment or extension of enlistment during which such member has satisfactorily participated in training with his unit.

"(c) No member shall be paid more than one bonus under this section.

"(d) A member who fails to participate satisfactorily in training with his unit during a term of enlistment for which a bonus is being paid to him under this section shall refund an amount equal to the amount by which the amount of such bonus exceeds the product of—

"(1) the number of months during that term of enlistment during which such member participated satisfactorily in training with his unit; and

"(2) $25.

"(e) The Secretary of Defense shall submit a report to the Congress every three months listing the units of the Selected Reserve of the Ready Reserve which have been designated by him for purposes of subsection (a)(3) and stating the number of members of the Selected Reserve of the Ready Reserve who at the time of such report are serving a term of enlistment for which a bonus is being paid under this section. The first such report shall be submitted not later than December 31, 1977.

"(f) This section shall be administered under regulations prescribed by the Secretary of Defense for the armed forces under his jurisdiction and by the Secretary of Transportation for the Coast Guard when it is not operating as a service in the Navy.".

(2) The analysis of chapter 5 of title 37, United States Code, is amended by inserting after the item relating to section 308a the following new item:

"308b. Special pay: reenlistment bonus for members of the Selected Reserve.".

(b) The amendments made by subsection (a) shall apply with respect to any reenlistment, or voluntary extension of an enlistment, in the Selected Reserve of any reserve component of the Armed Forces after September 30, 1977.

Mr. BENNETT (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. DOWNEY

Mr. DOWNEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DOWNEY: Page 12, delete lines 8 through 22; delete all of pages 13 though 19;

Page 20, delete lines 1 through 7.

Mr. DOWNEY. Mr. Chairman, when I was first elected to Congress in 1974 I wanted to familiarize myself with some of the intricacies of the legislative process. What intrigued me the most was the involvement of how a bill becomes law. I read Robert Bendiner's "Obstacle Course on Capitol Hill" and Eric Redmond's "Dance of Legislation."

What I am attempting to do today is restore some of the sanctity in the legislative process and attempting to delete something the Department of Defense is against, something that has found its way into this authorization bill. Mr. MONTGOMERY, my good friend, the gentleman from the State of Mississippi, has provided a new dance step in the obstacle course for legislation on Capitol Hill, this program is to provide educational incentives for the Reserves and reenlistment bonuses.

Mr. Chairman, what I was describing to the membership was "Sonny's new dance step" it avoids all of the unpleasantries of the legislative process. What it does, it provides $2,000 in educational expenses for a high school graduate who enlists 8 years in the Reserves. It provides a reenlistment bonus of $900 for an individual who has served less than 10 years and who will reenlist for 3 years, he will receive $900, and for an individual who serves 6 years, it is $1,800 bonus.

What the gentleman from Mississippi is attempting to do, or attempted to do in the committee, was solve a very real problem we have in the Reserves and the Reserves have a number of real problems, but the one the gentleman was addressing is that there are shortfalls in the Army National Guard and in the Armed Reserve in particular and it was the gentleman's opinion that to resolve the problem of a shortfall was to provide some incentives. This proposal will create more problems. It is, unfortunately, not the only problem that the Reserves have.

In 1975, in June of 1975, the GAO issued a very extensive report on the Reserves. What they said was very interesting. They said that for the most part about one-fourth or one-fifth of the training time of a reservist was wasted, that there was some 6.5 million mandays that individuals who were in the Reserve spent being idle and this was costing the taxpayers $500 million. That was one particular problem with the Reserves.

Another problem with the Reserves was highlighted during the incentive's debate and movement through the committee. One of the problems it has was that the members of the subcommittee unanimously supported my effort and that of the gentleman from Florida (Mr. BENNETT) to tailor this specific incentive and reenlistment bonus program to those individuals in the Reserves that would have early deployment dates and would be somehow related to our combat forces, because as we know, the whole purpose of the Reserves is to augment the active duty forces and to be a residual pool of manpower so that in case of war they can be called up quickly. So what I wanted to do was make sure these incentives were applied to those units that had early deployment dates, under 90 days, either to combat or support units.

Unanimously, the subcommittee said, "Tom, you have a good idea," and they supported it. In the full committee, the gentleman from Mississippi (Mr. MONTGOMERY) was so persuasive in arguing that if we did this, if we applied the incentive of the Reserve program to only combat units with early demobilization dates, it would not apply to anybody, which is the real problem of the Reserves. Common doctrine recognizes that any future war would be short and intense. We will need our Reserves right away. If Reserve units are not ready to fight within 90 days of mobilization they might never fight.

Unfortunately, we did not have hearings specifically on this legislation. What the Department did say was very instructive. Here is Mr. Fankersley:

The problem the Defense Department has at this time is that the Secretary feels that it would be unwise—

This is the Department of Defense speaking—

to commit the Defense Department to a policy of incentives until he has an opportunity—

meaning the Secretary—

to examine and calculate what in his opinion he thinks the impact on the reserves would be.

So the Department of Defense is not in favor of this particular provision. Why are they not in favor? Let me state some of the particularities of this bill.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. DOWNEY was allowed to proceed for an additional 5 minutes.)

Mr. DOWNEY. Mr. Chairman, one of the problems that the bill gives the Secretary of Defense is permissive authority to apply the incentives so rather than apply this to all units, which might seem, it would raise tremendous problems because in many instances the Secretary could be providing these incentives to band units, possibly to rail transportation units, civil affairs units, we would not want to provide all units with incentives, because they are not really combat units, or combat related.

So it is selective and permissive authority. That means that if we take this bill, we can apply the incentives to New York, because New York has a problem with recruiting, and not apply it to the great State of Louisiana, which does not have the same problem. Then, we will be faced with a very interesting problem. We are going to have Reserve units in Louisiana come up here, and in terms of effectiveness and lobbying

the Reserves are superb, and say, "Why is it that my unit in Louisiana is not eligible, or the Secretary has decided not to give us this, whereas in New York they are given it?"

The Secretary will want to apply those incentives to areas where there are shortfalls, so it is conceivable that one State will get them and another will not. It is also conceivable that some units that are not necessary for early mobilization, such as civil affairs units in the Army Reserve which will not be deployed until 6 or 8 months after war is started, will also get these educational incentives. Quite frankly, that has not been considered in any detail.

The Department of Defense witnesses, some of whom were in favor and some of whom were opposed, said that the Department of Defense would like time to look at it and to come up with its own proposals. Will this incentive be an inducement to a high school student? He will receive a $2,000 educational benefit if he or she is a graduate of high school—which is a bit unfair to the many fine reservists who are not high school graduates. We are saying, "We will give you this educational incentive. All you have to do is stay in your community for 8 years, go for the 2 weeks' active training and 48 weekend drills." Is that much of an incentive? I submit that it is not, and the Department of Defense is also willing to say that it is not, because they are looking for what will work.

The fact is that we will be spending $140,800,000 for new recruiters; 3,200 full time recruiters, 1,800 in the National Guard and 3,200 in the Army Reserve. We are increasing the advertising allowance to $21.3 million, which is $5 million more than we had last year. They have these two items to spur recruitment, the increase in recruiters and increase in the allowances for advertising, and then we can get the Department of Defense come back next year and propose something that they believe will be a suitable incentive for people to come back; not this particular proposal which the Department does not favor and which quite frankly, I do not believe we have thought out.

Mr. MONTGOMERY. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, the gentleman from New York referred to the fact that there might be some turbulence because this incentive might be applied to units in one part of the country, and other units who did not need it might get upset. He mentioned that perhaps in New York a unit would need the incentive, and a unit in Louisiana would not.

Speaking as one member of the Louisiana delegation, I am willing to take that chance, because I think that the way this is written it would permit the service secretaries to implement the program in a way that is needed, and in doing that I think the service secretaries would take into account the question of morale and the effect of giving the incentive to one unit in one area and not in another. So, I oppose the amendment, and I support the program of the gentleman from Mississippi. I think it is needed, and I do not think we can waste a lot of time in putting it into effect.

Mr. MONTGOMERY. The gentleman is exactly right. We cannot worry about the different sections of the country where we need to attract young people into the Guard and the Reserve. Let us use the incentive where they are needed and not worry about what sections would be affected.

Mr. SKUBITZ. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Chairman, I rise in opposition to the Downey amendment and in support of the committee's figures for authorized Naval Reserve strength.

Frankly, I believe this country is getting an exceptional bargain for the tax dollars spent in support of our ready Reserve Forces. The cost of maintaining these 93,000 Reservists in combat readiness is a small price to pay for backup support of our professional Navy.

Our Nation's ability to put together a first-class, integrated fighting force on short notice—has always been basic to our overall defense posture. If we, as a nation, were to lose our capability to put well trained civilians into combat in a matter of days—or hours if necessary—we will have lost a tried and proven measure of our deterrent posture.

The price we pay for a combat ready Reserve Force is small indeed—when we consider the alternatives—full-time troops at an increased military cost—or no troops at all at an increased risk. Considering the fact that there is no consolation prize for second best in combat—I for one—do not propose to subject this nation to the risk of a weakened deterrent and I shall vote against this amendment.

Mr. HILLIS. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. I thank the gentleman for yielding.

Mr. Chairman, I, too, rise in opposition to the amendment.

I would like to ask my colleague this question: Does the gentleman feel that this is a critical period in the history of our Guard and Reserves this year, and we have to do something to turn around the shortfall and the lack of reenlistments and enlistments, in the select reserve, and that this kind of program is crucial at this time?

Mr. MONTGOMERY. The gentleman is correct. We should have done something 2 years ago. Some of us have been introducing these incentive measures for a couple of years. It would be disastrous if we adopted the Downey amendment. We have to have incentives now to attract young people into the military. We are, in effect, in competition. The Reservists are in competition with the active forces. These active forces do have incentives. The Reserves and Guard have no incentive whatsoever, monetarily, to attract these young people into the Guard and Reserves. So we must defeat this amendment. If we do not, we have a shortfall of about 50,000 selective Reservists at this time. It could go as high as 75,000. We do not have any choice. This amendment will have to be defeated.

Mr. HILLIS. Mr. Chairman, will the gentleman yield further?

Mr. MONTGOMERY. I yield to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Is it not also a fact that the cost of the amendment this year would be $33 million, and increase to $43 million in 1982? So that the cost the gentleman referred to in the actual bringing of these bonuses into effect this year will not be that great.

Mr. MONTGOMERY. That is correct. It is a very minimal cost. It would be left up to the different Secretaries. But if every Secretary used the entire bonus program that we have recommended, the total cost would be less than $41 million by 1983.

Mr. HILLIS. If the gentleman will yield further, I remember the gentleman stated in general debate a few days ago what the cost of maintaining a Guardsman and a Reservist is, as compared to an active duty person. That cost is much, much less, is it not?

Mr. MONTGOMERY. That is correct. The Reserve program is a good buy for the taxpayer, for personnel cost of an Air Guard squadron during the same mission would be half the cost of a regular Air Force squadron.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. MONTGOMERY) has expired.

(By unanimous consent, Mr. MONTGOMERY was allowed to proceed for 2 additional minutes.)

Mr. MONTGOMERY. The cost is much better for an infantry National Guard brigade that has been integrated, such as the 25th Division in Honolulu, with a regular Army division. It costs one-eighth as much to train and keep that National Guard brigade in the regular forces in Honolulu. So it is a real cost saver to the people of this country.

Mr. HILLIS. If the gentleman will yield further, to make that cost saving effective, we have to have the people to man that reserve and the National Guard unit, is that not correct, and we have to have this device to get them there?

Mr. MONTGOMERY. Yes. Fifty percent of the Army-type units to deploy the Army would be done by the National Guard and Reserves. Of all the missions of the Air Force, one-half of those missions have now been turned over to the Air Guard and the Air Reserves. So, as I said earlier, we have to give some incentive to attract these people into the Guard and Reserves. They are now getting better equipment to train with. We used to get nothing but hand-me-downs. They are now getting better equipment. But we need the manpower to use and train with this equipment, not let the strength be reduced to be ineffective.

So, Mr. Chairman, I ask my colleagues to vote against the amendment.

Mr. WHITE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I am sure the Members recall that the people of this Nation asked us to eliminate the draft, and as a matter of fact this Congress did eliminate the draft. We have been holding onto a volunteer service principally by reason of the incentives that we have legislated to keep people in the service.

However, as to the Selected Reserves, which includes the National Guard and Reserves in paid-drill status, we must remember that almost 52 percent of the responsibility for response to any attack from overseas is on their shoulders. They have that burden, and yet we are 50,000 short in the Selected Reserves today and 320,000 short in the Ready Reserves.

The officers and enlisted men of the National Guard are using a good deal of their own time today in recruitment activities, and they are not finding enough time in order to train. They are losing their strength, and we are trying to help them out. They have come to us and said, "This is how we feel we can recruit the people we need in order to maintain our strength."

Mr. Chairman, I say this to the Members: An alternative is the draft, but I do not think the American people want a draft at this time. So let us say to our Reserve forces, "We will give you that opportunity. We are going to give you the opportunity to conduct an experiment. We are going to give you the opportunity for incentives."

What kind of incentives? I refer to education, which builds the strength of this country, and reenlistment bonuses as they apply to active forces. And furthermore, we give them protection by saying to the Secretary of Defense, "You have the discretion as to how to apply this."

Let us not fear that this is going to be abused. If we do this, we will then know whether indeed this is a good program and whether or not we can continue with it. Just give us a chance. This is the alternative to a draft.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from New York.

Mr. DOWNEY. First of all, Mr. Chairman, let me say that I have never had such delightful adversaries as my subcommittee chairman and my good friend, the gentleman from Mississippi (Mr. MONTGOMERY). Ours is, of course, a difference in philosophy, but it is a very fundamental one.

The gentleman, as chairman of the subcommittee, was certainly present at the time when Mr. Tankersley, the Deputy Assistant Secretary for Reserve Affairs, came in and testified. He said to the committee that at the present time they could not endorse the proposal of the gentleman from Mississippi (Mr. MONTGOMERY), because they really did not know whether it would work. I am sure the gentleman recalls that testimony.

Mr. WHITE. Yes, but sitting behind him were the heads of every Reserve and every National Guard organization, and one by one they were asked about it, and they said, "This is what we need."

Mr. Tankersley was not there in any position, as an official from the administration, to say whether or not they could endorse it, but he did not say, "We don't think it will work." He said, "We don't know."

Mr. DOWNEY. But, if the gentleman will yield further, did Mr. Tankersley not really say that the Department of Defense was in the process of determining through attitudinal surveys that they are conducting at the present time what incentives would in fact work for the Reserves?

I ask that, because the gentleman remembers, I think, that we have had discussions, for instance, concerning whether it is conceivable that a moderation of the haircut regulations might bring people into the Reserves.

Our good friend, the gentleman from Tennessee (Mr. BEARD), who is a member of the Marine Reserves, looks entirely different these days, because he is a member of the Marine Reserves and now he has to get a haircut. This has been a real problem. That is one of the things that we have not looked at.

Mr. WHITE. We have protected against that. I say that, because at the time they may be making that study the Secretary of Defense has total discretion as to how he will apply these incentives.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Actually, Mr. Chairman, we think these incentives will work, because they have been working for the active forces as far as the reenlistment bonus and the educational bonus are concerned.

I think perhaps our incentives are too modest. We were concerned, to be sure, with whether we could get this legislation passed. The incentives have worked for the active forces under the volunteer concept, and I think they will work for the National Guard and the Reserves. We must try them.

These suggestions have come from unit commanders and from sergeants out in the field with these Reserve forces, and many of the young people have requested some type of educational benefit, as well as enlistment or reenlistment bonuses. I think that speaks as a strong point to the fact that these young people are looking for an education, and I think we have a modest but a good incentive program.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WHITE) has expired.

(On request of Mr. DOWNEY and by unanimous consent, Mr. WHITE was allowed to proceed for 2 additional minutes.)

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, I think the gentleman from Mississippi (Mr. MONTGOMERY) raises an interesting point That is the fact that there is some history with respect to active duty forces to indicate that this might or might not be the proper incentive, the reenlistment bonuses, to make recruitment effective.

Let me quote what Mr. Tankersley had to say:

> There are a number of differences between active forces and reserve recruiting. Those procedures which have proven effective in many cases do not apply to active forces and the Guard with respect to intensity of reserve recruitment capability.

Therefore, Mr. Chairman, it is pretty clear that the gentleman may be sanguine about the fact that these particular incentives may make a difference, I am not.

Mr. WHITE. Mr. Chairman, if I may give the Members my impression here today, Mr. Tankersley was in the driver's seat in this department. All the gentlemen sitting behind him were under his administration, and yet he did not take this opportunity to put the quietus on this idea.

In fact, I got the impression that, in effect, he was saying, "This may really have a bearing, but I am not going to say it does or does not, because there is no official position."

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, I would like to quote the gentleman from New York, on page 127 of the committee report, pertaining to reserve incentives, with respect to which the gentleman from New York (Mr. DOWNEY), the gentleman from Michigan (Mr. CARR), and the gentlewoman from Colorado (Ms. SCHROEDER) had their views.

This is what they said:

> We are persuaded that these programs will improve the readiness of the force.

Therefore, Mr. Chairman, I think we are really talking about the timing.

The gentleman does agree, does he not, that these incentives are needed?

Mr. DOWNEY. Mr. Chairman, if the gentleman will yield further, I think we need to look at the incentives.

My concern is that while we have the Department of Defense willing to endorse a program, what we have problems with is determining what mobilization dates the reserve units have and that if we are going to start providing incentives for Guard units and other units, without regard for mobilization dates we will accomplish nothing.

Mr. WHITE. Mr. Chairman, the gentleman from New York (Mr. DOWNEY) has been a contributing member of this committee. I assure him that we are going to have some hearings in this committee on the readiness of the reserve and the performance of their duties. We are going to look into the things that concern him.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield further?

Mr. WHITE. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. I thank the gentleman for yielding.

The designation of these units in the National Guard Reserve was not picked by the National Guard. Those designations are picked by officials at the Pentagon, by the Secretary of Defense, and the different Secretaries.

Certainly some of these units should be eliminated; I agree with the gentleman, but we have many great units in the Air Guard and other Reserve components which have done a splendid job. In fact, some of our Air Guard Reserve units can be mobilized within 48 hours.

Mr. WHITE. Each unit has a different mobilization point, but they work in harmony, providing support for our national defense.

Really one cannot arbitrarily set a mobilization date and say, "This is the time."

Mr. MONTGOMERY. That is correct. None of these units have specific mobilization dates.

I have information from the Pentagon that less than one-half of 1 percent of the National Guard units do not have mobilization dates. On the Air Reserve, 5 percent of those do not have mobilization dates, but this is a small percentage. The rest of them need the equivalent to give them the men and the training.

Mr. WHITE. I think there comes a time when we should stop thinking about Reserves and National Guard and Active Forces and think in terms of the total force of this Nation that could preserve the peace of this world and the defense of this country, working together.

Mr. MONTGOMERY. I agree with the gentleman.

Mr. CARR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would just like to ask the gentleman from Mississippi (Mr. MONTGOMERY) a couple of questions about his fine work in this whole area.

As he correctly stated, in our dissenting views we are very much in favor of trying to do what we can do to improve the quality and the fighting readiness of the Reserves and the National Guard.

I think it does come down to a matter of the timeliness of this particular proposal today.

Is there anything that the gentleman has seen by way of a study or that has been performed, rather than just the opinions of some of the recruiting people, who, after all, probably have most of their experience or a great deal of their experience in active duty recruiting? Is there anything that the gentleman can give us that is hard documentary evidence showing that this is going to work?

It seems to me that that is what the Defense Department is going to try to gather in the next year, and I think that it would be well for the House to wait for 1 year or wait, perhaps for a special bill. As the chairman has indicated he would be willing to hold hearings so that a special bill can be reported out?

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. CARR. I will be glad to yield to the gentleman from Mississippi as soon as I have finished.

Let me ask this: First, Is there anything that makes this so immediate that we have to act today, and second, Is there any documentary evidence of studies that have been performed, like the GAO studies that seem to go the other way, that would compel us to support this today?

Mr. MONTGOMERY. Mr. Chairman, if the gentleman will yield, the best answer I could give to that question would be that the educational bonus, or the educational incentive for the Active Forces has worked very well for them. Also the reenlistment and enlistment bonuses have been very effective. Actually the National Guard and the Reserves are in competition with the Active Forces, as we go into the total volunteer system, so we need these incentives. They have worked, as I say, for the Active Forces and they will work for the National Guard and the Reserves.

In our proposal we have not asked for an enlistment bonus, the unit commanders and these people in the Reserves doing the recruiting have found out that attracting a person who has never been in the service before, that the educational incentive presents the greatest feeling of interest to he or she. So we have not asked for an enlistment bonus but just for the educational and reenlistment bonuses. Yes, I think it will work. I believe we cannot wait any longer. We are 50,000 short now and by this time next year it could well be 75,000 or 100,000 short. Let us try it.

Mr. CARR. Mr. Chairman, I would like to say to the gentleman from Mississippi (Mr. MONTGOMERY) that I respect his judgment in these most important matters, but in terms of my voting for a lot of money today as opposed to a couple of months from now down the line, I would really like to have some hard evidence on this.

Mr. MONTGOMERY. If the gentleman will yield further, how can we get the evidence if we do not start the program? We have got to have something to go on.

Mr. CARR. I am willing to go along with an appropriation for marketing studies, and such.

Mr. MONTGOMERY. The gentleman from New York (Mr. DOWNEY) says that we need to reduce haircut standards, but I would point out that we do not have any evidence that long haircuts will attract young people into the services. So we thought it through, and we think this incentive package is the best approach.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. CARR. I yield to the gentleman from New York.

Mr. DOWNEY. The gentleman from Mississippi knows and I know that the GAO study of the Reserves indicated the biggest problem with the Reserves, or one of the major problems was not because of training, but because a lot of the units just do not have mobilization dates. They do not have anything to do. They sit around. They drill 48 times a year and they go to camp 2 weeks a year. Mr. Tankersley who is an expert in these matters said that every survey they have run indicates the importance of training. That if you have good training in the units and it is meaningful training, the young people will join. They will not join if they do not have first class training. We are trying to impose an incentive on a structure that is faulty, and we are going to provide incentives for individuals to go into the Guard and the Reserves.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. DOWNEY, and by unanimous consent, Mr. CARR was allowed to proceed for 1 additional minute.)

Mr. DOWNEY. Mr. Chairman, will the gentleman yield further?

Mr. CARR. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, I can understand the desire of the committee to move forward, but this is the first time we have ever had an opportunity of discussing a very real problem that we have in our Armed Forces structure, and that is with the Reserves. What the gentleman from Mississippi is attempting to do is spend a little more money—not very much, granted; I think it is $35.5 million—for education and reenlistment bonuses which the Department of Defense, first, is not in favor of; second, which they do not know will work; and third, is imposed on a structure that is already faulty.

I think it is very important to the Members here today to understand that before we spend any more money, we might want to reform the Reserves significantly.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from New York (Mr. DOWNEY).

The question was taken; on a division (demanded by Mr. DOWNEY), there were—ayes 18, noes 66.

So the amndment was rejected.

The CHAIRMAN. Are there further amendments to title IV?

AMENDMENT OFFERED BY MR. DOWNEY

Mr. DOWNEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DOWNEY: Page 11, line 10, delete "93,600" and insert in its place "52,000".

Mr. DOWNEY. Mr. Chairman, certainly with the ground swell toward my reserve amendments as evidenced by the last vote, I will be brief with this one. It deals with something that I consider also important.

In fiscal year 1977 President Ford, who

had a brother in the Naval Reserve, and Secretary Rumsfeld, who himself was a Naval Reservist, asked this Congress to reduce the number of paid Category A Reservists in the Naval Reserve from 93,000 to 52,000. A paid Category A is an individual who drills 48 times a year, with 2 weeks of active duty. President Ford and Secretary Rumsfeld asked for it. The committee rejected it.

This year in the fiscal 1978 budget President Carter, a member of the Navy for some time, and a member of the Naval Reserve, and Secretary Brown made the same request to the committee and to this Congress that the number of paid category A reservists in the Naval Reserve, with 48 drills and 2 weeks of active duty, be reduced from 93,000 to 52,000. This does not mean that the individuals going from one category to another would be thrown out of the Naval Reserve. It means that they would not drill 48 times a year but would have the 2 weeks of active duty. An interoffice memorandum from the Pentagon states the reasons why they want this, and I quote:

> Most of the personnel are assigned to non-equipment units designed to reinforce operational staffs, headquarters, bureaus, offices and shore activiites upon mobilization. These personnel maintain adequate skill proficiency by two weeks active duty for training.

They have relatively simple skills which can be updated.

What my amendment proposes to do is to restore the Naval Reserve back to the level of 52,000, which President Carter and President Ford both asked the Congress for. It recognizes a number of things that are happening in the Navy; No. 1, there is a diminishing number of ships; two, the fact is that the Navy has decided to go on all its 57 Naval Reserve ships to full-time active-duty people manning those ships. So there is no need for these individuals, these 41,600, to have 48 drills a year, and 2 weeks of active duty to maintain the proficiency of their skills.

One of the concomitant features of this particular amendment of mine is that it would save $47 million. Two Presidents, one a Republican and one a Democrat, have proposed it and I offer the committee a chance to accept their proposal.

Mr. BOB WILSON. Mr. Chairman, will the gentleman yield?

Mr. DOWNEY. I yield to the gentleman from California.

Mr. BOB WILSON. Mr. Chairman, I appreciate the gentleman's concern. I think he is probably helping to point out this administration and past administration, Republican and Democrat, have shown a tendency to pick items in the budget that they know the Congress is very much in favor of and cut those items back, knowing the Congress will put them back in, and in the end being able to blame Congress for increasing the budget. Take for example impact aid for education, take rural electrification, and take the school lunch milk program. Time after time and year after year the Presidents have cut back the budget by redlining such items and then Congress puts them back in. The Executive, I think, will not be disappointed if we follow the usual course and put these things back in, as they should be in the first place.

Mr. DOWNEY. The gentleman has been here longer than I have. But the numbers of categories in the Reserves really deserve some careful consideration. I would suggest we take a look at the weather facilities, research and development communications, intelligence and communications security. All of these particular units are not the sorts of Reserves that are going out there and serve when the call comes and serve on the ships. They will be upgraded if needed and they will serve in the shore facilities. I am not arguing the basic premise of the gentleman.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. DOWNEY was allowed to proceed for 2 additional minutes.)

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. DOWNEY. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I do not know what anybody's motivations are in this regard. It sounds like plain common sense to me.

Mr. DOWNEY. I thank the gentlewoman from New Jersey.

Mr. WHITE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it is true that the President at least through his advisers did recommend this particular cut. Last year during the Ford administration and in previous years the Ford administration did the same, but then they reversed themselves, recognizing that indeed would have been a mistake. Every other expert who came bebore our committee advised against this cut from some very real reasons.

The Navy relies strongly on these reserves. It relies on them for early activity and early response. Let me give the Members some illustrations of percentage of responsibilities: On ships and related operational staff, 64 percent; squadron and air staff, 50 percent; communications activities, 35 percent; weather service, 43 percent; and so on.

It is suggested we just give them 2 weeks training and that is all they need and they can come back to duty and will be ready to go. But it has been found and apparently has been authenticated that if indeed we reduce these groups to about 2 weeks training a year, we will lose almost 90 percent of them. Ninety percent of them will be done from the Navy at a time when we can ill afford to lose them.

When we say they are groups without equipment, let us look at some of the particular units. We would lose 9 construction battalions known as Seabees. These units unanimously are recognized as some of the most ready and highly trained in the Reserve structure. These 10,000 men have their equipment, unlike the statement of a previous speaker. That is 50 percent of the Navy's capability in construction right there.

In intelligence, communications, weather personnel needed for mobilization to supplement Active Force capabilities which are manned only for peacetime, and so on, air base support and command staff—where are we going to get them from if they leave the Reserves?

We will not have a draft. If we implement a draft it will take 7 months to provide soldiers, Navy men, or airmen in the field. Are we going to wait 7 months in a fast-moving war? Or do we really want this Nation to be ready?

Admiral Charbonnet, the expert who appeared before our committee, pleaded with us not to cut the Reserves. This is a man who is not trying to maintain his own particular empire. He is going to be leaving the service, but he knows if we cut the Naval Reserve drilling by half then we are going to have half a Naval Reserve in time of war as far as active duty is concerned. They are not going to stay in the service, they are going to leave. We will be very seriously depleted and we will have to come back in another year and try to somehow reinstate their numbers.

Mr. HILLIS. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Indiana.

Mr. HILLIS. Mr. Chairman, I want to associate myself with my subcommittee chairman's remarks. I had the experience at the close of business on Friday to go down to Fort Eustis to make a talk in the evening. That is the home of the Army Transportation Center. I was flying in a small airplane and as I turned over the river at the small airport there, there were a dozen to dozen and a half small cargo-type ships out in the river. Later I asked one of the officers ashore, what was the purpose of these ships and was told that was part of our fleet Reserve, what is its use?

He said that the Navy has a mission to man those ships in 30 days after an emergency; in other words, after the so-called M-Day, the Navy has to have them in operation in 30 days to carry cargo to support our effort overseas.

Without the Reserves, I do not see how they can get them in service. The gentleman makes the point that without the Reserves, where do they go to bring ships out of mothballs and into action; they have to be able to expand our naval forces to move cargo to NATO or wherever it has to go.

It brought it home to me to see those ships standing in the river with no one to run them; that we must have Reserves to do the job.

Mr. WHITE. Mr. Chairman, if we cut the Naval Reserve drill this drastically, mainly what we will have left will be senior officers and men heading for retirement. The middle grades and younger men will be leaving the Reserve.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. DOWNEY).

The amendment was rejected.

The CHAIRMAN. Are there further

amendments to title IV? If not, the Clerk will read.

The Clerk read as follows:

TITLE V—CIVILIAN PERSONNEL

SEC. 501. (a) For the fiscal year beginning October 1, 1977, and ending September 30, 1978, the Department of Defense is authorized an end strength for civilian personnel of 1,034,328.

(b) The end strength for civilian personnel prescribed in subsection (a) of this section shall be apportioned among the Department of the Army, the Department of the Navy, including the Marine Corps, the Department of the Air Force, and the agencies of the Department of Defense (other than the military departments) in such numbers as the Secretary of Defense shall prescribe. The Secretary of Defense shall report to the Congress within 60 days after the date of enactment of this Act on the manner in which the initial allocation of civilian personnel is made among the military departments and the agencies of the Department of Defense (other than the military departments) and shall include the rationale of each allocation.

(c) In computing the authorized end strength for civilian personnel there shall be included all direct-hire and indirect-hire civilian personnel employed to perform military functions administered by the Department of Defense (other than those performed by the National Security Agency) whether employed on a full-time, part-time, or intermittent basis, but excluding special employment categories for students and disadvantaged youth such as the stay-in school campaign, the temporary summer aid program and the Federal junior fellowship program and personnel participating in the worker-trainee opportunity program. Whenever a function, power, or duty, or activity is transferred or assigned to a department or agency of the Department of Defense from a department or agency outside of the Department of Defense or from a department or agency within the Department of Defense, the civilian personnel end strength authorized for such departments or agencies of the Department of Defense affected shall be adjusted to reflect any increases or decreases in civilian personnel required as a result of such transfer or assignment.

(d) When the Secretary of Defense determines that such action is necessary in the national interest, he may authorize the employment of civilian personnel in excess of the number authorized by subsection (a) of this section but such additional number may not exceed 1½ per centum of the total number of civilian personnel authorized for the Department of Defense by subsection (a) of this section. The Secretary of Defense shall promptly notify the Congress of an authorization to increase civilian personnel strength under the authority of this subsection.

Mr. BENNETT (during the reading). Mr. Chairman, I ask unanimous consent that title V be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. CORNWELL

Mr. CORNWELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CORNWELL: Page 22, line 2, strike out "1½" and insert in lieu thereof "3".

Mr. CORNWELL. Mr. Chairman, I rise to offer an amendment to title V of H.R. 5970 to increase the flexibility given to the Secretary of Defense to exceed the civilian manpower ceiling from 1½ to 3 percent. This flexibility is necessary to insure the efficient management of our industrially funded activities and to insure the integrity of the moratorium on contracting out.

Manpower ceilings for DOD civilian employees, especially those employed at industrially funded activities—IFA's—inhibit the practice of efficient management by forcing managers to pay costly overtime, to hire and fire just to meet the October 1 ceiling date, and to contract out work without first determining if the work could be done cheaper in-house.

Title VIII of today's bill puts a moratorium on contracting out until a study is conducted to find out what, if any, cost-analyses methods are being used to determine both the amount and kinds of work to be contracted out. It is only consistent with the spirit of this moratorium that we give the Secretary of Defense the flexibility needed to meet additional demands for in-house personnel for work that, in the absence of the moratorium, would have been contracted out.

Industrially funded activities were established because it was the belief of both the Congress and the administration that certain activities could be operated more efficiently if allowed to function like private industry. IFA's operate on a contractual basis whereby the manager of an IFA is given contracts to fill periodically as the demand for the work appears. For example, if suddenly a naval ship is in need of repair due to an accident at sea, any given naval shipyard might be called to do the work. Thus, there is a need for manpower flexibility which rigid manpower ceilings cannot provide.

Indeed, this was in the mind of Congress when it initially established a one-half percent flexibility in the manpower ceiling. And, just this past year, unforeseen increases in the civilian workload caused Secretary of Defense Rumsfeld to exercise his statutory authority to increase the fiscal year 1977 civilian ceiling by that one-half percent—the equivalent of 5,100 spaces.

We must consider the fact that this "escape clause" was used in the heyday of contracting out. What is to happen this year when Congress decides to limit the amount of contracted out work? I maintain that the additional 1-percent flexibility which the committee has offered might be too small to meet the new demand.

If that be the case, the result will be costly and dangerous delays in providing vital services. We lose nothing by increasing the flexibility in the manpower ceiling. We potentially weaken our national security by not.

We are not talking about "leaf raking" jobs here. Industrially funded activities include naval shipyards. Army maintenance and supply depots, naval air rework facilities, and research and development operations of all the service branches. For example, the Naval Weapons Support Center at Crane in my district in Indiana, an IFA, has performed work in fleet logistics support, weapons quality engineering, and production engineering. Today, Crane has among its missions support of the vital Trident underseas long-range missile system which will replace our present Polaris-Poseidon SLBM forces and become our sea bases deterrent system of the 21st century. Clearly we are dealing with highly skilled and motivated Government workers who are performing vital defense functions. The manager at Crane readily agrees with the managers of other IFA's that rigid manpower ceilings obstruct the performance of vital defense tasks when there are backlogs of work which have already been funded.

At Crane, the commanding officer estimates that he could hire 200 additional employees to do work for which the funds have already been appropriated if only he had some flexibility in his manpower ceiling. He readily agrees with other managers that the encouragement of contracting-out by rigid manpower ceilings destroys the stability of the labor base, and, in addition, means the contracting-out of expertise. Again, the implications for national security are clear.

Public Law 93-365 states that:

It is the sense of Congress that the Department of Defense shall use the least costly form of manpower that is consistent with military requirements and other needs of the Department of Defense.

I believe that this is at the heart of our intent in placing a moratorium on contracting-out. As well, it is at the heart of the intent in increasing the manpower flexibility from 1½ to 3 percent so that we can provide the Secretary of Defense with the cheapest, most efficient form of labor to do work already authorized by congressional appropriations—that form of labor is in-house civilian employees.

Last, we must realize that the proposal I offer is modest. The increased flexibility would mean an additional 15,000 personnel slots out of over 1 million already authorized. I maintain that this increase in flexibility is necessary to carry out the intent of the moratorium on contracting-out. We lose nothing by supporting this flexibility. By not supporting it, we continue to inhibit the practice of good management in our Armed Forces, waste precious dollars unnecessarily, and compromise our national security.

I request your support for this amendment.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. CORNWELL. I yield to the gentleman from South Carolina.

Mr. DAVIS. Mr. Chairman, I rise to support the gentleman's amendment. I supported the increase from one-half of 1 percent to 1½ percent in committee, but I believe this amendment has exactly what is necessary, since it seems to be in a position to take the ceiling off industrially funded projects.

We can perform with better efficiency and productivity. It seems a sad shame when we give the money to the Depart-

ment of Defense to do the job, and then refuse to give them the manpower. The Secretary exercised the authority last year, but he still did not meet the full needs.

By going to three percent and giving him 30,000 more potential employees, I believe we can meet the needs. I am glad to join with the gentleman in his amendment.

Mr. CORNWELL. I thank the gentleman.

Mr. EMERY. Mr. Chairman, will the gentleman yield?

Mr. CORNWELL. I yield to the gentleman from Maine.

Mr. EMERY. Mr. Chairman, I would like to congratulate the gentleman for offering a most constructive amendment. I was the author of the provision in the Committee on Armed Services to increase flexibility to 1½ percent.

As the gentleman has most ably pointed out, manpower ceilings of this nature are a very inefficient and ineffective way to maintain uniform employment levels, and have resulted in misallocation of manpower in facilities doing necessary work for the military. Recent history has shown that attempts to raise the ceiling, or to eliminate it altogether, have prevailed in the House, but failed in the Senate.

So, I would hope that the House of Representatives would go on record today strongly supporting, in principle, the increase which would give us a greater flexibility of 3 percent, or 30,000 civilian workers, nationwide. I congratulate the gentleman on his amendment, and I urge a favorable vote.

Mr. CORNWELL. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

(By unanimous consent Mr. CORNWELL was allowed to proceed for 5 additional minutes.)

Mr. SIKES. Mr. Chairman, will the gentleman yield?

Mr. CORNWELL. I yield to the gentleman from Florida.

Mr. SIKES. Mr. Chairman, I support the amendment by the gentleman from Indiana which would give the Secretary of Defense authority to exceed the civilian manpower ceiling by no more than 3 percent. The intent is to make needed additional manpower available to military installations which are dependent upon industrial funding for the work they do.

There are occasions when it is in the national interest to have flexibility in the numbers of civilian personnel who are required for specific projects. If, for instance, a military base is assigned a particular program, such as helicopter repair, it may be found that the expertise or the numbers of the personnel available for the work cannot complete the requirements within a specified time limit. Consequently, in the interest of timely completion of the program or in the best and most effective utilization of funds available, it is important that flexibility be possible in the numbers of civilian personnel.

To tie a facility to a strict manpower level is to deny it the opportunity to perform work which in many cases can best utilize the facilities of the affected base.

It is not the intent of this amendment that the flexibility in numbers that we are requesting is to be used by the Department of Defense as a vehicle to avoid the manpower ceiling imposed by Congress. It is intended to insure the workers can be made available when there is an obvious need for their services and at facilities which are industrially funded.

This flexibility becomes increasingly important if we are to limit the apparent intentions of DOD to substitute additional contracting out for current in-house program, a process which can avoid accountability to Congress and conceals the true number of personnel employed by the Department of Defense.

Mr. CORNWELL. I thank the gentleman for his support.

Mr. Chairman, I might point out that in the last 3 working days here in Congress we have talked about reducing the number of very complicated and very expensive combat machines. We have talked about lowering the levels of troops we have abroad. We have talked about enlistment incentives and activation of Reserve forces now and in the future, and how it will take 30 days to get mothballed ships operational.

When I was in Vietnam, about two-thirds of our troops involved there were operational in a support capacity. There are in this country civilian personnel who work right here at home, who do repairs on these ships that are lying dormant in the harbor, that arm the bombs, that do intensive and essential research and development in military machinery. These are the people who provide the civilian support for the main combative troops and their military support units. Not to recognize these extremely important civilian support personnel would most certainly jeopardize our national security as in the same ways that the aforementioned reductions would have done.

I strongly suggest to my colleagues to consider this and to give me their full support on the passage of this amendment.

Mr. TREEN. Mr. Chairman, I rise in opposition to the amendment.

I appreciate there are a number of members of the Armed Services Committee who are disposed to go along with this flexibility increase. I am not. We have provided, essentially, in our bill a level for civilian employees that the Defense Department requested. We have heretofore been operating on a one-half of 1 percent flexibility factor. That is, if the Defense Department wants to go over their ceiling by up to 5,000 people if they want to do so, they come before the committee and tell us. We tripled that number in our bill. We went from one-half percent to one and one-half percent. I appreciate the arguments that have been made here. But, going to 15,000 is sufficient.

This is a 1-year authorization. If the Defense Department does not think the ceilings on civilian employees are high enough, we can look at it again next fiscal year. In the meantime, we have tripled the flexibility to 15,000. I think the Defense Department needs to exercise discipline. Therefore, I oppose the amendment.

Mr. WHITE. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from Texas (Mr. WHITE).

Mr. WHITE. I thank the gentleman for yielding.

Is it not true that if we give the Department too much flexibility they could get slipshod and use this as an excuse to not tighten up their own civilian programs? By tripling the ceilings already in the bill at least we give a meaningful ceiling they can understand. There is only one occasion when the Secretary of Defense has ever used the leeway that we gave him on the one-half percent.

Mr. TREEN. That is my understanding, that only one time did the Department of Defense ever have to exercise the one-half of 1 percent flexibility factor. And we triple it in this bill. And to double it again I think is irresponsible.

Mr. CORNWELL. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from Indiana (Mr. CORNWELL).

Mr. CORNWELL. I thank the gentleman for yielding.

The one time that the Secretary of Defense imposed this—that Secretary of Defense Rumsfeld took advantage of this flexibility was last year, because of the restrictions put upon contracting out and the ensuing crunch. Now we have a moratorium on contracting out proposed in title VIII of this bill to be placed against it, and the 1½ percent flexibility will not be sufficient.

Mr. TREEN. I am unable to anticipate what will happen to that subsequent amendment. But I still think the 15,000 gives us enough flexibility here.

Mr. CORNWELL. Is not anticipation the foundation from which we have come to determine these things? Or do we know what the level is going to be right off? We do not know that level now. The gentleman just said that we anticipate. We cannot anticipate so as to jeopardize our national security but rather must be totally prepared on all fronts at all times.

Mr. TREEN. We have given the Defense Department essentially what they have asked for in DOD ceilings now for their civilian employees. It may even be a little higher than actually what is on board. I am not sure. But we have given them what they asked for, and we have said, "You can vary that by another 15,000 people upward."

I am not satisfied that we need to go to a greater percent of flexibility in order to accomplish the purpose that the gentleman who offers the amendment would like to accomplish.

Mrs. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I would just like to apprise the Members of the House of some of the things that have been going on in the Post Office and Civil Service Subcommittee looking into the whole area of subcontracting out, in explanation of why I support the amendment of-

fered by the gentleman from Indiana (Mr. CORNWELL).

The Subcommittee on Employee Rights and Ethics has been holding extensive hearings on contracting out in both the civilian and the military areas, and we have learned some very interesting things. Let me just give the Members some of the reasons why I think these manpower levels may need to be changed, because there have been some phenomenal policy decision changes since the manpower requests came in from the different departments. Departments had no way of foreseeing these policy revisions when they set their manpower requests.

Up until last summer, if one had a person who was a Federal employee in a defense or civilian area and he was making $10,000 and they could replace him or her with someone making $10,700 on the outside, then it was considered economical by OMB to contract out that job to the private sector. Many of the Members know that last summer the figure changed from $10,700 to $12,700 considered to contract out the $10,000 job. Then a directive that went out from OMB to all governmental agencies suggesting that they start looking into five areas in their departments where these items could be subcontracted out under the new figure up from 7 to about 27 percent.

So the ground rules for contracting out were changed drastically last summer, and each governmental agency was told to take those matters into account and proceed forward. Agencies did this obviously because they intend to pay attention to these directives.

We have had some very long hearings about where that 27 percent came from suddenly and why it went from 7 to 27 percent or thereabouts in 1 year. What we found out was that the figure was so questionable and there were many things involved. OMB is holding up on its summer directive to proceed forward with the contracting out. They are not going to be pressuring agencies to contract out under the 27 percent figure. They are going back and reassess the 27 percent figure very, very carefully to find out whether or not a person who is today receiving $12,700 on the outside is really cheaper for the taxpayer than a person who is costing us $10,000 in Federal service.

OMB's new reappraisal may cause all sorts of new developments. Many more studies are going to be made, and the Subcommittee on Post Office and Civil Service is going to be holding many hearings on this.

Mr. Chairman, I think the nice thing about the gentleman's amendment is that it does not mandate that the Defense Department has to make those changes. It is just that if agencies find themselves in a crunch because of this recent change in policy about contracting out by OMB they will not be pinched, and they will not be caught short because we are giving them flexibility with the manpower addition potentials in the gentleman's amendment.

Mr. Chairman, until we figure out exactly what the governmental policy is going to be on contracting out, the flexibility in this amendment is very, very important.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am very sympathetic with the point of view of the gentlewoman from Colorado (Mrs. SCHROEDER) and that of the gentleman from Indiana (Mr. CORNWELL), who introduced this amendment. I have a military installation in my district too, and I know that the jobs there are important. I want to see as many jobs as possible retained in my installation; but I think the thrust of this amendment is being misunderstood.

We are not adding any jobs to any installation with this amendment. The ceiling on industrially funded employees to be hired during fiscal year 1978 is already included in the ceiling already in the bill for civilian employees. All we are doing in this amendment is to permit a certain increase and decrease in civilian employees on a temporary basis. But to believe that by raising the exemption to 3 percent instead of 1½ percent we are also doubling the number of employees that will be hired is fallacious.

As the gentleman from Louisiana (Mr. TREEN) has indicated, we have already increased this leeway by 300 percent over last year's leeway figure. And we are not going to add any more jobs by increasing that leeway figure by 600 percent because the funds to finance civilian employees are appropriated on the basis of the ceiling on civilian employees contained already in this title.

Our problem with the Defense Department this year and in the remaining years of this administration, is not going to be in finding ways of increasing civilian employees in the Defense Department. Our fight is going to be to keep the Defense Department from eliminating civilian jobs in our arsenals by contracting everything out to private industry.

That is the reason we have section 809 in this bill that prevents the Defense Department from making those contracting-out decisions until they have made a thorough study and reported to the Congress.

Therefore, what we need to do, I think, is to fight that primary battle in the days ahead. We are kidding ourselves, it seems to me, if we think we are really saving any jobs or adding any new jobs by increasing the one and one-half percent figure to 3 percent.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I do not think that any of us really think we are increasing the number of jobs.

I think what we want to make sure of is that DOD was not operating on the OMB mandate when they made their manpower request that they were going to start reducing their manpower levels by subcontracting out at least five positions per department, which was originally asked for by OMB.

The amendment does not mandate an increase, but permits one if Defense is caught short by the new policy of OMB.

Mr. STRATTON. However, we have exactly the same number of civilian employees authorized in this bill that we had last year, so the figure in this bill is not based on any estimated reduction as a result of anticipated contracting out.

I agree with the gentlewoman from Colorado (Ms. SCHROEDER) that we have to fight against this proposed contracting-out; but I think this is the wrong way to do it.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from South Carolina.

Mr. DAVIS. Mr. Chairman, we do however, have a bill here that is based on the contracting-out figures, if the gentleman will forgive me for disagreeing; but what we are really talking about here is just temporary employees. What we are talking about is a facility being able to do a complete job and being able to hire the temporary help such as one would in private industry, where one can complete a job and do it with great efficiency. No one can do it with 85-percent efficiency. By the same token, if one has the ability to go out and say, "All right. I need 25 more men here for this job," he can then hire them and do it.

Mr. STRATTON. The gentleman knows very well, however, that the Department of Defense is not going to do that. They have indicated they cannot pay for the total number of employees permitted under the Cornwell amendment because the civilian ceiling will govern the appropriations they receive.

Mr. DAVIS. No, but right now the Department will cut the entire job out.

Mr. STRATTON. We have already given them three times the leeway they have had in the past. That certainly is enough to take care of any real problem that may arise. They are not going to add on anybody if they can help it, considering the attitude that the Pentagon has right now.

Mr. DICKS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

I represent a district that has over 10,000 civilians who work under the defense personnel ceiling. These individuals are employed at Puget Sound Naval Shipyard, McChord Air Force Base, Fort Lewis, Bremerton Naval Hospital, Madigan Army Medical Center, Naval Torpedo Station at Keyport, and last but not least, the new Trident submarine base.

Thus, when changes occur which adversely affect civilians working under defense personnel ceilings, I eventually hear about them. Lately, I have been hearing from my constituents quite a bit, as DOD has resorted to all manner of means to get below these ceilings.

Here is what DOD has been doing in my area:

They are contracting out with greater emphasis. One contracting out action involves turning over the assembly and check out lines for the Poseidon and Trident missiles to a sole source supplier. To me, this insures two things: One, that subsequent contracts will jump notice-

ably as the Government becomes locked into the supplier, and two, that labor-related problems at the assembly line will rise. The Navy has refused to supply me with reports on the mobilization readiness consequences and cost-effectiveness justification for this action.

In addition, DOD has been carrying out reductions in force whereby those relieved of their 40 hour per week Civil Service positions are asked back to work 39 hours per week as "WAE" employees. This means "when actually employed"—and workers on this status lose all their retirement and sick pay benefits.

Finally, DOD is carrying out RIF's and replacing skilled civilians with military personnel who have better things to do. At a time when we are struggling to fill out our all volunteer force, I have a difficult time understanding why we are placing uniformed personnel in civilian jobs—especially when service regulations specifically prohibit such action. Yet, this has happened at Fort Lewis in my district; perhaps, this has happened at installations in your districts as well.

I am convinced that the driving force behind all of these actions is the civilian personnel ceiling imposed on DOD. I believe that Congress should exercise careful oversight on these individuals, but I believe we can accomplish this through the power of the purse. When we try to exercise oversight over civilian personnel via manpower and appropriations ceilings, we are creating a managerial nightmare.

It is my hope that in the future, the House Armed Services Committee and the Congress will consider the removal of a civilian manpower ceiling from the authorization bill. I understand the reasons why this requirement was instituted a number of years ago. But we have now had some time to review the practical consequences of this action. And in my view, the consequences do not merit continuation of this practice.

In the short term, we can alleviate the problems I have talked about here by allowing the Secretary of Defense to exceed the authorized civilian end strength by 3 percent, instead of the 1½ percent reflected in the committee's bill.

For this reason, I urge my colleagues to support this amendment.

AMENDMENT OFFERED BY MR. DAVIS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. CORNWELL

Mr. DAVIS. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. DAVIS as a substitute for the amendment offered by Mr. CORNWELL: On line 12, page 20, strike 1,034,328 and insert 1,065,328.

Mr. DAVIS. Mr. Chairman, my substitute just very simply raises the ceiling on industrially funded employees that can be hired by the Department of Defense. It takes it out of the discretionary area, it puts it totally to be totally funded by the appropriation bill. Thereby we can have the efficiency, that is needed, the various activities can operate in the manner that they would deem fit to do their job. It can handle the problem of those jobs that will be created and necessary by the moratorium on contracting out, rather than making it a 3 percent increase, it would really just make it a straight increase of 31,000 jobs available for the Secretary of Defense to use.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I think the gentleman from South Carolina is taking an intelligent approach. Certainly this would increase the number of employees and if that is what we need, this is the way we should go.

I support the amendment.

Mr. DAVIS. Mr. Chairman, I thank the gentleman from New York. It would make it a permanent thing so that there would not have to be the discretionary problems going on throughout the year.

Mr. WHITE. Mr. Chairman, I rise to oppose the amendment.

Mr. Chairman, first let me state that I have not had the opportunity to examine all of the implications presented by this particular amendment, but, just talking off the top of my head, it would appear that what we are doing is raising the total by some 30,000 employees, which gives the services an opportunity to hire that many more, and also retain the 1½ percent that is already in the bill. In other words, we are taking away the target that the services now have as to the hiring of civilian personnel. It would be far better if we are going to do anything of this nature to go to the 3 percent rather than going to the 30,000 that we have here, go to the 1½ percent or the 3 percent. It also makes discretionary that action by which they could deviate under certain circumstances, and now this will change the civilian level by 30,000 as a permanent amount and we will have to budget that amount.

Mr. DOWNEY. If the gentleman will yield, I reluctantly rise in opposition to the substitute. If I may have the attention of the gentleman from South Caroline (Mr. DAVIS) for a minute, the gentleman from South Carolina is, of course, a diligent member of this committee and I would ask the gentleman whether he can cite for me some testimony that we received that indicated that we needed to provide this additional authority?

Mr. DAVIS. Mr. Chairman, if the gentleman will yield, let me say that while I did not sit on the subcommittee on personnel, I did have the time to speak with some members of NARF who saw the need right away to increase the activities. I can cite the gentleman specific testimony dealing with the Naval weapons system.

Mr. DOWNEY. The gentleman is aware we are talking about less than 3,000 people?

Mr. DAVIS. That is right, but the other installations all over the country, if the gentleman from Texas will yield to me, are directly affected in the same manner. We have had the areas that are going to contract out. They have had to go there because they were only operating at about 85 percent efficiency because of the fact that the manpower ceilings prevented them from hiring and firing as the needs arose to do the job.

Mr. DOWNEY. If the gentleman from Texas would yield further, I sat on the Personnel Subcommittee and attended these meetings. Why, if they were having this problem, did they not come forward and recommend a change in the ceiling? It seems to me that the Department of Defense would not want to be hamstrung by their own civilian ceilings. They certainly would be the first people to come before us and request that this be changed.

Mr. DAVIS. If the gentleman from Texas would yield further, I would say, of course, they did not go before the gentleman's committee on this change because the Secretary of Defense said if they did not agree with company policy, they could find a new job. It is as pure and simple as that.

Mr. WHITE. Mr. Chairman, if I have any time left, I want to point out to the membership that the amendment offered by the gentleman from South Carolina (Mr. DAVIS) affects the portion of the bill on page 20 that says:

The Department of Defense is authorized an end strength for civilian personnel of 1,034,328.

That would still retain it at 1½ percent. That would appear on page 22. The gentleman is talking about two different things, so I would certainly hope that we would oppose the amendment offered by the gentleman from South Carolina (Mr. DAVIS) and that we would go back to talking about whether to make it 1½ or 3 percent, discretionary with the Secretary of Defense for civilian hiring under certain circumstances.

Mr. BENNETT. Mr. Chairman, I move to strike the last word.

I would really like to clarify this, if I can. A lot of the conversation on this amendment and the substitute amendment really relates to another section of the bill that has to do with contracting out. The bill as it stands without the amendment is most generous. My own amendment in committee added 3,000 to NARF's, Naval Air Rework Facilities. So we added that on top of the numbers added for ceiling flexibility in the committee. That is more than the Department asked for. We tripled the flexibility we had in the past, and there was no request from the Department, no indication that they would ever use anywhere near the tripling, so really we have been quite generous.

One can say that there is no necessity for any kind of ceiling. One can really make that argument. But, really, if there is any argument for a ceiling, the way the committee has handled it has been most generous, and, as I see it, will not involve in any way encouraging anybody to go contracting out.

Mr. Chairman, I would urge defeat of the substitute amendment and of the amendment itself. I believe the bill as drafted and as amended is a generous bill. The amendment is just adding 30,000 people. But no money is available to pay for it. All we are going to do is pile it on the budget.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina (Mr. DAVIS) as a substitute for the amendment offered by the gentleman from Indiana (Mr. CORNWELL).

The amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. CORNWELL).

The question was taken; and on a division (demanded by Mr. WHITE), there were—ayes 30, noes 17.

So the amendment was agreed to.

The CHAIRMAN. There being no further amendments to title V, the Clerk will read.

The Clerk read as follows:

TITLE VI—MILITARY TRAINING STUDENT LOADS

SEC. 601. For the fiscal year beginning October 1, 1977, and ending September 30, 1978, each component of the Armed Forces is authorized an average military training student load as follows:

(1) The Army, 77,711;
(2) The Navy, 60,767;
(3) The Marine Corps, 24,020;
(4) The Air Force, 50,356;
(5) The Army National Guard of the United States, 16,606;
(6) The Army Reserve, 11,136;
(7) The Naval Reserve, 1,065;
(8) The Marine Corps Reserve, 3,449;
(9) The Air National Guard of the United States, 2,598;
(10) The Air Force Reserve, 1,186.

Mr. BENNETT (during the reading). Mr. Chairman, I ask unanimous consent that title VI be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN. There being no amendments to title VI, the Clerk will read.

The Clerk read as follows:

TITLE VII—CIVIL DEFENSE

SEC. 701. Funds are hereby authorized to be appropriated during fiscal year 1978 to carry out the provisions of the Federal Civil Defense Act of 1950, for programs of the Defense Civil Preparedness Agency, in the amount of $134,800,000.

Mr. DOWNEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do not intend to offer an amendment to cut this because the committee has spoken. I think the feeling is on the floor that we want to move expeditiously with this bill, but I think it is important for the membership to realize that once again my committee increased from $90 million, which was requested by the President for civil defense, to $134 million.

Implicit in this whole attitude about increasing civil defense is an understanding that, No. 1, the Russians are increasing their civil defense network, so therefore mindlessly we must follow that lead, and, No. 2, that somehow by providing bomb shelters we can deter the effects of war and actually survive a nuclear war.

I reject both premises out of hand and offer the committee at least an alternative look at civil defense. I do not know if the Members saw on Friday the display the gentleman from New York (Mr. MITCHELL) had, a number of charts which were inside the Speaker's lobby, that indicated somehow 2 days after a nuclear blast that would have vaporized the Capitol dome, if one lived in Maryland one could climb out of his shelter 2 days later and continue to live this life as if nothing had happened. Nothing could be more preposterous. The thought that somehow we can insulate a society against the effect of a nuclear war is just that—preposterous.

The fact that the Russians are going ahead to try to do that indicates to me they have some lack of clarity with respect to strategic planning, and if they want to waste their money we should let them.

But the fact that we have increased this budget $44 million for civil defense I think is ridiculous.

Mr. WHITEHURST. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to reply to my friend, the gentleman from New York, because I was one of the ones in the subcommittee who pushed for this increase. I regret the gentleman did not have the opportunity to listen to the witnesses as some of the rest of us. Had he done so, I do not think he would be so anxious to reject out of hand, to use his own words, the very modest increase in terms of total dollars the money to be used for civil defense. We had witnesses before us and I asked one of them the same question reflected in the objections by the gentleman from New York. I saw a movie some years ago called On The Beach and I said this was a pretty grim sort of fate for the world if we have the nuclear "cook out" as sometimes it is called. He said:

> Congressman, it is pretty good fiction but that is about all it is and the world as a matter of fact will not end up totally devastated by a nuclear fallout.

As a matter of fact we were advised if there were a nuclear attack on the United States, that about 85 million people would survive with no shelters. We were told also, however, if we had an adequate shelter program for people to be able to walk to and within walking distance of about a day of our major urban areas that we could hold the casualties down. If we have, say, a 3-day notice of nuclear attack, and that is what the Russians have calculated in their own plans, we could hold down casualties to about 20 million.

That is a hideous loss of human life but it is better than 100 million that this Nation would suffer otherwise if it were subject to nuclear attack.

As a matter of fact, those of us advocating this increase know the major portion of it will go into regional shelters and a modest amount to the Defense Civil Preparedness Agency to get an evacuation program going for the urban corridor which is most threatened.

I would also say this to the gentleman. We are not suggesting that we build trenches and cover them over so people will have places to go to that have no other purpose. But these places can serve as nuclear fallout shelters. As a matter of fact there are many installations that can be constructed that would have a dual purpose. We saw a description of a school in the State of Oklahoma which has been built underground which could serve as a fallout shelter while serving primarily as an educational institution.

I might add that being built in this way, it is a tremendous energy saver. There are other areas. There are recreation facilities that can be constructed outside of heavily populated areas that could also be used for fallout shelters for our population.

Mr. Chairman, I think it is utterly absurd, indeed, it is criminal for us to say to the American people that there is no hope at all, nothing can be done. We are just ready to throw the chips in now and say that the fallout program is ridiculous.

One final thing I would say to the gentleman. The Russians do, in fact, have a shelter program going. It is not as comprehensive as the Chinese and I am not suggesting we go that route, either: But I think it is destabilizing to do nothing, because if we get to a crisis point and we have no shelter program and the Russians have one, they will by virtue of that advantage be prompted to act in that crisis and decide to go ahead and push the button. Because of that, the kind of program we are advocating, a modest increase now and an increase later on, will contribute to the stability between the nuclear powers.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. WHITEHURST. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, before the gentleman was a Member of Congress, the gentleman was a historian; is that correct?

Mr. WHITEHURST. That is correct; I taught history.

Mr. DOWNEY. The gentleman must certainly be aware that the way to protect a society against war is to not fight that war. Will the gentleman agree to that?

Mr. WHITEHURST. Of course, I will agree to that.

Mr. DOWNEY. Does the gentleman really believe that the additional money placed in this bill or any other program that we would embark upon would so change the policy of the United States or the Soviet Union as to have a difference one way or the other with respect to war?

Mr. WHITEHURST. I think it is a start. I am not suggesting any more than that; no one else is.

Mr. DOWNEY. Mr. Chairman, if the gentleman will yield further, if it is only a start and the gentleman perceives additional expenditures at some later date, that would be fruitful to the Civil Defense System.

Mr. WHITEHURST. I certainly do.

Mr. MITCHELL of New York. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the gentleman from New York (Mr. DOWNEY) has missed the

entire point of the presentation I made on the floor with the charts, based on the testimony by the experts in this country on civil defense. The point I was making is that we are victims of three different myths in the United States. The gentleman just speaking from New York, Mr. DOWNEY, brings that point forth beautifully. I do not know who the gentleman is referring to or who his informational experts are, but I would like to read a little about the overkill fallacy that the gentleman is referring it. This piece was prepared by Dr. Chester Conrad of the Civil Emergency Technology Section at the Oak Ridge, Calif., Laboratory. He was referring to the concept of overkill which means we will never have a nuclear war because both the United States and the Soviet Union have a sufficient amount of nuclear power to destroy each others population several times over. Dr. Conrad refers to an article in the Bulletin of Atomic Scientists which states the casualties per kilotons in Hiroshima were simply multiplied by the number of kilotons in the world's arsenal. They treated it as a routine mathematical computation.

Dr. Conrad states, in other words the overkill concept assumes some means can be devised to collect the entire target population into the same density as existed in Hiroshima and keep them in a completely unwarned and hence vulnerable posture.

A statement of identical validity is that the world's inventory of small arms ammunition, or for that matter, kitchen knives can also kill the human population several times over under these conditions.

On radiation, Mr. Chairman, once again, I do not know who the gentleman is relying on for his experts. I would like to quote something from the U.S. National Academy of Science. They advocate that if there was a massive nuclear holocaust, they estimate the long-term effect would amount to only a 2-percent increase in the cancer rate in this world over a 15-year period. This is a 2-percent increase in the cancer rate only; not 2 percent of the world's population. They point out further that this increase could be countered totally by not rebuilding many of the cigarette plants here today in our country.

To continue, Mr. Chairman, the gentleman says that if we think that the additional money we are going to spend will solve the problem, it is a very big step.

Another expert, Mr. Wilmur Strope estimates that if this country would spend an additional $100 million for 5 years, we would have a good civil defense program.

One of the chief thrusts of that program would be to inform people like the gentleman from New York that we have a problem, and we should do something about it, and that it is possible to survive a nuclear holocaust. The experts point out once again that in the Soviet Union it is estimated that if there is an all out attack and we hit the Soviet Union with everything we have on our submarines and with our other triad weaponry, and if they had about 4 days to disperse their population prior to our attack we would damage them less than the Germans did in World War II.

It is further estimated by some other authorities that as little as 2 or 3 percent of their population would be destroyed by such an all out attack. There is a debate as to what the final damage would be if there were a nuclear holocaust. The real danger is that the Soviet Union thinks they can survive an attack and people like the gentleman from New York know we cannot survive. This puts us in a horribly weak and a terribly vunerable position.

Mr. SIKES. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Florida.

Mr. SIKES. Mr. Chairman, I was privileged to hear the gentleman's discussion earlier in debate, in which he pointed out very effectively the fact that our civil defense system is largely a system in name only, whereas the Russians, by contrast, have a very complete and very effective system which could certainly make the difference in time of war. The gentleman's contribution is one of the most valuable, I think, that has been made during the debate on this bill.

It should be obvious that civil defense in which the Russians are becoming increasingly efficient, may be the final weapon which the free world cannot match. By protecting their own people and their essential installations from a nuclear holocaust, they will have an ability to survive which is not shared by the people of any other nation. We are neglecting our own civil defense program, so are nations all over the world other than the Iron Curtain countries.

Civil defense may well become the deciding factor in future negotiations, not in disarmament talks alone, but in détente. A country which can survive nuclear attack with minimal casualties is in a far stronger position than one whose people can expect to be decimated by such an attack.

Mr. MITCHELL of New York. I thank the gentleman.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, would the gentleman from New York tell us whether or not there is a crisis relocation plan being developed within the boundaries of the State of New York? For example, one is being developed in the central part of the State of Georgia, and there are nine of them over the Nation which are pilot projects.

The CHAIRMAN. The time of the gentleman from New York has expired.

(On request of Mr. BRINKLEY and by unanimous consent Mr. MITCHELL of New York was allowed to proceed for 3 additional minutes.)

Mr. BRINKLEY. A crisis relocation center is simply a plan of dispersal whereby you walk away from the target center and you plan survival, think survival, and you do survive. If I am not mistaken, the State of New York has made a very important beginning within the confines of its borders. I appreciate the gentleman calling these things to the attention of this body.

Mr. MITCHELL of New York. I thank the gentleman. The first plan was designed for a region in my congressional district, in the vicinity of a SAC air base.

Mr. WHITEHURST. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Virginia.

Mr. WHITEHURST. Mr. Chairman, I just want to make note of the point which is abroad that after a nuclear attack there is nothing left and one cannot go back, and there is the end of life.

Let me read the following:

After World War II, public attention was focused almost exclusively on the awesome destructive power of nuclear weapons. As a result, the industrial recovery of bombed cities such as Hiroshima went unnoticed. The fact is that industry can and will recover from even nuclear devastation. The day after the explosion, bridges into downtown Hiroshima were open to traffic, and electric service was restored in some areas. On the second day, trains were again operating. By the third day, some streetcar lines resumed service. Within 9 days, telephone service was restored to the city center. In the outlying areas of the city, water, sewer and gas services were never interrupted.

Mr. DORNAN. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from California.

Mr. DORNAN. Mr. Chairman, I would like to point out that there is an aspect of civil defense which does not always involve a nuclear holocaust. The movie "On the Beach" was mentioned earlier. There is a film released in the last year or so which, although not a classic, graphically demonstrates what will happen to a large metropolitan area such as Los Angeles if there is a severe earthquake. We are not prepared through civil defense for that type of major tragedy. We are not prepared in southern California or anywhere in the country for the disaster of a large meteor striking the surface of the Earth, as has happened in Siberian forests in June of 1908. That meteor weighed 10,000,000 tons and leveled 30 miles of thick forest. Imagine that horror in populated areas of any of our 50 States.

When I took my family to visit the Grand Canyon area last year, we went to the small city of Dinosaur and visited the large caverns there. In the large main cave we saw civil defense supplies stored there in preparation for a nuclear war, but nobody knows about these supplies except the cave tour guides and probably a minuscule percentage of the small population of Dinosaur, Ariz. This is just one pathetic example of the piddling effort this country has made toward helping its citizens survive any type of major catastrophe, man-made or natural.

If we take into account some of the testimony that was given in those poorly attended security briefings that we had last month by defense experts such as Paul Nitze of the SALT I team, we know the Soviet Union can use civil defense as a means of increasing world tension during confrontations.

The CHAIRMAN. The time of the

gentleman from New York (Mr. MITCHELL) has expired.

(On request of Mr. DORNAN and by unanimous consent, Mr. MITCHELL of New York was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL of New York. Mr. Chairman, I yield further to the gentleman from California (Mr. DORNAN).

Mr. DORNAN. In the event of some serious confrontation, suppose the Soviet Union begins to evacuate their cities under a civil defense plan, how will we respond to that? Mr. Paul Nitze says he agrees with the Soviets that their civil defense is none of our business as a SALT negotiating point as ours would be none of their business. But he pointed out an effective civil defense program is a very effective way of increasing pressure during a confrontation, the way President John Kennedy put one-third of our Strategic Air Command, our B-52's, into the air during the Cuban missile crisis of 1962. If the U.S.S.R. begin evacuating cities because of some conflict with us over the Middle East, how can we respond if we are totally defenseless in this area of protecting our populace? We have no credible civil defense and it is bordering on criminal negligence to suggest cutting the minimal dollars we have allocated. I thank the gentleman from New York for yielding.

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Idaho (Mr. SYMMS).

Mr. SYMMS. I thank the gentleman for yielding.

Mr. Chairman, I think the remarks of the gentleman from New York add a lot to the colloquy. I think it acts to dispel some of the mythology that is held by so many people in this country about overkill. The gentleman from New York says that we have enough bombs to kill the Russians 10 times over. If his feeling is right, all we need is 250 million 30/06 shells—one per Russian. The fact of the matter is, we could not kill over 5 percent of the Soviet population in a nuclear exchange. They killed more people than that just setting up their government when they had the revolution in 1917. Recently a U.S. News & World Report article pointed out the risk we would be in, where the Russians have proper civil defense and we do not have, and how we would have to jeopardize great masses of the population needlessly. This is not enough to increase our civil defense procedures but at least we should do this effort—I urge a no vote.

Mr. DELLUMS. Mr. Chairman, I move to strike the requisite number of words.

First of all, Mr. Chairman, at a moment of limited resources and difficult choices, it would seem to me that the rational, clear, thought-out set of priorities is what ought to dictate what we would do. We are now talking about over $90 million invested in developing national civil defense programs. If one would just look at the amount of cement that goes into just hardening one of our silos in order to provide a mechanism for the American people to survive a nuclear blast, it would take more concrete than we have on the face of the Earth. There is a certain degree of unreality, Mr. Chairman, about this entire discussion. The United States and the Soviet Union's combined explosive capability equals between 10 and 12 tons of TNT for every man, woman, and child who walks on the face of the Earth. We ought to be spending this money for other problems. If we are concerned about the civil defense of the American people, then, Mr. Chairman, some of our energies ought to go into reducing and, hopefully, removing the insanity of nuclear weapons from the face of the Earth. Ninety million dollars is a waste. It is a tragedy. It is ludicrous. It is to me frankly, Mr. Chairman, insane, if we are talking about protecting the American people, then let us enter into a dialog with other powers to stop the proliferation of nuclear weapons. The sophisticated nature of our kill capability and the sophisticated nature of the Soviet Union kill capability so far exceeds these absurd programs of building a few holes into the ground so that we can run in them in the event of a nuclear blast. It disturbs me, it makes me feel I am sitting here on the floor of the House of Representatives in a dream, in a real situation where Members of Congress are actually discussing the question of whether we will survive a nuclear blast.

I do not think that any Member here on this floor believes or forecasts that there will ever be a nuclear war. It seems to me that our energies ought to be put into stopping and curbing the ultimate possibility of any nuclear war. It seems to me that our energies ought to be put into stopping and curbing the ultimate possibility of any nuclear war. It seems to me that the spending of $90 million to try to build a civil defense mechanism is the height of insanity.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to the distinguished gentleman from New York.

Mr. DOWNEY. Mr. Chairman, I do not think there is much I can add to the eloquent remarks of the gentleman from California (Mr. DELLUMS). His views have been set forth plainly in this debate, and we have heard the attitude of some of the other Members with respect to civilian defense expenditures.

The fact is that both sides, the Soviet Union and the United States, have predicated their actions on a mutual assurance destruction mentality, and we have been told that we can destroy one-third of their population and two-thirds of their industrial base in the initial salvos. That is fact.

We could cite hundreds of experts, and we could take the printouts of the SIOP—single integral operations plan—and we would find that after a nuclear war that there would be little left in either country after nuclear exchange.

That is what the President's attitude with respect to arms control is, and it is realistic, and it is the only sane policy to follow. Certainly preparing for the effects of nuclear war and somehow trying to live after that war does not make a whole lot of sense.

Mr. Chairman, the gentleman mentioned a couple of scientific articles. I read scientific articles also, and sometimes I read the Scientific American. In one issue about 3 months ago there was an article that indicated the Department of Defense has done some computer planning on the effects of fallout. This is what the article pointed out:

What would happen if the Soviets decided only to hit the missiles in Minot, Mont.? The effects of that radiation would be felt as far as Washington, D.C. The fallout would be as deadly as anything we could conceive and obviously deadlier than anything we have seen before on this planet.

The Hiroshima bomb was only a 4-kiloton bomb, and they are still feeling the effects from the radiation of that warhead.

Mr. BOB WILSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I believe there has been an attempt to oversimplify the dangers of this investment and also to minimize the lack of danger from any nuclear attack. I do not think this country is going to be attacked or will undergo a nuclear holocaust, I hope to God it does not.

However, there are opportunities here to educate the public and let Americans know that we can protect ourselves through proper procedures. Many hundreds of millions of people could be saved through that type of education. That is the purpose of this money that will be invested in the Defense Civil Preparedness Agency.

It happens that Russia spends about 12 times per capita more than the United States does in this area. It also happens that the little country of Ireland, which has only a few million people, spends more money than this country does on civil defense. If we talk with scientists who know how nuclear reactions occur, we find out that we can protect ourselves against fallout if we get in underground tunnels and stay there for at least 7 days. So even if people are in close proximity to a nuclear blast, they can protect themselves against fallout.

Mr. Chairman, it just seems to me that the amendment that has been added here is inconsequential in amount when compared with the numbers of lives that could be saved in case this terrible disaster might befall this country. It is inconceivable to me that Russia and China can prepare to protect their total populations in case of nuclear attack and then feel that we do not think it is important at all.

Mr. WHITEHURST. Mr. Chairman, will the gentleman yield?

Mr. BOB WILSON. I yield to the gentleman from Virginia.

Mr. WHITEHURST. Mr. Chairman, I would add to the nations who are preparing for nuclear attack Sweden and Switzerland. They have also made elaborate preparations to protect their populations from fallout.

Mr. BOB WILSON. The gentleman and I both know, after having visited in

China, that the Chinese Government is attempting to build shelters for every single person in China so they will be able to get underground in case of nuclear fallout and in case of a nuclear attack.

Mr. Chairman, to make fun of the fact that there is a possibility of nuclear attack is wrong, because this is a very serious matter.

Mr. MITCHELL of New York. Mr. Chairman, will the gentleman yield?

Mr. BOB WILSON. I yield to the gentleman from New York.

Mr. MITCHELL of New York. Mr. Chairman, I would just like to say in answer to the gentleman from California (Mr. DELLUMS), who spoke earlier, that it would be wonderful if we could rid the entire world of all nuclear bombs.

However, in the real world it is not possible, today, at least. The contemplation of a nuclear holocaust is horrible. It would be catastrophic, but the point is people can survive one, if they are prepared.

Mr. Chairman, it surprises me too that the gentleman from California (Mr. DELLUMS) opposes spending what is relatively a small amount of money toward saving human lives. He mentions human problems. I submit to the gentleman that there is not any human problem greater than saving a life.

As far as the amount we are spending is concerned, we are spending about $124 billion to learn new and better ways to kill people. Why not spend $134 million to learn to save some American lives?

The CHAIRMAN. For what purpose does the gentleman from Florida (Mr. BENNETT) rise?

Mr. BENNETT. Mr. Chairman, I really was going to try to cut off debate. There is no amendment pending before us, although this discussion has been very productive.

The CHAIRMAN. The Clerk will read title VIII.

The Clerk read as follows:

TITLE VIII—GENERAL PROVISIONS

SEC. 801. Beginning with fiscal year 1979, the President shall include in the budget for each fiscal year a request for funds sufficient to meet the total operation and maintenance costs of the Department of Defense for such year, including reasonably foreseeable increases in both the private and public sectors in the cost of labor, material, and other goods and services.

SEC. 802. During the fiscal year 1978, there are authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to pay claims arising out of, or to pay equitable adjustments to, contracts for the construction of naval vessels, but none of the funds authorized to be appropriated under this Act may be used to pay any claim against the United States arising out of, or to pay any equitable adjustment to, any contract over $5,000,000 unless the Secretary of Defense certifies to the Congress, in writing, that such claim or adjustment has been thoroughly examined and evaluated by officials of the Department of Defense responsible for determining the merits and validity of such claims and adjustments, in accordance with applicable laws and regulations, and that such claim or adjustment is valid and meritorious.

SEC. 803. (a) Section 651(a) of title 10, United States Code, is amended by striking out "male" and "after August 9, 1955," in the first sentence thereof.

(b) The amendments made by subsection (a) shall take effect on the first day of the seventh calendar month beginning after the month in which this Act is enacted and shall apply to any female person who becomes a member of an Armed Force on or after such day.

SEC. 804. (a) Section 105(a) of title 32, United States Code, is amended—

(1) by striking out "The Secretary of the Army shall have an inspection made at least once a year" and inserting in lieu thereof "Under regulations prescribed by him, the Secretary of the Army may have an inspection made"; and

(2) by striking out "and" at the end of clause (4), striking out the period at the end of clause (5) and inserting in lieu thereof "; and", and inserting after clause (5) the following new clause:

"(6) the accounts and records of each property and fiscal officer are properly maintained.".

(b) Section 708 of title 32, United States Code, is amended—

(1) by striking out subsection (d);

(2) by redesignating subsections (e), (f), and (g) as subsections (d), (e), and (f), respectively; and

(3) by striking out "(e)" in subsection (e) (as so redesignated) and inserting in lieu thereof "(d)".

SEC. 805. Section 6485(b) of title 10, United States Code, is amended by striking out "and shall be physically examined" and all that follows in such section and inserting in lieu thereof a period.

SEC. 806. The Act entitled "An Act to provide subsistence allowances for members of the Marine Corps officer candidate programs", approved November 24, 1971 (84 Stat. 491; 37 U.S.C. 209 note), is amended by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1978".

SEC. 807. Notwithstanding any other provision of law, the authority provided in section 501 of Public Law 91-441 (84 Stat. 909) is hereby extended until October 1, 1979; but no transfer of aircraft or other equipment may be made under the authority of such section 501 unless funds have been previously appropriated for such transfer.

SEC. 808. The Secretary of Defense shall supply the Committee on Armed Services of the Senate and House of Representatives, not later than October 1 of each year, a full accounting of all experiments and studies conducted by the Department of Defense in the preceding twelve-month period, whether directly or under contract, which involve the use of human subjects for the testing of chemical or biological agents. In addition, not later than thirty days after final approval in the Department of Defense of plans for any experiment or study to be conducted by the Department of Defense, whether directly or under contract, involving the use of human subjects for the testing of chemical or biological agents, and not less than thirty days before the initiation of such experiment or study, the Secretary of Defense shall supply the Committee on Armed Services of the Senate and House of Representatives a full accounting of such plans for such experiment or study.

SEC. 809. (a) The Secretary of Defense shall conduct a complete and comprehensive study of the criteria used in determining whether commercial or industrial type functions at any Department of Defense installation should be performed by Department of Defense personnel or by private contractors. The study shall evaluate the basis and assumptions underlying Department of Defense methods for conducting cost analyses and identification of those mission essential functions which do not lend themselves to performance by private contractors.

(b) The study required by subsection (a) shall be submitted to the Committees on Armed Services of the Senate and the House of Representatives not later than December 31, 1977, and no further conversion of commercial or industrial activities to be performed by contractors shall be made before March 15, 1978.

(c) The percentage of the total funds available on the date of enactment of this Act for performance of research, development, test, and evaluation work at or by any Department of Defense research and development facility which is being expended for performance of such work by private contractors shall not be increased until the Congress determines that decreasing the percentage of such work performed by Department of Defense personnel is in the national interest or until March 15, 1978, whichever occurs first. The Secretary of Defense shall, not later than December 31, 1977, submit a report to the Committees on Armed Services of the Senate and House of Representatives listing the distribution of all funds available on such date for performance of research, development, test, and evaluation work at Department of Defense research and development facilities and detailing the rationale for any changes in the percentage of such work performed at any such facility by Department of Defense personnel between the date of enactment of this Act and December 31, 1977, and detailing any proposed change in such percentage.

SEC. 810. This Act may be cited as the "Department of Defense Appropriation Authorization Act, 1978".

Mr. BENNETT (during the reading). Mr. Chairman, I ask unanimous consent that title VIII be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN. For what purpose does the gentleman from Georgia (Mr. BRINKLEY) rise?

Mr. BRINKLEY. Mr. Chairman, the gentleman from Georgia rises late, in view of the Chair's recognition of the gentleman from Florida (Mr. BENNETT). The gentleman from Georgia had wished to be heard on the matter of civil defense briefly.

Therefore, Mr. Chairman, I will move to strike the requisite number of words.

The CHAIRMAN. The gentleman from Georgia (Mr. BRINKLEY) is recognized.

Mr. BRINKLEY. Mr. Chairman, in response to my friend, the gentleman from California (Mr. DELLUMS), he suggests that it is insanity for this country to spend $90 million. We, of course, propose in this bill to raise this figure to a full-growth budget of $134.8 million.

If that, Mr. Chairman, is the case, then the Soviet Union is 10 times more insane than we are, since they spend 10 times more. The real function of this money is for better communications, some new hardened shelters, and a lot better education for the American people.

One of the very important roles of Civil Defense is preparedness and response to wartime emergency.

Of secondary importance and to me of primary importance is the role of natural disaster reaction. Many of us feel that it should be expanded also to in-

clude preparedness in the natural disaster field such as the gentleman from California (Mr. DORNAN) referred to earlier.

Later this year hearings will be held on that topic in order, Mr. Chairman, to get a peacetime spinoff from this investment so that we might reap affirmative benefits from the money which we have invested toward being better able to deal with the natural disasters which will come. Of course, the wartime disaster money is an insurance policy against the day that we hope will never come.

Mr. Chairman, I appreciate the opportunity of being heard.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I thank the gentleman for yielding.

Let us talk about this matter rationally for a moment.

I think that all of us on the floor agree that the long-range solution of the problem is to remove all nuclear weapons from the face of the Earth. We are now faced with the short-run situation.

I do not think that anyone on the floor of this Congress today would think, in the short run, that there is a preeminent possibility of a nuclear holocaust. Therefore, the expenditure of $134 million, in my estimation, given the fact that there are unemployment, disease, poverty, and inadequate education, is a gross misuse of American dollars.

There is no short-run solution, and the long-range solution is to remove the weapons.

That is why I think this appropriation is absurd when we look at it within that context. The gentleman from California does not want to be blown out of his bed, but this amount of money is not going to save me, you, or the American people. What will save us is if our SALT talks do, in fact, result in a higher level of missile allocation but start to reduce and ultimately remove our weapons.

That is all the gentleman from California is trying to say.

Mr. BRINKLEY. Mr. Chairman, I share the gentleman's hope that we not have atomic war.

I share the wish that if we do build some hardened shelters, certainly that there will be a job spinoff.

These shelters would also have a dual-use purpose. They would be used additionally for storage, for schools, for libraries, and for recreation. We are not just going to pour the money down the drain.

AMENDMENT OFFERED BY MR. ASPIN

Mr. ASPIN. Mr. Chairman, I offer an amendment.

Mr. DOWNEY. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Seventy-five Members are present, evidently not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

AMENDMENT OFFERED BY MR. ASPIN

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin (Mr. ASPIN).

The Clerk read as follows:

Amendment offered by Mr. ASPIN: Page 28, after line 2, insert the following new section:

SEC. 810. (a) Any member of the Armed Forces who first becomes a member of the Armed Forces after the date of enactment of this Act shall be subject to subchapter III of chapter 83 of title 5, United States Code, relating to civil service retirement, to the same extent and in the same manner as if such member is a Member of Congress, as such term is defined in section 2106 of such title.

(b)(1) Nothing in subsection (a) shall be considered to affect the applicability of chapter 61 of title 10, United States Code, relating to retirement or separation for physical disability, to any member of the Armed Forces.

(2) Notwithstanding subsection (a), any member of the Armed Forces who is involuntarily retired under any provision of title 10, United States Code, shall be eligible to receive retired pay in accordance with such title, if the provisions of such title are more favorable to such member than the provisions of title 5, United States Code, which would otherwise be applicable to such member under subsection (a), except that for purposes of computing the retired pay of such member under title 10, United States Code, the basic pay of such member shall be considered to be the average pay of such member as defined in section 8331(4) of such title 5.

(c) The Secretary of Defense shall issue such regulations as may be necessary to carry out this section.

(d) Any provision of title 10, United States Code, relating to (1) eligibility of members of the Armed Forces for voluntary retirement, or (2) computation of retired or retainer pay for members of the Armed Forces who voluntarily retire, is to the extent inconsistent with subchapter III of chapter 83 of title 5, United States Code, superseded by this section.

(e) For purposes of this section, the term "Armed Forces" means the Army, Navy, Marine Corps, and Air Force, including the Reserve components thereof.

Page 28, line 3, strike out "810" and insert in lieu thereof "811".

Mr. ASPIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ASPIN. Mr. Chairman, the issue I would like to raise before the committee at this point concerns the fastest growing part of our defense budget. The cost of military pensions is the issue I would like to address with the amendment I have just introduced.

The military pension costs in 1964 were $1.2 billion and they were just about 1½ percent of the Defense Department budget. But this year the costs of military pensions are at $9.1 billion and they are well over 8 percent of the Defense Department budget. Without changing the military retirement system between now and 20 years from now the costs of military pensions will be running $34 billion a year.

This is a situation which is not peculiar to the Defense Department. We have seen a great many of these kinds of runaway pension costs associated with many of the other forms of Government, and we have seen it in the local governments and State governments and other places.

We are spending now on military pensions just a little bit less than we are spending on strategic weapons. Clearly within the next couple of years costs of military pensions are going to exceed strategic weapons.

How did we get to the position where military pensions are getting out of hand?

The formula for determining what people get in their military pensions was determined in the days before the All-Volunteer Army. In the old days before 1968–69 the pension formula was indeed very generous but it was a generous pension based upon a very low salary base. So the salary was low and the pension was low.

In 1968 when we raised the military pay we unfortunately did not also change the formula by which the military pensions were computed, so now we have a formula which is the same but the pay is very much higher, and that is what has caused the military pensions to expand from $1.2 billion in 1964 to $9.1 billion today and will go on up to $34 billion within 20 years.

What I am proposing in this amendment is that from now on those people who join the Armed Forces will come under the congressional retirement system. This amendment does not apply to anybody who is now retired. It does not apply to anybody who is now in the Armed Forces.

It will apply prospectively to those people who join the Armed Forces after the date of enactment of this bill.

The reason I suggest we put them under the congressional pension program is, first of all, the congressional system is a great deal more generous than we find in private industry. It is a great deal more generous than we find in most governments. It is not, however, anywhere near as generous as the military pension scheme.

In particular, we would save a great deal of money if we put military people under the congressional retirement scheme. We would save money in three important respects. No. 1, under the congressional system people who join the congressional system pay 8 percent of their salaries every year into the retirement program. In the military, there is no contribution whatsoever.

No. 2, under the congressional system,

the pension is payable to people when they reach age 62.

The CHAIRMAN. The time of the gentlemar from Wisconsin has expired.

(By unanimous consent, Mr. ASPIN was allowed to proceed for an additional 5 minutes.)

Mr. ASPIN. Mr. Chairman, the second feature about the congressional retirement program is that it is paid at age 62. People can collect it at an earlier age, as early as age 55, but at reduced benefits; but the military retirement scheme is paid immediately upon leaving the service after the completion of 20 years. If a person joins the service at age 21, leaves the military at age 41, they immediately start collecting their pension at age 41. That is a very, very expensive part of the military retirement program.

The third way in which the congressional retirement program is different from the military retirement program is that the congressional program is based upon the last 3 years' salaries. It is an average of the high 3 years. In the military the pension is based upon the last paycheck.

So in these three ways the cost of the military retirement program will be lowered, if we put people under the congressional system.

There are, incidentally, a couple ways in which the military pensions will be improved by going under the congressional retirement system. First vesting comes after 5 years under the congressional system and not 20 years as with the military; so they would be entitled to a pension with fewer years of service, but they would not get it until age 62. Second, pension payments are slightly higher under the congressional system.

Somehow, somewhere, some way, we have to get control over what is happening to military pension costs. Consider what has happened to New York City. It has happened to a number of other cities. It has happened to a number of States. When the pension system goes out of control, that particular governmental unit is in very, very serious trouble. The same thing can happen to our system of Government here.

Mr. Chairman, there are two reasons why we should get control over the military pension system. One is just to make sure that we have financial sanity in the whole system at all.

Second, that the military pension system does not expand and squeeze out all the weapons that we would want to buy for the military's benefit.

Senator EAGLETON said it very, very well, when he said that the classic economic question which this country eventually will have to face is the question of guns or pensions; not guns or butter, but guns or pensions, because what is happening is that pensions are taking a bigger and bigger and bigger part of the Defense budget and they are squeezing out the other things we might want to have.

One final word on the financial stability of the military pension system. A lot of people in this country worry about the national debt. They say we have a $600 billion national debt. The military pension system adds $200 billion to that national debt. If the Pentagon were to shut down today and go totally out of existence so that it did not exist, we would owe $200 billion to the people we are obligated to over their lifetimes.

The military pensions system adds $200 billion to the national debt of $600 billion. There is 5½ times more money in this year's budget for the military pension system than there is for the B–1 bomber. Members of the committee, it is long past time that we got control of what is happening to the military pensions and other pensions, but particularly the military pensions, as part of this budget.

I ask that every Member carefully consider this amendment. It seems to be a fair and equitable way to deal with the problem.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

(On request of Mr. ICHORD and by unanimous consent Mr. ASPIN was allowed to proceed for 2 additional minutes.)

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Chairman, I very reluctantly leave my committee and join with the gentleman from Wisconsin in support of his amendment. The reason why I say "reluctantly" is because we are dealing with a very complicated subject, and I regret the fact that the proper subcommittee does not have or will not have the chance to look at it if this amendment should pass. I know the gentleman from Alabama does intend to take a hard look at the problem.

The gentleman from Wisconsin, however, is correct. We have to do something. In 1954, our retirement costs were $1.2 billion. For 1978, it will run $9.1 billion. If we project out to the year 2000, it is going to be $34 billion. And, members of the committee, if we continue with this we are not going to have any money left for the hardware for the defense of this country. I cannot responsibly take any other position.

I think some of the studies I have seen being made over in the Defense Department are unduly complicating the situation. This is very simple. It only applies to the young man now coming into the service, and does not affect existing rights. I think we have to do it in the interests of buying hardware for the defense of this Nation.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, I think the gentleman's amendment raises some very, very important issues. The gentleman talked about the congressional system, and the fact that it would encourage people to stay longer. I do not think people realize that the average retired officer is 46 years old when he retires, and his pension is based on an annual salary of $15,400. We send men to the Moon who are older than 46 years old.

I think it would be one of the things the gentleman is attempting to do, to keep some of our officers for 25 or 30 years. I think his amendment is a very important consideration in this.

Mr. NICHOLS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I certainly concede to the gentleman from Wisconsin that due to the large and rapidly growing cost of the military, it is time the Congress did take a good, hard look at the military system of this country. But, let me call to his attention the fact that the military system of this country is not unique in having problems. The social security system is in trouble; the railroad retirement system is in trouble; the civil service system has an unfunded liability. So, I would not want the gentleman to leave the impression with this committee that the retirement system of the military is the only one that is in trouble.

I must admit to the Committee and to the gentleman from Wisconsin that, while I want to consider his amendment and will consider it in due time, that I only saw this amendment about noon today, so that I have had very little time, as chairman of the Military Compensation Committee, to take a good look at it. But, Mr. Chairman, with your permission let me probe the specifics of his amendment just a little further.

The fundamental objective, of course, of any element of a military compensation system is to attract into the service and to retain on active duty the number and the quality of men and women needed to carry out the defense mission. Now, does this retirement system, as suggested in the gentleman's amendment, provide the necessary incentive to retain the quantity and quality of men and women needed to utilize the complex programs being offered today?

Further, and equally important, Mr. Chairman, does this suggested system provide the incentives in the most efficient way?

The congressional retirement system, which the gentleman has so eloquently portrayed as being ideal for the military, requires an 8-percent contribution. The service member also contributes 5.85 percent in social security. So we are talking about a 14-percent total contribution. And in some cases, I am wondering if this might not be too heavy a burden for the service member, particularly in the lower enlisted grades.

Let me take, for example, the pay of a sergeant, an E–6, with 12 years of service. He gets about $12,000 a year. He would pay into the retirement system, under this, about $1,000 a year. A major, with 16 years service, pretty handsomely paid, the gentleman from Wisconsin might say, at $24,000 a year, would pay about $2,000 into such a system.

So I believe we ought to allow adequate time to consider this burden and how it affects the military in general.

When the gentleman talks about comparability, I wonder if the gentleman is saying that service in the military is comparable to service in the Congress. At times, I suppose, we feel like we have hazardous duty. But I see very little meaningful similarity between congressional service and military service.

I would add also, Mr. Chairman, in closing, that the President is in the process now of appointing a blue ribbon committee to look into, and report back to the Congress, on the whole matter of retirement. This matter has not come before our subcommittee and my friend, the very able gentleman from Wisconsin (Mr. ASPIN) is the ranking member of that subcommittee, and I can assure him he will have ample opportunity to bring it before the committee.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. NICHOLS. I yield to the gentleman from South Carolina (Mr. DAVIS).

Mr. DAVIS. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Alabama. At the present time, I am inclined to oppose this amendment, knowing the fact that the gentleman from Wisconsin has been on the Military Compensation Subcommittee for the last 4 years. So it could have been brought to the subcommittee and full ramification hearings could have been held during those 4 years. He is still on that subcommittee. I think we ought to have the opportunity, if we are to protect the integrity of the subcommittee and committee system, to bring this up in the normal course of legislative process.

The CHAIRMAN. The time of the gentleman from Alabama (Mr. NICHOLS) has expired.

(By unanimous consent, Mr. NICHOLS was allowed to proceed for 1 additional minute.)

Mr. NICHOLS. I yield further to the gentleman from South Carolina (Mr. DAVIS).

Mr. DAVIS. I thank the gentleman for yielding.

Mr. Chairman, it is not known whether we are going to provide any more incentive to stay in. We may be providing a little bit of an incentive for an individual to be getting out of the military, because right away we can see where the future enlistee is going to have a reduction of pay and will be paying into the retirement system, where maybe someone serving in the same rank, under the old system, is not. So the pay is not going to be equal. We have several ramifications.

I think the gentleman from Alabama would be willing to hold hearings on it and maybe bring up a bill. We have to do something about the retirement system. That is a known fact. But let us do it in a regular manner and not come in harum-scarum and adopt something when it could have been done through the subcommittee.

The CHAIRMAN. The time of the gentleman from Alabama (Mr. NICHOLS) has again expired.

(By unanimous consent, Mr. NICHOLS was allowed to proceed for 1 additional minute.)

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. NICHOLS. I yield to the gentleman from Pennsylvania (Mr. GARY A. MYERS).

Mr. GARY A. MYERS. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Alabama. I think the amendment would have an adverse impact on drawing and keeping people in the military. I would have thought a proposal such as this would be of a more serious nature if it did not have appended to it a congressional title. It would seem to be something less than a serious proposal as it is presently billed.

I think the gentleman's remarks about taking it to committee and giving it study is a much more solid approach.

Mr. NICHOLS. Mr. Chairman, I thank the gentleman for his remarks.

I think the real damage, Mr. Chairman, from this amendment is to the military itself. I submit to the Members that if we bring this amendment out of this committee and agree to it without going through the necessary committee of Congress, then the members of the armed services are going to say, "If this is all the Congress thinks of our services, then show me where we can start signing up the unionized military."

I ask that the amendment be defeated.

Mr. MITCHELL of New York. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I had not seen the amendment before a few minutes ago, but on the surface of it and from a cursory evaluation, it does not seem to me that the two systems are really compatible.

We are talking about two different groups of people. It seems as though we are trying to match oranges and orangutans.

We have not seen any great emphasis in Congress—at least we have not so far—on youth or physical conditioning or strength. There seems to be no great concern for an up-and-out movement or a lean and mean philosophy; there is no great concern for bravery in the front lines.

I say that there are better ways to revise our system if it needs revision.

Mr. Chairman, I think the amendment is also premature. Some Members have pointed out that this is a highly important measure, and that it does require comprehensive hearings.

In the meantime, while we are talking about this—and I hope not frivolously—we are having a great deal of difficulty in maintaining our force levels in all of the Armed Services. One of the reasons we hear time and time again for that is that there is a real or perceived erosion of benefits to servicemen; those people to whom we promised certain things. We hear a great deal about breach of contract and about changing the rules in the middle of the game.

I would say that the one redeeming feature of the gentleman's amendment is that it is prospective, that is, it does grandfather in those people who are in the service right now. There seems to be at least this much of a message to them: that if a change is to take place in the retirement program, according to the gentleman from Wisconsin (Mr. ASPIN), it will take place with those individuals who enlist after the date of the passage of the act that addresses this problem.

Otherwise, Mr. Chairman, I think the gentleman's amendment represents just one more threat to the serviceman, one more threat that we do not need. I think that this is the wrong proposal, the wrong procedure, and being submitted at the wrong time.

Mr. TRIBLE. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Virginia.

Mr. TRIBLE. Mr. Chairman, I rise in opposition to the gentleman's amendment.

What I think the gentleman from Wisconsin fails to recognize is the pervasive interrelationship between the elements of the military compensation system and the ability of the force manager to maintain the quality and quantity of members needed to accomplish the mission of defense. This is a complex system; and the implications of a change to one element—a major element such as retirement especially—will have profound impacts on retention of individuals at various points in their careers.

Permit me to point out just a few of the potential impacts on retention. Application of the congressional retirement system to military personnel may well provide an incentive for the member who has reached 20 years of service to serve longer. An admirable goal, I think.

At the other end of the spectrum, an individual—age 18 or 19 or 20—who is deciding to join the military probably does not give a whole lot of thought to the amount of retired pay he will receive. I do think, however, that the present availability of retirement after 20 years of service is an important consideration to this individual when there are other jobs offering the same pay.

Moreover, for the individual facing a career decision after the first, and subsequent enlistment or obligated tour, today's retirement system is most important. Age 60 is a long way off to provide any motivation to remain on active duty. In contrast, the availability of a lumpsum return of contributions plus interest would be a powerful incentive to leave active duty. By capriciously setting aside the present retirement system, we would be neglecting the effect on retention and the consequent ability to maintain a viable military force.

The military retirement system should be changed if it no longer satisfies the objectives for which it was established. But let us make changes in a considered and rational way. We cannot give the matter appropriate review here today.

I ask that the amendment be rejected.

Mr. HILLIS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to the gentleman from Indiana.

Mr. HILLIS. Mr. Chairman, I thank the gentleman very much for yielding, and I associate myself with his remarks.

I, too, am going to oppose this amendment at this time. I think my colleague, the gentleman from Alabama (Mr. NICHOLS), hit the nail on the head when

he said that this will open the door to unions in the military if we act hastily without adequate study. I think the issue should be studied very carefully.

Mr. LLOYD of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I guess I am probably the only person in this room who actually participates in the system that we are talking about. As such I think that I can clearly state that any person who has retired from the military recognizes the fact that there is a horrendous waste in manpower in retiring people after 20 years at the age of 40. I just do not think that we can justify spending the taxpayers' money that way.

I do not think that these people are inadequate or incompetent or that they can no longer properly serve, but I do think that we must be very careful. Why? Because one of the things that Congress has done is it has made a commitment to these people guaranteeing retirement. I realize that the amendment says, "Well, all after now," but it is definitely making changes which will affect the attitudes of those who are currently in service.

There has been an erosion. There is the potential of the loss of commissary privileges, and over and over again we hear about recapitulation. A person who has served in the services as I did and who retired in 1963 probably feels—and I do not feel this way, but I know people who do—that their value is as great as those who retired in 1973.

Obviously, we cannot go back and review each phase because we do not happen to have an extra $25 billion for recomputation.

My good colleague, the gentleman from Wisconsin (Mr. ASPIN), has introduced a very necessary amendment which should be a bill. There is no doubt in my mind that before this year is over, we will pass a bill of that type.

Mr. Chairman, I do not really know that this is the answer to all things. For instance, I do not really know how we are going to handle 20-year retirements. I think, for instance, that there ought to be a different commitment. There ought to be a commitment where it says this "up and out" requirement is dead wrong.

Mr. Chairman, there is no necessity to throw somebody out of the military system at the age of 40 when there is yet great use for his services.

However, the point is that the military system has had the luxury of retiring people, who are good, competent people. Why? Because they are worried about the promotional system. I do not blame them for that. We have to have young people who are dynamic in the services, but we also have to have some sort of escape valve for those not ready for retirement but no longer in contention for higher responsibility.

I think that this is what this bill lacks at the present moment. We need an escape valve; we just cannot continue to "up and out" people and let them go to another retirement system. That does not solve the problem.

Mr. Chairman, I think what is necessary is that we take this matter back into the subcommittee, review it and it needs to be done now. From there we can go forward and come up with a bill that will really address itself to all phases that need to be addressed as far as military retirement is concerned.

Mr. DOWNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, one can imagine the fear of someone in the military these days, what with the Congress taking harder and harder looks at the way we spend our money versus how the Russians do so.

There is a tremendous fear over there that we are not going to provide the sort of money to keep this country strong and free. What overrides that fear or supersedes it is the fear that something will be done to the pension system so that the very courageous lieutenant colonel who is in charge of personnel, after 17 years, is wondering whether or not he will be able to retire and come back to the civil service at age 41 and double-dip like 141,000 other people who are double-dipping in our system, costing us $870 million.

Mr. Chairman, what the gentleman is attempting to do is to raise the consciousness, if you will, of the Members of this body by introducing a rather intriguing amendment.

Each and every one is concerned, for instance, about the generosity of the congressional system, and it is a generous one. By comparison, however, the military system is that much more generous.

Let me just cite a few figures: The average enlisted man is 41 years old when he retires. He could still make an excellent master sergeant. He is going to get $6,400. He is going to receive, after 20 years, $414 a month, and then as so many who have retired from the military do, he will come back to work for the Federal Government and receive an additional salary.

Mr. Chairman, that is outrageous. That is what the gentleman from Wisconsin (Mr. ASPIN) is trying to address this amendment to. He wants to delay the period of time during which the taxpayers are going to have to pay out this money, and he is against double-dipping.

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. DOWNEY. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Chairman, I thank the gentleman for yielding.

I would like to respond to a couple of points made by various speakers who have talked here this afternoon.

The gentleman from South Carolina (Mr. DAVIS) was saying that the committee could, of course, address this issue and bring it up as separate legislation.

Why I have brought this matter to the floor is because we have not done it in committee. As the gentleman from South Carolina (Mr. DAVIS) says, I have been on the committee for 4 years. Four years is the length of time that the military retirement pension has been on our calendar, and we have not gotten around to it.

There are lots of reasons for this. The Pentagon is not all that interested in pushing it. Our committee has had other things to do. But the point is that I have not just decided to spring this idea all of a sudden on some Monday afternoon.

Second, the reason that I suggest that we use the congressional system is that this is an ongoing program. If someone came in with a complicated program then someone might say that we do not know whether or not it would work. So, by suggesting the congressional pension system, which is an ongoing program, it is one that works and we know it works and it is working now.

So I believe that the simplest thing, if one is looking to simplify things, as the gentleman from Missouri (Mr. ICHORD) says, then look for an ongoing program to join—the congressional system.

I would like to refer to the remarks of the distinguished gentleman from Alabama because he has made a couple of points that I think are important. It is true that being in the military is not like being in anything else, there is no question about that. Military life is different from other kinds of life. But the question is should the hazards, the frequency of moves, the frequency of separations associated with military life be compensated through the pension system? Because those differences hit various people in the military services in different ways. Not everyone has hazardous duty. Not everyone has frequent separations. These are things that do not hit everyone in the same way. They should be compensated for but they should not be compensated through the pension system that applies to everybody.

Mr. MOTTL. Mr. Chairman, I move to strike the requisite number of words, and I rise as a proponent of the amendment.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Wisconsin (Mr. ASPIN) to place military personnel under the congressional pension system.

This proposed amendment will relieve the taxpayer and the Treasury of the heavy burden and high cost of the present military pension system. It will save in excess of $3 billion per year.

Opponents of this amendment will argue that our servicemen deserve a generous retirement plan for their many years of service to our country, and I would agree. However, the present military retirement system is not just generous, it is lavish. It will cost the taxpayer $9.1 billion in fiscal year 1978 alone.

Placing military personnel under the congressional pension system will still provide generous benefits, without being quite so openhanded with the taxpayers' dollars. For many servicemen, it will increase their monthly pension check. It will also expand the number of persons covered by the military pension system by reducing the number of qualifying years.

For the first time, servicemen will be asked to contribute to their pension scheme, and they will no longer be able to retire at an abnormally early age. Notably, almost one-third of the servicemen going on the pension roles this year will be in their forties.

Possibly during times of armed conflict, special benefits should be considered. But, the excesses of the present military pension system should be

curbed. Even the Pentagon itself described the present retirement system as providing "excessively liberal benefits when compared with most civilian sector plans."

This proposed amendment will end some of the excesses of the present military pension system, and save the taxpayers billions of dollars. I urge that the Members vote "yes" on the amendment.

Mr. BEARD of Tennessee. Mr. Chairman, I move to strike the requisite number of words.

I would like to ask the sponsor of the amendment one question. Under the congressional system after we put in 5 years, we are eligible for a retirement pension—after 5 years.

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. BEARD of Tennessee. I yield to my colleague, the gentleman from Wisconsin.

Mr. ASPIN. I thank the gentleman for yielding.

That is correct.

Mr. BEARD of Tennessee. Would this also apply to those individuals in the military who put in 5 years?

Mr. ASPIN. If the gentleman will yield, yes, a person who does serve 5 years is entitled to it, but he will not receive it until he really retires.

Mr. BEARD of Tennessee. That is the point I was thinking about. What are the cost implications here of 5 years? I know they may not be too great initially, but after we reach a certain point in time and we have a million men or so reaching the age of 62 having put in 5 years, what is the dollar cost?

Mr. ASPIN. The expensive part of the military retirement program is the 20-and-out. The fact is that people start receiving their retirement pay in the late thirties or early forties. The 28 percent of the military retirees, the people who are receiving military retirement pensions today, are in their thirties. They are 38, 39, 37 years old, and they will receive it the rest of their lives. That is what costs money.

One of the problems is we have people in the service 13, 14, or 15 years, and they say, "We cannot kick him out now because he is going to lose all of his pension."

Mr. BEARD of Tennessee. Let me just say I am on the Compensation Subcommittee. I really look forward to being able to listen to this type of debate, because there are a lot of complicated questions I think that have to be answered.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. BEARD of Tennessee. I yield to the gentleman from New York.

Mr. STRATTON. I appreciate the gentleman's yielding.

The gentleman from Wisconsin (Mr. ASPIN) implied a few minutes ago that the reason he is bringing this very complicated amendment out on this floor without any analysis in the committee is that the Military Compensation Subcommittee for some reason sat on it for years without doing anything about it. I happened to be the chairman of that subcommittee during the years that this matter was before our committee, and the gentleman from Wisconsin was on the subcommittee. The gentleman knows very well that the subcommittee, including its chairman, was fighting one important battle to hold down excessive costs in the retirement program by combating the idea of recomputation; and that was a fight we found we had to fight two or three times on the floor of this Chamber before we finally won it.

Then the next most important item from the point of view of the military services was to get the defense officer procurement bill out, known as DOPMA, and over to the Senate, which we did. We were planning last fall to take up the Defense retirement modernization program, either at the end of the year or at the beginning of this year. But the Joint Chiefs of Staff came to members of the committee and pointed out that, properly or not, the men and women in the armed services felt very strongly that their benefits were being eroded. If one picked up the Army Times or the Navy Times, they were always talking about how benefits were being eroded by Congress. It was that belief in erosion, even though untrue, that was leading to the interest in unionization among armed services personnel, so the chiefs told us.

So the Joint Chiefs of Staff came up to us and said, "Look, do not change the military retirement program this year. We have got enough problems with morale already. We want to try and stabilize the benefits for at least a year in order to avoid unionization, and in the future we will take a look at the retirement program and see if we can improve it."

That is the job that the gentleman from Alabama (Mr. NICHOLS) is now undertaking, as chairman of that subcommittee and that is the best way to handle this particular, complex problem.

Mr. BEARD of Tennessee. If I may ask, am I again correct in saying that the members of the military would still be paying into the social security system?

Mr. ASPIN. Mr. Chairman, will the gentleman yield?

Mr. BEARD of Tennessee. I yield to the gentleman from Wisconsin.

Mr. ASPIN. I thank the gentleman for yielding.

Yes, they would.

Mr. BEARD of Tennessee. Really, it would not be like the congressional system because we know the Social Security System is inadequate, so we do not pay into it.

Mr. ASPIN. It is similar to the congressional system in that under the congressional system one has the option—all Congressmen have the option—of whether they join the retirement system or not.

If we join the retirement system, 8 percent of our salary is deducted. But we also have the option as congressmen not to join the retirement program. That choice would under this amendment apply to the military. They could go just on social security if they wanted to, but if they wanted to join the retirement system they could join it.

Mr. BENNETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is the first time during this debate that I have come to the well. I do so because I feel very deeply about the particular thing that is before us today and the damage it might cause if we should happen to pass this amendment. It is true the retirement costs of the military are very great, but it is also true that the retirement costs of every other branch of the Government are very great.

Unlike other branches of the Government, the retirement costs in the military are taken out of the hide of the defense of our country. That is not true in agriculture. If a man retires from the Department of Agriculture, it is not taken out of the budget of the Department of Agriculture. In our case it is taken out of the national defense budget. That is unfair and it ought to be changed. I have had a bill before us for a long time to make that change.

What is early retirement for? It is in the military for several reasons, but one of the reasons is the danger involved to the individual who is to be retired. Another is to make the service attractive for able people, so they will enter the service, so they will have some chance for advancement. That is the reason for early retirement.

A statistic was given about how many people are so young when they retire, but many of those the gentleman talks about retiring, the ones he said are in their thirties, are disability retirees. How are we going to take care of those disability retirees? That is certainly an unfair thing to do when they have given out of their lives for the service, if we deny them retirement when disabled.

How about the FBI and the CIA and the Secret Service and the firefighters throughout the country? All these people get early retirement because of the specialties of their jobs, the dangers involved in their jobs, and so on.

But to me an overwhelming argument is this: our country is at a crossroads in national defense. We are going to be lucky if we do not have a war in the next 10 years because of the fact that we are cutting down on our national defense. We do not want to tell these couple of million young men and women who have had enough of a spirit of patriotism to be in our military forces that we care so little about them that we will approve this matter in the cavalier fashion in which it has been presented here on the floor. If we were to take seriously this amendment, it would be in my opinion the worst blow we could possibly strike at military morale. I know many of the votes will be expressions of concern over high retirement costs by those who do not expect the amendment to pass. But the military people do not know that.

It would be the sort of thing I have heard presented on the floor before by our fascinating and capable and charismatic Members of Congress who have made these beautiful stories and who get the great headlines in all the press. But at the bottom line for most of us who are simple, common American folk, we want our country to be protected and we are not trying to make the headlines and we want to see our country survive. All these wonderful and charismatic people

who get the headlines can make these speeches but somebody has to protect them. The soldiers have to protect the speechmakers.

If we pass this amendment we will strike one of the worst blows at the American military and the defense of our country since I have been in the Congress, so let us vote down the amendment.

Mr. BEDELL. Mr. Chairman, I move to strike the requisite number of words.

My first question is: Did I understand the chairman of the subcommittee correctly, the gentleman from New York, when he indicated that indeed there have not been hearings on this proposal and it has not been discussed in his subcommittee extensively because of other items that have had priority over this item? I understood the gentleman to say that.

Mr. STRATTON. Mr. Chairman, if the gentleman will yield, I was the former chairman of the subcommittee. We held a great many hearings on retirement and a great deal of testimony was taken before the Committee on Retirement because we were constantly dealing with the problem of recomputation.

I think I can say in all candor that in the case of my friend, the gentleman from Wisconsin, the figures he has used in supporting this attack on military retirement are the figures our committee and our staff originally worked up and used in combating those various attempts to get recomputation.

Mr. BEDELL. If I can recapture my time, I understand the gentleman's committee had hearings on this type of proposal and have considered it and rejected it.

Mr. STRATTON. Oh no, we have not had hearings on the Retirement Modernization Act. And we did not reject it.

We had hearings on the DOPMA bill, the military officer bill, but the Retirement Modernization Act was scheduled for hearings for this year.

Mr. BEDELL. Mr. Chairman, I yield the balance of my time to the gentleman from Wisconsin (Mr. ASPIN).

Mr. ASPIN. Mr. Chairman, let me just say that the gentleman from New York is correct. We have had hearings, but we have had hearings only on the recomputation figures and the figures did not come from that. The recomputation is an entirely different issue; but I commend the gentleman from New York for fighting recomputation and the former chairman of the committee, the gentleman from Louisiana, Mr. Hébert; they should be commended for their work. Otherwise, the problem we would be facing would be 10 times worse. The problem is still here. The problem now is, what are we going to do about it?

I should point out, because the gentleman from Florida (Mr. BENNETT) raised the question about the disability payments, specifically there is a clause in here that says it does not apply to disability. We are talking about nondisability retirements and the 28 percent were nondisabiilty retirements.

Mr. BENNETT. Mr. Chairman, if the gentleman will yield, what I said with regard to that had nothing to do with the content of the gentleman's amendment. It had to do with the statement that people were in their thirties and retiring and the reason they were retiring was most were still in their thirties.

Mr. ASPIN. No, no. The point is that 28 percent of all the people getting retirement was for nondisability retirement and were in their thirties. They are not disabled. They are retired and are not receiving disability payments.

Mr. BENNETT. My staff tells me the gentleman's statistics are correct.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, I am perplexed. I would like to direct a question through the gentleman to the gentleman from Alabama.

Has there been a commitment made to take on this subject soon in the Committee on Armed Services by the gentleman's subcommittee?

Mr. NICHOLS. Mr. Chairman, if the gentleman will yield, let me reply to the gentleman from Wisconsin. The gentleman may have missed what I said earlier. I want to assure the gentleman from Wisconsin on this side of the aisle and the gentleman from Wisconsin on the other side of the aisle that the subcommittee does plan to take up this matter and we propose to take it up this year. I will say to the gentleman from Wisconsin (Mr. ASPIN), and I assure the gentleman that the gentleman will get a chance to bring the bill before the subcommittee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. ASPIN).

The question was taken.

RECORDED VOTE

Mr. ASPIN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 148, noes 247, not voting 38, as follows:

[Roll No. 149]

	Milford	Zeferetti

The Clerk announced the following pairs:

On this vote:

Mr. Brademas for, with Mr. Zeferetti against.

Mr. Badillo for, with Ms. Boggs against.

Mr. Rangel for, with Mr. Edwards of California against.

Ms. Chisholm for, with Mr. Milford against.

Messrs. DERRICK, HANSEN, and RAILSBACK changed their vote from "aye" to "no."

Messrs. PRESSLER, KASTEN, VOLKMER, and GUDGER changed their vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. BENNETT. Mr. Chairman, I move to strike the last word.

AMENDMENT OFFERED BY MR. COHEN

Mr. COHEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COHEN: Page 28, after line 2, insert the following new section:

SEC. 810. (a) Notwithstanding any other provision of law, and except as provided in subsection (c), no action may be taken to effect or implement—

(1) the closure of any military installation;

(2) a reduction in the authorized level of civilian personnel at any military installation by more than one thousand or 50 per centum, whichever is smaller, in any twelve-month period; or

(3) any construction, conversion, or rehabilitation at any military facility other than a military installation referred to in paragraph (1) or (2) (regardless of whether such military facility is a military installation as defined in subsection (d)) which will or may be required as a result of any relocation of civilian personnel to such military facility by reason of any closure or reduction in force to which this section applies,

unless and until the provisions of subsection (b) are complied with.

(b) No action described in subsection (a) with respect to the closure of, or reduction in force at, a military installation may be taken—

(1) unless the Secretary of Defense or the Secretary of the military department concerned—

(A) notifies Congress in writing that such military installation is a candidate for such a closure or reduction in force;

(B) after complying with subparagraph (A), complies with all terms, conditions, and requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) with respect to the proposed closure or reduction in force; and

(C) after complying with subparagraph (B), notifies the Committees on Armed Services of the Senate and House of Representatives of the final decision to carry out the proposed closure or reduction in force and submits to such committees a detailed justification for such decision, including statements of the estimated fiscal, local economic, budgetary, environmental, strategic, and operational consequences of such closure or reduction in force; and

(2) until a period of sixty days has elapsed following the date on which the justification required by paragraph (1)(C) is received by such committees.

(c) This section shall not apply to the closure of a military installation or a reduction in force at a military installation if the President certifies to the Congress that such closure or reduction in force must be implemented for reasons of national security or a military emergency.

(d) For purposes of this section:

(1) The term "military installation" means any camp, post, station, base, yard, or other facility under the authority of the Department of Defense—

(A) which is located within any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, or Guam; and

(B) at which not less than five hundred civilian personnel are authorized to be employed.

(2) The term "civilian personnel" means direct-hire, permanent civilian employees of the Department of Defense.

(e) This section shall apply with respect to the closure of any military installation and any reduction in force at any military installation which is first publicly announced on or after January 1, 1976.

Page 28, line 3, strike out "810" and insert in lieu thereof "811".

Mr. BENNETT (during the reading). Mr. Chairman, this is the same amendment which Congress voted on favorably last year.

I ask unanimous consent, Mr. Chairman, that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. COHEN. Mr. Chairman, my amendment would establish permanent procedures for congressional oversight of major base realinements and closures proposed by the Pentagon.

As many of my colleagues may recall, last year the House adopted a similar amendment, which I coauthored with Speaker O'NEILL, to insure that the House and Senate Armed Services Committees were fully informed about base realinements which have a significant impact on our national security, the Federal budget, and local communities. Section 612 of Public Law 94-431, which required detailed studies to be submitted to the Armed Services Committees, will expire on October 1, 1977. I proposed to continue these requirements beyond the end of the fiscal year.

Patterned on section 612, my amendment applies to any Defense Department proposal to close a military installation at which 500 or more civilians are authorized to be employed or to reduce the authorized level of civilian personnel at a base by more than 1,000 persons, or 50 percent, whichever is smaller. The Department would be required to notify the Armed Services Committees that a military installation is a candidate for closure or realinement. If the Department were to decide to proceed with the reduction or closure, the Secretary would have to provide the committees with a detailed justification for such a decision at least 60 days prior to implementing the realinement. The reports submitted would have to include analyses of the strategic, economic, and environmental effects—including estimates of unemployment compensation benefits, manpower retraining and relocation expenses, and military construction and rehabilitation costs—resulting from the cutback.

Furthermore, until this analysis was completed, the Pentagon would be prohibited from undertaking new construction at another base to provide facilities for civilian personnel relocated from the base selected for closure or reduction.

In the event of a military emergency or for reasons of national security, the President could waive any of the provisions of this amendment.

The National Environmental Policy Act provides for environmental impact statements to assess the impact of base realinements on local communities. But these studies do not include any estimates of the actual cost to the taxpayer of closing or reducing a base. The comprehensive studies required by this amendment will enable the congressional committees to better evaluate the net cost of proposed realinements.

In the case of Fort Devens in Massachusetts, this type of cost analysis convinced the President to maintain the base at present strength. The Army estimated that $5.8 million would be saved by reducing Fort Devens to a semiactive status. But transferring the functions of the base to other installations would have cost $156.4 million. Clearly, deactivating Fort Devens was not in the best interest of the taxpayers. My amendment would extend this cost-effectiveness analysis to any major reduction or closure proposed by the Pentagon.

My own experience with the proposed reduction of Loring Air Force Base in my district in Maine further illustrates why this legislation is needed.

As I indicated earlier, the National Environmental Policy Act requires the Department of Defense to prepare environmental impact statements before carrying out any base closure or reduction. This report is crucial in assessing the impact a closure or reduction would have on affected communities, yet the Air Force's draft environmental impact statement on Loring was shamefully inaccurate and inadequate. Hearings held in November in Maine clearly demonstrated that the draft environmental impact statement was riddled with errors, distortions, and omissions. Only after considerable pressure from the Maine delegation and concerned citizens in Aroostook County did the Air Force finally agree to revise the report using the proper data base.

But even in the revised report, no esti-

mate is given of the total cost to the taxpayer of reducing the base. We still do not know what the net cost of deactivating Loring would be in terms of increased unemployment, defaults on Small Business Administration and other Government-sponsored loans, manpower relocation costs, and increased Government assistance to the area.

What we do know is that the reduction would cause unemployment in the area to skyrocket to 22 percent, that many businesses would fail, and that the economy of the entire region would be severely depressed. Because of the unquestioned severity of the impact, I believe that reducing the base would be more costly, in terms of increased Government assistance to the area, than maintaining Loring at present strength. But without the thorough cost-effectiveness analysis provided for in this amendment, we simply do not know.

If the reduction of Loring would result in significant savings and if Loring were no longer necessary for our national defense, the people of Maine would accept the realinement. We ask only for a full justification of the proposed reduction. This amendment would provide that by requiring the Air Force to justify its case before the appropriate House and Senate committees.

This issue transcends the question of the survival of one airbase in northern Maine. It involves the role of Congress in exercising needed oversight of proposed base realinements. For too often in the past, instead of saving the taxpayer's dollars, base realinements have actually cost significant sums. Without interfering with our defense posture, we can insure that proposed realinements are truly in our national interest and that we are making the best use of our limited tax dollars.

I hope that each of my colleagues will join me in supporting this amendment.

Mr. ERTEL. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Maine (Mr. COHEN) inasmuch as I also proposed a similar amendment that is printed in the RECORD.

Mr. EMERY. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment offered by the gentleman from Maine (Mr. COHEN).

Mr. Chairman, as a member of the Armed Services Committee, I rise in support of the amendment offered by my colleague from Maine (Mr. COHEN).

The Maine congressional delegation has seen, on several occasions in recent years, that the Pentagon often operates independently of congressional oversight, and often evades attempts of elected officials to force the military to justify its decisions—especially if those decisions have an adverse economic import on a State or on a given municipality. In short, the Pentagon often does what it likes, regardless of objectors of individual legislators or their constituents; or of valid questions they may raise.

The Cohen amendment would require the Pentagon to justify the facts and figures before Congress before implementing a decision to reduce civilian manpower at a base by 1,000 or more, or by 50 percent, whichever is smaller. I urge support of the amendment.

AMENDMENT OFFERED BY MR. LE FANTE TO THE AMENDMENT OFFERED BY MR. COHEN

Mr. LE FANTE. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. LE FANTE to the amendment offered by Mr. COHEN: Strike out paragraph (2) of subsection (a) of the proposed section 810 and insert in lieu thereof the following:

(2) a reduction in the authorized level of civilian personnel at any military installation—

(A) by more than one thousand or 50 per centum, whichever is smaller, in any twelve-month period; or

(B) by more than 250 in any twelve-month period, if the average rate of unemployment in the labor market area (as determined by the Secretary of Labor) in which the military installment is located is in excess of 8.5 per centum when measured over the three-year period ending with the date of the first public announcement of such reduction by the Department of Defense; or

Mr. BENNETT. Mr. Chairman, will the gentleman yield?

Mr. LE FANTE. I yield to the gentleman from Florida.

Mr. BENNETT. Mr. Chairman, with reference to the amendment just offered by the gentleman from New Jersey (Mr. LE FANTE) to the amendment offered by the gentleman from Maine (Mr. COHEN), let me state that the committee cannot agree to the amendment to the amendment at this point, because no study has been made of the amendment. However, we are having hearings in the subcommittee, in the Military Construction Subcommittee, and we invite the gentleman to appear before the committee as a witness to explain his proposal.

So, Mr. Chairman, I would urge the gentleman to withdraw his amendment at this point and bring the matter up at the subcommittee hearing.

I do not really wish to accept something that has not been thoroughly examined and studied by the committee.

Mr. LE FANTE. Mr. Chairman, I thank the gentleman from Florida. I will be happy to appear before the subcommittee on Wednesday morning.

Mr. Chairman, I ask unanimous consent to withdraw my amendment to the amendment.

Mr. CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine (Mr. COHEN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TREEN

Mr. TREEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TREEN: on page 28, after line 2, add the following new section:

No funds authorized or appropriated under this or any other act shall be expended to purchase advertising media of any sort for the purpose of advertising the existence of the special discharge review program for certain individuals who served in the armed forces of the United States between August 4, 1964 and March 28, 1973 which was established by order of the Secretary of Defense on April 5, 1977.

On line 3, redesignated section 810 as section 811.

Mr. TREEN. Mr. Chairman, I think I can dispose of this in about 2 minutes. I think the Members will like this amendment, because it is simple; it saves money; and it should spare the Members a lot of mail from outraged taxpayers.

As we all know, less than a month ago the President of the United States authorized a program of upgrading discharges—undesirable and other less-than-honorable discharges—for Vietnam veterans. This program even includes deserters under certain circumstances. It seems that the Army is disappointed that only about 15,000 out of more than 432,000 eligible persons have come forward. So the Army is suggesting an advertising program, not only a public-service-announcement type advertising program, but perhaps the purchase of media time on television and radio to tell these people that they should come in and get their discharges upgraded.

My amendment does not prohibit in any way public service announcements by television, radio, or newspaper. It does prevent the taxpayers' money from being spent on paid advertising for these programs. I think that if we were to spend taxpayers' money for this, it would be the ultimate outrage, and I would suggest to the Members that they would receive an awful lot of mail from their constituents.

Mr. Chairman, I hope the Members will support the amendment.

Mr. BENNETT. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from Florida.

Mr. BENNETT. I thank the gentleman for yielding.

We agree to the amendment on this side.

Mr. BOB WILSON. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from California.

Mr. BOB WILSON. I thank the gentleman for yielding.

We accept the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. TREEN).

The amendment was agreed to.

Mrs. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will be very brief.

I would like to ask the gentleman from Missouri, who is the author of section 809, a question about that.

Am I correct in understanding that the "complete and comprehensive study of the criteria used in determining whether commercial or industrial type functions at any Department of Defense installation should be performed by Department of Defense personnel or by private contractors," as required by section 809, is intended to include such matters as, first, any adverse impact of contracting-out on the civil service system and the employment of war veterans, and second, any adverse impact of con-

tracting-out on Government control over, and accountability for, certain essential missions related to national security?

Mr. ICHORD. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Missouri.

Mr. ICHORD. I thank the gentlewoman from Colorado for asking this question, because I believe there is need for further legislative history so that the Department of Defense will know how to administer section 809.

The answer to the question of the gentlewoman from Colorado is yes. I might also state that subsection (a) directs the Secretary of Defense to conduct a study of the criteria used to determine if Defense personnel or private contractors should, at Defense installations, perform "commercial or industrial type functions." Page 26, lines 18 and 19.

The contracts included here are all those which entail work classified as the performance of services at Department of Defense installations.

Examples: Such contracts include providing guards, building maintenance, equipment maintenance—motor pool garage, computers, aircraft support, et cetera, food preparation and serving, laundry, clerical services, operational analysis—efficiency studies, weapon system evaluations, et cetera, manning to conduct work at Defense installations—operating computers, test ranges, and equipment, et cetera. This list is exemplary and not all inclusive.

Subsections (a) and (b) only pertain to contracts for work at Department of Defense installations. Contracts unique to the private section, such as commercial metal refining, machine manufacturing, aircraft manufacturing, et cetera, are not included.

Subsection (b) contains the words "commercial or industrial activities"—page 27, lines 4 and 5. These words are synonymous and have the same meaning and effect as the words used in subsection (a), "commercial or industrial type functions"—page 26, lines 18 and 19.

Subsection (c) directs the Secretary of Defense to submit a report listing the percentages of funds available, on the date of enactment of this act, for performance of research, development, test, and evaluation—R.D.T. & E.—work at or by any Department of Defense research and development facility which is obligated for R.D.T. & E. contracts.

The contracts included here are all those entered between Department of Defense laboratories and private contractors for R.D.T. & E. work and funded from appropriations authorized in title II of this act.

Subsection (b) directs that there shall be "no further conversion of commercial or industrial activities to be performed by contractors—before March 15, 1978." Page 27, lines 4, 5, and 6.

The effect on Department of Defense contracting authority, for such contracts, is to prohibit the Department of Defense from entering contracts which convert work performed, on the date of enactment of this act, by defense personnel to private contractors. This prohibition expires on March 15, 1978. The word "conversion" here applies to work performed by defense personnel not to work presently performed by private contractors. Thus, the Defense Department can enter into contracts to continue work presently performed by private contractors and contracts for new work which do not eliminate jobs for defense personnel.

Subsection (c) directs that the percentage of funds available, on the date of enactment of this act, at Department of Defense laboratories which are obligated for R.D.T. & D. contracts shall not be increased "until the Congress determines that decreasing the percentage of such work performed by Department of Defense personnel is in the national interest or until March 15, 1978, whichever occurs first." Page 27, lines 12, 13, 14, and 15.

The prohibition on increasing the percentage of funds obligated for R.D.T. & E. contracts at Department of Defense laboratories expires on March 15, 1978.

Mrs. SCHROEDER. I thank the gentleman, and I yield back the remainder of my time.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

(By unanimous consent, Mr. STRATTON was allowed to proceed out of order.)

SOUTHERN FLANK OF NATO IN REAL TROUBLE

Mr. STRATTON. Mr. Chairman, I take this time because, although we have spent now 2 important days on the defense of our country, I think that there are some areas of activity in this House, outside the purview of the House Armed Service Committee that could actually mean that the money we are authorizing for weapons and personnel in this bill might not be used properly or prove worthless.

One of the things that bothers me very deeply is although much of the money in this bill has gone to NATO and for the defense of NATO, one of the very important parts of NATO, the southern flank of NATO is actually in real trouble today. Ever since the congressionally mandated arms embargo on Turkey in 1974, the military posture of Turkey, which has otherwise the largest army in NATO, second only to the United States, is in a complete shambles. They cannot even get spare parts for their helicopters.

The President the other day recommended that we extend to Turkey about $135 million in military aid in spite of the embargo. But that request is being held up, as I understand it, in the International Relations Committee, because some Members feel that nothing should be sent to Turkey until after the Cyprus matter has been settled.

At the present time the Russians are wooing the Turks, trying to lure them away from NATO. If the Russians should succeed in wooing Turkey away from NATO, look on this map at what would happen. Here is Turkey, down here at the juncture with the Soviet Union. Turkey controls the Bosporus. No ships can get out into the eastern Mediterranean in the event of hostilities if the Turks are on NATO's side. But if Turkey switches there is no longer a bar in the Bosporus and the Dardanelles. Turkey also stands in the way of a Soviet drive into the Middle East, including Israel; but if Turkey switches to the other side there will be no longer any bar to the Soviet movement into the Middle East.

Since we no longer have those early warning intelligence stations, we will not even know when the Soviets are getting ready to move.

Although this matter of military aid to Turkey is not within the purview of the Military Affairs Committee, unfortunately, in my judgment, this is something that concerns the defense of our Nation and I hope the leaders of this House will use every effort to get that aid request out of the International Relations Committee so this assistance can be made available to Turkey so we can get them back into NATO, and strengthen its sagging southern flank.

Certainly I am as concerned about what is happening in Cyprus as anybody else. But we have to have some priorities with our national security, and obviously keeping Turkey in NATO is and should be one of our top priorities. So I apologize for taking this time out of order but I do think, to paraphrase Clemenceau, that "The security of this Nation is too important to be left entirely to the International Relations Committee."

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Is the gentleman saying the Russian bear is about to become a Turkey gobbler?

Mr. STRATTON. I think the problem is serious enough, even though the gentleman is a great humorist, that it deserves to be taken seriously even by him.

Mr. CHARLES H. WILSON of California. Mr. Chairman, if the gentleman will yield, is it not true that Greece has withdrawn from NATO also and we have a very serious problem that involves both Greece and Turkey?

Very frankly I have been a little fed up with the European countries on whom we are spending money to try to protect them and then when something comes up they disagree with, they drop out of NATO. For years we have taken care of them.

Mr. STRATTON. There is no question that Greece is also involved. The only thing is, I think Turkey has a somewhat more strategic position with relation to the Soviet Union.

Mr. Clark Clifford, our former Secretary of Defense, made a trip in February to both Greece and Turkey as the President's representative on the whole dispute. I do not know whether he has met with the International Relations Committee since his return but he has not given anything to the rest of us up here and I think he should be asked to make a full report to the Congress on his findings and his recommendations so we can develop some adequate solution to this very complex problem.

AMENDMENT OFFERED BY GARY A. MYERS

Mr. GARY A. MYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARY A. MYERS: Page 28, after line 2, insert the following new section:

SEC. 810. (a) (1) Each civilian officer or employee of the Department of Defense and each member of the Armed Forces who performs a decision-making function in the handling of any contract, or any bid or proposal for any contract, for which funds are authorized to be appropriated under this Act shall provide for the record a written statement identifying any significant financial interest he has in the contractor or the person submitting the bid or proposal, as the case may be. Notwithstanding any other provision of law, if such officer, employee, or member has a significant financial interest in any such contractor, the statement required by this subsection shall be made available to the public.

(2) The Secretary of Defense shall take appropriate disciplinary action, in accordance with existing law and regulations, against any civilian officer or employee of the Department of Defense or any member of the Armed Forces who knowingly violates paragraph (1).

(b) (1) Not later than the end of the 90-day period beginning on the date of enactment of this Act, the Secretary of Defense shall issue regulations to implement this section. Such regulations shall define "significant financial interest" and "decisionmaking function" for purposes of this section.

(2) The Secretary of Defense shall submit a report to the Congress not later than June 1, 1978, and annually thereafter, concerning the administration and enforcement of this section during the preceding calendar year.

Page 28, line 3, strike out "810" and insert in lieu thereof "811".

Mr. GARY A. MYERS. Mr. Chairman: As you know I have offered similar "sunshine in Government" amendments to previous pieces of authorizing legislation to require public financial disclosure by Federal officials of their holdings in firms or organizations applying for Government contracts, grants or other financial assistance. The objective of all these amendments has been the same: To prevent favoritism by Federal employees and to open the processes of Government to the American public.

However, I have decided to withdraw my amendment to H.R. 5970, the military authorizations for 1978. I have made this decision primarily because the Post Office and Civil Service Committee's Employee Ethics and Utilization Subcommittee, under the able direction of Mrs. SCHROEDER, has already begun comprehensive hearings into the subject of "financial disclosure requirements for Federal employees"—hearings that will apply to the more than 1 million civilian employees of the Department of Defense.

Since the topic of appropriate financial disclosure is so important, and since many of the more than 2 million service men and women employed by the Department of Defense are involved in contracting or bidding activities, I would urge the Armed Services Committee to also consider reviewing financial disclosure requirements in the near future.

In light of the ongoing investigations in the area of financial disclosure of civilian employees and in hopes that similar hearings will be convened to cover military personnel, I am withdrawing my amendment at this time.

Mr. Chairman, I ask unanimous consent to withdraw the amendment I have offered.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Hughes: On page 28, after line 2, insert the following new section (and redesignate section 810 as 811):

SEC. 810. (a) No officer who is on a retired list of the Army, Navy, Marine Corps, or Air Force in the grade of colonel or captain (Navy), or above, and no former officer of the Army, Navy, Marine Corps, or Air Force who served in such grade at any time during the 12-month period preceding his separation from the armed forces may, during the 3-year period beginning on the date such officer is discharged or released from active duty, be employed by, or accept compensation for employment from, any person who is or has been a party to any contract for the provision of goods or services to the United States if such officer or former officer, while serving on active duty in the grade of colonel or captain (Navy), or higher, during the 3-year period ending with such discharge or release from active duty, participated personally and substantially, through decision, recommendation, investigation, or otherwise, in the awarding of such contract.

(b) No fulltime officer or employee of the Department of Defense who was at any time during the twelve months preceding the termination of his employment with the Department compensated under the Executive Schedule or compensated at or above the annual rate of basic pay for grade GS–16 of the General Schedule may, during the 3-year period beginning on the date of the termination of his employment with the Department, be employed by, or accept compensation from, any person who is or has been a party to any contract for the provision of goods or services to the United States if such officer or employee, while compensated under the Executive Schedule or compensated at or above the annual rate of basic pay for grade GS–16 of the General Schedule, during the 3-year period ending with the termination of his employment by the Department, participated personally and substantially, through decision, recommendation, investigation, or otherwise, in the awarding of such contract.

(c) Any person who violates subsection (a) or (b) shall be assessed a civil penalty of the amount of compensation received by such person in the course of, or as a result of, such violation.

(d) This section shall apply to any retired officer or former officer described in subsection (a) who is discharged or released from active duty after the end of the six-month period beginning with the date of enactment of this section, and to any former officer or employee described in subsection (b) who ceases to be employed by the Department of Defense after the end of the six-month period beginning with the date of enactment of this section.

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, the amendment I am offering is intended to deal with the long-standing problem of conflicts of interest in Government. The amendment is identical in purpose to the one I offered last year to the Defense Officer Personnel Management Act, and which was agreed to by a vote of 209 to 137.

In the last Congress, I also offered similar amendments affecting top level regulatory and purchasing officials at the Interior Department and ERDA, which were also agreed to by this body.

In essence, my amendment states that if a top-level officer or employee of the Defense Department is involved in granting a contract to a specific defense contractor, that officer or employee may not thereatfer go to work for that defense contractor for a period of 3 years following his separation from the Defense Department.

It is designed to deal with the free exchange of jobs between those who buy for the Pentagon, and those who sell to the Pentagon. This is one facet of what our esteemed former President, Dwight D. Eisenhower, called the "military-industrial complex."

Since we last agreed to this amendment, a number of events have occurred that serve once again to emphasize the need to put a wedge in the revolving door between the highest levels of Government and industry.

For one, Common Cause released a study indicating that between 1969 and 1973, 1,406 Defense Department officers and employees left the Department to take jobs with defense contractors. More significantly, 379 of those employees went to work for contractors that they dealt with while in office or that were under their official jurisdiction.

More recently, Senator PROXMIRE released information indicating that the number of high-level military officers transferring to defense industry jobs has skyrocketed in the past year, from 620 in 1975 to 1,044 in 1976, an increase of 68 percent. Large increases in the number of civilian employees going to private defense jobs were also noted.

Among those are a number of specific examples of officers and employees who were in charge of a major weapons program going to work for the same contractor who is supplying the weapons. This is a situation which must inevitably undermine the faith of the American people in the process through which defense contracts are awarded to private industry.

My amendment is carefully and narrowly drawn to deal with the specific problem without being unfair to those officers who, for entirely legitimate reasons, are moving into private industry.

It does not apply to all officers and employees: only to those serving in the rank of colonel or above, or captain or above in the case of a Navy officer. In the case of civilian employees, it would apply only to those compensated under

the executive schedule, or at a rate of GS–16 or higher.

It is not an across-the-board prohibition of all employment with defense contractors: only those which the former officer or employee was involved with while on active duty.

It is not a permanent disqualification: It would last for a period of only 3 years.

I urge my colleagues to support this amendment. It would go a long way toward restoring public confidence in the integrity of the defense contracting process and draw a clear, distinct line between the buyers and the sellers of Government goods and services.

Thank you.

Mr. BENNETT. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Florida.

Mr. BENNETT. Mr. Chairman, I would like to say we have given consideration to this amendment on this side. As we know, it was passed overwhelmingly in the House before. I am the author of legislation that has been introduced for years quite similar to this. We will do the very best we can to sustain it, in spite of possible opposition on the Senate side. We will do our very best to get it in the law at this time and we agree to it and accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The question was taken; and on a division (demanded by Mr. BAUMAN), there were—ayes 95, noes 7.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. QUAYLE

Mr. QUAYLE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. QUAYLE: Page 25, line 24, insert "(a)" after "Sec. 808".

Page 26, after line 15, insert the following new subsection:

(b)(1) The Secretary of Defense may not conduct any test or experiment involving the use of any chemical or biological agent on civilian populations unless local civilian officials in the area in which the test or experiment is to be conducted are notified in advance of such test or experiment, and such test or experiment may then be conducted only after the expiration of the 30-day period beginning on the date of such notification.

(2) Paragraph (1) shall apply to tests or experiments conducted by Department of Defense personnel and tests or experiments conducted on behalf of the Department of Defense by contractors.

Mr. QUAYLE. Mr. Chairman, I rise to offer an amendment to this authorization bill.

I believe that, in the matter of chemical and biological testing, residents of the test area should be given as much notice as the members of the Committees on Armed Services. I ask that local civilian authorities be given 30 days' advance warning of any tests or experiments, which will be conducted on civilian populations, whether by the Department of Defense or by private contractors for the Department.

The need for this provision in the defense authorization became clear to me earlier this year, when it was made public that the Department of Defense had conducted tests on the city of Fort Wayne, Ind., without the knowledge or consent of the residents of the city as to the true nature of the tests. In the period from 1964 to 1966, Fort Wayne had been subject to a series of atmospheric diffusion tests using zinc cadmium sulfide. Large weather balloons were floated to retrieve these particles as they were dropped through the air, thus measuring their rate of dispersal over the city. When citizens inquired as to the nature of these balloons and other testing equipment, they were led to believe that the tests were actually measuring air pollution. They were not informed that these tests were part of the Department's field testing of antipersonnel biological stimulants.

Presumably the tests had no ill effect on the residents of Fort Wayne and its environs, but I believe that this type of lack of openness and information does not serve to foster confidence and trust in the Nation's military. If the experiments were harmless, I doubt that anyone would have seriously objected to the use of Fort Wayne as testing grounds. I also believe that a frank discussion with city officials prior to the start of the tests, explaining the true purpose of the tests, would have done a great deal to allay the suspicions and fears which arose earlier this year when the information was finally released.

Since learning of these tests, I have attempted to find out from the Defense Department their current policy toward such testing of civilian populations. In a letter which arrived this week from the Assistant Secretary of the Army for Research and Development, I was told:

There are no tests currently being conducted in the chemical or biological program which involve the civilian population. All activities in the biological warfare program except for a small biological defense activity were terminated in 1969. Should any tests be required in the future, they would be planned, coordinated and conducted in accordance with the statutes governing public health and environment at that time.

I feel that this answer is vague and inconclusive. It leaves open the option which was exercised in 1964: large-scale experiments on civilian populations without fully explaining or even notifying the residents of these areas. Since the Secretary of Army will rely on legislation for policy, I see no alternative but to place this requirement of mandating prior notice to citizens being affected.

The 30-day notice stipulated in my amendment should not place a burden on the Defense Department. It correlates with the notice which the Department must give the House and Senate Armed Services Committees prior to such testing, and should not entail any substantial additional cost.

I urge the support of my colleagues in this amendment. We are dealing with the health and environment of the residents of our districts—and Fort Wayne was not alone in this testing; experiments took place in many sections of the country, including Hawaii, New York City, Florida, Alaska, and Washington, D.C. It is my belief that we should seek to guarantee our citizens some degree of protection from unannounced testing.

This amendment will simply restore the proper rights to those citizens who will be most directly affected by future testing.

Mr. BENNETT. Mr. Chairman, will the gentleman yield?

Mr. QUAYLE. I yield to the gentleman from Florida.

Mr. BENNETT. Mr. Chairman, the committee has studied this. As a matter of fact, the author of this amendment has been most considerate to the committee. The gentleman has talked with the committee and made some changes in what the gentleman originally proposed. As it is, on this side we are prepared to accept it.

Mr. TUCKER. Mr. Chairman, I move to strike the last word. I rise in support of the amendment.

Mr. Chairman, I congratulate the gentleman for offering this amendment. The committee in working with the gentleman can make it a workable amendment. Such tests were conducted previously in my district and in my State. I think the gentleman's approach is a worthwhile approach to the bill and I appreciate it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. QUAYLE).

The amendment was agreed to.

Mr. BINGHAM. Mr. Chairman, the annual authorization bill for the Department of Defense's weapons, research and manpower programs always presents me with a difficult decision. I am opposed to many of the funds these bills authorize because I consider them variously unnecessary, excessively expensive, or destabilizing in a strategic sense. During the Vietnam war era, my opposition to that tragic mistake in our foreign policy combined with these reasons for opposition and made voting against the entire bill a relatively easy choice to make. Since the war ended in 1974, however, the question of support or opposition to the entire bill has become more difficult. Clearly many of the programs and force levels authorized in this legislation are necessary for our Nation's defense. These funds will provide the conventional and strategic weapons the United States must have to deter our foes from attacking us or undertaking military adventures elsewhere in the world.

On the other hand, much of the almost $36 billion authorized in this bill will only add to Pentagon fat and will not build up our military muscle. Moreover, several of the programs it authorizes add nothing to U.S. security but only add impetus to the senseless arms race that leads us to spend billions on progressively more expensive weapons. DOD is constantly seeking authorization for new weapons which they assert are needed to fill "requirements" produced by speculation and dream lists rather than realistic estimates of our own needs and our potential enemies' capabilities. I commend the Carter administration for putting the ax to a number of these programs. For

example, Secretary Brown ended the patrol hydrofoil missile program which had spent $105 million and built only one boat that did not work.

There is a major need for caution and restraint in our arms development and purchasing policies. I recall that in 1971, after the crash of the second test flight of the Navy's F-14 aircraft, I began to warn the Congress that a more careful and scrutinizing approach was necessary before a decision was made to deploy the F-14 on a widespread basis. Despite this warning, the Congress followed the Pentagon's lead and rushed to appropriate large sums of money for the procurement of the F-14, but the aircraft's history has been marred by costly, yet avoidable setbacks. Whereas test flights determined that the F-14 operated well in the vertical mode, it was found to be less maneuverable in the horizontal mode than the old F-4. The engine itself is inadequate for the airframe of the plane and has forced the development of the new "B" engine to provide needed extra power. The combat readiness of the plane is poor as it constantly is in need of spare parts and repair.

These shortcomings could have been predicted from the early test flights as I warned, yet due to fears that the program would be canceled, or severely cut back, the Navy was eager to rush the plane into production. The bill before us today will approve $26 million, with many millions more to follow, to develop the "B" engine in order to correct mistakes that could and should have been avoided. While we probably have to spend these funds to improve the F-14, there are numerous weapons in this bill which should not be funded.

Foremost among these is the $1.1 billion authorized in this bill for the purchase of five B-1 bombers. The B-1 is the most expensive and one of the most unnecessary weapons programs this Nation has ever undertaken, and the President is still reviewing its ultimate fate. I hope that this is the last time provision for B-1 bombers will be seen in an authorization bill, and that the President, after completion of his review, will stand by his campaign statements and bring this unfortunate and unnecessary program to an end. Both the House and the Senate have come very close in the past to sounding the death knell for the B-1, only to be frustrated by intensive lobbying by the administration. If the President decides to end the B-1, I trust the Congress will back him up.

There are other wasteful programs in this bill. The $44.8 million increase for civil defense preparations is ridiculous, the result of drum beating by the Pentagon which has been ballyhooing the Russian civil defense program for months now. The idea that there is any effective way of protecting our country or theirs from complete destruction in the event of nuclear war is preposterous, and these funds are totally unnecessary. The military pension system needs drastic overhaul, but this bill leaves it untouched and authorizes $9.1 billion to pay military retirees lavish benefits. The Aspin amendment, which I support, would cut back the level of benefits to a still generous but more reasonable level. This bill also adds some $793 million to the amounts requested by the administration for the purchase of unnecessary fighter airplanes and submarines which were not included in the Pentagon's requests.

The list of wasteful items authorized in this bill could go on and on, but I think these few are sufficient to make my point. This is a bloated bill. The funds it misplaces into weapons and research are desperately needed in so many other areas here at home rebuilding our cities, providing needed services, and shoring up an economy which has 7 million people out of work.

Equally worrisome are the strategic programs in this bill which could make the task of negotiating limitations on strategic arms much more complicated if not totally impossible. The Department of Defense is fascinated by an alluring new weapon, the cruise missile, and the Armed Services Committee seems to have picked up the same infection. It is an attractive weapon on the surface—cheap, unmanned, versatile, and lethal. But the $325 million authorized for continued development of the cruise missile will bring us very close to full scale production of a weapon which could well be impossible to regulate under any SALT agreement. Because of its size and versatility, it is extremely unlikely that verifiable range or other limitations on the cruise missile, which would make possible a distinction between cruise missiles designed as tactical or strategic weapons, could ever be agreed to in SALT negotiations. Since cruise missiles can be launched from land, sea and air, and since the observable differences between strategic versus tactical or nuclear versus conventional cruise missiles are negligible, the Soviet SALT planners might not ever be sure that any negotiated limits on cruise missiles are being respected. Yet these fears seem to be almost totally discounted by Pentagon planners, and this bill will push the cruise missile program extremely close to the point where we will have created a weapon system that cannot be mutually controlled possibly dooming any chance of an end to the strategic arms race.

This bill also authorizes funds for an even more immediate threat to strategic arms limitations. I am referring to the modernization of the Minuteman III ICBM, the backbone of our land-based missile force. This bill authorizes the installation of the new MK-12A warhead and refinements in the NS-20 guidance system on our 550 Minuteman III missiles. These improvements will give our missiles far greater accuracy and yield per warhead, resulting in a 600 percent increase in their hard target kill capability. It is this capability which is at the heart of the so-called counterforce strategy which would allow an attack on the enemy's strategic forces. We claim to have no interest in a counterforce or first strike capability, yet these improvements will give us a 5-year lead over the Russians in our hard target kill capability.

It is deeply troubling to me that on the one hand, our arms control negotiators are making proposals to ban any improvements in existing missile systems, while on the other hand DOD is going full speed ahead in making such improvements. DOD seems to believe that the way to get the Russians to accept such a limit on qualitative improvements is to scare them into it. I am afraid the huge advantage these new warheads and guidance systems will give us will not encourage negotiation but will instead increase competition. It might be advisable to suspend the installation of these new systems for a limited period of time to give our SALT negotiators time to pursue an agreement to limit these improvements, and I will be working with the administration to explore this possibility in the coming months.

At least it is clear that nothing in this bill will preclude President Carter from pursuing the SALT negotiations and more particularly the proposals he has made. The manager of the bill, the gentleman from Florida (Mr. BENNETT), was good enough to confirm this point in a colloquy with me earlier in the proceedings.

That being the case, I return to the question with which I began, Should I cast my vote for or against this bill on final passage?

The argument for a negative vote is that it is the only way to express my unhappiness with many of the items included in this authorization; that it amounts in effect to a protest vote which does no harm because the bill is sure to pass anyway.

On the other hand, the customary procedure in this House is to support a measure if it is a fundamentally necessary one, even though amendments which a Member has favored are not adopted.

On balance, I am inclined at this point to change my position of recent years and to vote in favor of this authorization bill. I do so in large part as an indication of my fundamental support of the Carter administration, and particularly of the President's efforts to bring the arms race under control. In addition, there is the consideration that a high proportion of the funding authorized by this bill—perhaps as high as 90 percent—are in my judgment needed for our national security.

Mr. BEDELL. Mr. Chairman, I would like to make a brief comment on the B-1 bomber. I do not want the press and the public to get the idea that debate over the B-1 is dead simply because we have not said anything about it today and yet we are authorizing $1.1 billion for it in this bill.

I realize that President Carter is cur-

rently reviewing the program and that $1.1 billion is what is required to keep the program alive pending his review. I agree that we should let the President go ahead with his review before we do anything.

But at the end of this month or early May when the President gets his report from the National Security Council on the B–1, I feel there will have to be some entirely new and overwhelming evidence in favor of the B–1 or we should expect the President to live by his campaign promises to stop it. On June 12 last year, as a candidate, Mr. Carter said:

> The B–1 bomber is an example of a proposed system which should not be funded and would be wasteful of the taxpayers' dollars.

The B–1 would be the most expensive weapons system of all time with a fleet of 244 planes estimated to cost $22 billion. This does not even include the cost overruns which inevitably come with these programs. I personally feel this is a sheer waste and I want the people to know that this Congress is going to monitor the B–1's future very carefully. Today's authorization should not be seen as a go-ahead signal for this program.

Mr. LAGOMARSINO. Mr. Chairman, I would like to speak to a particular provision of H.R. 5970 which addresses the issue of "contracting out' various functions at military installations to the private sector. This has become an increasingly common trend among base commanders, apparently, at least in part, in an attempt to circumvent congressional mandated manpower ceilings, which incidentally are often too low to permit the commander from carrying out his assigned mission.

Section 801, title VIII of this bill accordingly requires the Department of Defense to report to Congress by the end of this year on the criteria used to decide whether private contractors or DOD personnel should conduct commercial and industrial functions at DOD installations, and on the portion of DOD funds at each facility going to private industry for research and development activities. Title VIII also places a moratorium on converting any commercial or industrial activities to private contract before March 15, 1978, and prohibiting DOD from increasing the percentage of funds spent from private industry R. & D. until the same date, unless Congress determines that a change would be in the national interest.

Mr. Chairman, I think this is an entirely appropriate step. People employed at military installations throughout our Nation are rightly concerned at being made sacrificial lambs on what may well be the altar of false economy. If a particular function is deemed to be essential then it should be performed by the personnel trained to do it, not hidden by contracts with the private sector, at least until there has been a much more thorough review. I do not think this is what President Carter has in mind with the adoption of zero base budgeting and I do not think it is what this Congress had in mind in setting DOD manpower ceilings.

The language in this bill will give us a chance to look at what is happening at the field level and make appropriate adjustments where they are indicated. Perhaps just as importantly, it will avoid morale problems and the unnecessary breakup of efficient teams at DOD installations now performing these functions.

Mr. WEISS. Mr. Chairman, I am voting against H.R. 5970, Department of Defense authorization for fiscal year 1978, because it authorizes an excessive amount of expenditures for military programs.

I believe we can meet our military and defense needs within a budget that is more restrictive than the budget authorized under this bill.

The House Armed Services Committee says in their report accompanying this bill (page 56 of H. Rept. 95–194):

> The Department must do a better job in "selecting out" weapons that are too expensive for the performance they provide, must avoid unnecessary duplication of effort, must place better emphasis on product improvement, must provide for better, *not* more test and evaluation, must provide more meaningful management review processes. . . .

Unfortunately, this bill does not heed that excellent advice and instead authorizes excessive expenditures and increments in our military programs.

H.R. 5970 adopts a policy of accelerating our "combat readiness." This fact becomes apparent when we realize that H.R. 5970 authorizes $3 billion more than the amount authorized last year—$2.79 billion of which is for new weapons procurement—and nearly $61 million more than the Department of Defense itself had requested.

This bill, if passed, would accept excessive wasteful increments in our military programs in the following manner: A large increase in our military force by a total of 16,000; continuation of an Active troop level of over 2 million individuals; the procurement of new military hardware in the nature of a $790 million increase over DOD's own procurement budget request; an increase in the budget for the Civil Defense Preparedness Agency of $44.8 million; and sustainment of our involvement in the wasteful and unnecessary B–1 bomber research and development program.

Over $1 billion is being authorized for that B–1 bomber program. The B–1 bomber duplicates the work of already existing weapons systems and has been adjudged both uneconomical and hazardous to the environment.

I cannot accept this excessive budget in the name of "combat readiness" or anything else.

It is for these reasons that I favor the solution offered by the transfer amendment, which we will consider later this week. This amendment, which I cosponsored with the distinguished gentleman from Maryland (Mr. MITCHELL) would amend the overall 1978 budget by permitting approximately $15 billion to be transferred from the military budget into badly needed domestic programs. This course of action, which in my judgment is much preferable to the course offered by H.R. 5970, would make efficiency cuts in the military budget and discard wasteful weapons procurement programs. It maintains our present high military preparedness capability while making funds available for much needed programs.

We have developed a first-strike and second-strike capability until we can destroy the Soviet Union and the whole human race three times over. With this fact in mind, I cannot in good conscience accept a budget that would redundantly augment that devastating ability by excessive increases in the defense budget.

I strongly urge my colleagues to oppose the passage of H.R. 5970.

Mr. Chairman, I feel compelled to make special note of the B–1 bomber and my opposition to its continued funding, the serious waste of public funds which it has involved and the irresponsible Government policy which has permitted its development to this point.

First, a strong indictment of the B–1 bomber program can be found in an examination of the costs which the program has extracted from America's financial resources: $4.372 billion over the last 6 years and an additional $1.4 billion more if we add the cost of its predecessor the B–70—which never materialized as a viable defense aircraft either. Even more frightening than these already expended funds, is the anticipated skyrocketing costs that will be incurred if B–1 bombers are manufactured on a mass scale: Over $16 billion by 1985. And now we are talking about $1.2 billion for five aircraft which have already experienced a great deal of depreciation in their value monetarily and strategically.

Second, the B–1 bomber program can be condemned on defense and strategic grounds. According to a Congressional Reference Service report the United States already possesses 6,842 ballistic missile-launched reentry vehicles versus 2,415 possessed by the Soviet Union. In addition the pending deployment of the Trident submarine will nearly double our SLBM—submarine launched ballistic missile—capability. In short, we already possess the defense capability that the B–1 bomber is supposed to provide—the capability to deliver a nuclear warhead before the Russians do. The B–1 bomber only duplicates that ability.

And the price for the B–1 bomber also includes the fact that it is a manned defense vehicle; while our chorus of ballistic unmanned missiles lines the hinterlands of this country. I cannot see any gain that can be won by manufacturing manned vehicles to deliver deadly warheads that already can be delivered automatically.

Third, let us not overlook the opportunity costs. Let us not overlook the many other things that we forego by

insisting on clinging to the B–1 through its dismal conclusion; the other ways we could be investing our money and employing the energies of our people. As a new Member of Congress I have had a particularly vivid view of this grim fact. As a member of the Subcommittee on Employment Opportunities of the Education and Labor Committee, I have seen how the youth employment program cannot over the next few years be developed to its full effectiveness, because of a lack of necessary funding—only 10 to 12 percent of targeted youth will be able to participate in that program. Other domestic programs suffer similar curtailment, because of overexpenditures in the defense area.

The Federal Government, including Congress, must learn to be less obsessed with programs like the B–1 bomber—programs which never seem to take off the ground while extracting terrible financial costs to us all without reaping any constructive returns. Our experience with the inept B–70 should have been heeded as early warning against this kind of waste.

Mr. Chairman, I am hopeful that the President will shortly announce that he is asking Congress to join him in terminating the B–1 program a senseless project which should be ended as soon as possible.

The CHAIRMAN. Are there any further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. FOLEY) having assumed the chair, Mr. ROSTENKOWSKI, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5970) to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes, pursuant to House Resolution 492, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment adopted by the Committee of the Whole?

Mr. ASHBROOK. Mr. Speaker, I demand a separate vote on the so-called Treen amendment.

The SPEAKER pro tempore. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: On page 28, after line 2, add the following new section:

"SEC. 811. No funds authorized or appropriated under this or any other act shall be expended to purchase advertising media of any sort for the purpose of advertising the existence of the special discharge review program for certain individuals who served in the armed forces of the United States between August 4, 1964 and March 28, 1973 which was established by order of the Secretary of Defense on April 5, 1977."

On line 3 redesignate section 811 as section 812.

The SPEAKER pro tempore. The question is on the amendment.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 291, nays 96, answered "present" 1, not voting 45, as follows:

[Roll No. 150]

	Myers, Michael	

The Clerk announced the following pairs:

Mr. Brademas with Mr. Crane.
Mr. Zeferetti with Mr. Findley.
Ms. Boggs with Mr. Pritchard.

Mr. Edwards of California with Mr. Madigan.
Mr. Milford with Mr. Forsythe.
Mr. Badillo with Mr. Hawkins.
Mr. Rangel with Ms. Collins of Illinois.
Ms. Chisholm with Mr. Fowler.
Mr. Anderson of California with Mr. Evans of Delaware.
Mr. Corman with Mr. Marriott.
Mr. Florio with Mr. Ashley.
Mr. Yatron with Mr. Frenzel.
Mr. Teague with Mr. Rose.
Mr. Price with Mr. Hagedorn.
Mr. Patten with Mr. Duncan of Oregon.
Mr. Roe with Mr. Eckhardt.
Mr. Shipley with Mr. Michael O. Myers.
Mr. Mann with Mr. Hyde.
Mr. Holland with Mr. Ryan.
Mr. Long of Louisiana with Mr. Goodling.
Mr. Thompson with Mr. McCormack.
Mr. Wright with Mr. Murphy of Illinois.

Mr. ROGERS changed his vote from "nay" to "yea," and Mr. WALGREN changed his vote from "yea" to "nay."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BENNETT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 347, nays 43, not voting 43, as follows:

[Roll No. 151]

McCormack	Pepper	Shipley
Madigan	Price	Teague
Mann	Pritchard	Wright
Milford	Rangel	Yatron
Murphy, Ill.	Roe	Zeferetti
Myers, Ind.	Rosenthal	

The Clerk announced the following pairs:

On this vote:

Mr. Corman for, with Ms. Chisholm against.
Mr. Teague for, with Mr. Badillo against.
Mr. Zeferetti for, with Mr. Rangel against.
Mr. Mann for, with Mr. Rosenthal against.
Mr. Brademas for, with Mr. Edwards of California against.

Until further notice:

Mr. Holland with Mr. Eckhardt.
Mrs. Boggs with Mr. Pepper.
Mr Price with Mr. Shipley.
Mr Patten with Mr. Wright.
Mr Dent with Mr. Hyde.
Mr Evans of Delaware with Mr. Milford.
Mr. Ryan with Mr. Heftel.
Mr. Yatron with Mr. Forsythe.
Mr. Pritchard with Mrs. Collins of Illinois.
Mr. Roe with Mr. Madigan.
Mr. Florio with Mr. Frenzel.
Mr. Goodling with Mr. Crane.
Mr. John T. Myers with Mr. Hawkins.
Mr. McCormack with Mr. Long of Louisiana.
Mr. Duncan of Oregon with Mr. Findley.
Mr. Murphy of Illinois with Mr. Anderson of California.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

THE HONORABLE MELVIN PRICE

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENNETT. Mr. Speaker, I have two technical matters to raise, but I want to take just a second or two before that. I want to say that it has been a great pleasure to handle the bill on the floor today. I am saying this primarily because I want to pay tribute to the man I served under before, the chairman of the Committee on Armed Services, the gentleman from Illinois (Mr. PRICE), who is in the hospital. The gentleman will be operated on later this week. The operation is not a major operation, but all of us pray that the gentleman gets well real quick and fully.

In my opinion, the gentleman from Illinois (Mr. PRICE) is certainly one of the best loved men this Congress has ever had. I would be hard put to find one more loved in the 30 years I have been here. I would say also the gentleman is one of the most able men that has been in the Congress, so it is a difficult thing to follow a man of such magnitude. We all wish the gentleman well and hope the gentleman gets well quickly.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. BENNETT. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I want

to join with the gentleman from Florida in wishing our distinguished chairman, the gentleman from Illinois (Mr. PRICE) well in the ordeal that the gentleman faces.

I also would like to commend the gentleman from Florida for the outstanding job the gentleman has done with great patience and great ability in the past 2 or 3 days as we have handled this bill.

Mr. BENNETT. Without the gentleman from New York (Mr. STRATTON) it could not have been done.

Mr. STRATTON. Mr. Speaker, I know the gentleman stepped into the breach at the last minute and succeeded in getting this bill through, I think, with the biggest majority we have had in the last 4 or 5 years.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. BENNETT. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, I think the gentleman has done an outstanding job. Of course, the gentleman from Illinois (Mr. PRICE) is one of the best loved men in the House. If I were to pick somebody equally well loved, it is the gentleman who managed this bill today. I did not vote for the bill because of my personal affection for either the chairman or the gentleman from Florida, but it does seem to me that not only has a very careful, professional job been done on this, probably the best in recent years, but that the advice of the administration has been largely followed. They have tried to come in with what is a reasonable effort. I think they deserve some support. For that reason, I probably have raised a few eyebrows by voting "aye."

Mr. BOB WILSON. Mr. Speaker, will the gentleman yield?

Mr. BENNETT. I yield to the gentleman from California.

Mr. BOB WILSON. Mr. Speaker, I had the privilege a few moments ago of speaking to our chairman, the gentleman from Illinois (Mr. PRICE) in the hospital, and informed the gentleman that the gentleman from Florida (Mr. BENNETT) had done a magnificent job of shepherding this bill through the Congress. The gentleman from Illinois was very happy about it. The gentleman seemed in good spirits. The gentleman is going to be out for a couple weeks, but all of us, I know, wish the gentleman well.

Mr. Speaker, I want to extend my congratulations to the gentleman from Florida (Mr. BENNETT) for the excellent way the gentleman has handled this bill. It went through without any problem. It has been a pleasure to work with the gentleman from Florida.

PERSONAL EXPLANATION

Mr. SCHEUER. Mr. Speaker, on rollcall 150, on the so-called Treen amendment just preceding final passage of H.R. 5970, I made an error and voted aye.

I meant to vote no. I am sorry that I did not vote no, and I deeply regret, on an issue of such deep moral significance, that I made a mistake and voted in a way contrary to my intention.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN PUNCTUATION, SECTION NUMBERS, AND CROSS REFERENCES IN ENGROSSMENT OF H.R. 5970

Mr. BENNETT. Mr. Speaker, I ask unanimous consent that the Clerk may be authorized to make corrections in punctuation, section numbers, and cross references in the engrossment of the bill H.R. 5970.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

GENERAL LEAVE

Mr. BENNETT. Mr. Speaker, I ask unanaimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill H.R. 5970.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

H.R. 5970

(Mr. BOB WILSON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BOB WILSON. Mr. Speaker, I rise again in support of H.R. 5970, the fiscal 1978 authorization bill which covers every major element of our defense.

This bill is, of course, of great importance for the specific authorizations that it recommends to the House. But its implications go far beyond the procurement, the research and development, and the other highly varied authorities that it would grant. The bill in addition to all this has the further function of setting the tone and establishing the policies that will guide our defense both in the short and the long term. In this way it goes well beyond the provision of these authorities in that it informs the Members of this House as to where we are today with respect to our defense, and also where we intend to go for the future.

The committee started its hearings on this bill months ago and has examined every request made by the executive branch in the most detailed fashion. Here and there the committee found itself in disagreement with the Pentagon, but any changes that were made in the budget requests were made only after the closest study and after full and free discussion in the committee.

It has always been the view of the Armed Services Committee that, as the representative committee for this House in defense matters, it is responsible for direct participation in the determination of our defense policy. It does not merely accept what is proposed to it but makes its own determinations based upon testimony presented to it by the civilian and military leaders of the Department of Defense. This has been our view and practice over the years, and this year is no different. The committee, under its charter, has a duty to recommend to the House what it believes to be necessary to maintain this country's defense at a level of strength and capability that will at the one time protect our people and prevent any major breech of the peace of the world.

This is not a partisan bill and it does not come from a partisan committee. There are, of course, disagreements within the committee from time to time, and I, for one, would have it no other way. But we do work out our differences, and this year, again, we have brought to the floor a bill that represents the best thinking of all of us, a bill that warrants the full support of all Members. We are your agents and I think we have performed well for you.

This bill covers thousands of individual items, all of them important. Some of them are quite small from a money standpoint but nonetheless are essential from the standpoint of insuring a high scientific and technological level for programs that will develop in the future. I am pleased that this body has accepted the bill in almost the identical form in which we presented it.

Members of the House are familiar with many of the programs involved in this bill either because of the high cost involved or the obvious importance of the particular system. We all are familiar, for example, with the B–1, the cruise missile, the Trident ballistic missile submarine, and recently we have heard and read a great deal about an aircraft that will be entering our inventory in the near future, the F–16.

The news has all been good about the F–16, and I think it warrants some brief remarks in order that there may be an even greater understanding of what an advance this small fighter aircraft represents.

From the standpoint of cost it represents a reversal of our recent experience with new weapons systems, and from the standpoint of performance it has opened up a new vista of capability. It is difficult to believe that an aircraft the size of the F–16 can demonstrate such speed, persistence in combat, weight-carrying capability, and range. This is our first experience with an aircraft of this kind. It is axiomatic that aircraft are bought by the pound, the fewer the pounds, the lower the cost. All of the experience over the years in fighter aircraft has proved this formula to be mathematical in its certainty. And the development of the F–16 has, I think, established a principle that should be our guide for the future: Tell our high technology private industry what it is we need in an aircraft, establish a price for the aircraft beyond which the Government is unwilling to go, and then leave it up to the genius of our manufacturers to come up with what is needed. The F–16 is an admirable example of this principle.

In Vietnam we learned—the hard way—that our big fighter aircraft simply were not the equal of the very much

smaller and very much more agile Soviet fighters. And it was the experienced fighter pilots themselves who asked for a small, persistent, and highly agile aircraft that would permit them to take on this kind of fighting job and be sure that they could out-turn, out-run, and outmaneuver the aircraft it faced in battle. The F-16 is the answer that those fighter pilots were looking for. It does everything that they said that they needed to do, and has exceeded even their hopes and expectations.

We did what we set out to do. We have developed a high-performance aircraft that proves what the industry of this country is capable of when given a problem and then left alone to provide the answer. The F-16 is, without question, the finest small inexpensive fighter aircraft in the world today. The testing so far proves all of this conclusively.

And however you figure it: The cost of development, the program or flyaway cost, or costs to operate, the F-16 comes out lowest in every category.

Mr. Speaker, H.R. 5970 is sound, well studied, and responsible defense legislation. I urge the support of all Members.

WAIVING ALL POINTS OF ORDER AGAINST AMENDMENT REVISING CONGRESSIONAL BUDGET FOR FISCAL YEAR 1977 IF OFFERED TO HOUSE CONCURRENT RESOLUTION 195.

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 95-220) on the resolution (H. Res. 515) waiving all points of order against an amendment revising the congressional budget for the U.S. Government for the fiscal year 1977 if offered to House Concurrent Resolution 195, which was referred to the House Calendar and ordered printed.

CONFERENCE REPORT ON H.R. 3843, SUPPLEMENTAL HOUSING AUTHORIZATION ACT OF 1977

Mr. REUSS submitted the following conference report and statement on the bill (H.R. 3843) to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 95-221)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3843) to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Supplemental Housing Authorization Act of 1977".

TITLE I—SUPPLEMENTAL AUTHORIZATIONS AND EXTENSIONS OF HUD PROGRAMS

AMENDMENTS TO THE UNITED STATES HOUSING ACT OF 1937

SEC. 101. (a) The first sentence of section 5(c) of the United States Housing Act of 1937 is amended by striking out "and by $850,000,000 on October 1, 1976" and inserting in lieu thereof "and by $1,228,050,000 on October 1, 1976".

(b) Section 9(c) of such Act is amended by striking out "and not to exceed $576,000,000 on or after October 1, 1976" and inserting in lieu thereof "and not to exceed $595,600,000 on or after October 1, 1976".

(c) Section 8(e)(1) of such Act is amended—

(1) by striking out "two hundred and forty months" in the first sentence and inserting in lieu thereof "three hundred and sixty months, except that such term may not exceed two hundred and forty months in the case of a project financed with assistance of a loan made by, or insured, guaranteed or intended for purchase by, the Federal Government, other than pursuant to section 244 of the National Housing Act"; and

(2) by striking out "In the case of" in the second sentence and inserting "Notwithstanding the preceding sentence, in the case of".

GENERAL INSURANCE FUND

SEC. 102. Section 519(f) of the National Housing Act is amended by striking out "$500,000,000" and inserting in lieu thereof "$1,341,000,000".

URBAN HOMESTEADING DEMONSTRATION

SEC. 103. Section 810(g) of the Housing and Community Development Act of 1974 is amended by striking out "not to exceed $5,000,000 for fiscal year 1977" and inserting in lieu thereof "not to exceed $15,000,000 for fiscal year 1977".

EXTENSION OF HUD INSURANCE AUTHORITIES

SEC. 104. (a) Section 1201 of the National Housing Act is amended—

(1) by striking out, in subsection (b)(1), "April 30, 1977" and inserting in lieu thereof "September 30, 1978";

(2) by striking out, in subsection (b)(1)(A), "April 30, 1978" and inserting in lieu thereof "September 30, 1981"; and

(3) by striking out in subsection (b)(2), "April 30, 1978" and inserting in lieu thereof "September 30, 1978".

(b) Section 122(d) of such Act is amended by inserting immediately before the period at the end thereof a comma and the following: "except that such term shall expire on September 30, beginning in either calendar year 1977 or 1978, as determined by the Secretary".

MISCELLANEOUS PROVISIONS RELATING TO MORTGAGE INSURANCE PROGRAMS

SEC. 105. (a) The first sentence of section 101(c) of title I of the Housing Act of 1949 is amended—

(1) by striking out "and no mortgage shall be insured, and no commitment to insure a mortgage shall be issued, under section 220 of the National Housing Act, as amended," and

(2) by striking out the first proviso.

(b) Section 220(d)(1)(A)(ii) of the National Housing Act is amended by striking out "in a community respecting which the Secretary of Housing and Urban Development has made the determination provided for by section 101(c) of the Housing Act of 1949, as amended".

CONSTRUCTION OF MODERATE INCOME HOUSING

SEC. 106. The first sentence of section 221(d)(4) of the National Housing Act is amended by striking out "other than a mortgagor referred to in subsection (d)(3) of this section,".

TITLE II—NATIONAL COMMISSION ON NEIGHBORHOODS

SHORT TITLE

SEC. 201. This title may be cited as the "National Neighborhood Policy Act".

FINDINGS AND PURPOSE

SEC. 202. (a) The Congress finds and declares that existing city neighborhoods are a national resource to be conserved and revitalized wherever possible, and that public policy should promote that objective.

(b) The Congress further finds that the tendency of public policy incentives to ignore the need to preserve the built environment can no longer be defended, either economically or socially, and must be replaced with explicit policy incentives encouraging conservation of existing neighborhoods. That objective will require a comprehensive review of existing laws, policies, and programs which affect neighborhoods, to assess their impact on neighborhoods, and to recommend modifications where necessary.

ESTABLISHMENT OF COMMISSION

SEC. 203. (a) There is hereby established a commission to be known as the National Commission on Neighborhoods (hereinafter referred to as the "Commission").

(b) The Commission shall be composed of twenty members, to be appointed as follows:

(1) two Members of the Senate appointed by the President of the Senate;

(2) two Members of the House of Representatives appointed by the Speaker of the House of Representatives; and

(3) sixteen public members appointed by the President of the United States from among persons specially qualified by experience and training to perform the duties of the Commission, at least five of whom shall be elected officers of recognized neighborhood organizations engaged in development and revitalization programs, and at least five of whom shall be elected or appointed officials of local governments involved in preservation programs. The remaining members shall be drawn from outstanding individuals with demonstrated experience in neighborhood revitalization activities, from such fields as finance, business, philanthropic, civic, and educational organizations.

The individuals appointed by the President of the United States shall be selected so as to provide representation to a broad cross section of racial, ethnic, and geographic groups. The two members appointed pursuant to clause (1) may not be members of the same political party, nor may the two members appointed pursuant to clause (2) be members of the same political party. Not more than eight of the members appointed pursuant to clause (3) may be members of the same political party.

(c) The Chairman shall be appointed by the President, by and with the advice and consent of the Senate, from among the public members.

(d) The executive director shall be appointed by the President, by and with the advice and consent of the Senate, from among individuals recommended by the Commission.

DUTIES

SEC. 204. (a) The Commission shall undertake a comprehensive study and investigation of the factors contributing to the decline of city neighborhoods and of the factors necessary to neighborhood survival and revitalization. Such study and investigation shall include, but not be limited to—

(1) an analysis of the impact of existing

Federal, State, and local policies, programs, and laws on neighborhood survival and revitalization;

(2) an identification of the administrative, legal, and fiscal obstacles to the well-being of neighborhoods;

(3) an analysis of the patterns and trends of public and private investment in urban areas and the impact of such patterns and trends on the decline or revitalization of neighborhoods;

(4) an assessment of the existing mechanisms of neighborhood governance and of the influence exercised by neighborhoods on local government;

(5) an analysis of the impact of poverty and racial conflict on neighborhoods;

(6) an assessment of local and regional development plans and their impact on neighborhoods; and

(7) an evaluation of existing citizen-initiated neighborhood revitalization efforts and a determination of how public policy can best support such efforts.

(b) The Commission shall make recommendations for modifications in Federal, State, and local laws, policies, and programs necessary to facilitate neighborhood preservation and revitalization. Such recommendations shall include, but not be limited to—

(1) new mechanisms to promote reinvestment in existing city neighborhoods;

(2) more effective means of community participation in local governance;

(3) policies to encourage the survival of economically and socially diverse neighborhoods;

(4) policies to prevent such destructive practices as blockbusting, redlining, resegregation, speculation in reviving neighborhoods, and to promote homeownership in urban communities;

(5) policies to encourage better maintenance and management of existing rental housing;

(6) policies to make maintenance and rehabilitation of existing structures at least as attractive from a tax viewpoint as demolition and development of new structures;

(7) modification in local zoning and tax policies to facilitate preservation and revitalization of existing neighborhoods; and

(8) reorientation of existing housing and community development programs and other tax and subsidy policies that affect neighborhoods, to better support neighborhood preservation efforts.

(c) Not later than one year after the date on which funds first become available to carry out this title, the Commission shall submit to the Congress and the President a comprehensive report on its study and investigation under this subsection which shall include its findings, conclusions, and recommendations and such proposals for legislation and administrative action as may be necessary to carry out its recommendations.

COMPENSATION OF MEMBERS

SEC. 205. (a) Members of the Commission who are Members of Congress or full-time officers or employees of the United States shall serve without additional compensation, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of the duties vested in the Commission.

(b) Members of the Commission, other than those referred to in subsection (a), shall receive compensation at the rate of $100 per day for each day they are engaged in the actual performance of the duties vested in the Commission and shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of such duties.

ADMINISTRATIVE PROVISIONS

SEC. 206. (a) The Commission shall have the power to appoint and fix the compensation of such personnel as it deems advisable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates, but at rates not in excess of a maximum rate for GS-18 of the General Schedule under section 5332 of such title.

(b) The Commission may procure, in accordance with the provisions of section 3109 of title 5, United States Code, the temporary or intermittent services of experts or consultants. Persons so employed shall receive compensation at a rate to be fixed by the Commission but not in excess of $100 per day, including traveltime. While away from his or her home or regular place of business in the performance of services for the Commission, any such person may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 (b) of title 5, United States Code, for persons in the Government service employed intermittently.

(c) Each department, agency, and instrumentality of the United States is authorized and directed to furnish to the Commission, upon request made by the Chairman or Vice Chairman, on a reimbursable basis or otherwise, such statistical data, reports, and other information as the Commission deems necessary to carry out its functions under this title. The Chairman is further authorized to call upon the departments, agencies, and other offices of the several States to furnish, on a reimbursable basis or otherwise, such statistical data, reports, and other information as the Commission deems necessary to carry out its functions under this title.

(d) The Commission may award contracts and grants for the purposes of evaluating existing neighborhood revitalization programs and the impact of existing laws on neighborhoods. Awards under this subsection may be made to—

(1) representatives of legally chartered neighborhood organizations;

(2) public interest organizations which have a demonstrated capability in the area of concern; and

(3) universities and other not-for-profit educational organizations.

(e) The Commission or, on the authorization of the Commission, any subcommittee or member thereof, may, for the purpose of carrying out the provisions of this title, hold hearings, take testimony, and administer oaths or affirmations to witnesses appearing before the Commission or any subcommittee or member thereof. Hearings by the Commission will be held in neighborhoods with testimony received from citizen leaders and public officials who are engaged in neighborhood revitalization programs.

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 207. There are authorized to be appropriated not to exceed $1,000,000 to carry out this title.

EXPIRATION OF THE COMMISSION

SEC. 208. The Commission shall cease to exist thirty days after the submission of its report under section 204.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3843) to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I—SUPPLEMENTAL AUTHORIZATIONS AND EXTENSIONS OF HUD PROGRAMS

FHA general insurance fund

Both the Senate amendment and the House bill provided for an increase in the authorization for losses incurred by the FHA General Insurance Fund from the current level of $500 million. The Senate bill would have authorized an increase in the Fund to $1 billion. The House bill would have authorized an increase to $1.341 billion. The Conference Report contains the House provision.

Federal crime and riot insurance programs

Basic Insurance Authority

The Senate amendment authorized an extension in basic riot reinsurance and crime insurance program authority from April 30, 1977, to April 30, 1978. The House bill authorized an extension from April 30, 1977, to September 30, 1978. The Conference Report contains the House provision.

Continuation of Policies in Force

The Senate amendment authorized continuation of basic riot reinsurance and crime insurance policies in force before April 30, 1978, to April 30, 1981. The House bill authorized such continuation to September 30, 1981. The Conference Report contains the House provision.

Liquidation and Termination of Riot Reinsurance and Crime Insurance Programs

The House bill contained a provision not in the Senate amendment extending the date that the Secretary of HUD must submit a plan for the liquidation and termination of riot reinsurance and crime insurance programs from April 30, 1978, to September 30, 1978. The Conference Report contains the House provision.

Miscellaneous provisions relating to mortgage insurance programs

Workable Program Requirement With Respect to Section 220 FHA Mortgage Insurance

The Senate amendment contained a provision not in the House bill which deleted the requirement that no mortgage shall be insured under Section 220 of the National Housing Act unless the locality in which the property is located has in effect a workable program for community improvement. The Conference Report contains the Senate provision.

Mortgagors Eligible for Section 221(d)(4) FHA Mortgage Insurance

The Senate amendment contained a provision not in the House bill which makes clear that mortgages insured under Sec. 221(d)(4) of the National Housing Act may be executed by a mortgagor which is a public body or agency, or a cooperative, limited dividend corporation or other entity, private nonprofit corporation or association, as well as a profit motivated entity, as defined by the Secretary. The Conference Report contains the Senate provision.

Emergency Homeowners' Relief Act

The Senate amendment contained two provisions not in the House bill which would

have amended the Emergency Homeowners' Relief Act. The first provision would have amended Section 102(a) to add a Congressional finding that "severe localized economic distress caused by the legal claims of the Mashpee Tribe in Mashpee, Massachusetts, may require the furnishing of assistance under this Act to avoid mortgage foreclosures and distress sales resulting from the temporary loss of employment and income." The second provision of the Senate amendment would have provided that assistance under the Act could be made available if a mortgagor's involuntary unemployment or underemployment is the result of adverse local, as well as national, economic conditions.

The Conference Report contains neither of the Senate provisions.

The conferees agreed that alternative legislative means would be found to address the problems arising out of the legal claims of the Mashpee Indians during consideration by the House and Senate of Fiscal Year 1978 housing and community development act authorizations.

TITLE II—NATIONAL COMMISSION ON NEIGHBORHOODS

The Senate amendment contained a provision not in the House bill which provides for the creation of a National Commission on Neighborhoods composed of 20 members. The Commission would undertake a comprehensive analysis of the factors that contribute to the decline of neighborhoods and are necessary to their survival and revitalization, and report its findings and recommendations for legislative and administrative action to the Congress and President within one year after funds became available. $1 million would be authorized to carry out the Commission's activities. The conferees accepted the Senate amendment with an amendment to delete the cost-benefit quantification required under Sec. 204(a)(8) of the Senate amendment.

It is expected that substantial efforts will be made in selecting Commission members to seek out and appoint qualified women and that, as a result of these efforts, a substantial number of Commission members will be women.

ARMENIAN MEMORIAL DAY—APRIL 24, 1977

(Mr. BENJAMIN asked and was given permission to address the House for 1 minute, to revise and extend his remarks.)

Mr. BENJAMIN. Mr. Speaker, yesterday, the Armenians world over observed the 62d memorial of the Turkish genocide of the Armenian people, the first mass murder of a people in modern times.

April 24 is a day of mourning for nearly 2 million Armenians who were massacred or deported from their provinces in 1915. More than that, it is a reminder to the civilized world that the withholding, denying, or ignoring of justice because of political expediency has its consequence in the course of human misery. We were reminded of the unfortunate sequel to the Armenian atrocity by our colleagues, Representatives MIKULSKI of Maryland and GILMAN of New York who last week included remarks in the CONGRESSIONAL RECORD on "The Anniversary of the Warsaw Ghetto Uprising" and "Let Us Remember—The Holocaust." In commencing the ruthless murder of the Polish and Jewish peoples, Hitler alluded to the extermination of Armenians as a forgotten element and fact thereby offering collateral support for the conduct on which he was to embark.

The American people are well aware of the history of oppression of minorities in other lands. The strength of our own Nation is based in our tradition of receiving and caring for the oppressed from abroad.

Unfortunately, this tradition has had its exceptions to include the denial by the Congress in 1920 of the request of President Wilson to make the cause of Armenians "our own." On April 8, 1975, this House did adopt House Joint Resolution 148, introduced by Speaker O'NEILL and others to designate April 24 of that year as a "National Day of Remembrance of Man's Inhumanity to Man." While passing the House by a 332 to 55 vote, it was not considered further in the Senate.

While we commemorate April 24 as a day of infamy, I trust that we will convert that day into a day of action by advocating a solution.

In that respect, I ask the Subcommittee on Europe and the Middle East, Committee on International Relations, to consider opposition to any direct or indirect U.S. military or economic aid to Turkey subject to:

First. A total withdrawal from Cyprus of all Turkish troops and all "colonists" who have migrated to the island from Turkey since the illegal and unprovoked invasion of the Republic of Cyprus; also, a resettlement of all Greek and Armenian Cypriot refugees who wish to return to homes and appropriate reparations.

Second. Confirmation by appropriate, independent, international humanitarian organizations that repression in "modern" Turkey has ended and that there is indisputable evidence that:

The illegal imprisonment and torture of Turkish, Kurdish and other Moslem political dissidents has ceased.

Armenian, Greek, and Jewish citizens of Turkey enjoy in fact, as well as under law, all of the rights—individually and collectively—enjoyed by others, and that their churches, schools, press, and other institutions are free of discriminatory regulations and practices.

Third. Evidence that the Government of Turkey agree to take the first, positive steps toward a peaceful and just solution of the Armenian question, thereby opening a new era of Turkish-Armenian dialog and cooperation.

I also ask the subcommittee's influence and work for:

First. The U.S. State Department to not support or participate in Turkish attempts to deny or distort the truth about the Turkish genocide of the Armenians.

Second. The State Department to recognize and concern itself with the role and importance of the Armenian communities in the Middle East and in other parts of the world.

Third. U.S. policy to recognize and support the importance of a just, equitable and peaceful solution to the Amenian question.

Human rights, throughout the world, has to be the cornerstone of our foreign policy and the hallmark of our international commitments. Let us take another meaningful step in that direction as we join the Armenians in their commemoration of Memorial Day, 1977.

PRESIDENT'S HOSPITAL COST CONTAINMENT LEGISLATION

The SPEAKER pro tempore (Mr. FOLEY). Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 60 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, President Carter, in a message to the Congress today, has proposed legislation to constrain rapidly escalating hospital costs. I am pleased to join with my colleague from Florida, the Honorable PAUL ROGERS, in introducing the President's cost containment legislation, H.R. 6575. Chairman ROGERS and I are today announcing that public hearings on the President's proposal and the general issue of hospital cost containment will be held on May 11, 12, and 13. These will be joint hearings before the Interstate and Foreign Commerce Committee's Subcommittee on Health and the Environment, chaired by Mr. ROGERS, and before the Ways and Means Committee's Subcommittee on Health, which I chair.

The President's proposal addresses a very serious issue. Each year the total costs of hospital care increase another 15 percent. These costs, unless checked, will double in 5 years. Those of us who need to guard the financial solvency of the medicare program must be concerned about increases of this magnitude. State governments, whose budgets are upset as the costs of the medicaid program soar, and all who pay for hospital care directly or through insurance, must be concerned about the rapid and continuing escalation of hospital costs.

I am sure there will be serious objections raised to the President's proposal. Some will argue that a cost containment program applying only to hospitals unfairly singles them out and will do harm to the quality and availability of necessary care. At our hearings, I hope these people will then be able to explain why year after year it is necessary and proper that hospital costs should increase at rates far exceeding the general rate of inflation. Others will criticize the specific cost containment mechanisms in the proposal, or will suggest alternative approaches to promoting efficiency in hospital and health care.

If the Congress is to act wisely in this difficult and controversial matter, we need to have all these views adequately aired. I look forward to our May hearings as an additional opportunity for the ad-

ministration to make the case for the cost containment proposal and as a time during which other views can also be thoughtfully examined.

A summary of the President's proposal follows, as does a detailed announcement of the joint hearings on this subject. The legislation itself, H.R. 6575, immediately follows the remarks of my colleague, the gentleman from Florida (Mr. ROGERS).

The material follows:

H.R. 6575—HOSPITAL COST CONTAINMENT ACT OF 1977

THE BILL IN BRIEF

Objectives: To curb the inflation in hospital costs, which is currently running far ahead of other prices, and to pave the way for more fundamental reform of the methods by which hospitals are paid and of the supply and distribution of health care services.

Basic Method: Increases in hospital revenues from in-patient services would be limited to approximately 9 percent in the first year the legislation was in effect and gradually declining amounts in subsequent years.

Coverage: In-patient hospital revenues of acute-care hospitals. (Chronic-care hospitals, which are chiefly mental hospitals, hospitals less than two years old and Health Maintenance Organization (HMO) hospitals would be excluded from the coverage of the Act.)

The Basic Limit: This would be set by a formula reflecting general price trends in the economy, plus an allowance for some added intensity of patient services.

Exceptions: Exceptions to the revenues limit would be granted only for extraordinary changes in patient load, or for major increases in capital facilities, equipment or services.

Low-wage Workers' Adjustment: The permissible increase in revenues could be adjusted upward, for any individual hospital, to allow for the actual wage increases granted to non-supervisory employees.

State Waivers: Hospitals in states that have strict cost-containment programs and meet other specified conditions can be excluded from coverage.

Capital Expenditures: A dollar limit would be established annually on new capital expenditures by the covered hospitals. This limit would be allocated, state-by-state, based on a population formula. In addition, increasing the number of beds would be banned outright in areas having a surplus of beds.

BACKGROUND

Rapidly rising costs

Hospital costs—which account for 40 cents of every dollar Americans spend on health care—have been escalating far faster than the overall cost of living for more than two decades.

Since 1950, the cost of one day's stay in a hospital has increased more than 1,000 percent, compared with a 136 percent climb in the Consumer Price Index.

The past decade has witnessed a continuation, and in some cases an acceleration, of the inflationary trend in hospital costs. For example, since 1965:

The average cost of a day's hospitalization has increased more than 300 percent, from $41 to more than $158.

The cost of an average hospital stay climbed from less than $300 to more than $1,300.

The nation's total hospital bill jumped to $55.4 billion—or an average $254 per person and over $1,000 per family.

And the end of the upward spiral appears nowhere in sight.

In calendar year 1976, the cost of a stay in a hospital increased more than 15 percent—or two and a half times the 6 percent increase in the Consumer Price Index. The hospital cost increase even outstripped increases in the costs of energy and food.

In 1976, Federal, State and local governments spent nearly $4 billion more for hospital care than one year earlier.

In 1976, States paid $7 billion as their share of the Federal-State Medicaid program for the poor—or more than double the $3 billion States invested in Medicaid in 1971.

Special causes of hospital cost inflation

Two factors unique to the hospital industry lie behind the explosive growth in hospital costs.

The first factor is a third-party payment system that gives patients and their physicians little cause to consider hospital costs. More than 90 percent of all hospital costs are paid for by someone other than the patients—by Medicare, Medicaid, Blue Cross or other insurance carriers or public programs. Few patients even know what their hospital stay costs.

The second inflation-promoting factor is that third-party payors reimburse hospitals on the basis of whatever the hospitals state as their costs, or whatever price the hospital charges. This cost-reimbursement system fails to provide hospitals with any economic incentives for holding down costs. In fact, the reimbursement system tends to encourage hospitals to add expensive new facilities and technologies. As a result, many hospitals have extremely costly and greatly underutilized services and equipment and the nation as a whole has 100,000 more hospital beds than it needs.

Impact of hospital cost inflation

Runaway hospital costs represent a "hidden-tax" on workers and their families. For example:

Americans today must work more than one full month of every year just to pay for their health care. It takes at least two weeks' wages just to cover hospital costs.

Higher health insurance premiums paid for fully or in part by employers drain off money that could have been passed on to workers in the form of higher wages or pensions.

Private health insurance premiums climbed an average 15 to 20 percent last year alone. Blue Cross premiums for the Federal Government's own workers rose 33 percent last year alone.

Runaway hospital cost inflation also has caused severe distortions in the nation's overall health care delivery system. While hospitals devour extra billions of dollars each year, other vital health care programs—such as immunizing children and other sickness-prevention programs—have been short-changed.

In effect, we as a nation have been investing so much in curing illness by the most expensive means—acute care hospitalization—that we have not been readily able to afford steps to help us avoid acute illness in the first place.

Future impact of unrestrained hospital cost inflation

At its present inflationary rate, the national cost of hospital care will double in the next five years. In Fiscal Year 1977 alone, total hospital spending will climb another 15 percent to $63.7 billion.

Just as States have had to raise taxes to cover their ballooning Medicaid costs, so has the Federal Government had to set more and more money aside for health care.

Today, nearly 12 cents of every Federal dollar goes for health care—nearly 9 cents for hospital care alone.

Based on these inflationary patterns, the need for controlling increases in hospital costs is clear and compelling.

Savings by restraining costs

The savings resulting from implementation of the Administration program would be enormous. In Fiscal Year 1978 alone, net savings would total $1.855 billion—including $578 million in Medicare funds, $143 million in Medicaid and $879 million in private funds.

By 1980, net savings would nearly triple to $5.58 billion—including $1.755 billion under Medicare, $429 million under Medicaid, and $2.64 billion in private funds.

The effort to restrain inflation in this unique industry is a major component of the Administration's overall anti-inflation program.

Need for transitional system

Fundamental reform of the methods by which hospitals are paid and in the supply and distribution of health care services is essential, regardless of future prospects for enacting national health insurance legislation. Permanent structural reforms of the health care reimbursement system are expected to take up to three years to put in place. In the meantime, a transitional program is necessary to bring the increase in hospital costs more in line with price trends in the rest of the economy.

It is important to stress that the Hospital Cost Containment Act of 1977 embodies a purely transitional program. The Act provides that by March 1, 1978 the Secretary of HEW shall submit his recommendations to the Congress on the form and content of a longer-range program.

But the success of any long-range program would be damaged by a failure to begin restraining health cost inflation now.

DETAILED SUMMARY AND RATIONALE

I. Basic method

Total hospital revenue would be constrained by limiting increases in payments from each third-party cost payor—such as Blue Cross, Medicaid and Medicare—and from charge payors—including private insurance and individuals who pay their own bills—as a class. The limit would be about 9 percent in the first year of the program. The program would begin October, 1977.

Rationale

The approach can be implemented and administered quickly and simply.

It requires no new data collection or reporting forms and can be readily understood by hospitals.

It guarantees immediate savings to the Medicare and Medicaid programs, to private insurance and to the public.

Future year savings will be even greater as hospital managers alter employee staffing patterns and take a most cost-conscious view of expenditures for new services and equipment.

II. Coverage

The program would cover the in-patient revenues of about 6,000 acute-care and speciality hospitals. It would exclude chronic-care hospitals, new (less than 2-year-old) hospitals, and those getting at least 75 percent of their revenues from Federally defined Health Maintenance Organizations (HMOs) on a capitation basis. Federal hospitals would not be covered directly; such hospitals would be directed by the President to stay within the limits.

Rationale

The cost-containment program would apply only to in-patient services because they represent the most expensive mode of treatment. The Administration views as desirable shifts from in-patient to out-patient care

when quality of care is maintained, since out-patient care is considerably less costly.

Federal Government hospitals would not specifically be included in the legislation because these facilities already operate under budget constraints—and these constraints would be modified with respect to short-term in-patient units to reflect the objectives of the overall national system and to set an example for the private sector.

Exemption of hospitals dealing predominantly with Federally defined HMOs provides an added incentive for further development of these cost-effective organizations. Chronic care hospitals would be excluded because they do not have the same inflationary problems as acute-care hospitals.

To prevent hospitals from shifting costs of in-patient services outside the hospital to avoid the revenue limit, the ceiling would exclude from the base any services previously performed in the hospital that were moved out of the hospital.

III. Setting the basic limit

The basic limit on increases in total-in-patient care revenues would be set by a formula reflecting general price trends in the economy as a whole, plus an additional amount to accommodate some increase in intensity of patient services.

The formula would use the "GNP deflator," published by the Commerce Department, which measures price changes in the whole economy, and would work as follows:

"The allowable increase would equal the increase in the GNP deflator for the most recently published 12-month period, plus ⅓ of the difference between the average annual increase in hospital costs in the preceding two years and the increase in the GNP deflator in that same period.

"Example: Assume for 1975 and 1976 that the increase in hospital costs was 15 percent and the increase in the GNP deflator for the relevant periods was 6 percent.

"Allowable increase = 6 (GNP deflator) + (15 − 6) ÷ 3 = 6 + 9 ÷ 3 = 6 + 3 = 9."

In future years, as the gap between overall price increases and hospital costs narrowed, the allowable increase would come down.

Rationale

A legislated formula based on a general economic price index plus an allowance for limited expansion of services should serve to reassure hospitals that unreasonably low limits will not be set.

A formula based on the overall rate of price increases in the economy will reflect increases in the costs of the things hospitals buy, in most instances.

The additional allowance for expansion of services provides a cushion to hospitals with above-average increases in the prices of what they buy.

IV. Adjusting the basic limit for changing patient load

The basic limit would be adjusted to reflect any major changes in patient load:

Increases in total allowable revenue would remain constant where patient load, measured by admissions, increased 2 percent or decreased by 6 percent (10 percent in the case of small hospitals—those with fewer than 4,000 annual admissions).

Revenue increases equal to one-half of average revenue per stay in the base year would be allowed for each increased admission beyond 2 percent. However, no additional allowance would be made for admissions beyond 15 percent in the case of large hospitals unless a specific exception were granted.

Similarly, revenue decreases equal to one-half of average revenue per stay would be imposed for decreased admissions below 6 percent. For reductions in patient load beyond 15 percent, full revenue reduction would be imposed, except for small hospitals.

Example

"Assume that the basic revenue increase limit is 9 percent and that Hospital X's base year revenue figure is $10,000,000 derived from 10,000 admissions—$1,000 an admission. If Hospital X's admissions in the year beginning October 1, 1977, are the same as in the base year then the total revenue allowed to the hospital is $10,900,000—$900,000 more than in the base year.

"If the number of admissions in the hospital increased to 11,000, 1,000 or 10 percent more than in the base year, the hospital is allowed a $500 increase in revenue—50 percent of the revenue per admission in the base year—for 800 of these admissions (the excess over 2 percent), or $400,000.

"Thus, the total revenue allowed for Hospital X would be $11,300,000 (representing the basic increase of $900,000 plus the increase of $400,000, reflecting the increased patient load). The limit on payments per admission by each major type of third-party payor would be adjusted accordingly."

Rationale

The adjustment provides incentives for hospitals to identify and reduce unnecessary hospital utilization.

Limiting to 50 percent the automatic upward adjustment in revenues for major changes in patient load reduces the incentive to increase admissions arbitrarily.

Special treatment for small hospitals, which are subject to wider percentage changes in patient load from year to year, would not seriously undercut the effectiveness of the overall constraint, and would ease Federal administration of the Act.

V. Applying the limit

To meet the overall limit of about 9 percent, the allowable increase in revenue per admission would be calculated by estimating the expected changes in hospital admissions. For example, with an overall limit of 9 percent and an estimated increase in hospital admissions of 2 percent, a hospital would be permitted an increase in average revenue per admission of 7 percent. Cost payors would estimate the limit per stay for purposes of interim reimbursement, based on any anticipated changes in patient load, and apply the actual limit in final settlement, using final fiscal year data on actual changes in patient load.

In addition, the Medicare intermediary would assume responsibility for determining any excess charges per stay for commercial carriers or self-pay patients, from data routinely reported on Medicare cost reports.

If total charges per stay exceeded the rate of increase allowed for the hospital, it would be required to reduce charge increases in the following year accordingly. Adequate public notice of the hospital's violation would be required. Any hospital or third-party payor that was found to have paid or received funds in violation of this Act could be required to pay a tax to the U.S. Treasury equal to 150 percent of the amount in violation.

Example

"If Hospital X overcharged charge-payors by $10,000 in a year, then refused to put the overcharge in escrow to be deducted from the following year's ceiling, it would be subject to a tax of $15,000."

Rationale

Applying the allowable percentage increase by major type of payor is administratively simple, permits each major third-party payor (Medicare, Medicaid, Blue Cross) to make final settlements without waiting for all other payors, and would not require any additional reporting forms or audit.

The approach is neutral with regard to type of payor, neither favoring nor discriminating against any type of payor.

Imposing the tax and requiring hospitals to publicize any overcharges should be a significant deterrent to excess charge increases.

VI. Base for applying the limit

The base would be the dollar total of the hospital's revenue from each class of payor for calendar 1976 (or, in the case of hospitals with a non-calendar fiscal year, for its accounting year that ended in 1976). To bring the 1976 base up to date, an adjustment would be made that would treat the revenue increases in 1977 as though they had been the same as the average annual increase in the two years 1975 and 1976. However, the adjustment rate could not exceed 15 percent or be lower than 6 percent.

Rationale

This method would assure that any hospital which raised charges after public announcement of the Administration's hospital cost containment effort would not benefit from that action.

It would reward hospitals with increases in their revenues of less than 6 percent annually in recent years.

Using previous trends from a period of generally high cost increases is a generous standard, and should not impose a burden on hospitals.

VII. Exceptions

Exceptions to the total revenue limit would be permitted on only two grounds:

(1) Exceptional changes in patient load (anticipated to encompass about 3 percent of all hospitals); and

(2) Major increases in capacity or types of services, or major renovation or replacement of physical plant.

Local and state health planning agencies would review and comment on exceptions. To receive added revenues under any exception, a hospital would also have to demonstrate a relatively poor financial condition. Specifically, it would have to show that its ratio of current assets to current liabilities put it in the bottom 25 percent of hospitals covered by the program.

HEW would have to act on requests for exceptions within 90 days or the hospital and third-party payors could presume approval.

Any hospital granted an exception would be subject to an operational review of effectiveness and efficiency by the HEW Audit Agency or its agents. The report of the HEW findings would be made public.

Rationale

Limited criteria for exceptions are necessary to maintain the effectiveness and administrative simplicity of the program.

Strong tests of community necessity for new services by health planning agencies and the requirement that a relatively poor financial condition be demonstrated should ensure a limited number of exceptions.

VIII. Adjustment for nonsupervisory employees

To avoid an inequitable impact on the earnings of low-wage hospital workers, hospitals would be permitted an adjustment of the revenue limit based on actual increases in pay they granted to non-supervisory employees. At the end of 18 months, the Secretary of HEW would determine if the adjustment should be continued.

Under this method, the hospital revenue-increase limit is computed by making a separate calculation for the wages of non-supervisory employee.

Example

"Assume that Hospital X's costs in the base year are distributed as follows: 35 percent for wages of non-supervisory employees and 65 percent for all other costs. Assume that the earnings per non-supervisory em-

ployee have increased 11 percent in the current year. In this case, the revenue-increase limit is 9 percent for 65 percent of the hospital's costs and 11 percent for the remainder, or a total of 9.7 percent."

Rationale

This provision is needed to assure that low-wage hospital workers do not bear the brunt of the cost containment program.

IX. Maintenance of effort

Hospitals would be required to maintain their charity patient load shares. Enforcement would be on the basis of investigation by health planning agencies of complaints by other area hospitals.

Rationale

Although it is not expected to be a major problem, there is a possibility that some hospitals would seek to avoid the intent of the limits by replacing patients without any insurance coverage with those covered by government or private insurance. This provision would reduce that possibility.

X. Disclosure

Hospitals would be required to make available to the public current charge schedules and cost-reimbursement reports. The local health service agency would publish every six months a list of hospitals with their charges for typical services.

Rationale

These provisions would foster better understanding of hospital costs by consumers and other concerned parties and provide an incentive for self-enforcement of the Act by hospitals.

XI. State programs

Hospitals in States which receive a waiver from the Federal cost containment program would not be covered. A State would have to meet the following conditions:

a. A hospital cost containment program must have been in effect in the State for at least one year prior to the requested waiver;

b. That program included all payors in the State (except Medicare) and covered at least 90 percent of the hospitals that would be included in the Federal program;

c. The State agrees to comply, on an aggregate basis, with the basic Federal ceiling;

d. There is the expectation, based on demonstrated performance, that the State will achieve the Federal objective under its own program;

e. The State plan provides that any excess revenues generated will be returned to payors.

The requirement that all payors except Medicare have been included in the State plan can be waived if the State has had a program covering at least 50 percent of total hospital payments for one year and the State adds all payors to its plan effective no later than the time of the requested waiver.

New State programs could be added over time, but only under the strict criteria of the experimental programs established under present law.

Rationale

Recognition should be given to State activity in hospital cost containment since the methods developed by some States are more sophisticated and refined than the initial national effort.

XII. Enforcement

Payment above the cost containment limits would be disallowed under the Medicare and Medicaid programs.

Payment by Blue Cross or other cost payors, or receipt of hospitals of excess revenues, would be subject to a tax at the rate of 150 percent unless rebated to the payors.

Local Health Systems Agencies (HSAs) and State health planning agencies would be required to comply with provisions of the program or face loss of their designation and of Federal funding under the Public Health Service Act .

Rationale

Unless *all* hospital revenues are controlled, hospitals would have an incentive to discriminate against Federal beneficiaries for whom they receive lower payments, and to compensate for revenue reduction by increasing costs to private plans and individual payors.

XIII. Capital expenditure program

First, the program would set an annual national limit on new capital expenditures by acute care hospitals. The limit would be set at a level somewhat below expenditures in recent years.

The national limit would be allocated to the States by a formula based on population for at least the first year. In later years, the Secretary of HEW could adjust the formula to take into account factors other than population—such as costs of construction and need for capital expansion or modernization. States would award new certificates of need to hospitals up to their limit. HSAs would assist the States by reviewing and commenting on applications of certificates.

Medicare and Medicaid would deny reimbursement to hospitals for unapproved projects. The Federal Government would operate the program in States which do not agree to participate.

Second, in any health service area in which the number of hospital beds exceeds 4 per 1,000 population, or in which the average hospital occupancy rate is less than 80 percent, no certificates of need would be allowed if they would yield a net increase in beds in the area. In addition, no Federal grants, loan guarantees or tax subsidies for construction of beds in excess of the existing number would be permitted.

Rationale

A cost containment effort can only be effective over a long period of time if steps are taken now to slow the rate of growth of bed capacity and the duplication of expensive technology.

An effective capital spending constraint will have further benefits by reducing the number of hospitals qualifying for exceptions in future years.

THE HONORABLE DAN ROSTENKOWSKI, DEMOCRAT OF ILLINOIS, CHAIRMAN, SUBCOMMITTEE ON HEALTH OF THE COMMITTEE ON WAYS AND MEANS, AND THE HONORABLE PAUL G. ROGERS, DEMOCRAT OF FLORIDA, CHAIRMAN, SUBCOMMITTEE ON HEALTH AND THE ENVIRONMENT OF THE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, ANNOUNCE A 3-DAY JOINT HEARING OF THE PRESIDENT'S HOSPITAL COST CONTAINMENT PROPOSAL, H.R. 6575, TO BE CONDUCTED WEDNESDAY THROUGH FRIDAY, MAY 11–13, 1977

The Honorable Dan Rostenkowski, (D., Ill.), Chairman of the Subcommittee on Health of the Committee on Ways and Means, and the Honorable Paul G. Rogers (D., Fla.), Chairman of the Subcommittee on Health and the Environment of the Committee on Interstate and Foreign Commerce, announced today that their Subcommittees will hold joint hearings on the Carter Administration's Hospital Cost Containment Proposal, H.R. 6575. These hearings will be conducted on Wednesday, May 11, 1977, in the Ways and Means Committee's Main Hearing Room, across the hall from Room 1102 Longworth House Office Building, and on Thursday and Friday, May 12 and 13, 1977, in the Interstate and Foreign Commerce Committee's Main Hearing Room, 2123 Rayburn House Office Building. The hearings will begin at 10 a.m. each day.

BACKGROUND INFORMATION REGARDING THE HEARING TOPIC

In a message of April 25 to the Congress, President Carter proposed adoption of a program of hospital cost containment. This proposed legislation has been introduced as H.R. 6575. The Subcommittees' desire is to receive testimony on the specific provisions of this bill, on the general issues involved, and on alternative proposals for containing escalating health care costs.

DETAILS FOR SUBMISSION OF REQUESTS TO BE HEARD

Cutoff Date for Requests to be Heard, etc.—Requests to be heard must be received by the Committee no later than the close of business, Wednesday, May 4, 1977.

Requests should be addressed to John M. Martin, Jr., Chief Counsel, Committee on Ways and Means, U.S. House of Representatives, 1102 Longworth House Office Bldg., Washington, D.C. 20515. The telephone number is (202) 225-3625. Notification of a witness' scheduled date of appearance will be made as promptly as possible after the cut-off date. Once a witness has been advised of his date of appearance, it is not possible for this date to be changed. If a witness finds he cannot appear on that day, he may wish to either substitute another spokesman in his place or file a written statement for the record of the hearing instead of appearing in person. In any event, if a change in witness or a cancellation becomes necessary, please advise the Committee office immediately.

Allocation of Time to Witnesses—Due to the limited time available for this hearing, it may be necessary to limit the number of witnesses and will be necessary to allocate the amount of time available to each witness for the presentation of his oral testimony. It will be mandatory on all witnesses not to exceed the time allocated for this purpose. Each witness must present his oral statement in summary form; a more detailed statement will be accepted for inclusion in the printed record of the hearing. If necessary, witnesses may be grouped into panels to further expedite the hearing process. Additionally, all persons and organizations having a common position should exert the maximum effort to designate one spokesman to represent them.

REQUESTS TO BE HEARD MUST CONTAIN THE FOLLOWING INFORMATION:

(1) The name, address and capacity in which the witness will appear;

(2) A topical outline or summary of the comments and recommendations which the witness proposes to make.

It is requested that persons scheduled to appear before the Subcommittees submit 75 copies of their prepared statements to the Ways and Means Committee office (Room 1102 Longworth House Office Building) no later than 24 hours in advance of their scheduled appearances. An additional supply may be furnished for distribution to the press and the public on the date of appearance.

Written Statements in Lieu of Personal Appearance—Any person or organization may, instead of a personal appearance, file a written statement for inclusion in the printed record of the hearing. For this purpose, 5 copies of the statement should be submitted by the close of business, Friday, May 27, 1977. Additional copies may be furnished for distribution to the Members of the Subcommittees, the staff, press and public, if submitted to the Committee during the course of the hearings.

PRESIDENT'S HOSPITAL COST CONTAINMENT LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. ROGERS) is recognized for 60 minutes.

Mr. ROGERS. Mr. Speaker, I am joining today with my colleague, DAN ROSTENKOWSKI, chairman of the Subcommittee on Health of the Ways and Means Committee to introduce H.R. 6575, the

Hospital Cost Containment Act of 1977, and we are announcing joint hearings of the Committee on Interstate and Foreign Commerce and the Committee on Ways and Means. This proposal has been developed by the administration in response to a serious issue which has long been of great concern to me, and to many others concerned with the improvement in delivery of high quality health services to the American population—the constantly increasing spiral of health care costs, most particularly costs of hospital care.

All of us who have to deal with the difficult issues of allocating scarce dollars to an endless number of pressing demands to improve access to and the availability of high quality health care services, including expansion of comprehensive health centers, and more suitable programs, services and facilities to meet the needs of the poor, the aged, the mentally ill, and the retarded—know the frustration of seeing our health dollars eaten up by the increases in costs which far exceed the general increases in cost of living. Clearly there can be no doubt about the seriousness of the problem, and I welcome the commitment by the administration to work with the Congress to seek an effective way of dealing with the issue.

In introducing the administration's bill today, I am seeking to focus and intensify the dialog on the problems of increasing health care costs, particularly in the area of hospital care, and on the appropriate ways to address them. I am convinced that we must slow the rate of increase, or the improvement of health care financing systems and further progress in expansion of our health care system will be difficult.

However, I believe that we must proceed with care in this area. I am convinced that we will have developed a workable, equitable way of dealing with hospital costs only when the reimbursement system is designed so that it provides incentives to the hospitals themselves—incentives to operate more efficiently, incentives to reduce inpatient care and provide outpatient care more effectively, and incentives to close down services which are not needed or are better provided in other settings. I question whether any system for controlling the increases in costs of hospital care will work over the long run unless such an incentive system is present.

Further, I believe we must take care in developing hospital reimbursement limitations to assure that we are not devising a system under which the inefficient hospital can continue to prosper, because it has room in its budget so that it can easily reduce costs to meet the reimbursement constraints, while the hospital which has been more efficient, which has reached out to serve the poor and the difficult-to-treat cases, and which has no fat in its budget, suffers because it has no room left to accommodate the tighter reimbursement ceilings. I recognize that any system which is to be implemented rapidly cannot be individually adjusted to each hospital's situation, yet we must find a way to protect against an unhappy result from a system designed to treat all hospitals equally when in fact the situations among the hospitals across the country are very unequal.

There is a third concern which is very much on my mind as we approach the debate on appropriate action to limit increases in hospital costs. We must not develop a system where the hospital—to protect its economic viability—reacts by reducing services to the poor and persons who are unable to pay, and reduces its outpatient activities because it can no longer carry the loss with money from inpatient services. If we end up with such an unintended result we will have created a problem worse than the one we started with.

Finally, effective control of health care costs must address all parts of the health care system. While it clearly is appropriate to start with inpatient hospital costs, control of cost increases of services delivered in all health care institutions, including nursing homes, should surely be considered.

I am not yet convinced that the approach of H.R. 6575 can respond satisfactorily to these concerns, and I personally want to examine its impact very carefully before recommending action to the Members. Yet, I am convinced that there is much in the administration's proposal which is commendable. And I am particularly encouraged by the direction it takes in looking to limits on capital expenditures as an effective way to moderate health care costs.

I look forward to a period of constructive debate and suggestions for improvements to the proposal.

H.R. 6575

A bill to establish a transitional system of hospital cost containment by providing for incentives and restraints to contain the rate of increase in hospital revenues, to establish a system of capital allocation designed to encourage communities to avoid the creation of unneeded and duplicative hospital facilities and services, to provide for the publication and disclosure of information useful to the public in making decisions about health care, to provide for the development of permanent reforms in hospital reimbursement designed to provide incentives for the efficient and effective use of hospital resources, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Hospital Cost Containment Act of 1977".

REPORT ON PERMANENT REFORM IN THE DELIVERY AND FINANCING OF HEALTH CARE

SEC. 2. The Secretary of Health, Education, and Welfare (hereinafter in this Act referred to as the "Secretary") shall submit to the Congress, no later than March 1, 1978, a report setting forth his recommendations for permanent reforms in the delivery and financing of health care which will increase the efficiency, effectiveness, and quality of health care in the United States and which will replace the transitional provisions of title I of this Act.

TITLE I—TRANSITIONAL HOSPITAL COST CONSTRAINT PROVISIONS

PART A—PURPOSE AND GENERAL DESCRIPTION OF THE PROGRAM

PURPOSE

SEC. 101. It is the purpose of the transitional hospital cost containment program established by this title to constrain the rate of increases in total acute care hospital inpatient costs, beginning October 1, 1977, and continuing until the adoption of the permanent reforms referred to in section 2, by limiting the amount of revenue which may be received, by the hospitals involved, from government programs, private insurers, and individuals who pay directly for such care.

GENERAL DESCRIPTION OF PROGRAM

SEC. 102. (a) In order to carry out the purpose of the transitional program as set forth in section 101, the inpatient revenues of short-term acute care and specialty hospitals (excluding new hospitals and certain HMO-related hospitals) are to be limited in the manner outlined in the succeeding provisions of this section (and more particularly described in parts B and C of this title).

(b) The increase in total revenue which a hospital (as defined in section 121) may receive in any accounting year in the form of—

(1) reimbursement paid under the medicare and medicaid programs, and by cost payers, for inpatient services, and

(2) charges imposed upon other persons for inpatient services,

may not, on a per-admission basis, exceed the average inpatient reimbursement due or inpatient charges imposed per inpatient admission in the base period (in general, the hospital's accounting year ending in 1976) by more than the percentage which is applicable to the hospital for such accounting year under section 111.

(c) Such percentage, in the case of any hospital for any accounting year, is to be determined by—

(1) establishing for such year, under section 112(b), and "inpatient hospital revenue increase limit" based on increases in the GNP deflator and in total hospital expenditures nationwide,

(2) modifying the limit so established by the "admission load formula", as promulgated under section 113, to take account of major changes in patient loads experienced by that particular hospital, in order to arrive at an "adjusted inpatient hospital revenue increase limit" for that hospital in such year, and

(3) applying such adjusted limit for periods after September 30, 1977, with recognition being given under section 111(a)(1) to cost increases prior to that date.

(d) An exception from the limits otherwise established may be granted in accordance with section 115 (for a particular period) to any hospital which is experiencing substantially higher costs as a result of extraordinary changes in patient loads or major changes in facilities and services, to the extent required to assure that the necessary additional revenue will be available where necessary to meet actual community needs.

(e) Compliance with these limits is to be enforced, in accordance with section 116, in various ways. Such compliance is required under the medicare program by directly applying the limits for purposes of both interim and final reimbursement. Amounts paid to hospitals under the medicaid program in excess of such limits will be disallowed as a basis for Federal matching payments. Hospitals and nongovernment cost payers exceeding the limits will be subject to a Federal excise tax in an amount equal to 150 percent of the excess (except in the case of a hospital which is exempt as a result of corrective actions as prescribed under section 116(d)(2)).

(f) The Secretary is authorized, under section 117, to waive the limits otherwise established for all hospitals located in any State which has had in effect for at least one year a hospital cost containment program which covers at least 90 percent of all acute care hospitals in the State, applies to

all payers except the medicare program, limits inpatient hospital revenue increases to a rate no greater (in the aggregate) than the rate established for the period involved under section 112(b), and provides for return of excess hospital revenues.

PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

IMPOSITION OF LIMIT ON HOSPITAL REVENUE INCREASES

SEC. 111. (a) The average reimbursement paid to a hospital for inpatient services under title XVIII of the Social Security Act, under a State plan approved under title V or title XIX of such Act, or by any cost payer, and the average charges imposed by a hospital for inpatient services, in any accounting year any part of which falls within a period subject to this title, may not (except as provided in subsection (b)) exceed the base inpatient hospital revenue per inpatient admission (as established under section 114) by a percentage greater than the sum of—

(1) the percentage by which the costs involved would have increased in the period elapsing after the close of the hospital's base accounting year and prior to October 1, 1977, if such costs had increased (during that period) at the average annual rate actually experienced by the hospital during the two-year period ending with the close of such base accounting year, except that such percentage as applied for purposes of this section shall not be more than 15 percent nor less than 6 percent,

(2) the percentage by which, such costs would have increased in the period elapsing after September 30, 1977, and prior to the first day of the accounting year for which the limit is being imposed if such costs had increased (during such period) at an annual rate consistent with the inpatient hospital revenue increase limit determined and promulgated under section 112(b), and

(3) the percentage by which such costs would have increased in the accounting year for which the limit is being imposed if such costs had increased (during such year) at an annual rate consistent with the adjusted inpatient hospital revenue increase limit applicable to the hospital under section 112(a).

(b) Where less than a full accounting year falls within a 12-month period subject to this title, the limit set forth in subsection (a) of this section, and the limit established under section 112(a), shall apply with respect to reimbursement due or charges imposed for the part of such accounting year which falls within such period in the same proportion as the number of days in such accounting year that fall within such period bears to the total number of days in such accounting year.

DETERMINATION OF ADJUSTED INPATIENT HOSPITAL REVENUE INCREASE LIMIT

SEC. 112. (a) The "adjusted inpatient hospital revenue increase limit" which is applicable to any hospital for purposes of section 111(a)(3) with respect to any accounting year shall (subject to section 111(b) and section 124) be equal to the inpatient hospital revenue increase limit determined and promulgated under subsection (b) of this section for the 12-month period in which such accounting year or any part thereof falls, modified by the application of the "admission load formula" which is promulgated under section 113 and applied to that hospital.

(b)(1) Between July 1 and October 1 of each calendar year beginning with 1977, the Secretary shall promulgate a figure which (subject to paragraph (2)) shall be the "inpatient hospital revenue increase limit" applicable to the 12-month period beginning October 1 in such year (with each such 12-month period being referred to in this title as a "period" or a "period subject to this title"). Such figure shall be the sum of—

(A) the implicit price deflator of the Gross National Product as calculated by the Bureau of Economic Analysis of the Department of Commerce and published in the Survey of Current Business (hereinafter in this title referred to as the "GNP deflator") for the 12-month period ending June 30 of such year, and

(B) one-third of the difference between—

(i) the average annual rate of increase in total hospital expenditures which is found by the Secretary to have occurred during the 24-month period ending on the day preceding January 1 of such calendar year, and

(ii) the annual rate of increase in the GNP deflator for the 24-month period ending on the day preceding January 1 of such calendar year.

(2) If the Secretary finds during any period subject to this title that the GNP deflator with respect to such period is expected to exceed by more than one percentage point the GNP deflator which was used in making the determination under paragraph (1) (or in making a prior adjustment under this paragraph), the Secretary shall increase (or further increase) the GNP deflator so used by the amount of such excess; except that no adjustment made under this paragraph shall be effective with respect to any accounting year ending prior to the calendar quarter preceding the calendar quarter in which such adjustment is made.

PROMULGATION OF ADMISSION LOAD FORMULA

SEC. 113. The "admission load formula" shall be promulgated by the Secretary by October 1, 1977, and shall be such that—

(1) a hospital will be allowed an increase in total revenue from inpatient services in any accounting year to the extent (and only to the extent) consistent with the inpatient hospital revenue increase limit promulgated under section 112(b), for the period in which such accounting year or any part thereof falls if admissions in such accounting year have increased by less than 2 percent or declined by less than 6 percent as compared to the base accounting year (2 percent and 10 percent, respectively, in the case of a hospital with no more than 4,000 admissions in the base accounting year);

(2) in the case of a hospital whose admissions in any accounting year are beyond the applicable range set forth in paragraph (1), the amount of total revenue from inpatient services in such year which is otherwise allowed under paragraph (1) shall be further increased for each admission above such range by one-half of the average revenue per admission that would have been allowed under paragraph (1) if the actual percentage change in admissions (as compared to the base accounting year) had been zero, or shall be reduced for each admission below such range by one-half of the average revenue per admission that would have been so allowed, except as provided in paragraph (3); and

(3) in the case of a hospital which had more than 4,000 admissions in the base accounting year, no additional revenue will be allowed for increased admissions (with respect to any accounting year) beyond 15 percent above those in the base accounting year, but the revenue otherwise permitted such a hospital under paragraphs (1) and (2) shall be reduced (dollar for dollar) for decreased admissions (in that year) beyond 15 percent below those in the base accounting year.

BASE INPATIENT HOSPITAL REVENUE

SEC. 114. (a)(1) The revenue base for application of the adjusted inpatient hospital revenue increase limit with respect to any hospital in any accounting year shall (subject to subsection (b)) be the revenue from reimbursement due and inpatient charges imposed for inpatient hospital services provided in the hospital's base accounting year (as defined in paragraph (2)).

(2) For purposes of this title, a hospital's "base accounting year" is its accounting year which ended in 1976, or, in the case of a hospital which did not meet the definition contained in section 121 for at least one full accounting year prior to an accounting year ending in 1976 in which it met such definition, the accounting period immediately prior to the first accounting year in which it satisfied such definition.

(b) The base revenue established for any hospital by subsection (a) shall (except as provided in subsection (c)) be reduced by an amount equal to any inpatient charges in such base accounting year for elements of inpatient services for which payment is not made to the hospital in an accounting year any part of which falls within a period subject to this title.

(c) Subsection (b) shall not apply with respect to revenue for inpatient services which have been found inappropriate under section 1523(a)(6) of the Public Health Service Act by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital involved is located.

ESTABLISHMENT OF EXCEPTIONS

SEC. 115. (a) The Secretary shall have authority to grant exceptions from the limits established under this title to individual hospitals for particular periods, but in any case only to the extent that the hospital requesting the exception provides evidence satisfactory to the Secretary—

(1) of the extent to which costs of providing inpatient hospital services in an accounting year any part of which falls within a period subject to this title exceed such costs in the base accounting year as the result of—

(A) changes in admissions beyond the range specified in section 113(3), or

(B) changes in capacity or in the character of inpatient services available in the hospital or major renovation or replacement of physical plant, but only if such changes have increased inpatient costs per admission by more than one-third of the difference specified in section 112(b)(1)(B) over inpatient care costs per admission in the previous accounting year;

(2) that the revenue otherwise allowable (taking into account all other available resources) is insufficient to assure the solvency of the hospital as indicated by the existence of a current ratio of assets to liabilities (determined in accordance with the last sentence of this subsection) of less than the ratio which the Secretary estimates is being experienced by 25 percent or less of the hospitals subject to this title; and

(3) that the changes in admissions, capacity, plant, or services available generating the excess costs described in paragraph (1) have been found to be needed under section 1523(a)(5) of the Public Health Service Act or appropriate under section 1523(a)(6) of the Public Health Service Act by the State health planning and development agency, designated under section 1521 of such Act for the State in which the hospital involved is located.

For purposes of paragraph (2), the term "current ratio of assets to liabilities", with respect to any hospital, means the sum of the cash, notes and accounts receivable (less reserves for bad debts), marketable securities, and inventories held by such hospital divided by the sum of all liabilities of such hospital falling due in an accounting year for which the exception is requested under this section.

(b) The Secretary shall either approve any request for an exception made by a hospital under subsection (a), or deny such request, within a period not to exceed 90 days after the hospital has filed in a manner and form

prescribed by the Secretary the evidence required by such subsection. Any such request not denied within such 90-day period shall be deemed approved.

(c) Any hospital granted an exception under this section must make itself available for an operational review by the Secretary. The findings from any such review shall be made public, and continuance of the exception shall be contingent on implementation of any recommendations which may be made (as a result of such operational review) for improvements to increase efficiency and economy.

(d)(1) If the Secretary grants an exception with respect to any accounting year to a hospital which had 4,000 or more admissions in the base accounting year on the grounds set forth in subsection (a)(1)(A), such hospital shall be allowed increased revenue for purposes of this title as though it were a hospital with fewer than 4,000 admissions in such base year under section 113.

(2) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(B), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on its allowable rate of increase in inpatient hospital revenues shall be adjusted upward accordingly) in an amount no greater than the amount necessary to maintain the current ratio of its assets to liabilities (determined in accordance with the last sentence of subsection (a)) at the level specified in subsection (a)(2).

(e)(1) Any hospital which is dissatisfied with a determination of the Secretary under this section may obtain a hearing before the Provider Reimbursement Review Board established under section 1878 of the Social Security Act, if the amount in controversy is $25,000 or more and the request for such hearing is filed within 180 days after receipt of the Secretary's determination.

(2) For purposes of paragraph (1), the Secretary (notwithstanding section 1878(h) of the Social Security Act) shall appoint five additional members to the Provider Reimbursement Review Board, following the specifications for expertise applicable to the existing five members. Such five additional members shall constitute the Board for purposes of reviewing appeals under this title. All the other provisions of section 1878 of the Social Security Act shall apply except that the Board as so constituted shall be considered as reviewing decisions of the Secretary rather than of a fiscal intermediary, and subsection (b) of such section shall not apply.

ENFORCEMENT

SEC. 116. (a) Notwithstanding any provision of title XVIII of the Social Security Act, reimbursement for inpatient hospital services under the program established by that title shall not be payable, on an interim basis or in final settlement, to the extent that it exceeds the applicable limits established under this title.

(b) Notwithstanding any provision of title V or XIX of such Act, payment shall not be required to be made by any State under either such title with respect to any amount paid for inpatient hospital services in excess of the applicable limits established under this title; nor shall payment be made to any State under either such title with respect to any amount paid for inpatient hospital services in excess of such limits.

(c) Notwithstanding any other provision of law, receipt by any hospital of payment for inpatient hospital services in excess of the applicable limits established under this title, or payment by any cost payer (as defined in section 122(e)(2)) for inpatient hospital services on a cost basis in excess of such limits, shall subject such hospital or cost payer—

(1) to the Federal excise tax imposed by section 4991 of the Internal Revenue Code of 1954 (as added by section 126 of this Act), and

(2) to exclusion, at the discretion of the Secretary, from participation in any or all of the programs established by titles V, XVIII, and XIX of the Social Security Act.

(d)(1) Where the Secretary determines that average charges per admission billed for inpatient services by a hospital during an accounting year any part of which is included in a period subject to this title exceed the applicable limits established under this title, he shall promulgate (or shall require the hospital to promulgate in such manner as he may prescribe) the percentage by which the average charge per admission billed in that accounting year by the hospital exceeded the applicable limitation on average charges per admission established under this title.

(2) Any hospital described in paragraph (1) shall be exempt from the penalties set forth in subsection (e) if it holds in escrow an amount equal to the percentage promulgated under such paragraph multiplied by the hospital's total inpatient charges less its inpatient charges applicable to cost payers (as defined in section 122(e)), imposed on the accounting year referred to in such paragraph, until such time as charges below the applicable limits established under this title, equal in the aggregate to such amount, are experienced; but any such hospital which fails to do so shall be subject to such penalties.

EXEMPTION FOR HOSPITALS IN CERTAIN STATES

SEC. 117. (a) At the request of the Governor (or other Chief Executive) of any State (including the District of Columbia and Puerto Rico) the Secretary may exclude from the application of this title all hospitals physically located in such State if the Secretary finds that—

(1) such State has had in effect for at least one year as of the date of such request a program for containing hospital costs in the State which covers at least 90 percent of the hospitals in the State which would otherwise be covered under the program established by this title;

(2) the State program applies at least to all inpatient care revenues of such hospitals (except revenues received under title XVIII of the Social Security Act);

(3) the Governor (or Chief Executive) certifies, and the Secretary determines, that the aggregate rate of increase in inpatient hospital revenues for all hospitals in the State will not exceed the rate promulgated by the Secretary under section 112(b); and

(4) the Governor (or Chief Executive) has submitted and had approved by the Secretary, a plan for recovering any excess of revenue which (notwithstanding paragraph (3)) may occur.

(b) A State which would meet the conditions of this section except that its program does not satisfy subsection (a)(2), but whose program did cover at least 50 percent of all inpatient care revenues during the 12-month period preceding the date of its request under subsection (a), will nonetheless be eligible under this section if, by the date of such request, it does have a program which satisfies such subsection.

EXEMPTION FOR HOSPITALS ENGAGED IN CERTAIN EXPERIMENTS OR DEMONSTRATIONS

SEC. 118. A hospital may be excluded from the application of this title if the Secretary determines that (1) such exclusion is necessary to facilitate an experiment or demonstration entered into under section 402 of the Social Security Amendments of 1967 or section 222 of the Social Security Amendments of 1972, and (2) such experiment or demonstration is consistent with the purposes of this title.

PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS

DEFINITION OF HOSPITAL

SEC. 121. (a) For purposes of this title (subject to subsection (b) of this section), the term "hospital", with respect to any accounting year, means an institution (including a distinct part of an institution participating in the program established under title XVIII of the Social Security Act) which—

(1) satisfies paragraphs (1) and (7) of section 1861(e) of the Social Security Act, and

(2) had an average duration of stay of 30 days or less in the preceding accounting year.

(b) An institution shall not be considered a "hospital" during any part of a period subject to this title if with respect to such period it—

(1) is a Federal hospital;

(2) has met the conditions specified in subsection (a) (under present and previous ownership) for less than two years before such period; or

(3) derived more than 75 percent of its in-patient care revenues on a capitation basis, disregarding revenues received under title XVIII of the Social Security Act, from one or more health maintenance organizations (as defined in section 1301(a) of the Public Health Service Act).

OTHER DEFINITIONS

SEC. 122. For purposes of this title—

Accounting Year

(a) The term "accounting year" with respect to any period means—

(1) in the case of a hospital participating in the program established by title XVIII of the Social Security Act, a period of 12 consecutive full calendar months including the same months as the last full reporting period allowed for reimbursement purposes under such title;

(2) in the case of a hospital not participating in the program established by title XVIII of the Social Security Act, a period of 12 consecutive full calendar months including the same months as the last full accounting period used by such other cost payer as the Secretary may designate; and

(3) in the case of a hospital which is not participating in the program established by title XVIII of the Social Security Act and for which the Secretary does not designate an accounting year under paragraph (2), a calendar year.

Inpatient Hospital Services

(b) The term "inpatient hospital services" has the meaning given it by section 1861(b) of the Social Security Act (including in addition the services otherwise excluded by paragraph (5) thereof).

Inpatient Charges

(c) The term "inpatient charges" means regular rates, applied to all inpatient hospital services, that meet the requirements of section 405.452(d)(4) of the Federal regulations applicable to title XVIII of the Social Security Act.

Admissions

(d) The term "admission" means the formal acceptance of an inpatient by a hospital, excluding newborn children (unless retained after discharge of the mother) and transfers within inpatient units of the same institution.

Cost Payer

(e) The term "cost payer" means—

(1) a program established by or under title V, XVIII, or XIX of the Social Security Act, and

(2) any organization which (A) meets the definition contained in section 1842(f)(1)

of the Social Security Act, and (B) reimburses a hospital subject to this title for inpatient hospital services on the basis of cost as defined for purposes of such reimbursement.

DETERMINATION OF INPATIENT REIMBURSEMENT

SEC. 123. For purposes of section 111, inpatient reimbursement under the programs established by titles V, XVIII, and XIX of the Social Security Act shall be determined without regard to adjustments resulting from the application of section 405.460(g), 405.455(d), 405.415(f), or 405.415(d)(3) of the Federal regulations applicable to such title XVIII.

EXEMPTION OF NONSUPERVISORY PERSONNEL WAGE INCREASES FROM REVENUE LIMIT

SEC. 124. (a) At the request of any hospital which is subject to the provisions of this title and which provides the data necessary for the required calculation, the Secretary shall modify the inpatient hospital revenue increase limit and the adjusted inpatient hospital revenue increase limit otherwise established for such hospital with respect to any accounting year under section 112 to allow such hospital to receive, without restriction, revenue equal to the average amount of any increase in regular wages granted in such year to employees who do not meet the definition of "supervisor" as that term is used for purposes of the National Labor Relations Act and (if not employees of a State or political subdivision thereof) who are covered by such Act.

(b) Such modified limits for any accounting year shall be calculated by adding together—

(1) the average percentage increase in regular wages granted to the employees referred to in subsection (a) since the close of the preceding accounting year multiplied by the percentage of total inpatient cost (as determined for purposes of title XVIII of the Social Security Act) attributable to such wages in such preceding year; and

(2) the inpatient hospital revenue increase limit or, as appropriate, the adjusted inpatient hospital revenue increase limit otherwise applicable to the hospital under this title multiplied by the percentage of revenues (as determined for purposes of title XVIII of the Social Security Act) attributable to all other expenses in the preceding accounting year.

(c) The modified inpatient hospital revenue increase limit and adjusted inpatient hospital revenue increase limit established under subsection (b) for any hospital with respect to any accounting year shall constitute such hospital's inpatient hospital revenue increase limit or, as appropriate, the adjusted inpatient hospital revenue increase limit for such year under section 111 for all of the purposes of this title.

(d) This section shall apply to accounting years beginning after March 31, 1979, only to the extent the Secretary so determines.

DISCLOSURE OF FISCAL INFORMATION

SEC. 125. (a)(1) Every hospital shall (A) submit semiannually to the health systems agency designated under section 1515 of the Public Health Service Act for the health service area in which it is located, by March 1 and September 1 of each year, its average semiprivate room rate and the charges for the 10 other services which the health systems agency finds represent the services which are most frequently used or most important for purposes of comparing hospitals, and make available all cost reports submitted to cost payers, and (B) submit annually its overall plan and budget described in section 1864(z) of the Social Security Act.

(2) Failure by any hospital to comply with the requirement of paragraph (1) shall subject it to exclusion, at the discretion of the Secretary, from participation in any or all of the programs established by titles V, XVIII, and XIX of the Social Security Act.

(b) Each health systems agency designated under section 1515 of the Public Health Service Act shall publish every April 1 and October 1, in readily understandable language for public use, the information it receives under this section, in a manner designed to facilitate comparisons among the hospitals in its area.

IMPROPER CHANGES IN ADMISSION PRACTICES

SEC. 126. Upon written complaint by any institution meeting the conditions set forth in paragraphs (1) and (7) of section 1861(e) of the Social Security Act that one or more hospitals subject to this title in a health service area for which a health systems agency has been designated under section 1515 of the Public Health Service Act has changed its admission practices in a manner that would tend to reduce the proportion of inpatients of such hospital or hospitals for whom reimbursement at less than the inpatient charges (as defined in section 122(c) of this Act) applicable to such inpatients is anticipated, such health systems agency shall investigate the complaint and, upon a finding by such agency that the complaint is justified, the Secretary may impose the sanction set forth in section 116(c)(2) of this Act.

REVIEW OF CERTAIN DETERMINATIONS

SEC. 127. Any determinations made on behalf of the Secretary under this title with respect to the application of its provisions to individual hospitals (other than determinations made under section 115 or 126) shall be subject to the provisions of section 1878 of the Social Security Act in the same manner as determinations with respect to the amount of reimbursement due a provider of services under title XVIII of such Act.

EXCISE TAX ON EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

SEC. 128. (a) Subtitle D of the Internal Revenue Code of 1954 (relating to miscellaneous excise taxes) is amended by adding at the end thereof the following new chapter:

"Chapter 45.—TAX ON CERTAIN EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

"Sec. 4991. Imposition of tax.

"Sec. 4991. IMPOSITION OF TAX

"(a) In General.—There is hereby imposed, with respect to the receipt by any hospital of payment for inpatient hospital services in excess of the applicable limits established by title I of the Hospital Cost Containment Act of 1977, and with respect to any payment made by any cost payer as defined in section 122(e)(2) of such Act for inpatient hospital services on a cost basis in excess of such limits, a tax equal to 150 percent of the amount of such excess. The tax imposed by this subsection shall be paid by the hospital or cost payer.

"(b) Exception.—The tax imposed by subsection (a) shall not apply with respect to any hospital so long as it is determined by the Secretary of Health, Education, and Welfare to be taking the corrective action described in section 116(a)(2) of the Hospital Cost Containment Act of 1977.

"(c) Definitions.—Terms used in subsections (a) and (b) have the meanings given them by title I of the Hospital Cost Containment Act of 1977.

"(d) Administration.—Under and to the extent provided by regulations of the Secretary, the appropriate provisions of subtitle F (relating to procedure and administration) shall be made applicable with respect to the tax imposed by subsection (a) of this section.".

(b) The table of chapters for subtitle D of such Code is amended by adding at the end thereof the following new item:

"Chapter 45. Tax on Certain Excessive Payments for Inpatient Hospital Services.".

TITLE II—LIMITATION ON HOSPITAL CAPITAL EXPENDITURES

SEC. 201. (a) Part A of title XV of the Public Health Service Act is amended by adding at the end thereof the following new section:

"LIMITATION ON HOSPITAL CAPITAL EXPENDITURES, CEILING FOR THE SUPPLY OF HOSPITAL BEDS, AND STANDARD FOR OCCUPANCY OF HOSPITAL BEDS

"SEC. 1504. (a)(1) Before the beginning of the fiscal year beginning October 1, 1977, and at least 60 days before the beginning of each succeeding fiscal year, the Secretary shall promulgate a sum as a hospital capital expenditure limit applicable to such fiscal year. The sum promulgated as a limit under the preceding sentence for any period shall be an amount which may not exceed $2,500,000,000.

"(2) The Secretary shall apportion the sum promulgated under paragraph (1) for any fiscal year among the various States on the basis of the population of the various States; except that for any fiscal year beginning more than 18 months after the date of enactment of this section the Secretary shall apportion the sum promulgated under paragraph (1) for such fiscal year among the various States, taking into account the population of the various States; and also taking into account, to the extent feasible, variations among the States in the costs of construction, population patterns and growth, the need for hospital facilities and equipment and for modernization of existing hospital facilities and equipment, and other factors important to the equitable apportionment of such sum.

"(b)(1) At the time the Secretary promulgates under subsection (a) a hospital capital expenditure limit the Secretary shall also promulgate for the fiscal year to which such limit is applicable—

"(A) a national ceiling for the supply of hospital beds within health service areas established under section 1511 (hereinafter in this title referred to as the 'supply ceiling'), and

"(B) a national standard for the rate of occupancy of hospital beds within such areas (hereinafter in this title referred to as the 'occupancy standard').

"(2) The supply ceiling promulgated for any fiscal year under paragraph (1)(A) may not exceed the ratio of 4 hospital beds per 1,000 of population; but the Secretary may promulgate under such paragraph a different supply ceiling for health service areas which have special characteristics or which meet special requirements established by the Secretary.

"(3) The occupancy standard promulgated under paragraph (1)(B) for any fiscal year may not be less than 80 percent; but the Secretary may establish a different occupancy standard for health service areas which have special characteristics or which meet special requirements established by the Secretary.".

(b)(1) Part C of title XV of the Public Health Service Act is amended by adding at the end thereof the following new section:

"CERTIFICATE OF NEED PROGRAM

"SEC. 1527. (a) The certificate of need program required by section 1523(a)(4)(B) shall provide for the following:

"(1) Review and determination of need under such program of institutional health services, health care facilities, and health maintenance organizations shall be made before the time such services, facilities, and organizations are offered or developed or

substantial expenditures are undertaken in preparation for such offering or development.

"(2) The program shall be administered in such a manner that only those services, facilities, and organizations found to be needed shall be offered or developed in the State in which the program applies.

"(3) In issuing a certificate of need for any such service, facility or organization, the State shall specify in the certificate the maximum amount of capital expenditures which may be made for such service, facility, or organization under such certificate.

"(4) The aggregate of the maximum amounts of capital expenditures authorized in a fiscal year in accordance with paragraph (3) for hospitals may not exceed the portion of the sum promulgated under section 1504(a)(1) and apportioned to the State under section 1504(a)(2) for such fiscal year, as adjusted in accordance with this paragraph. For any fiscal year the sum apportioned to a State under section 1504(a)(2) shall (A) if the aggregate of the maximum amounts of capital expenditures authorized by the State in the preceding fiscal year in accordance with paragraph (3) for hospitals was less than the portion of such sum so apportioned to the State for such fiscal year, the difference between such authorized maximum amounts and the sum so apportioned shall be added to the sum so apportioned to the State for the fiscal year following such fiscal year, and (B) if in the fiscal year there was a closure of a hospital (or part thereof) through which institutional health services found under section 1523(a)(6) to be inappropriate were provided, then the amount by which the historical cost (as defined for purposes of title XVIII of the Social Security Act) of such hospital or part exceeds the total Security Act) of such hospital or part exceeds the total amount of depreciation of such hospital or part claimed for purposes of establishing the reasonable costs of services provided by the hospital for purposes of receiving reimbursement under title XVIII of the Social Security Act shall be added to the portion of such sum so apportioned to the State for such fiscal year.

"(b)(1) Under such a certificate of need program a certificate of need may not, except as provided in paragraph (2), be granted for an institutional health service or health care facility within a health service area established under section 1511 if the development of such service or facility under such certificate would result in a number of hospital beds within such area which is in excess of the applicable supply ceiling promulgated under section 1504(b)(1)(A).

"(2) If in a health service area the number of hospital beds is in excess of the supply ceiling applicable to a fiscal year, then a certificate of need may be granted for such a service or facility the development of which would result in a number of new hospital beds which is not more than one-half of the number of hospital beds removed permanently from service in such area in such fiscal year.

The amount by which the number of new hospital beds with respect to which certificates of need may be issued in a fiscal year under the preceding sentence is less than the number of new hospital beds with respect to which certificates of need were issued in such fiscal year may be added to the number of new hospital beds with respect to which certificates of need may be issued in the succeeding fiscal year.

"(c)(1) Under such a certificate of need program a certificate of need may not, except as provided in paragraph (2), be granted for an institutional health service or health care facility within a health service area if the development of such service or facility could reasonably be expected to produce a number of hospital beds which would result in a hospital bed occupancy rate within such area which is less than the applicable occupancy standard promulgated under section 1504(b)(1)(B).

"(2) If in any fiscal year the hospital bed occupancy rate within a health service area is less than the occupancy standard applicable for such fiscal year, then a certificate of need may be granted for a service or facility the development of which would result in a number of new hospital beds which is not more than one half of the number of hospital beds removed permanently from service in such area in such fiscal year. The amount by which the number of new hospital beds with respect to which certificates of need may be issued in a fiscal year under the preceding sentence is less than the number of new hospital beds with respect to which certificates of need were issued in such fiscal year may be added to the number of new hospital beds with respect to which certificates of need may be issued in the succeeding fiscal year.

"(d) In granting certificates of need under such a program a State shall take into account priorities recommended by health systems agencies within the State under section 1513(h).".

(2) The second sentence of section 1523(a)(4) of the Public Health Service Act is repealed.

(c) Section 1531 of the Public Health Service Act is amended (1) by striking out "For purposes of this title" and inserting in lieu thereof, "Except as otherwise provided for purposes of this title", and (2) by adding after paragraph (5) the following new paragraphs:

"(6) For purposes of section 1504 and 1527, the term 'hospital', with respect to any accounting year, means an institution (including a distinct part of an institution participating in the program established under title XVIII of the Social Security Act) which—

(A) satisfies paragraphs (1) and (7) of section 1861(e) of the Social Security Act, and

(B) has an average duration of stay of 30 days or less in the preceding accounting year,

except that for any fiscal year such term does not include a Federal hospital or an institution which during such fiscal year derived more than 75 percent of its inpatient care revenues on a capitation basis, disregarding revenues received under title XVIII of the Social Security Act, from one or more health maintenance organizations (as defined in section 1301(a)).

"(7) For the purposes of sections 1504 and 1527, the term 'capital expenditure' means an expenditure which, under generally accepted accounting principles, is not properly chargeable as an expense of operation and maintenance and which (A) exceeds $100,000, (B) changes the bed capacity of the facility with respect to which such expenditure is made, or (C) substantially changes the services of the facility with respect to which such expenditure is made, except that such term includes expenditures for obtaining a facility or part thereof, or equipment for a facility or part, under a lease or comparable arrangement but does not include the acquisition of an existing hospital facility if such acquisition does not make a change in the services or bed capacity of such hospital facility. For purposes of clause (A) of the preceding sentence, the cost of the studies, surveys, designs, plans, working drawings, specifications, and other activities essential to the acquisition, improvement, expansion, or replacement of the plant and equipment with respect to which such expenditure is made shall be included in determining whether such expenditure exceeds $100,000. If a person makes an acquisition of equipment for a hospital and donates it to the hospital, the expenditure for such acquisition shall be considered a hospital capital expenditure for purposes of sections 1504 and 1527.".

(d) Section 1532(b)(2) of the Public Health Service Act is amended (1) by striking out "ninety days" and inserting in lieu thereof "one year", and (2) by adding before the period "or longer than such shorter period from such date as the Secretary may prescribe".

SEC. 202. (a)(1) Section 1122 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(j)(1) Except as provided in paragraph (2), in determining the Federal payments to be made under titles V, XVIII, and XIX with respect to services furnished in a health care facility located in a State—

"(A) which has not entered into an agreement with the Secretary under this section, or

"(B) which does not have a certificate of need program approved under title XV of the Public Health Service Act,

the Secretary shall not include an amount equal to ten times any amount which is attributable to depreciation, interest on borrowed funds, and return on equity capital (in the case of proprietary facilities) or other expenses related to capital expenditures after September 30, 1977, for such health care facility unless the Secretary has approved, in accordance with procedures and criteria established by the Secretary, such expenditures after taking into account any recommendation made by a State agency designated under section 1521 of the Public Health Service Act. With respect to any organization which is reimbursed on a per capita or a fixed fee or negotiated rate basis, in determining the Federal payments to be made under titles V, XVIII, and XIX, the Secretary shall exclude an amount which in his judgment is a reasonable equivalent to the amount which would otherwise be excluded under this subsection if payment were to be made on other than a per capita or a fixed fee or negotiated rate basis.

"(2) Paragraph (1) shall not apply with respect to determination of Federal payments to be made under title V, XVIII, or XIX with respect to services furnished in a health care facility located in a State which has a certificate of need program, approved by the Secretary for purposes of this section, which applies to capital expenditures for hospitals and with respect to which such capital expenditures meet the requirements of section 1527 of the Public Health Service Act.".

(2) Subsection (e) of such section 1122 is amended by striking out "subsection (d)" and inserting in lieu thereof "subsection (d) or (j)".

(3) Subsection (b) of such section 1122 is amended by inserting before the period at the end thereof the following: "or does not meet any applicable requirement of subsection (a)(4), (b), or (c) of section 1527 of the Public Health Service Act".

(4) Subsection (d)(1) of such section 1122 is amended by striking out "any amount" in the matter following subparagraph (B) of the first sentence of such section and inserting in lieu thereof "an amount equal to ten times any amount".

(b) The amendments made by subsection (a) shall apply with respect to capital expenditures made after September 30, 1977.

SEC. 203. (a) Section 103 of the Internal Revenue Code of 1954 (relating to exclusion from gross income of interest on certain governmental obligations) is amended by redesignating subsection (f) as subsection (g), and by inserting after subsection (e) the following new subsection:

"(f) Obligations Supporting Increases in Acute Care Hospital Beds.—Any obligation issued by a State or territory for an institutional health service, health care facility, or health maintenance organization—

"(1) the development of which would result in a number of hospital beds within a health service area which number is in excess of the applicable supply ceiling for such area promulgated under section 1504(b)(1)(A) of the Public Health Service Act, or

"(2) for which a certificate of need has not been issued under a certificate of need program approved under title XV of the Public Health Service Act, shall be treated as an obligation not described in subsection (a)(1).".

(b) The amendments made by subsection (a) shall apply with respect to taxable years beginning after the date of the enactment of this Act.

INDEPENDENT LIVING PROGRAMS FOR THE HANDICAPPED ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maine (Mr. COHEN) is recognized for 5 minutes.

Mr. COHEN. Mr. Speaker, I am pleased to join with Congressman KOCH in sponsoring legislation to provide supports for the handicapped so that they can live independently in their own homes.

One month from today, we will be in the midst of the White House Conference on Handicapped Individuals. The purpose of that conference will be to suggest how this country may give its handicapped citizens a chance to live as well as other citizens, despite their afflictions.

This conference is by no means the first attention this country has given to the needs of the handicapped. Since I came to Congress, we have passed such important pieces of legislation as the Education for All Handicapped Children Act and the Rehabilitation Act. We have provided several programs to increase accessibility for the handicapped to our transportation systems, housing, and places of business. In this regard, I was pleased to have authored legislation, later amended to the Tax Reform Act of 1976, which provided tax incentives for the removal of architectural and transportational barriers from the paths of the handicapped.

This year, Congressman KOCH and I have already sponsored legislation to make voter registration sites and polling places accessible to the handicapped. I believe the bill we are introducing today is another step in the difficult struggle to achieve equality of opportunity and acceptance that we all seek from our society.

As a member of the House Select Committee on Aging, I have recognized the value of sustaining individuals so that they may continue to live in their own homes. The services envisioned by this demonstration bill—such as continuous wheelchair repair, attendant screening and referral, housing and transportation referral and assistance, and employment and economic counseling—will promote the independence, productivity, and quality of life of disabled individuals. If we recognize the needs of the handicapped and take initiatives to fullfill those needs, the handicapped will cease to be burdens and their talents and abilities will in turn benefit us all.

SAYING HAPPY ANNIVERSARY TO ISRAEL IS NOT ENOUGH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. BURKE) is recognized for 30 minutes.

Mr. BURKE of Florida. Mr. Speaker, it is with special pride that I join with my colleagues in the U.S. House of Representatives in commemorating the 29th anniversary of the birth of the State of Israel. This observance has special significance this year for as renewed attention is being focused upon the violations of human rights, the struggle of the State of Israel serves to remind us of that insatiable quest for freedom which lies at the heart of the human spirit.

Mr. Speaker, ever since the State of Israel was first established on April 21, 1948, the Arab States have waged war against her on four fronts: military, diplomatic, economic, and by propaganda. Punctuating the gunfire, there has been a never-ending propaganda effort to capture world opinion and to isolate Israel. Throughout her 29 years of existence—and through four costly wars for survival—Israel has had to struggle to maintain her right to exist. And yet, through all the adversity Israel has not only maintained her independence, but she has also been a beacon of freedom in an increasingly hostile world.

While there has never been any formal treaty committing the United States to take actions of any kind in response to Israel's defensive needs, the American commitment to the survival of Israel has been affirmed by every U.S. President since 1948. The United States stands committed to the survival and integrity of the State of Israel and this has been the bipartisan basis of American policy over the past 29 years and under seven administrations. And the reason for this policy is clear: it is a vital interest of the United States to assure that its ally—Israel—is powerful. A strong Israel is a strategic asset for the United States. A weak Israel is a liability.

Mr. Speaker, it is a keystone of American principles and policies that the U.S. commitments abroad should be oriented toward the survival of democratic states. Here, Israel's importance to the United States is manifest. The very presence of Israel in the Middle East lends not only a military stability to the area, but it also lends a political presence which would not otherwise exist. This presence helps to promote the development of free and democratic institutions. It helps the United States to stand in opposition to those forces of totalitarianism both on the right and on the left. In short, by acting as a bulwark against these forces, Israel is contributing substantially toward the institutionalization of democratic principles which wherever they are found serve to enhance the security of the United States.

Mr. Speaker, the United States recognizes Israel as one of her strongest and most reliable democratic allies. The strong bonds between the two countries are based upon common ideals and a shared commitment to freedom. As we commemorate Israel's 29th birthday, let us reaffirm the basic truth that the long-term survival of the United States and Israel are inextricably bound together Both nations have a solemn commitment to freedom. And it is the steadfastness with which Israel has honored this commitment which we celebrate today.

But Mr. Speaker, on this 29th birthday, I feel it would be wrong to recognize Israel on this 29th anniversary of its existence without expressing my opposition to President Carter's recent suggestion as to how to bring a peace settlement in the Middle East. It is my belief that to take the President's course is dangerous and should be opposed.

Mr. Speaker, in a news conference held only 2 days after the Prime Minister of Israel—Mr. Yitzhak Rabin—arrived in Washington for talks with the President, Mr. Carter outlined his vision of a Middle East peace settlement. Distinguishing between legal frontiers, geographical borders, and defense lines, he indicated that Israel's defense borders did not necessarily have to conform to her recognizable legal borders. In fact, he said that in order for Israel to enjoy a termination of belligerence toward her by her neighbors, Israel would have to substantially withdraw from the territory she has occupied since the 1967 war. He made it clear that as long as Israel was able to defend herself, these changes should not matter.

As an adjunct to this, President Carter also announced that it would be United States policy to mount a major effort to bring the parties together in Geneva where it would act as intermediary in the conflict.

Mr. Speaker, I believe President Carter is in error on this issue for three basic reasons. In meetings and my travels to the Golan Heights and my observations I feel that the parties involved in the Middle East can best resolve their own problems. Interference by the so-called super powers cannot help the security of the State of Israel nor lead to a lasting peace in the region. In fact, it is my view also that to push a settlement with assurance of peace is against the national interests of the United States and could lead to ultimate hazard for the world.

Mr. Speaker, if Israel were to submit to a hasty peace settlement drawn up at American insistence, I believe that it could only make Israel more vulnerable to possible increased terrorism by her enemies—not to mention the manifold political demands which would carry more weight in such a situation. Since the 1967 war, Israel has acquired territory which has made it possible to have a defense-in-depth for the first time since becoming a state. This affords Israel an

enhanced military security—as well as a political security—which profoundly affects all aspects of Israeli life. To move hastily toward some kind of peace settlement that substantially changes the present arrangement could easily unravel Israel's present security position and undermine whatever prospects for peace now exist.

Mr. Speaker, if we have learned anything from our experience in Vietnam, it is that any peace settlement must come about as the result of a slow evolutionary process. The passions of hatred and enmity run too deep and are too strong to ever be removed by the simple negotiation of a paper document. If there is to be a lasting peace in the Middle East, the way for it must be paved in the minds and the hearts of the people themselves. Any other kind of settlement is entirely too fragile and tends to overlook the vast political, social, economic, military, and ideological forces which militate against it. More than negotiations are needed to bring about a peace settlement. There must be a basis both in the domestic and in the international policies of the parties involved.

In addition, we should not be unmindful of the consequences which could ensue should the Arab States not have to contend with the possibility of an Israeli attack. As is commonly known, there are numerous Palestinians residing in Israel. These people constitute a potential fifth column which if agitated could terrorize the entire country. If the level of engagement were to be transferred from one of possible conventional warfare to all-out terrorist and guerrilla warfare, the danger to Israel could become significantly greater than it presently is.

Nor should we think that deepening involvement in the Middle East is in the best interests of the United States. There are those in the Congress who think that because of our leading role in this area that the United States is in a stronger position than it has been for some time. I profoundly disagree.

Mr. Speaker, it is my belief that the very fact that the United States is attempting to force a settlement on Israel is a sign not of our enhanced position in the Middle East. On the contrary, it is a sign of a national weakness stemming from a loss of American power in the region and its corollary—the willingness to compromise our national interest. And even more significantly, this becomes the source for the strength of the oil cartel.

Mr. Speaker, there can be no doubt that Russian influence has diminished in the area. But, what they have lost they can always regain if the United States fails to satisfy the Arab countries. The crucial factor in the Middle East politics is the leverage the Arab nations have acquired by virtue of their control over the supply and the price of oil—as well as the added leverage they enjoy as a consequence of the uncertainties that will necessarily arise in the event of another Middle East war. This leverage both conditions and compromises American policy in this region. It places severe constraints on the freedom of action we would otherwise enjoy.

Let there be no doubt. The United States finds itself in a position of weakness precisely because of a "felt need" to be responsive to the interests of the Arab States. And the net result of this leverage is that U.S. policy will more and more be forced to pressure Israel to make concessions in order to keep oil flowing to Western nations at a reasonable price.

Mr. Speaker, the fact that President Carter is beginning to pressure Israel to accept the terms of a dictated peace can only be interpreted to mean that the United States is acting not out of strength, but out of weakness. We are acting as instruments in the hands of the Arab oil cartel. To continue to pursue such a policy will not lead to lasting peace in the Middle East, nor will it protect the interests of either the United States or Israel. It is just another chapter in what has become a slow, but continual, retreat of American power. And I am strongly opposed to such a policy.

PERSONAL EXPLANATION

The SPEAKER. Under a previous order of the House, the gentleman from New Jersey (Mr. LE FANTE) is recognized for 5 minutes.

Mr. LE FANTE. Mr. Speaker, I regret that due to official business in my District, I was unable to be on the floor of the House on Wednesday, April 20, 1977 when the vote was taken on H.R. 5840, amendments to the Export Administration Act. Had I been present, I would have voted in favor of the bill.

CANADIAN FISHING AGREEMENT OPPOSED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AUCOIN) is recognized for 5 minutes.

Mr. AUCOIN. Mr. Speaker, today I voted no on legislation approving a reciprocal international fishing agreement with the Government of Canada. This vote was cast in protest over the State Department's refusal to press the Canadians during these negotiations to adopt fishing seasons consistent with those proposed on the west coast.

I would like my colleagues to understand why this issue is so important to Oregon's fishermen. Recently the Pacific Regional Fishery Management Council proposed, pursuant to the new 200-mile law, a salmon management plan which would close the month of June to all commercial trolling. While the council claims this action was necessary to insure an adequate escapement of young salmon, what it does is to allow these salmon to cross into Canadian waters only to be caught there. It is estimated that at least 30 percent of the fish which escape U.S. trollers in June will be caught by the Canadians. Other estimates have it at 50 percent. This would not be a problem if Canada and the United States adopted consistent seasons.

If one objective of the fisheries management plans envisioned in the 200-mile law is the enhancement of the fish resource, the cooperation of Canada is essential. It is useless to regulate fishing off America's coast if actions taken by the Government of Canada only serve to negate these benefits to the advantage of Canada.

West Coast trollers can expect to suffer substantial—if temporary—loss of income in the name of fishery conservation. This sacrifice is hard to swallow if you realize, as the trollers do, that the fish they pass up will end up in the hands of foreign fishermen.

For this reason I vigorously protested in the Merchant Marine and Fisheries Committee the failure of the State Department to consider this issue. I won a pledge from the Department to take this matter up as soon as the negotiations are resumed on a permanent agreement. But this does not lessen my extreme dissatisfaction with the 1 year provisional agreement which the House considered today.

STANDARDS FOR NO-FAULT MOTOR VEHICLE ACCIDENT BENEFITS ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Moss) is recognized for 10 minutes.

Mr. MOSS. Mr. Speaker, I am pleased to introduce today, together with Mr. MURPHY, Mr. VAN DEERLIN, Mr. SCHEUER, Mr. METCALFE, and 8 other cosponsors, the Standards for No-Fault Motor Vehicle Accident Benefits Act.

Mr. Speaker, no one needs to be told that our system for compensating motor vehicle accident victims is seriously ailing. The liability system has a well documented history of leaving accident victims unpaid, underpaid, or paid long after the doctor bills and other loss payments fall due. A 26-volume Department of Transportation study concluded:

> In summary, the existing system ill serves the accident victim, the insuring public and society. It is inefficient, overly costly, incomplete, and slow. It allocates benefits poorly, discourages rehabilitation, and overburdens the courts and the legal system.

The basic concept of no-fault is to replace the antiquated "get-a-lawyer-and-sue" liability system with a "get-paid-out-of-your-own-policy-no-matter-who-is-at-fault" system.

Under a no-fault system, you buy insurance that will compensate you for your injuries in an accident, instead of buying insurance to protect your assets against the possibility that you will be found "at fault" in an accident, usually through a costly, time-consuming lawsuit.

It is important to note, Mr. Speaker, that when we speak of a no-fault system, we are not saying that irresponsible drivers should go unpenalized. They should be held accountable. This bill provides that programs designed to deter negligence, such as fines, drivers license suspension and revocation, compulsory driver education, and others, should be continued. But we cannot allow the process of setting penalties to get in the way of providing victims with the benefits they need to bring about a full recovery as quickly and completely as possible. Thus it is only the compensation system

that would operate on a no-fault basis under this legislation, not the penalty system, which would remain under the control of local and State authorities.

This legislation provides for no-fault systems established and run by each State, according to standards set forth in the bill. It does not impose a Federal no-fault program. The States are allowed wide latitude under the standards this legislation would create. The role of the Federal Government is kept to a reasonable minimum.

An identical bill is also being introduced today by a bipartisan group of Senators and has broad-based support among labor and consumer groups as well as in the insurance industry. This wide support is in clear recognition of the relative merits of the new no-fault over the current tort liability system. The tort system:

First. Pays benefits to fewer than 50 percent of accident victims.

Second. Distributes benefits inequitably—paying victims with small economic losses 4½ times their actual loss while paying victims with $25,000 or more in economic losses only 30 percent.

Third. Pays for losses after 16 months.

Fourth. Overall, pays victims 44 cents out of each premium dollar.

Fifth. Pays attorneys 20 cents out of each premium dollar.

By contrast, the no-fault insurance system:

First. Pays benefits to all accident victims.

Second. Pays the actual economic losses of victims, including the cost of all reasonable medical and rehabilitation expenses up to $100,000 and up to a year's lost wages for the average worker.

Third. Pays for losses within 30 days of when they accrue.

Fourth. Pays victims 60 cents out of each premium dollar.

Fifth. Pays attorneys 5 cents out of each premium dollar.

The no-fault system is able to pay more benefits to more victims because it eliminates in large part the inefficient frictional cost of lawsuits, with their substantial attorneys' fees, and the gross overcompensation of victims with small economic losses that takes place under the fault system because of the "nuisance value" of any person's claims.

In fact, the only organized and consistent opposition to no-fault has come from the trial lawyers who stand to lose the fees these lawsuits generate, an amount totalling $1.500,000,000 annually. The efforts of these same lawyers have prevented the States from enacting effective no-fault programs. Of the 24 States that have revised their vehicle accident compensation systems, only one law—that of the State of Michigan, comes close to meeting the minimum provisions of a good no-fault program. That law is working well to pay all victims promptly at reasonable cost. Most of the other laws either provide inadequate benefits for the seriously injured, or too low a tort threshold to keep premiums at reasonable levels.

Fears that no fault systems will increase premium costs are unfounded. These fears grow out of the poorly functioning efforts in States other than Michigan, and do not reflect what can be expected under no-fault programs established under this legislation. In fact, cost estimates of past no-fault bills, applied to this legislation, suggest a cost savings in bodily injury premiums of more than 10 percent for the average insurance buyer.

The overriding purpose of this no-fault legislation is to put accident victims back on their feet and back on the job as soon as possible, and to repay them quickly for out-of-pocket financial losses resulting from an accident. To accomplish this objective, the legislation contains several key provisions.

First, the legislation would require State programs to provide a minimum of $100,000 for medical benefits, or under certain conditions to provide medical benefits for a minimum 2-year period. These benefits must be paid to victims within 30 days of the submission of a reasonable proof of loss, or within 15 days after the close of each period, if loss claims are submitted on a periodic basis.

Second, in addition to medical benefits, State plans would also require the following minimum coverages: $12,000 in work loss benefits; $7,300 for replacement services benefits; and $1,000 for funeral and death benefits.

If necessary, States would be permitted to reduce benefits other than medical benefits or funeral benefits, if it is necessary to keep premiums from rising above the cost of pre-existing coverage, other than to account for inflation.

For individuals who wish coverages greater than a basic policy would provide, States must require sellers of insurance to offer higher levels of coverage, for example, up to $1 million in medical payments, at comparably higher rates.

Third, the bill would permit victims to sue for any economic loss that is not covered by no-fault benefits. Also, the measure would permit seriously injured victims to sue for their pain and suffering as well.

Fourth, State plans must require each owner to maintain continuous coverage. This coverage is designed to apply to each insured person, rather than to an insured vehicle, to cover the widest possible range of accident situations.

Fifth, broad consumer protection measures are included, among them restrictions on cancellation of coverage, adequate information on cost and availability for prospective purchasers of compulsory coverage, accountability of medical providers, and rehabilitation services meeting basic standards. The legislation encourages each State to move aggressively to require that medical and rehabilitation services paid for under the State's no-fault program meet adequate quality standards.

Sixth, a procedure is established for granting approval of State plans and for working out means for States to meet Federal standards in instances where difficulties arise. Only if a State fails to enact and maintain a plan that meets the basic standards the Federal Government, specifically the Secretary of Transportation, may implement a no-fault plan in that State.

Mr. Speaker, these are the major provisions of the Standards for No-fault Motor Vehicle Accident Benefits Act. I believe its approach is entirely reasonable and an extremely workable balance between Federal and State interests. More importantly, it will enable this Congress, the Federal Government, the States and society as a whole to meet the obligation to eliminate the persistent horrors of our current system by meeting the needs of millions of accident victims each year. Thank you.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. OAKAR) is recognized for 5 minutes.

Ms. OAKAR. Mr. Speaker, I was unavoidably absent yesterday when the House voted on H.R. 3340, which would amend the provisions of the tax code concerning individuals who use a part of their home to provide day care services.

Had I been present, I would have voted yea.

CONGRESSMAN BRADEMAS HONORS SAUL BELLOW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. THOMPSON) is recognized for 10 minutes.

Mr. THOMPSON. Mr. Speaker, recently my good friend and valued colleague, JOHN BRADEMAS, spoke at a dinner honoring the Nobel laureate author, Saul Bellow. Congressman BRADEMAS' remarks contain provocative insights into the role of the humanities in the contemporary world as well as highlighting the enormous contribution of Saul Bellow to modern literature. I would like to take this opportunity to share these remarks with my colleagues:

REMARKS OF CONGRESSMAN JOHN BRADEMAS

I count it an honor to have been invited to offer a few remarks on the occasion of the 6th Annual Jefferson Memorial Lecture.

Now, although my father was born in Greece, I hope that I shall not be charged with ethnic chauvinism if I here recall for you those first lines of a poem by that extraordinary Greek of Alexandria, Constantine P. Cavafy:

"Ordinary mortals know what's happening now, the gods know what the future holds because they alone are totally enlightened. Wise men are aware of future things just about to happen."

As I think of our honored guest tonight, I must say that, measured by Cavafy's test—awareness of future things just about to happen—we are in the presence of a very wise man, indeed.

It is nearly a quarter of a century now since I read Saul Bellow's big, wonderful, roaring novel, "The Adventures of Augie March," and that his achievements since won him the Nobel Prize last year should be no occasion for surprise to any of us in this room.

Indeed, I believe that in Saul Bellow's moving lecture before the Swedish Academy in December, one can find lessons for us all both about the purposes of the agency of government which is the sponsor of the Jef-

ferson Lecture and about the role, more broadly, of the humanities in our own lives.

For in his Nobel Prize lecture, Mr. Bellow expressed his concern about what he perceived to be the separation in the West between some great artists and the general public, artists, he said, who "developed a marked contempt for the average reader and the bourgeois mass."

Central to the purpose of the National Endowment for the Humanities, I suggest, is the stimulation of activities of the mind and the imagination, activities which, while of high quality, ought nonetheless to be within the reach of the millions of the American society.

There is an echo of this commitment of the Endowment, at least when it is operating at its best, to both quality and accessibility, in the question Mr. Bellow raised at Stockholm:

"What would writers do today if it would occur to them that literature might once again engage those 'central energies', if they were to recognize that an immense desire had arisen for a return from the periphery, for what was simple and true?"

Stimulating writers—and others—to 'engage those central energies', is, I reiterate, a large part of what the National Endowment for the Humanities is all about.

And let me here interject that I trust I shall not be taken as partisan when I say that I believe that what in large measure has caused President Carter to come to command such broad confidence among the American people is, beyond his uncommon intelligence, a conviction on their part that his own basic values, like the best in the American heritage, are, in Mr. Bellow's words, "simple and true."

But there is a further lesson of which the achievement of Saul Bellow reminds us. It is of the indispensability to what he calls the "main human enterprise" of art and literature, of the life of the mind and the imagination.

Allow me to make my point by recalling how, in 1970, when several of my colleagues and I decided to write legislation providing funds for elementary and secondary schools to offer courses on environment, I picked up the phone in Washington and called Robert Motherwell to ask him to be a witness on the first day of our hearings.

He said, "Why do you want me to testify on environmental education? I'm a painter."

I responded:

"Because we want to establish at the outset that in discussing the environmental crisis, we are talking about far more than clean air, land and water. We are talking about the fundamental values of human life."

Motherwell said, "I'll come", and his eloquent testimony that day says from the perspective of a painter what Saul Bellow says to us as a writer.

Said Motherwell:

"I speak only as an artist, but to speak as an artist is no small thing. Most people ignorantly suppose that artists are the decorators of our human existence, the esthetes to whom the cultivated may turn when the real business of the day is done. But actually what an artist is, is a person skilled in expressing human feeling.

"Far from being merely decorative, the artist's awareness with his sense of proportion and harmony, is one of the few guardians of the inherent sanity and equilibrium of the human spirit that we have."

Saul Bellow is one of these guardians.

AMENDMENTS TO FIRST CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. GIAIMO) is recognized for 5 minutes.

Mr. GIAIMO. Mr. Speaker, on Tuesday, April 26, and Wednesday, April 27, 1977, the House will consider the First Concurrent Resolution on the Budget for fiscal year 1978—House Concurrent Resolution 195.

The Committee on the Budget has authorized me to offer two floor amendments to reflect the adjustments made necessary by developments occurring subsequent to the date on which the resolution was reported to the House. The amendments, with supporting explanations, follow. I ask my colleagues to support these important adjustments:

AMENDMENT TO H. CON. RES. 195 BY MR. GIAIMO

Insert the following new section:

SEC. 4. Pursuant to section 304 of the Congressional Budget Act of 1974

(1) Section 1 of S. Con. Res. 10 is amended to read as follows:

"That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $355,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $3,300,000,000;

(2) the appropriate level of total new budget authority is $469,700,000,000;

(3) the appropriate level of total budget outlays is $414,250,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $59,250,000,000; and

(5) the appropriate level of the public debt is $707,970,000,000."

(2) Section 2, paragraph (10) of S. Con. Res. 10 is amended to read as follows:

"(10) Income Security (600):

(A) New budget authority, $167,700,000,000;

(B) Outlays, $138,100,000,000."

HOUSE BUDGET COMMITTEE AMENDMENT

ADJUSTMENT TO 3D BUDGET RESOLUTION FOR FISCAL YEAR 1977 TO EXCLUDE $50 REBATE

[In millions of dollars]

	Fiscal year 1977		
	3d budget resolution	Committee amendment	Resolution as amended
1. Adjustment to budget aggregates:			
Revenues	347,700	+7,300	355,000
Decrease	(10,600)	(−7,300)	(3,300)
Budget authority	472,900	−3,200	469,700
Outlays	417,450	−3,200	414,250
Deficit	69,750	−10,500	59,250
Debt subject to limit	718,400	−10,430	707,970
2. Adjustment to functional categories:			
600—Income security:			
Budget authority	170,900	−3,200	167,700
Outlays	141,300	−3,200	138,100

3. Explanation: The committee amendment makes the necessary adjustments to the Third Budget Resolution for FY 1977 to remove provision for the $50 individual tax rebate and payment proposal. The total impact of the amendment is to reduce the deficit by $10.5 billion to $59.25 billion. Removal of the tax rebate provision increases the estimate for total revenues to $355.0 billion, which reflects a $7.3 billion increase. Budget authority and outlays in the budget resolution totals and the functional category for Income Security are reduced by $3.2 billion each. It had been estimated that payments to social security, supplemental security income, and railroad retirement recipients would cost about $1.8 billion and that payments to recipients of the earned income credit and others with earned income but limited tax liability would cost about $1.4 billion.

AMENDMENT TO H. CON. RES. 195 BY MR. GIAIMO

On page 2, line 2 strike out $462,349,000,000 and insert in lieu thereof $463,864,000,000;

On page 2, line 5 strike out $64,255,000,000 and insert in lieu thereof $65,770,000,000;

On page 2, line 7 strike out $801,100,000,000 and insert in lieu thereof $792,100,000,000;

On page 2, line 9 strike out $101,100,000,000 and insert in lieu thereof $92,100,000,000;

On page 3, line 9 strike out $2,880,000,000; and insert in lieu thereof $4,395,000,000.

HOUSE BUDGET COMMITTEE AMENDMENT

ADJUSTMENT TO THE 1ST BUDGET RESOLUTION FOR FISCAL YEAR 1978 TO INCLUDE A REESTIMATE OF COMMODITY PROGRAMS (CCC)

[In millions of dollars]

	Fiscal year 1978		
	1st budget resolution	Committee amendment	Resolution as amended
1. Adjustment to budget aggregates:			
Revenues	398,094	----------	398,094
Decrease	(1,073)	----------	(1,073)
Budget authority	500,764	----------	500,764
Outlays	462,349	+1,515	463,864
Deficit	64,255	+1,515	65,770
Debt subject to limit	801,100	−9,000	792,100
Increase	(101,100)	(−9,000)	(−92,100)
2. Adjustment to functional categories:			
350—Agriculture:			
Budget authority	2,153	----------	2,153
Outlays	2,880	+1,515	4,395

3. Explanation:

The committee amendment adds $1,515 million in outlays to the Budget Resolution total and to the Agriculture function to accommodate recent adjustments in commodity programs of the Commodity Credit Corporation. The amendment reflects the impact of these adjustments on current law only. No legislative changes are assumed for 1977 crops.

This adjustment in commodity program outlays was deferred during committee consideration of the Budget Resolution, pending submission of a revised estimate by the Administration. That revised estimate has been received, has been reviewed by the Congressional Budget Office and the committee staff, and is reflected in the committee amendment.

It is assumed that administrative actions to extend wheat loans (reseal program), expand storage facility loans, and increase price support levels for wheat, feedgrains, and dairy will require additional expenditures. Further, it is assumed that deteriorating economic circumstances for commodities such as wheat will require larger loans and payments.

A BALANCED AND SUCCESSFUL APPROACH TO PROFESSIONAL SCHOOL ADMISSIONS

(Mr. EILBERG asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. EILBERG. Mr. Speaker, the subject of admissions to professional schools—especially law, medical, and dental schools—has been a divisive one

for several years. The larger question of access to the professions is interwoven with the American dream. The former practice of systematic exclusion of minorities from professional schools and the reaction of establishing "affirmative action" programs to insure admission of minorities to professional schools have been met by emotional reactions, criticism, factfinding, legislation, conciliation attempts, arbitration, and even litigation. In the political arenas of this Nation, the subject has taken on increasing significance.

In the judicial arena, two cases stand out: DeFunis and Bakke.

DeFunis v. *Odegaard*, 416 U.S. 312 (1974) (per curiam), 82 Wash. 2d 11, 507 P. 2d 1169 (1973) (en banc).

In DeFunis, the University of Washington School of Law employed a special segregated, dual admission program. The result of this segregated process was that some minority applicants were accepted to the law school with college grades and LSAT scores so low that, had they not been "minorities," their applications would otherwise have been "summarily denied."

Bakke v. *Regents of University of California*, 18 Cal. 3d 34, 132 Cal. Rptr. 680, 553 P. 2d 1152 (1976) (In Bank), cert. granted 45 U.S.L.W. 3570 (U.S. Feb. 22, 1977) (No. 76-811).

In the Bakke case, presently pending before the U.S. Supreme Court, a similar and segregated special admissions program used by the medical school of the University of California at Davis adopted a quota system by reserving 16 seats for minority applicants out of a possible entering class of 100 students. The Davis process also provided for summary denial of admission to all white applicants with college averages below 2.5—on a 4.0 scale—while giving further consideration, and in some cases tendering acceptance, to minority applicants with college averages below 2.50.

The DeFunis and Bakke types of special admission programs are problematical in at least two senses: First, they assume that minorities need a racially segregated evaluation process—in the extreme, supported by an imposed quota—in order to gain entrance to the professional schools; and second, they assume that the sole measures of merit are those qualifications reflected in standardized test scores and college grade point averages. The issue has further been sidetracked by myopic "either/or" extremism. Either you favor giving minorities a "break" by means of a segregated, preferential quota system, or you do not. If you do not, then you are a "racist." If you do, then you are "against" individual merit and the maintenance of academic standards.

We are all too familiar with this type of tunnel vision analysis and the legacy that has resulted from its use.

I am especially happy to bring to your attention, therefore, what appears to be a balanced and successful approach to professional school admissions. I refer to the program and policy of the Temple University School of Law as described by its dean, Peter J. Liacouras. In his November 18, 1976, report to the Law Alumni/ae Association, Dean Liacouras outlined his school's "discretionary" admissions policy, which can be contrasted with the "minorities-only" or "quota" admissions policies of the University of Washington in DeFunis and the University of California at Davis in Bakke.

The Temple Law School's Sp.A.C.E.—special admissions and curriculum experiments—program was instituted in its present form in 1972 under Dean Laicouras' leadership. Unlike the DeFunis- and Bakke-type special admissions programs which are limited to racial minorities and operate with established quotas, the Temple Sp.A.C.E. program operates to insure that applicants with the best individual merit and the highest aptitude for the practice of law and community leadership—not just LSAT scores—will be seriously and competitively considered for admission to the law school. The Temple program, which is not a racially exclusive or "quota" admissions program, accounts for approximately one-fourth of each entering class. The program seeks to go beyond the applicant's statistical credentials, beyond the evaluation of artificial LSAT scores and college grade point averages which are the sole basis for admission to Temple Law School for the remaining three-quarters of each entering class. The program deemphasizes the current overreliance on standardized tests and examines a wide variety of other relevant factors in any individual's application. In short, the Temple program has avoided the "either/or" trap which has haunted most other special admissions programs.

I commend the enlightened approach of Dean Liacouras at Temple Law School in his pioneering effort. Such programs can help bring the Nation together again in this difficult matter of admissions to the professions.

It is my belief that Dean Liacouras' remarks and the Temple Law School Sp.A.C.E. program exhibit a proper balancing of the various competing interests consistent with the maintenance of the highest admission standards, as well as the need for individuals from all groups in society to have an equal opportunity to enter the professions on the basis of individual merit. Other law schools and professional schools would do well to follow Temple's lead in this direction:

LAW SCHOOL ADMISSIONS: A REPORT TO THE ALUMNI(AE)

(By Peter J. Liacouras)

On behalf of the Faculty, students and administrators of the Temple University School of Law, I extend our congratulations to our proud son, Nat Posner, for his distinguished and continuous service to the legal profession and to his Law School. No one has been more helpful to Temple Law School and to me, than Nat and Bea Posner. Congratulations to all of us for having produced this outstanding leader.

I would also like to express my personal gratitude to those loyal men and women who graduated from Temple Law School during an earlier era, and who have steadfastly maintained spiritual, tangible ties to our Law School through the Alumni Association and the Temple University Law Foundation—and without whom none of us would be here today, basking in the glory of what is increasingly being recognized as one of the great law schools in the country.

In May of 1972, a fortnight before assuming the deanship, and again in May 1974, in the wake of the De Funis "reverse discrimination" case, I addressed this distinguished body of alumni(ae) and friends of Temple Law School, on the subject of admissions. Today, I will repeat some of that discussion and briefly assess our progress to date. "Law school admissions" is still the most controversial issue in legal education. This challenge is not, of course, unique to Temple, nor to law schools alone.

At practically every law school in the United States, deans, faculties and alumni(ae) are asked to justify an admission process which produces results which many fair-minded people cannot accept. Alumni(ae) who had no trouble being admitted to law school a decade or two ago now see highly qualified, well-balanced children and friends rejected at the same school. Racial minorities and women, understandably, view the legal and medical professions as the historical and exclusive preserve of white males, and continue to ask what we are doing to change this. Those professional schools which do take steps to remedy historical race and sex imbalances are accused of discriminating in reverse. Then, there are the lawyers, judges and even law professors who complain that law school graduates of today, while bright, aware and book-learned, lack hard common sense, motivation and tenacity to the same degree possessed by their predecessors, and blame the law school admissions process for this. And finally, there are members of the Bar who are concerned, not that qualified applicants are being rejected, but that too many are being accepted and graduated into a tight employment market. I will not answer all of these criticisms today—or possibly ever!

II

At Temple Law School, there was room this Fall for only one in ten of our applicants. Our entering class of 373 constitutes, in traditional admissions terms, "the highest quality" group in the School's history, and was selected from some 3,750 applicants. We were "accepted back" at an unprecedented rate.

Admissions to the Law School were through two routes, "non-discretionary" and "discretionary".

As to "non-discretionary" admissions, roughly 75 percent of the entering class is admitted "through the numbers," which means using almost exclusively the college grade point average and the Law School Admissions Test (LSAT) scores. The median grade point average of that group is well above 3.50 and the median LSAT is well up in the 600's, which means in the top 10 percent of the 130,000 takers of that examination. And almost everyone of the persons admitted through this "non-discretionary" formula, is a white man or white woman.

As to "discretionary" admissions (which fall within the Sp.A.C.E. Program), there have, during the four years of my stewardship been approximately twice as many whites admitted as minorities through the Sp.A.C.E. Program. The Fall 1976 entering class experience was not substantially different. Unlike the vast majority of other Law Schools whose special admissions programs are exclusively for minorities and are now ripe for assault, we have followed a different course at Temple. Our Sp.A.C.E. Program seeks out and carefully, individually and affirmatively selects those applicants—minority and majority group members—who have an outstanding performance record and an exceptional aptitude for the study and practice of law, not necessarily reflected by their LSAT scores.

Our outstanding student body of 1,115 is the equal of any in the nation. Although women now happily constitute 36 percent of our student body (not the 2 percent of 12

years ago), our minority students now comprise only about 10 percent, with blacks making up less than 8 percent of the total enrollment—up from only 1 percent ten years ago. The percentages of women and minorities in the Fall 1976 entering class were even somewhat higher.

Temple Law School's Sp.A.C.E. Program has followed in the spirit of the Founder of our University, Dr. Russell Conwell. We have maintained our populist tradition in making a superior legal education available to working men and women, and their children, irrespective of ethnic or racial or social or religious heritage, or favoritism. That is what I said in 1972 we would do, and that is what we are doing. (For those of you who are not familiar with the Sp.A.C.E. Program, we have distributed at each table, copies of the 1977 Admissions Brochure, page 3 of which describes the Program.)

III

The admissions crisis in law and other professional schools was spotlighted in 1974 by the De Funis case and again two months ago by the Bakke case, which strikes at the heart of the minority admissions practices of many professional schools. I would like to put the Bakke case to rest, as it affects Temple Law School. We can then address the larger admissions issues that remain.

The Bakke case involved a white male who was denied admission to the Medical School of the University of California at Davis. In striking down the Davis Medical School's special admissions program, the Supreme Court of California held the program to be "unconstitutional, because it violates the rights guaranteed to the majority by the equal protection clause of the Fourteenth Amendment of the United States Constitution." (No appeal has yet been filed with the United States Supreme Court.)

At Davis, Bakke was denied admission pursuant to a special admissions program which, in contradistinction to the Temple Sp.A.C.E. Program, afforded a "clear preference on the basis of race to persons who, by the University's own standards, are not as qualified for the study of medicine as non-minority students denied admission."

In further sharp contrast to the Temple Sp.A.C.E. Program, the special admissions program at Davis is "for racial minorities only" and reserves a quota of 16 places for racial minorities out of 100 total admissions to the Medical School. Temple Law School has no quotas, active or benign. Unlike our Sp.A.C.E. Program that is open to all applicants, at Davis all students "admitted under the special program were members of racial minorities; . . . the program applied separate, i.e., preferential standards of admission as to them, and . . . the use of separate standards resulted in the acceptance of minority applicants who were less qualified for study of medicine than Bakke and other non-minority applicants not selected."

Unlike our admissions procedures which insure an independent evaluation of every Sp.A.C.E. Committee recommendation by at least two senior faculty members and administrators, all of the special admissions at Davis were made by a special admissions committee consisting of minority students and faculty "who were predominantly but not entirely minorities."

During the past several years, I have called on other law schools to follow Temple's lead in developing non-discriminatory, special admissions programs and also to work with us to construct regular admissions standards and procedures fair to everyone, suited to excellence in a pluralistic society. As a result of Bakke, most professional schools will be forced to revise their special admissions programs. It should not surprise you that the Temple Law School Sp.A.C.E. Program is now being hailed by civil rights organizations and emulated by other law schools in all parts of this country and abroad.

You should be proud of Temple's Sp.A.C.E. Program.

At Temple Law School, all students admitted under the Sp.A.C.E. Program are highly qualified persons whom we believe will become good lawyers and community leaders. I want to emphasize that every applicant admitted to Temple Law School brings in a very strong academic record. Some, thus specially admitted, had extraordinarily high grade point averages from college but LSAT scores below those regularly admitted. Others have exceptional work experience. They possess the attributes espoused by the Founder of our University, Dr. Russell Conwell. Many picked themselves up by their own bootstraps. As a group, they include men and women from practically every racial, ethnic, economic class, religion, age group, and walk of life. By way of illustration: a Hungarian refugee whose family was in a Nazi concentration camp; a youngster of Italian ancestry who worked in a gas station for 40 hours a week from the age of 12 all the way through college in order to overcome his economic disadvantage; the children of working class Kensington, Manayunk and South Philadelphia ethnics; a white woman who, as a teacher, helped establish an alternative school; those with proud Puerto Rican ancestry who grew up in crowded sections of Manhattan, Vineland and Mt. Vernon Street; policemen from across the Delaware Valley; brilliant Jewish students from Logan and the Main Line who score below average in standardized tests; Poles, Lithuanians and Lebanese from Two Street and Northeast Pennsylvania; black women whose dedication and abilities have permitted them to trade a childhood expectation of domestic work for excellence in college and future leadership in our nation; black wounded Vietnam veterans who have earned, through their performance, the opportunity to realize the American Dream; a white from a Chester County farm who was the first in his family, extending back to colonial days, to attend college; an American Indian raised on a reservation; a Japanese-American whose first memories of life were in a World War II detention camp; the Executive Directors of statewide agencies; and I can go on and on. Each such person admitted through the sound discretion in the Sp.A.C.E. Program, made it to Temple Law School on the merits. These persons, and the 75% of our regular admitted students, constitute the most dynamic, pluralistic, excellent student body in a law school. And every student at Temple Law School is treated precisely the same.

But rather than gloating or resting on laurels, we should face our wider responsibility: We must not stop at reexamining professional school minority admissions policies, but our entire admissions practices to which I will now turn briefly.

V

Properly understood, "law school admission" is an issue which raises a series of policy judgments: who, from what groups in society, with what backgrounds and to achieve what kind of future legal profession and larger society, will be given the opportunity to enter the legal profession and become our future community leaders by first getting into law school, medical school, or the other professions?

With several qualified applicants for each available place in law school, and with the realization that access to the legal profession is a significant ladder to social, economic and political mobility, is there any other context in which to judge admissions standards and procedures?

I do not have to remind you that the American Dream remains largely unfulfilled for millions of Americans, including the bulk of our racial minorities. However, I am not going to dwell on the prospects of racial minority youngsters or even our own children, those with professionals as parents. Instead, I would like to highlight the continuing saga of our admissions crisis by focusing attention on the children of our newest Americans.

I refer to the Portuguese, Italians, Jews, Haitians, Poles and Greeks and other new emigrees who have arrived in the United States during the past ten years thanks to the new Immigration Law. This law overturned the pernicious annual quota for southern Europeans which, for example, allotted exactly 308 immigration places for Greeks.

It is the children of these new immigrants we must now start thinking about. In ten or twenty years they will constitute another minority group knocking on the doors of professional schools.

Will the American Dream come true for them?

Will they have an equal opportunity to make it on their own merits? Will they be looked down on as the new "green horns?" Will they find subtle but insuperable obstacles placed in their way if they wish to enter the professions?

Please do not misunderstand why I zero in on the professions. The professions are not necessarily better or worse than any other group, but they are important in shaping society and in implementing a community's claim for a fair share of scarce resources.

My thesis is: unless general admissions policies to the professions change, these new Americans will probably not get in.

VI

Let me acquaint you with three such children I have come to know. Their parents are food vendors who station their trucks on the streets alongside Temple Law School.

Every morning at 6:30 a.m., Mr. and Mrs. Nikos Tsakaris park their stainless steel truck on Broad Street at the Law School's main entrance, sell food to all comers, rain or shine, and leave when the "No Stopping" traffic regulation goes into effect at 4:00 p.m. They have a son, Panagiotis, who is two-and-a-half.

Mr. and Mrs. Constantinos Mitropoulos own a blue truck which they park at the southeast corner of Broad Street and Montgomery Avenue for 12 hours each day, beginning at 6:30 a.m. Their children, Steve, 15, and Maria, 12, already work in the truck on weekends and holidays and in the summer.

Both families came to the United States six years ago from Thessalonika, Greece. In the best tradition of our forebears, the parents are grateful for the opportunity to work hard, make a decent living and save for their children's education.

But how will little Panagiotis Tsakaris, Steve and Maria Mitropoulos, and the thousands of similar children fare in 10 or 20 years if they are inclined toward careers in the professions?

The answer is that those children will almost certainly *not* get into the professions unless dramatic changes in college admissions practices occur.

VII

If admission to professional school is determined in 1996 as it is now—primarily by "objective," standardized tests such as the four-hour, multiple-choice Law School Admission Test (the so-called LSAT), and the clear trend is toward more reliance on them—then Panagiotis, Steve, Maria and others like them will probably find the door to the professions closed. For it is a statistical fact that groups whose first or family language is not standard English, and who are not a product of the "elite" preparatory school system, are out-

scored on such tests by native-born Americans who are. This has little to do with brains or merit.

These ostensibly objective tests are not the easy-to-recognize "Minorities Keep Out" obstacles of the past. But they are just as effective barriers and they should be exposed as such.

Why do professional schools rely so heavily on a test that, at most, may predict how likely you are to perform on some future tests, such as law school exams which themselves may bear little or no relationship to how well you are likely to perform as a professional and community leader in the real world.

There are no valid answers.

Standardized tests like the LSAT, which became the centerpiece of the admissions process in the 1960's, had some attractive features: they appeared fair because they apparently eliminated the potential for subjective abuses by the examiner; they were easy to administer and grade; and most importantly in a period when there are several qualified applicants for each available law school seat, they produced an index number, purportedly measuring qualifications behind which an admissions officer could fend off pressure from alumni, politicians, donors and others who would like to influence the admissions process.

Why am I so critical of these neat, efficient tests?

Because the LSAT does not even purport to measure the critical question of a person's capacity to become a good lawyer or community leader. The LSAT purports to measure some narrow analytical skills, rather than pragmatic strengths. It was designed almost solely to predict performance in the first-year examinations of law school.

Even at a preliminary level, the use of the LSAT presents a serious problem: the ability to score well on standardized tests may itself be a "skill" independent of the analytical skills which the LSAT purports to be measuring. (The saturation of "cram schools" for SATs, LSATs, MCATs, etc. is strong evidence of the consumer's view that these are neither achievement nor long-range aptitude tests.) In such a situation, the original value of the test is eroded.

Further, the LSAT and similar admissions standards operate on an assumption that the test is the same as real lawyering: if you do well in one, you will succeed in the other.

Does the fact that you score in the 90th percentile rather than the 70th percentile, or rank higher in the class than the next person, mean that you really are more meritorious or more qualified to be a lawyer or more likely to be a better lawyer or judge? You may indeed be a super test taker or great law student but a corrupt or incompetent lawyer. Why do we give degrees to those who present only minimum passing average?

What the LSAT does not even purport to measure—and what is not seriously and systematically measured in most general admissions processes—turns out to be so much of what *does* count in lawyering: common sense, motivation, judgment, practicality, idealism, tenacity, fidelity, character and maturity, integrity, patience, preparation, perseverance, client-handling, creativity, personality, oral skills, organizational ability and leadership. These qualities Panagiotis Tsakaris, Steve and Maria Mitropoulos and your own children may have in abundance. But the tests and the professions pay them no mind.

Although the designers and sellers of the standardized tests warn against overreliance on them, the legal profession and law schools have been unwilling or unable to look beyond these artificial tests. Given the enormous resources and changes in institutional attitudes required to construct an admissions process fair to all, we cannot expect that law schools and the legal profession will suddenly reverse their overreliance on tests prepared and administered by outsiders.

I am not suggesting that we throw out the LSAT altogether, nor that we change the ground rules in midstream to the detriment of the very able, worthy, highly-qualified applicants who relied on this published admissions standard. Whatever changes in admissions are made must be careful, deliberate and fair. But inaction is not the answer either.

Yet the law school world has, until very recently, done preciously little thinking about the admission process except for its most glaring defect that blacks and other racial minorities were being excluded. Yet that defect was considered to be a unique social exception which actually "proved" the validity of and reliance on the LSAT and similar standardized admissions criteria. That is one of the critical fallacies in the Davis-type special admissions policy. The basic admissions standard was not, therefore, called into question.

We are all God's children. Each of us should—on individual merit—be given an equal opportunity. Equal opportunity is not the exclusive preserve of the members of just one or several groups in society. It is due to each of us.

VIII

At Temple, we began five years ago to move slowly and carefully in the right direction. We are understandably finding that the test systematically excludes other groups in society from a share of the American Dream, and that a good percentage of those excluded may be at least as deserving and as qualified as the many who get into law school.

What is the next step?

One partial solution would be to take several times as many students in medical, dental, law and other professional schools.

Each profession's lobby would, of course, resist that solution, (although the legal profession has demonstrated a much greater inclination to expand: law school enrollments virtually tripled during the past ten years). There is a great temptation to pull up the rope when you reach the top of the mountain!

Practically speaking, growth in these professions will come primarily as a result of outside forces. Even then we would probably continue to experience a numbers crunch even if not the present excess demand of five to ten applicants, almost all of whom are qualified under reasonable criteria, for each available seat.

Accordingly, the major thrust of my criticism on admissions standards would still have to be faced.

Certainly, each profession must maintain the highest practical and fair standards, and protect the public from incompetence and treachery. But we see that, under the false banners of "neutrality," "high standards," "objectivity" and the like, plenty of mischief is being perpetrated.

IX

The pressure for constructive changes that will insure equal opportunity for access to the professions, preserve our open society and foster the best of our pluralistic tradition, will come primarily from the outside—from individuals and groups of all races and creeds. But I would hope that Temple Law School alumni(ae) will also lead the way as they have in the past.

Thank you for your attention and your support.

APPENDIX I

TEMPLE LAW SCHOOL 1977 ADMISSIONS BROCHURE

Sp.A.C.E.—SPECIAL ADMISSIONS AND CURRICULUM EXPERIMENTS—PROGRAM

The vast majority (about 75%) of the entering class is selected solely on the basis of the traditional criteria explained above in Section 1. Such admissions are non-discretionary. The remainder of the class is admitted in accordance with the sound discretionary judgment of the Faculty of Law. Those who enter the School of Law through the discretionary admissions process are part of the Sp.A.C.E. Program.

There are two reasons for the Sp.A.C.E. Program. The School of Law has been concerned that an over-reliance on the LSAT and WA—or any other abstract measuring factor—could create an unhealthy rigidity in the composition of a law school class as well as in tomorrow's lawyers and community leaders. The School of Law is also firmly committed to a policy of seeking to help correct minority and similar imbalances in the legal profession.

For these reasons, the Sp.A.C.E. Program was established by the Faculty of Law. The task of the Sp.A.C.E. Program is to seek out and carefully, individually and affirmatively select such applicants—minority and majority group members—who have an outstanding performance record and an exceptional aptitude for the study and practice of law, not reflected by their LSAT and WA scores.

Applicants who consider their backgrounds exceptional may request a review by the Sp.A.C.E. Committee. For your information and guidance, the six categories within the jurisdiction of the Sp.A.C.E. Committee are as follows:

(1) Minority: Black, Hispanic, American Indian, Asian or any other group grossly underrepresented in the legal profession;

(2) Non-minority (i.e. other than category (1) above) with equivalent admissions criteria as in category (1);

(3) College GPA's of 3.80 or above (including Phi Beta Kappa, summa cum laude honors);

(4) Overcoming exceptional and continuous economic deprivation (the "Conwellian tradition");

(5) Exceptional and continuous leadership ability demonstrated in substantial college or community activities;

(6) Exceptional physical disability, such as blindness, which precludes taking the regular LSAT.

There may be additional outstanding applicants who are not within these six categories. Any applicant who believes that he or she has exceptional and unique credentials should describe them and include substantial supporting documentation with the application for possible review by the Committee.

High academic achievement is a requirement for consideration by the Sp.A.C.E. Committee.

It should be emphasized that while Temple University School of Law has one of the largest enrollments in the nation, the number of seats is, nonetheless, limited; that many well-qualifid applicants for admission in each category of the Sp.A.C.E. Program, as well as in the non-discretionary admissions program, will be rejected no matter whom we admit; that admission is competitive within and among the six Sp.A.C.E. categories; that being in one of the six Sp.A.C.E. categories does not necessarily (or even probably) lead to admission; and that everyone admitted to Temple Law School must clearly be within the range of predictable success in law school.

For acceptance by this discretionary route, the Sp.A.C.E. Committee must find first *inter alia* that, as to the individual applicant, the LSAT and WA criteria do not adequately measure the applicant's potential for success in law school and the legal profession. Following a comprehensive review of each applicant, the Sp.A.C.E. Committee then recommends for admission those candidates who, in its considered judgment,

present the very best objective qualifications among all of the six categories.

An applicant interested in applying through the Sp.A.C.E. Program should follow the application procedure outlined in Section 1. Additionally, such a person should append to the application a statement detailing specific reasons for consideration by the Sp.A.C.E. Committee.

APPENDIX II

APPENDIX: EXCERPTS FROM BAKKE VERSUS REGENTS OF THE UNIVERSITY OF CALIFORNIA

(Supreme Court of California, September 16, 1976, pp. 30–32, multilith opinion, footnotes omitted)

The Court painstakingly observed that "the University is not required to choose between a racially neutral admissions standard applied strictly according to grade-point averages and a standard which accords a preference to minorities because of their race." The Court continued:

"[W]hile minority applicants may have lower grade point averages and test scores than others, we are aware of no rule of law which requires the University to afford determinative weight in admission to these quantitative factors. In practice, colleges and universities generally consider matters other than strict numerical ranking in admission decisions. . . . The University is entitled to consider, as it does with respect to applicants in the special program, that low grades and test scores may not accurately reflect the abilities of some disadvantaged students; and it may reasonably conclude that although their academic scores are lower, their potential for success in the school and the profession is equal to or greater than that of an applicant with higher grades who has not been similarly handicapped.

"In addition, the University may properly as it in fact does, consider other factors in evaluating an applicant, such as the personal interview, recommendations, character, and matters relating to the needs of the profession and society, such as an applicant's professional goals. In short, the standards for admission employed by the University are not constitutionally infirm except to the extent that they are utilized in a racially discriminatory manner. Disadvantaged applicants of all races must be eligible for sympathetic consideration, and no applicant may be rejected because of his race, in favor of another who is less qualified, as measured by standards applied without regard to race. We reiterate, in view of the dissent's misinterpretation, that we do not compel the University to utilize only "the highest objective academic credentials" as the criterion for admission. . . . Another ameliorative measure which may be considered is to increase the number of places available in the medical schools, either by allowing additional students to enroll in existing schools or by expanding the schools. In 1974, the University received almost 40 applications for each place available, and the entering class in all the medical schools in the state in the last academic year totaled only 1,094 students. . . ."

AFFIRMATIVE ACTION REPORT

Temple University School of Law, Philadelphia, Pa., September 7, 1976 (revised).

I. Total students (J.D. program)	1115
Males	713
Females	402
Minority students (J.D. program)	118
Black	88
Hispanic	16
Asian American	11
American Indian	3
Majority students (J.D. program)	997
II. First year students only (J.D. program)	375
Males	221
Females	154
Minority students (J.D. program)	61
Black	48
Hispanic	7
Asian American	3
American Indian	3
Majority students (J.D. program)	314

PETER J. LIACOURAS,
Dean.

THE ADMISSIONS STANDARDS

REGULAR ADMISSIONS

The regular admissions standards utilized for an applicant is as follows:

	Maximum Points
(1) Undergraduate grade point average × 200	800
(2) Last reportable period's grade point average × 200	800
(3) Highest LSAT × 1	800
(4) Highest writing ability (WA) score × 7.5	600
(5) Academic honors and achievements (up to 50 points)	50
(6) Military service Peace Corps, Vista, et cetera (up to 50 points)	50
(7) Substantial part-time work during college (up to 50 points)	50
(8) Full-time employment post college (up to 50 points)	50
Maximum combined point total	3,200

In 1975 and 1976 an applicant with a total of 2450 points, calculated using the above formula, was accepted. An illustration may be an aid in understanding the operation of this formula. Suppose an individual applicant presents the following credentials: an undergraduate grade point average of 3.50 (on a 4.00 scale), a last reportable period of 3.75, an LSAT score of 600 and a Writing Ability score of 60. The combined point total accumulated by inserting these specific figures into the formula would be 2500 (700+750+600+450). That combined total would have insured admission in 1975.

The specific figures in the illustration may vary, of course, so long as the combined total reached the minimum level of 2450 points. If, on the other hand, the combined total was over 2300 but below 2450, there was an individual review by the Associate Dean for Admissions for "bonus points" identified in categories 5 through 8.

In the event an applicant was below 2450 (and even if below 2300) but something very exceptional was identified in the regular admission process, then that file was sent to the Sp.A.C.E. Committee for the purpose of considering admission through special admission route. In addition, applicants could specifically request review by the Sp.A.C.E. Committee by checking the appropriate box on the application form.

THE UNITED STATES SHOULD NOT ASSIST PRESIDENT PARK IN THE REPRESSION OF HIS OWN PEOPLE

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, in the wake of the recent fact-finding trip to South Korea by four of our colleagues, LESTER WOLFF, MARIO BIAGGI, HELEN MEYNER, and BILLY LEE EVANS, that country's President, Park Chung Hee, has initiated a major new crackdown on his political opponents. This action typifies the malignancy and the arrogance of the Park regime.

President Park attempts to justify the repression of all democratic dissent in his country by arguing that North Korea would misconstrue normal democratic opposition as weakness and invade the South again as it did in 1950. This argument is grossly simplistic, ignoring as it does the fundamental strategic and political differences between the international situation at the height of the cold war and at the present. It constitutes nothing more than a self-serving attempt to cover the repressive activities of his secret police with a veil of legitimacy.

The arrogant statement to the U.S. Congress inherent in the timing of the recent arrests, which came within 36 hours after the departure of our colleagues who visited South Korea to evaluate the human rights situation and met with some of Park's domestic critics cannot be left unanswered. Our response should be an immediate and uncompromising cessation of all military aid and sales to South Korea to remain in effect until President Park stops repressing his people, rescinds the 1972 rewrite of the Constitution, which gives him virtually unlimited dictatorial powers, and allows the return of democratic government.

The attitude of the Korean Government toward the U.S. Congress is, however, of secondary importance compared to the Park regime's systematic violations of human rights. It is not an interference in another country's internal affairs to refuse to provide that country military assistance on the grounds that it violates human rights. First of all, universal adherence to minimum standards of human rights is a matter of international concern that transcends national boundaries. Second, there are intangible but very important gains to be made in the international sphere by clearly identifying this country with fundamental principles of decency, thereby distinguishing our way of life and government from that perpetrated by repressive dictators. Our tragic experience in Vietnam is ample testimony to this point.

There are those, such as our Ambassador to Ankarra, Richard L. Sneider, who maintain that open and strong support of human rights in other countries interferes with our other successes achieved by quiet diplomacy. To that I ask, what are our "successes?" What successes did we achieve in Vietnam? In Chile? In fact, the most effective way to improve human rights in other countries is to use whatever leverage we have in a pragmatic fashion. And in the case of South Korea, our military aid makes our leverage great indeed.

Several days ago, 12 Protestant and Roman Catholic leaders headed by William P. Thompson, president of the National Council of Churches, delivered a letter to United Nations Ambassador Andrew Young urging President Carter to do whatever he can to secure the release of the Christian dissidents just arrested

by Park's secret police. I wish to add my voice to theirs in requesting that the President speak out on this matter and that he immediately cancel all aid to South Korea until President Park ends his repressive measures against the democratic opposition in his country. His present actions and his attitude toward the United States and more important his own people cannot be tolerated. We should not be providing the arms that permits him to engage in repression in his own country against his own people.

The appended editorial from the New York Times of April 24, 1977, bears on this matter.

SOUTH KOREA: OUR INDECENT ALLY

The news from South Korea is dismal and familiar. President Park is cracking down on political opponents again; midnight raids, arrests, surveillance, break-ins. More than 30,000 Americans died in South Korea's defense, and billions of dollars have been spent over a generation to protect it against aggression by Communist North Korea, a police state. But the South remains a police state, too. Must our sense of strategic obligation render us helpless against the most brazen violations of human rights?

Let us accept for the moment the assumptions of every American administraton since the Korean War; that the defense of Korea involves the defense of Japan, which involves the balance of Pacific power with the Soviet Union and China, which involves the security of the United States. Accept President Carter's intention gradually to withdraw 33,000 American ground troops from South Korea, with careful notice to the Koreans and Japanese and with an indefinite commitment of American air power to the South's defense. Preventing a war that would surely involve the United States has been Washington's overriding objective. But even if we could safely withdraw altogether in disgust, abandoning the people of the South to the rulers of the North would hardly enhance their freedom.

So what can Americans do, particularly now that we have been aroused to the cause of human rights in Eastern Europe, the Soviet Union and some Latin and African nations? Do we let stand the impression that our security, even if accurately calculated in South Korea, supersedes all humanity? Does our President write letters to Andrei Sakharov, the Soviet dissident who is free to visit our embassy, but not to Kim Chi Ha, South Korea's foremost poet, who sits imprisoned for life for his anti-Government views? No word of sympathy from the White House for Kim Dae Jung, in prison for the crime of running against President Park in 1971 and obtaining 46 percent of the vote?

President Park may not respond to such rhetorical pressure. The Kremlin hasn't either, except with counter-propaganda. But some American investors and traders might respond, to the detriment of General Park's economy and claims of intimacy with the United States. Or some of his domestic opponents might take heart from the evidence that the American commitment extends to a people, and not to their dictator. In time, if there is no reform in South Korea, the denunciations might indeed erode American support for the commitment itself, but that would not be an immediate or inevitable consequence. Surely the errant rulers of South Korea should be more nervous about their ties to the United States than Americans are about ties to them. We cannot soon impose democracy on their country, but we have earned the right to demand decency.

INDEPENDENT LIVING PROGRAMS FOR HANDICAPPED INDIVIDUALS

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, in the spring of 1976 while traveling in Spain, Anne Thomas, a young woman of 18 who had just resigned from my staff, was the victim in a violent automobile collision which left her totally paralyzed below the waist. While Ms. Thomas was made of very tough fiber and has maintained her sunny disposition throughout her recovery and continuing rehabilitation, she has experienced tremendous frustrations in adjusting her bustling ambulatory life to an active wheelchair existence. Normal daily activities of able bodied persons can literally become physical and sometimes mental barriers to the disabled.

Much has been done by the Congress in recent years to help our disabled citizens gain access to transportation systems, to increase their mobility in central shopping districts, and to provide them with the tools of education and rehabilitation. The Rehabilitation Acts of 1973 and 1974, the Education for All Handicapped Children Act, the Federal Aid Highway Amendments of 1974, and the Housing and Community Development Act all were designed to expand the number of programs aiding the physically disabled. Yet the Federal Government has failed to consider the special difficulties encountered by the disabled from the perspective of their day-to-day living needs once they have been absorbed into the community.

The Center for Independent Living, CIL, in Berkeley, Calif., is a nonprofit organization run by disabled individuals that has pioneered in developing a realistic approach to helping the handicapped live independently in their own communities. Ms. Thomas' situation subsequent to her accident brought to my attention the excellent rehabilitative opportunities available in independent living programs for the handicapped. CIL, which served as a model for the legislation my colleague Mr. COHEN and I are introducing today, coordinates referrals of architecturally accessible housing, has a 24 hour wheelchair repair service, provides special transportation for its clients, and an attendant screening and referral service, as well as other programs, which all help to solve the difficulties of handicapped persons living on their own. With their advocacy unit, which refers clients to the Federal and State government services available to them, the CIL resolves the continuing frustration of the handicapped in their contacts with Government bureaucracies. This guidance and support means that the handicapped in Berkeley, Calif., and in other parts of the country where similar programs are in operation, can hold responsible jobs, continue their education, and pursue normal social activities within their own communities.

The difficulties encountered by Ms. Thomas and our subsequent research in this area have served to point out the real need for Federal stimulus of this concept of independent living for the handicapped, to enable these citizens across the country and in all walks of life to derive a more enriching and active existence. We believe the Federal Government should consider the needs of disabled persons who would like to live independently of their families or institutions, but who are unable to do so because the logistical support needed is unavailable in their own communities. To remedy this situation, Mr. COHEN and I are introducing legislation today to establish grant funding for a 3-year period for the establishment of community service programs to aid the handicapped by providing services such as those found at the Center for Independent Living. Our proposal would allot $250,000 for each State per year, which would be awarded by the Department of HEW to organizations run by and employing disabled individuals that provide the services of an independent living program, ILP.

Under our bill, an Office of Independent Living, OIL, would be established under the Rehabilitation Services Administration of the Department of Health, Education, and Welfare, HEW, would serve as the grant-making body for currently operating or proposed independent living programs. All organizations would apply to the OIL for funding, with the important criteria being that such organizations be composed of, managed by, and employ a substantial portion of persons who are themselves disabled.

The OIL would be responsible for evaluating each proposal to insure that it would adequately provide disabled citizens with services to aid them in living independently.

Such services could include a referring and counseling program with respect to attendant care, training programs on the maintenance of equipment, repair services for equipment such as wheelchairs, hearing aids, TTY's—telephones for the hearing impaired—and closed-circuit television, housing and transportation referral and assistance, and a job-seeking skills program.

Once established, the ILP's would be monitored by regional committees which would evaluate the operations of the various programs. At the Federal level, a task force would be established composed of representatives from HEW, the Department of Housing and Urban Development, the Department of Labor, the Veterans' Administration, the President's Committee on Employment of the Handicapped, the General Services Administration, and those ILP's currently in operation. Qualified individuals who are themselves disabled would receive priority consideration for task force membership. The task force would be responsible for reviewing the operations of the HEW Office of Independent Living, and would determine the future of the ILP program. At the end of a 3-year trial

period, the task force would make recommendations for future funding and program revision.

As I said earlier, Mr. Speaker, a number of independent living programs are currently in operation across the country but we must reach out to those handicapped individuals who have not had the advantages offered by such centers. In addition to the Center for Independent Living in Berkeley which I mentioned previously, other centers include the Ann Arbor Center for Independent Living in Michigan, the Centers for Independent Living in Boston and Worcester, Mass., and the Texas Institute for Rehabilitation and Research in Houston, Tex. Centers such as these have been the product of efforts on the part of concerned handicapped individuals in their respective communities, and have often been aided by nearby university institutions in realizing their goals.

Our legislation seeks to increase the number of such programs across the Nation, so that our handicapped can contribute their talents and energies to the labor force and to their communities. Those profoundly handicapped who have the courage and the drive to continue with their education and to seek to remain active in business and the professions must get the support of this Congress. The handicapped have done so much by themselves to overcome enormous obstacles, emotional and physical, that for the Congress not to assist in this small way would be an outrageous failure on our part.

I am appending an article that appeared in the New York Times that describes the success of the Center for Independent Living in Berkeley as it supports the potential for this bill's proposal:

[From the New York Times, Sept. 8, 1976]

BERKELEY TURNS INTO MECCA FOR HANDICAPPED PERSONS

(By Nancy Hicks)

BERKELEY, CALIF., September 8—The Free Speech and People's Park struggles are long gone, but Berkeley has become a mecca for a new, equally radical movement—the growing numbers of handicapped people who are determined to live independent lives in the community, out of their family basements, out of the institutions that have kept them hidden for so long.

Armed with new antidiscrimination legislation that protects the 25 million physically and emotionally handicapped Americans, and working with a sympathetic City Council here, the handicapped are pushing to open up this town to accommodate their wheelchairs and accept their disfigurements, and they are succeeding.

UNUSUAL STUDENT BODY

"Berkeley ought to be the kind of place where people feel free to create something and be whatever they want to be," said City Manager Elijah Rogers, in explaining why this municipality is spending $250,000 this year to put an elevator in City Hall so that citizens in wheelchairs can attend City Council meetings and to continue the program of constructing sidewalk ramps for wheelchairs.

They have a friend in Sacramento, the state capital—Edward V. Roberts, a quadriplegic who runs the state's programs for the handicapped as director of rehabilitation. Mr. Roberts, a controversial figure, is credited with beginning the Berkeley movement for the handicapped when he convinced the university here to admit him as a student against its will in 1962.

The disabled have now swelled their ranks in the student population at the university to what is probably the largest concentration of handicapped people on a campus in the country—409 students, 150 of them in wheelchairs.

And they have set up an unusual service and support center, the Center for Independent Living, which is complete with peer counseling, job and housing referral and a kind of travel service for wheelchairs. It has become a model replicated around the state, the country and the world.

The center, C.I.L., as it is known, is the hub of activity for the handicapped here. An outgrowth of the campus radicalism of the 1960's, it has been a driving force to challenge traditional charity groups, to help define issues, and to provide nuts and bolts answers to problems that keep the disabled out of circulation, it does the following:

Operates a 24-hour-a-day wheelchair repair program, complete with emergency road service, to enhance mobility, which center leaders believe is the key to integrating the handicapped into mainstream life. Recognizing that most wheelchairs are designed for indoor use and break down often as a result, it has made prototype of a new, smaller, more sturdy chair built with longer lasting parts that are cheap and easily available in bicycle shops and department stores.

Modifies cars and vans to allow the handicapped to drive. It modifies wheelchair controls so that those who are unable to use their hands or fingers can use their chins, cheeks or foreheads—whatever moves—to propel themselves to their destination. The center is training other handicapped people to make these repairs so that they become the nucleus for staffing other centers like theirs across the country.

Operates an attendant referral services that screens and develops a pool of reliable aides who help immobile people bathe, dress and eat.

Seeks to remove sections of Federal welfare laws that discourage persons from working. While Federal rehabilitation law is supposed to encourage work opportunities for the disabled, Federal programs that provide allowances for living, for help and for attendants are often cut off once the disabled person earns more than $3,000 a year. Government agencies estimate that a pariplegic has to earn $12,000 a year to recover lost benefits through income.

Sponsors bachelor's and master's degree programs in health administration and psychology with the Center for Health Studies at Antioch College.

The essence of C.I.L.'s approach is its federally funded peer-counseling research project, headed by Don Galloway.

Mr. Galloway, who was blinded in childhood play at age 13, is also the local president of an organization called BOLD—the Blind Outdoor Leisure Development project—which sponsors skiing white water rafting, tandem bicycle groups and backpacking parties for the blind.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. HYDE (at the request of Mr. RHODES), for April 25, on account of official business.

Mr. CORMAN (at the request of Mr. WRIGHT), for after 3:30 p.m. today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. QUAYLE) to revise and extend their remarks and include extraneous material:)

Mr. COHEN, for 5 minutes, today.

Mr. BURKE of Florida, for 30 minutes, today.

(The following Members (at the request of Mr. IRELAND) to revise and extend their remarks and include extraneous matter:)

Mr. LE FANTE, for 5 minutes, today.
Mr. AUCOIN, for 5 minutes, today.
Mr. KOCH, for 10 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. MOSS, for 10 minutes, today.
Ms. OAKAR, for 5 minutes, today.
Mr. THOMPSON, for 10 minutes, today.
Mr. MCHUGH, for 5 minutes, today.
Mr. GIAIMO, for 5 minutes, today.
Mr. PEPPER, for 60 minutes, on May 19.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. EILBERG, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,127.

Mr. ROGERS and to include extraneous matter notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,610.

Mr. SEIBERLING to insert his remarks in connection with H.R. 5675.

(The following Members (at the request of Mr. QUAYLE) and to include extraneous matter:)

Mr. ANDERSON of Illinois.
Mr. CRANE in two instances.
Mr. VANDER JAGT
Mr. DERWINSKI in four instances.
Mrs. HOLT.
Mr. GILMAN.
Mr. DEVINE.
Mr. SAWYER.
Mr. HANSEN in four instances.
Mr. MCCLOSKEY.
Mr. MARRIOTT.
Mr. ROBERT W. DANIEL, JR.
Mr. MARKS.
Mr. STEERS.
Mr. SHUSTER.
Mr. DORNAN in two instances.
Mr. COHEN.
Mr. SYMMS in two instances.
Mr. WALSH.
Mrs. SMITH of Nebraska.
Mr. EVANS of Delaware.
Mr. KASTEN.
Mr. PRESSLER.

(The following Members (at the re-

quest of Mr. IRELAND) and to include extraneous material:)

Mr. BAUCUS.
Mr. FARY.
Mr. ROE.
Mr. MOTTL.
Mr. ANNUNZIO in six instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. DRINAN in two instances.
Mr. STUMP.
Mr. MCDONALD in five instances.
Mr. ROSE.
Mr. EILBERG.
Mr. HARKIN in two instances.
Mr. LEDERER.
Mr. TEAGUE.
Mr. WOLFF.
Mr. ROSENTHAL.
Mr. RODINO in three instances.
Mr. MATTOX.
Mr. KASTENMEIER.
Mr. GIBBONS.
Mr. RANGEL.
Mr. GAYDOS.
Mr. PATTISON of New York.
Mr. VAN DEERLIN.
Mr. WIRTH.
Mr. YOUNG of Missouri.
Mr. MURTHA.
Mr. PERKINS.
Mr. OBERSTAR.

ADJOURNMENT

Mr. IRELAND. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 32 minutes p.m.), the House adjourned until tomorrow, Tuesday, April 26, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1329. A letter from the Assistant to the Director for Congressional Relations, Office of Management and Budget, Executive Office of the President, transmitting current revised budget estimates for fiscal years 1977 and 1978; to the Committee on Appropriations.

1330. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2-18, "To authorize the charging of fees for the provision of clinical services at District of Columbia health clinics, and for other purposes," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1331. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2-19, "To establish a 6-month limitation on the payment of benefits under the general public assistance program," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1332. A letter from the Acting Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during March 1977, pursuant to section 234 of Public Law 91-510; to the Committee on Government Operations.

1333. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Mabel Murphy Smythe, Ambassador-designate to the Republic of Cameroon; Ronald I. Spiers, Ambassador-designate to Turkey, and their families, pursuant to section 6 of Public Law 93-126; to the Committee on International Relations.

1334. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

1335. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense articles to Israel (Transmittal No. 77-17), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1336. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense articles to Israel (Transmittal No. 77-18), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1337. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense services to Jordan (Transmittal No. 77-20), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1338. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense services to Jordan (Transmittal No. 77-23), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1339. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense services to Saudi Arabia (Transmittal No. 77-24.) pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1340. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense services to Saudi Arabia (Transmittal No. 77-25), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1341. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense articles to the Republic of Korea (Transmittal No. 77-26), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1342. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting a draft of proposed legislation to amend title XIV of the Public Health Service Act; to the Committee on Interstate and Foreign Commerce.

1343. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to repeal sections 1735 and 1736 of the Revised Statutes (22 U.S.C. 1199); to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ZABLOCKI: Committee on International Relations. H.R. 6179. A bill to amend the Arms Control and Disarmament Act to authorize appropriations for fiscal year 1978, and for other purposes. (Rept. No. 95-219). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLLING: Committee on Rules. House Resolution 515. Resolution waiving all points of order against an amendment revising the congressional budget for the U.S. Government for the fiscal year 1977 if offered to House Concurrent Resolution 195. Concurrent resolution setting forth the congressional budget for the U.S. Government for the fiscal year 1978 (Rept. No. 95-220). Referred to the House Calendar.

Mr. REUSS: Committee of conference. Conference report on H.R. 3843. (Rept. No. 95-221.) Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ABDNOR (by request):

H.R. 6570. A bill to make loans available to cattle ranchers for the purpose of refinancing certain existing debt obligations of such ranchers; to the Committee on Agriculture.

By Mr. BAFALIS (for himself, Mr. DAN DANIEL, Mrs. CHISHOLM, Mr. YOUNG of Florida, Mr. KILDEE, Mr. LENT, Mr. ROBERT W. DANIEL, JR., Mr. TREEN, Mr. CHARLES WILSON of Texas, Mr. PATTERSON of California, Mr. PEPPER, Mr. BEARD of Tennessee, and Mr. LUKEN):

H.R. 6571. A bill to amend the Internal Revenue Code of 1954 to eliminate the adjusted gross income limitation on the credit for the elderly; to the Committee on Ways and Means.

By Mr. BALDUS (for himself and Mr. BAUCUS):

H.R. 6572. A bill to provide price support for milk at not less than 90 percent of the parity price therefor, and for other purposes; to the Committee on Agriculture.

By Mr. CARR (for himself, Mr. RICHMOND, Mr. PRESSLER, Mr. BRODHEAD, Mr. FRASER, Mr. BAUCUS, Mr. HUGHES, Mr. NEAL, Mr. LOTT, Mr. MOAKLEY, Mr. RANGEL, Mr. STARK, Mr. BINGHAM, Mr. FORD of Michigan, Mr. LONG of Louisiana, Mr. NOLAN, Mrs. HOLTZMAN, Mr. EDWARDS of California, Mr. WEISS, Mr. BLOUIN, Mr. BADILLO, Mr. WEAVER, Mr. KILDEE, Mr. PURSELL, and Mr. TRAXLER):

H.R. 6573. A bill to amend section 107 of the Energy Reorganization Act of 1974 (42 U.S.C. 5817) to delegate power to State legislatures to veto Energy Research and Development Administration site selection for radioactive waste storage; to the Committee on Interior and Insular Affairs.

By Mr. DANIELSON:

H.R. 6574. A bill to amend the Indochina Migration and Refugee Assistance Act of 1975 to provide a 2-year extension of Federal assistance to Indochinese refugees and to provide Federal assistance beyond 2 years to any Indochinese refugees who is under 18 years of age; to the Committee on the Judiciary.

By Mr. ROGERS (for himself and Mr. ROSTENKOWSKI):

H.R. 6575. A bill to establish a transitional system of hospital cost containment by providing for incentives and restraints to contain the rate of increase in hospital revenues, to establish a system of capital allocation designed to encourage communities to avoid the creation of unneeded and duplicative hospital facilities and services, to provide for the publication and disclosure of information useful to the public in making decisions about health care, to provide for the development of permanent reforms in hospital reimbursement designed to provide incentives for the efficient and effective use of hospital

resources, and for other purposes; jointly, to the Committees on Ways and Means Interstate and Foreign Commerce.

By Mr. HORTON (for himself and Mr. STEED):

H.R. 6576. A bill to distinguish Federal grant and cooperative agreement relationships from Federal procurement relationships, and for other purposes; to the Committee on Government Operations.

By Mr. KOCH (for himself and Mr. COHEN):

H.R. 6577. A bill to establish a system for promoting the creation of independent living centers for handicapped individuals, and for other purposes; jointly, to the Committees on Education and Labor, and Interstate and Foreign Commerce.

By Mr. METCALFE:

H.R. 6578. A bill to establish in the Department of Housing and Urban Development a low-interest loan program to assist low- and middle-income owners of homes to finance necessary major improvements to their homes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MIKVA (for himself, Mr. ANDERSON of Illinois, Mr. AUCOIN, Mr. DAVIS, Mr. MURPHY of Pennsylvania, and Mr. ST GERMAIN):

H.R. 6579. A bill to correct inequities in certain franchise practices, to provide franchisors and franchisees with evenhanded protection from unfair practices, to provide consumers with the benefits which accrue from a competitive and open market economy, and for other purposes: to the Committee on Interstate and Foreign Commerce.

By Mr. PEPPER (for himself and Mr. WINN):

H.R. 6580. A bill to amend the Railroad Retirement Act of 1974 with respect to the annuities payable under such act to the widows of retired railroad employees; to the Committee on Interstate and Foreign Commerce.

By Mr. PERKINS:

H.R. 6581. A bill to provide an immediate 15 percent increase in social security benefits (over and above any regular cost-of-living increases in such benefits), and to provide that full social security benefits (when based upon the attainment of retirement age), and medicare benefits, will be payable at age 50; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. PRICE (for himself and Mr. BOB WILSON) (by request):

H.R. 6582. A bill to amend titles 10 and 5, United States Code, to disestablish one of the positions of Deputy Secretary of Defense and establish an Under Secretary of Defense for Policy, and for other purposes; to the Committee on Armed Services.

By Mr. RAHALL (for himself, Mr. SLACK, Mr. WHITEHURST, Mr. BUTLER, Mr. WAMPLER, Mr. HUBBARD, Mr. NATCHER, Mr. CARTER, Mr. PERKINS, Mr. LUKEN, Mr. LUNDINE, and Mr. MINETA):

H.R. 6583. A bill to amend the Small Business Act to reduce the rate of interest on disaster relief loans under such act, to apply special provisions of such act of such loans made in connection with major disasters occurring after April 1, 1977 and before June 6, 1977; to the Committee on Small Business.

By Mr. REUSS:

H.R. 6584. A bill for the relief of unemployment through the performance of useful public work, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ROSENTHAL:

H.R. 6585. A bill to establish a utility services stamp program to assist low-income and fixed-income households to meet the rising cost of utilities; to the Committee on Interstate and Foreign Commerce.

By Mr. SEIBERLING (for himself, Mr. THOMPSON, Mr. STANTON, Mr. BRADEMAS, Mr. CORNELL, and Mr. LUNDINE):

H.R. 6586. A bill to amend the Internal Revenue Code of 1954 to encourage the modernization of manufacturing plants by providing an additional investment credit for machinery placed in service in existing manufacturing plants or in nearby plants; to the Committee on Ways and Means.

By Mr. SLACK:

H.R. 6587. A bill to protect the national security, protect the economic well-being of the American people including the Nation's present supplies and undeveloped sources of energy, fuel, food and fiber from damage due to arbitrary and unsound regulation, order, or decision issued by any executive department, agency, or commission, and for other purposes; to the Committee on the Judiciary.

By Mr. STEERS:

H.R. 6588. A bill to provide for immediate action by the Federal agencies concerned to protect the public more effectively against asbestos contamination; to the Committee on Interstate and Foreign Commerce.

By Mr. WHALEN:

H.R. 6589. A bill to amend title II of the Social Security Act to provide that the automatic cost-of-living increases in benefits which are authorized thereunder may be made on a semiannual basis (rather than only on an annual basis as at present); to the Committee on Ways and Means.

By Mr. WOLFF:

H.R. 6590. A bill to provide coordinated veterans readjustment training and supportive services and for other purposes; to the Committee on Veterans' Affairs.

By Mr. YOUNG of Florida (for himself and Mr. KELLY):

H.R. 6591. A bill to provide for national cemeteries in the central west coast area of the State of Florida; to the Committee on Veterans' Affairs.

By Mr. APPLEGATE:

H.R. 6592. A bill to amend section 162(a) of the Internal Revenue Code of 1954 to permit the deduction of certain expenses by members of State legislatures; to the Committee on Ways and Means.

By Mr. CLEVELAND:

H.R. 6593. A bill to amend the Airport and Airway Development Act of 1970 relating to a minimum annual apportionment for each State for general aviation airport development; to the Committee on Public Works and Transportation.

By Mr. CLEVELAND (for himself and Mr. D'AMOURS):

H.R. 6594. A bill to amend section 111 of title 23, United States Code, to permit the sale of State lottery tickets on Interstate System right-of-way; to the Committee on Public Works and Transportation.

By Mr. ERLENBORN (for himself and Mr. HYDE):

H.R. 6595. A bill to repeal the Presidential Primary Matching Payment Account Act, and for other purposes; to the Committee on House Administration.

By Mr. EVANS of Delaware:

H.R. 6596. A bill to remove the remedy of busing from the jurisdiction of Federal courts and for other purposes; jointly, to the Committees on the Judiciary, and Education and Labor.

By Mr. FARY:

H.R. 6597. A bill to encourage localities to develop strategies and to use available Federal assistance for the preservation of neighborhoods and the reclamation of existing housing stock; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FITHIAN (for himself and Mr. JENRETTE):

H.R. 6598. A bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act and for other purposes; to the Committee on Agriculture.

By Mr. HEFTEL (for himself and Mr. AKAKA):

H.R. 6599. A bill to repeal section 222 of the Communications Act of 1934; to the Committee on Interstate and Foreign Commerce.

By Mr. MARTIN (for himself, Mr. AUCOIN, Mr. MCDADE, Mr. ANDERSON of California, Mr. CONTE, Mr. LAFALCE, Mr. BEARD of Rhode Island, Mr. BRECKINRIDGE, and Mr. SOLARZ):

H.R. 6600. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. MOSS (for himself, Mr. VAN DEERLIN, Mr. MURPHY of New York, Mr. METCALFE, Mr. SCHEUER, Mr. BADILLO, Mr. BEILENSON, Mr. DELLUMS, Mr. DICKS, Mr. HARRINGTON, Mr. MIKVA, Mr. ROYBAL, and Mr. VENTO):

H.R. 6601. A bill to provide basic standards for State no-fault benefit plans for the rehabilitation and compensation of motor vehicle accident victims, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PATTERSON of California:

H.R. 6602. A bill to provide for grants to States for the payment of compensation to persons injured by certain criminal acts and omissions, and for other purposes; to the Committee on the Judiciary.

By Mr. PRESSLER (for himself and Mr. NOLAN):

H.R. 6603. A bill to encourage farmers to establish shelterbelts for the purposes of reducing soil erosion, protecting crops and livestock, and establishing wildlife habitat areas; to the Committee on Ways and Means.

By Mr. RANGEL:

H.R. 6604. A bill to eliminate racketeering in the sale and distribution of cigarettes and to assist State and local governments in the enforcement of cigarette taxes; to the Committee on the Judiciary.

By Mr. ROYBAL (for himself, Mr. HAMMERSCHMIDT, Mr. PEPPER, Mr. SANTINI, Mr. RISENHOOVER, Mr. DRINAN, Ms. OAKAR, Mr. BIAGGI, Mr. WALSH, and Mr. RINALDO):

H.R. 6605. A bill to amend the Community Services Act of 1974 to permit the Director of the Community Services Administration to furnish assistance for the installation of security devices in the residences of elderly persons; to the Committee on Education and Labor.

H.R. 6606. A bill to amend the Older Americans Act of 1965 to provide assistance for the installation of security devices in the residences of elderly persons; to the Committee on Education and Labor.

By Mr. ROYBAL (for himself, Mr. HAMMERSCHMIDT, Mr. PEPPER, Mr. RISENHOOVER, Ms. OAKAR, Mr. WALSH, and Mr. RINALDO):

H.R. 6607. A bill to provide for grants to States for the payment of compensation to certain elderly individuals who are injured by criminal acts and omissions or who suffer property loss as a result of certain criminal acts and omissions, and for other purposes; to the Committee on the Judiciary.

By Mr. ROYBAL (for himself, Mr. HAMMERSCHMIDT, Mr. PEPPER, Mr. SANTINI, Mr. RISENHOOVER, Mr. DRINAN, Ms. OAKAR, Mr. BIAGGI, Mr. WALSH, and Mr. RINALDO):

H.R. 6608. A bill to amend title XX of the Social Security Act to include among the services eligible for Federal assistance under such title the installation of devices to promote the security of the elderly in their homes; to the Committee on Ways and Means.

By Mrs. SMITH of Nebraska (for herself, Mr. ANDREWS of North Dakota, Mr. AUCOIN, Mr. BALDUS, Mr. CAVANAUGH, Mr. CONTE, Mr. FITHIAN, Mr. HALL, Mrs. KEYS, Mr. KINDNESS, Mr. LAGOMARSINO, Mrs. LLOYD of Tennessee, Mr. LOTT, Mr. MCDADE, Mr. MCEWEN, Mr. MADIGAN, Mr. MARLENEE, Mr. MONTGOMERY, Mr. OBERSTAR, Mr. PICKLE, Mr. QUIE, Mr. RONCALIO, Mr. SEBELIUS, Mr. THONE, and Mr. TRIBLE):

H.R. 6609. A bill to extend the moratorium on post office closings; to the Committee on Post Office and Civil Service.

By Mr. STARK (for himself and Mr. AUCOIN):

H.R. 6610. A bill to govern the disclosure of certain financial information by financial institutions to governmental agencies, to protect the constitutional rights of citizens of the United States, and to prevent unwarranted invasions of privacy by prescribing procedures and standards governing disclosure of such information, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H. Res. 517. Resolution to amend the Rules of the House of Reprsentatives to establish the Committee on Internal Security, and for other purposes; to the Committee on Rules.

By Mr. CONABLE:

H.R. 6613. A bill for the relief of Ruth N. Stetson; to the Committee on the Judiciary.

By Mr. PATTISON of New York:

H.R. 6614. A bill for the relief of Jack T. Arnold: to the Committee on the Judiciary.

By Mr. RONCALIO:

H.R. 6615. A bill for the relief of Nola Grace Ptasynski; to the Committee on Interior and Insular Affairs.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

90. By the SPEAKER: Petition of the Common Council, Michigan City, Ind., relative to providing funds for low-cost paying and neutering clinics; to the Committee on Interstate and Foreign Commerce.

91. Also, petition of the Puerto Rico Chapter, Association of Trial Lawyers of America, San Juan, Puerto Rico, relative to the creation of four additional U.S. district court judgeships for Puerto Rico; to the Committee on the Judiciary.

92. Also, petition of the City Council, Lawrence, Mass., relative to tariffs on textiles and wearing apparel; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H. CON. RES. 195

By Mr. GIAIMO:

On page 2, line 2 strike out $462,349,000,000 and insert in lieu thereof $463,864,000,000;

On page 2 line 5 strike out $64,255,000,000 and insert in lieu thereof $65,770,000,000;

On page 2, line 7 strike out $801,100,000,000 and insert in lieu thereof $792,100,000,000;

On page 2, line 9 strike out $101,100,000,000 and insert in lieu thereof $92,100,000,000;

On page 3, line 9 strike out $2,880,000,000; and insert in lieu thereof $4,395,000,000.

Insert the following new section:

SEC. 4. Pursuant to section 304 of the Congressional Budget Act of 1974

(1) Section 1 of Senate Concurrent Resolution 10 is amended to read as follows:

"That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $355,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $3,300,000,000;

(2) the appropriate level of total new budget authority is $469,700,000,000;

(3) the appropriate level of total budget outlays is $414,250,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $59,250,000,000; and

(5) the appropriate level of the public debt is $707,970,000,000."

(2) Section 2, paragraph (10) of Senate Concurrent Resolution 10 is amended to read as follows:

"(10) Income Security (600):

(A) New budget authority, $167,700,000,000;

(B) Outlays, $138,100,000,000."

EXTENSIONS OF REMARKS

BISHOP ALFRED L. ABRAMOWICZ: 34 YEARS AS A GREAT SPIRITUAL LEADER

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. FARY. Mr. Speaker, during the last district work period I had the pleasure to meet with a man who has given much of himself to the city of Chicago and to the services of God—that man is the Most Reverend Bishop Alfred L. Abramowicz, D.D.S.

Bishop Abramowicz is presently serving as the executive director of the Catholic League for Religious Assistance to Poland, in addition to holding the position of archdiocesan consultor. He is pastor of Five Holy Martys Parish at 4327 South Richmond Street in Chicago, as well as being a truly meritorious bishop for this great city.

Bishop Abramowicz has been a spiritual leader in Chicago for over 34 years. Born in Chicago on January 27, 1919 of the late Adolph and Victoria, nee Fukaczewski, Abramowicz, he was baptized in the same church where he is now pastor.

Bishop Abramowicz attended St. Pancratius Parish Elementary School, pursuing prepatory studies at the Quigley Prepatory Seminary. He then matriculated at St. Mary of the Lake Major Seminary, Mundelein, Ill., where on May 1, 1943 he was ordained into the priesthood by his Eminence Samuel Cardinal Stritch.

He was appointed assistant pastor at Immaculate Conception of the Blessed Virgin Mary Parish in South Chicago in 1943 being transferred to St. Helen's Parish where he served until 1949.

Father Abramowicz was then assigned to pursue post graduate studies at the Gregorian University in Rome—July 7, 1948 to June 1951, where he received his Licentiate of Canon Law Degree. In 1951 he returned to Chicago where he continued his work at the Matrimonial Tribunal until 1968, residing at the Holy Name Cathedral.

On December 16, 1959 he was nominated Papal Chamberlain. On July 4, 1960 he was elected executive director of the Catholic League for Religious Assistance to Poland and has continued to serve with admirable dedication in this office.

He was nominated officialis of the Matrimonial Tribunal in December of 1966, where his compassion and insight into marital problems earned him the respect of everyone, and in March 1968, he was appointed archdiocesan consultor, in which capacity he still serves.

During the summer of 1966 the then Most Reverend Monsignor Alfred L. Abramowicz was chairman of the executive board, during observance of the great spiritual renewal of the vows made to Our Lady of Czestochowa on the occasion of 1,000 years of Christianity in Poland. Polish-Americans from throughout the United States attended this tremendous event hailing the Mother of God, as a Queen of Poland and our Protectress with the celebration of a Pontifical Mass held at Soldier's Field in Chicagoland, and celebrated by His Excellency John Cardinal Cody, Archbishop of Chicago; assistant celebrant being the Most Reverend Bishop Wladystow Rubin, D.D.S.—Titular Bishop of Scrta and Auxillary Bishop of Gmiezno, and delegate for Polish refugees in exile with headquarters in Rome, Italy, as well as being a special envoy representing Pope Paul VI for this occasion.

On May 2, 1968 he was appointed by Pope Paul VI to be Auxiliary Bishop of Chicago—Titular Bishop of Paistum, consecrated on the Feast of Corpus Christi, June 13, 1968, by His Eminence John Cardinal Cody, at the Sacred Heart Chapel, Quigley Seminary South in Chicago.

His Excellency was assigned pastor of Five Holy Martyrs Parish on July 14, 1968 and serves in this capacity to this day.

Bishop Abramowicz is also cochairman of a nationwide campaign to save the American Shrine honoring our Lady of Czestochowa located at Doylestown, Pa., some 60 miles from Philadelphia.

American Catholics are distressed and Polish Catholics are shocked by the news of the danger that the shrine might be lost because of its burdened finances. So far Bishop Abramowicz has, thru a vigorous financial campaign, been able to keep the shrine from closing.

The Shrine of Our Lady of Czestochowa has become deeply rooted in Polish heritage, a source of spiritual solace and uplifting to hundreds of thousands of pilgrims, from all over the country worshippers come to this Shrine of Mary, Queen of Poland and Patroness of the United States.

Mr. Speaker, during my visit with His Excellency he explained to me the meaning of his family crest which I found most informative and which I would like to pass on to you, my colleagues. The coat of arms of the Abramowicz family consists of a blue shield bearing a silver horseshoe with crosses. For Bishop Abramowicz these ancestrial arms have been kept intact, except for the addition of several features which make the new coat of arms personal to him.

One such addition is the heart of the gold diagonal band which symbolizes the bishop's work of charity as executive director for the Catholic League for Religious Assistance to Poland. There is also the open book which represents years of learned service contributed as a member and later as officials of the matrimonial tribunal of the Archdiocese of Chicago.

The chief, or upper section of this lovely shield displays the colors of the Polish flag, horizontally divided into white and red stripes. The gold crown of fleurs-de-lis expresses in simplified form the famous painting enshrined in the Basilica at Czestochwa. The crown honors the Blessed Virgin as patroness of Saint Mary of the Lake Seminary, where the bishop studied for the priesthood, and Immaculate Conception parish, South Chicago, where he was first assigned as a priest.

The bishop's motto is included in the arms: "Cartas Christi Urget Me"—the love of Christ impels me. It is adapted from Saint Paul's Second Epistle to the Corinthian: "For the love of Christ impels us" (II Cor. 5: 14–15).

The processional cross and tasseled hat behind the shield are symbolic of his office of bishop. Priests of every rank, traditionally, have been represented in heraldry by the clerical hat placed over their escutcheons; the color of the hat, and the number of rows of tassels on the hatstrings, denoted the rank of the wearer. For a bishop, the hat is green and has three rows of tassels on either side.

It was inspiring to see the many accomplishments of this humble man as symbolized in his family coat-of-arms. Much can be understood through these dramatic and beautiful symbols, but to truly understand the spiritual leadership of Bishop Alfred L. Abramowicz one would have to know him. Only then is the understanding of this compassionate and devoted spiritual leader complete. I am honored that I have the exciting privilege of knowing Bishop Alfred L. Abramowicz, and have this opportunity to share his tributes with my colleagues in the House, for Bishop Abramowicz is truly a great son of Chicago as well as a powerful spiritual leader.

NEWARK CHERRY BLOSSOM FESTIVAL

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. RODINO. Mr. Speaker, on numerous occasions at this time of year I have enjoyed the memorable experience of walking through Branch Brook Park in Newark, and appreciating the glory of cherry blossoms in full bloom. Over 3,000 Japanese cherry bossom trees complement the park, and this year my home district will hold its second annual Cherry Blossom Festival to focus attention on their magnificent flowering displays.

The appreciation of natural beauty is only one aspect of this enriching celebration, for the festival is an affirmation and renewal of the faith of the people of Newark in their city. The 2-week event includes such cultural highlights as: "Live Theater for Children," at the Newark Public Library; a "Cherry Blos-

som Photo Exhibit," at Prudential Insurance Co.; an organ concert at the Old First Church, as well as contemporary music performed by the Twentieth Century Ensemble, at the Newark Museum; in addition to the opening of the City Without Walls Art Gallery, and an AAU-endorsed marathon "Cherry Blossom Run." The festival will culminate with an Arbor Day ceremony on April 29, at which time 10 new cherry blossom trees will be planted for the enjoyment of future generations. Additionally, the renowned Newark Boy's Choir will present a spring concert prepared especially for the occasion.

Mr. Speaker, I wish to warmly congratulate all who have worked so diligently to make the Cherry Blossom Festival a great success, and on their outstanding contributions to the citizens of my hometown of Newark, N.J.

THE UTILITY SERVICES STAMP ACT OF 1977

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. ROSENTHAL. Mr. Speaker, one of the most pressing issues facing the Congress today is the development of a comprehensive, effective, and equitable national energy plan. Essential to that program is the curtailment of waste and the provision of an adequate, affordable supply of energy for all Americans.

To help meet these objectives, I am today introducing the Utility Services Stamp Act of 1977, legislation which would provide Federal assistance for energy costs to low-income households. Concern for the need for such a measure has been voiced by the President and other Members of Congress who have introduced similar bills.

This program is necessary to assist many low- and fixed-income persons meet rapidly rising utility costs. Substantial increases in the cost of oil, electricity, gas, telephone service, and water have affected all Americans, but those living on subsistence-level incomes or less are being hurt most. The skyrocketing price of energy has forced those with limited financial resources to devote major portions of their incomes to the purchase of utility services. According to the Federal Energy Administration, these persons spend, relative to their income, 10 times the national average on energy costs. As a result, many of these households experience considerable economic hardship which also may affect the families' health and well-being. Federal assistance for such households would alleviate this hardship.

My bill would provide utility stamps to households earning up to $8,000 to help pay a portion of their gas, electricity, household heating oil, telephone, and water bills. Utility stamps would range in value from $4 to $28 monthly, depending upon income and the number of persons in a household. Families and single persons would be eligible to participate in this program. In addition, utility stamps would be available to both homeowners and renters.

This legislation would make use of existing HEW programs and would not create a new Federal bureaucracy. The Secretary would delegate responsibility for the certification of eligible households and issuance of coupons to States choosing to participate in the program.

I am hopeful that Congress will realize the need to insure that all Americans have adequate utility service for their homes and promptly approve this measure.

A VITAL AMENDMENT

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. VANDER JAGT. Mr. Speaker, it was my intention last Friday to speak in greater detail concerning the very important amendment that I offered to H.R. 5970, the Department of Defense authorization for fiscal year 1978. This legislation, handled in expert style by the House Committee on Armed Services, now is expected to be voted upon today.

As you know, my amendment, providing for a relatively small but extremely important sum of money—$10 million—to be spent by the Department of the Army to continue development of the advanced diesel tank engine, was formerly adopted by the House last Friday. I am most grateful for that affirmative action.

I particularly want to acknowledge the wonderful cooperation and assistance that I received from Congressman SAM STRATTON, truly one of our most knowledgeable congressional experts on our Nation's military tank development, and his staff. And, of course, I am very grateful to Congressmen CHARLES BENNETT and ELWOOD "BUD" HILLIS, as well as Chairman MELVIN PRICE. I am most appreciative of their personal interest and assistance.

My amendment simply read:

On page 4, line 24, strike out "$2,365,232,000;" and insert in lieu thereof "$2,375,232,000".

Now, let me discuss this matter in greater detail.

As many Members know, the Army has been pursuing the development of a new tank for over 12 years. Initially it was known as the MBT–70 which was a combined program with the Federal Republic of Germany and more recently a competitive program between Chrysler and General Motors, known as the XM–1 tank.

My remarks today are not intended in any way as a criticism of the turbine engine. My point is that it is an unproven engine at the present time and there is substantial Army testimony to support that statement. As a matter of fact, the distinguished chairman of the House Armed Services Committee stated in his report currently before us that:

The Committee is concerned that the Army may be taking an unnecessary risk in the XM–1 program by terminating development of the diesel technology before the turbine engine has fully proven itself.

The committee pointed out further that:

It remains an unproven system.

The committee stated further that:

It believes that it would be prudent to continue development of this engine as an in-house project . . . until the turbine has been certified to assure its availability

As a matter of fact, the Army requested the substantial sum of $29 million in additional funds in this year's budget which was called a "turbine maturity program," in order to further the development of the turbine engine. In view of this and the fact that the XM–1 tank program is estimated to cost $4.9 billion I feel the Congress should insist on a viable alternative engine in the event the turbine engine encounters significant problems, or in the event it cannot meet the Army's requirements.

I should tell the Members it is important to understand that the Army is currently undertaking a 2½ year full scale engineering development program on the XM–1 tank. For $10 million the Army can continue development of the diesel engine during this period of time so that a viable alternative will be available to the Army.

If the turbine engine should fail then the program will not be in jeopardy. If the turbine engine proves successful then there are several other applications for this new diesel engine technology, namely:

First. Retrofit the M–60 tank to upgrade its performance. The engine and transmission can be installed in the M–60 without hull modification.

Second. High mobility vehicle program called HIMAG. A DOD-DARPA program.

Third. Lighter-than-air patrol craft for the Navy, where the diesel engine is required for the long mission requirement.

Fourth. A new landing vehicle assault—LVA—under development for the Marine Corps.

Fifth. Retrofit M–60, M–48, M–47 tanks currently in the hands of our allies.

Sixth. New tanks being built in foreign countries.

Congress on several occasions has asked the Army to redirect its efforts to reduce production costs and at the same time improve the fightability and survivability of the XM–1 tank.

The Army has accomplished these tasks. There seems to be no question that this is the best tank in the world today; however, due to its lengthy development it is imperative that it reach production at the earliest possible time.

In order to insure that no unreasonable delays or costs are incurred it is essential that all risks be avoided. One such risk that I have mentioned is the engine.

The General Motors tank possessed the advanced air cooled diesel engine known as the AVCR–1360. It has been under development since the MBT–70

joint program with the Federal Republic of Germany. This engine is fully developed and the Army testified it is more mature than the turbine engine.

To date, the Army has spent more than $50 million in development of advanced diesel technology incorporated in this engine. To complete its development will only require $10 million over the next 2 years. It will result in an engine configured for the Chrysler XM–1 tank. These funds will also include the running of a 400-hour NATO endurance test.

In conclusion, Mr. Speaker, my amendment will authorize the Army to continue with the development of the diesel engine during the Army's 2½-year full scale engineering development program. I feel this small sum represents a modest insurance policy in protecting the Government's enormous investment in the XM–1 tank program currently estimated to cost $4.9 billion.

Again, I thank all those members of the House Armed Services for their cooperation and interest and, of course, I am most grateful for the floor support last Friday.

THE SEARCH FOR NAZIS IN AMERICA

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. DRINAN. Mr. Speaker, the task of uncovering Nazi war criminals, who lied to gain admission to and in some cases citizenship in the United States, has been a difficult process. Two of our colleagues in the House, Chairman EILBERG and Congresswoman HOLTZMAN, have been very active in pursuing available legal remedies in this regard.

In a recent issue of Christianity and Crisis, Wayne H. Cowan examines the scope of the problem and the efforts Representatives EILBERG and HOLTZMAN have made to resolve it. He points to lax enforcement on the part of the Justice Department, especially its component unit the Immigration and Naturalization Service. Mr. Cowan also discusses the "cold war considerations including CIA and FBI machinations—which—were involved in suppressing the investigations."

I am inserting the article in the RECORD at this point:

NAZIS IN AMERICA? PROCESS, DUE AND OVER-DUE

(By Wayne H. Cowan)

Justice hangs by a slender thread, and too often not even by that. Contemporary tales of injustice are so abundant and have so bloated the modern mind that our consciences are blighted and react slowly, if at all, when confronted by a tale yet unheard, however moving. The more so when it is the tale of *another* agency of the United States Government derelict in its duty.

Yet, thank God, there are still a few issues that touch the core of our remaining sensitivity—and the search for ex-Nazis is one of the foremost. We sputter with anger at the thought that they live, shielded and safe, untried and apparently untryable, in certain Latin American countries. Only gradually are we beginning to recognize the "possibility" that they may be among us here in God's own country and that they have, in fact, been shielded and largely untried by no less than God's own servants in US Government agencies.

Thanks to the "collectors of justice"—both those who survived the Dachaus and the Buchenwalds and those who have searched relentlessly for Nazis in their behalf—certain parts of the media, and particularly to two members of the House Subcommittee on Immigration, Chairman Joshua Eilberg of Pennsylvania and Elizabeth Holtzman of Brooklyn, there has been a resurrection of this concern in the life of the nation. All at once in late 1976—"thanks" to "heretofore unavailable" witnesses from the Soviet Union and Israel (can you believe it?)—the Immigration and Naturalization Service (INS) announced a significant expansion of investigations to almost 100 persons compared to a list about one-third that many two years earlier.

Thus, finally after 25 years of footdragging—and in some cases outright finagling—the INS has turned from the John Lennons to the by now much more difficult task of prosecuting persons who entered this country after World War II illegally by denying that they had participated in the persecution and execution of Jews in Europe a few years earlier. Nor does the INS deserve the whole burden for this sordid story. In the anti-Communist hysteria of those days such persons who were considered "suitable" were coveted and used by the CIA (just as our army of occupation in Korea gave high posts in the postwar administration of that country to those who had collaborated with the Japanese). After all, good Nazis have always been anti-Communists, right?

Yes, and there was the State Department, which among other things continued until late 1976 to refuse to return Andrija Artukovic to Yugoslavia—though he had entered the U.S. as a temporary visitor and was ordered to leave in 1952—because of fear of political persecution. (He was also reported to have FBI "character references.") And well might they fear for him; as former Interior Minister of the Nazi-run puppet state of Croatia (and therefore head of the police and internal security forces), he supervised the arrest of 30,000 Jews under his jurisdiction, of whom 90 percent were murdered.

The case of Archbishop Valerian Trifa, spiritual leader of the Rumanian Orthodox Episcopate of America, has aroused particular concern within the U.S. religious community. In May 1975, almost 25 years after his arrival in this country as a displaced person from Italy—and almost as many years after his entry was first challenged and called to the attention of the INS for investigation—the Government finally called for a trial charging that the archbishop had won his citizenship through "false and untrue" denials that he had been a member of the Iron Guard and that he "did advocate the killing of Jews and Masons and did participate in activities commencing on or about January 21, 1941, which resulted in the murder of Jews. . . ." The Iron Guard has been characterized as the storm troopers of the fascist regime of Ian Antonescu. (The allegations against Trifa are detailed by Howard Blum in an article in last October's *Esquire* and in his new book *Wanted! The Search for Nazis in America*, Quadrangle Press.)

Members of Concerned Jewish Youth highlighted the Trifa case by disrupting the National Council of Churches' Governing Board meeting early last October and by frequent sit-ins and picketing at NCC headquarters in New York. They chose the NCC because the archbishop—by the decision of a constituent member, the Orthodox Church in America (OCA)—was a member of the Council's Governing Board, albeit totally inactive since he attended only 14 meetings in over 25 years and only one since 1970.

Goaded by the actions of the Jewish youth and other expressions of concern from the Jewish community, the NCC Executive Committee took action in late October. It requested that the OCA refer to a commission it had created to study the case a request that Trifa refrain from executing his duties as a member of the Governing Board until the matter was resolved by the OCA and the civil judicial process. This request was granted on February 4, reportedly despite the Archbishop's opposition.

The NCC is obviously relieved to have this issue removed from its doorstep. In an effort to assure that no such situation arises again, the NCC Executive Committee on October 30 authorized a committee to review the constitution and consider the establishment of qualifications for Governing Board membership that will "insure the moral integrity of the council."

Yet, there is precious little comfort here for authorities, moral or other. One would have expected OCA officials to have dealt openly and fully with this question a generation ago. We fail to see on their part any effort to restrain or suspend the archbishop's activities Instead, we hear their plea that we adhere to "procedures prescribed by law" and the statement that "[such] observance of due process" would have prevented the genocide by Nazi and Stalinist regimes.

Yes, let us be for due process, but what about the *over*-due processes that have dominated INS procedures these many years? Even today when the process has finally begun it will still take years for definitive action to be taken. Two earlier investigations of Trifa conducted by the INS were discontinued for lack of evidence. In September 1973 Charles Gordon, INS general counsel, indicated that a new investigation would be conducted. Eight months later Congresswoman Holtzman complained that not even a single witness had been interviewed in the interim. Another year passed before the U.S. Attorney in Detroit instituted proceedings against the archbishop. The trial, which it was anticipated would begin in the fall of 1975, has not yet begun and reportedly will not begin until midyear at the *earliest*. It will be a lengthy and complex litigation with likely appeals. Even if the Government is successful and wins a denaturalization decision, thereby rescinding Trifa's U.S. citizenship, a separate and further proceeding would be required for deportation.

Archbishop Valerian Trifa claims that he is the victim of a "Communist plot." His church insists rightly that all persons are innocent until proven guilty. However, in a case of such serious proportions, its failure to suspend him from all ecclesiastical duties until their own three-bishop commission completes its investigation (which at this date is so overdue as to be unbelievable), or until the courts render a verdict, however long "due process requires," is itself a miscarriage of justice. We demand as much of police officers under investigation as well as other civil servants and officials. Is a "servant of the Lord" to be treated differently, especially in so serious a case? Does the church as the servant of God choose its officials and maintain them in office with less scrutiny than do the state and its agencies?

Which returns us to where we started: the INS. There are those who read into this overdue process of dealing with the possible presence of Nazis in our midst the existence of a super-worldwide continuing Nazi organization that has successfully thwarted both the necessary investigations and the prosecutions by the INS. On the basis of present evidence such a judgment must be considered far-fetched. However, there is no question that cold war considerations including CIA and FBI machinations were involved in suppressing the investigations, which were characterized by "appalling laxness and superfi-

ciality," in Rep. Holtzman's words. "Despite the 'high prority' nature of the INS investigation," Ms Holtzman said, "its administration and conduct can only be described as haphazard, uncoordinated and unprofessional."

There can be no doubt about the difficulty of conducting these investigations almost 30 years after the fact. Nevertheless, they must be pursued with diligence and care. Overdue process can mean only one thing for everyone involved: Justice delayed is justice denied.

PENNSYLVANIA LEGISLATURE SUPPORTS NATIONAL HOLIDAY TO HONOR MEMORY OF DR. MARTIN LUTHER KING

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. EILBERG. Mr. Speaker, again this year, I have had the privilege of joining with a number of my colleagues in introducing legislation which would set aside January 15 of each year as a national holiday in memory of the late Rev. Dr. Martin Luther King.

As of this date, Mr. Speaker, 124 Members of the House have sponsored such legislation, but, under the rules of the Subcommittee on Census and Population of the House Committee on Post Office and Civil Service, to which this legislation was referred, no formal action will be taken unless and until 218 Members—a majority of the House—have joined in such sponsorship.

It is my urgent hope, Mr. Speaker, that Members will take the initiative and join in sponsorship of this legislation. It seems to me that we have a responsibility to affirm the life of a man who fought for peace and against violence; that we have a responsibility to recognize the work of a man who believed deeply in law and the Constitution and strove to make both our law and our Constitution work for all Americans.

Four years ago, Mr. Speaker the general assembly of the State of Pennsylvania adopted Senate Resolution 203, memorializing the Congress to establish a national holiday in honor of Dr. King. Because the message of that memorial resolution is as pertinent today as it was when the Pennsylvania General Assemby adopted it in 1973, I am placing in the RECORD the complete text and legislative history of this resolution:

MEMORIALIZING CONGRESS TO DESIGNATE JANUARY 15 AS A NATIONAL HOLIDAY IN MEMORY OF DR. MARTIN LUTHER KING

The Reverend Dr. Martin Luther King, Jr., was a modern apostle of liberty and justice for all peoples, regardless of race, color, or creed.

Doctor King was an outstanding leader in the cause of Civil Rights and he used his position as head of the Southern Christian Leadership Conference to establish the principle of nonviolence.

Whereas, the Reverend Doctor Martin Luther King, Jr., was a man who dedicated his life to the revolutionary principles that love and justice are the most powerful truths that mankind possess.

The Reverend Doctor Martin Luther King, Jr. devoted a lifetime to the causes of the poor, to the civil and human rights of all peoples, and to the purpose of restoring to mankind domestic and world peace through the concept of nonviolence for which he was awarded the Nobel Peace Prize.

The Reverend Doctor Martin Luther King, Jr,. was a modern apostle of liberty and justice for all peoples, regardless of race, color, or creed, and of the need for cooperation among men, of the need for brotherhood and unity among peoples of all races, colors and religions.

Around the entire Nation there continues the good works begun by this great man whose birthday anniversary is celebrated on January 15 of each year and whose martyrdom we respect and pay reverence to; therefore be it

Resolved, That this day, the forty-fourth anniversary of the birthday of Doctor Martin Luther King, Jr., a great American and a great humanitarian, that this Senate place on record its appreciation and gratitude in recognition of the services rendered by him to the Nation and to mankind; and be it further

Resolved, (the House of Representatives concurring), That the General Assembly of the Commonwealth of Pennsylvania memorialize the Congress of the United States to designate January 15 as a National holiday in memory of the Reverend Martin Luther King, Jr.; and be it further

Resolved, That copies of this resolution be transmitted to the presiding officers of each House of the Congress of the United States and to each Senator and Representative from Pennsylvania in the Congress of the United States.

CONGRESS MUST TAKE ACTION ON CIGARETTE BOOTLEGGING

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. RANGEL. Mr. Speaker, on March 16, 1977, the New York State Legislature adopted Legislative Resolution No. 95 asking for the Congress to enact legislation making it a felony to transport cigarettes in interstate commerce for unlawful purposes and to establish a nationwide program with respect to payment of taxes on cigarettes.

To this end, today I introduced legislation making it a felony to traffic in "bootleg" cigarettes. I urge my colleagues on both sides of aisle to support this pieces of legislation.

The following is the text of the New York State Senate Resolution No. 95.

LEGISLATIVE RESOLUTION SENATE NO. 95

Legislative Resolution of the State of New York memorializing Congress to enact legislation making it a felony to transport cigarettes in interstate commerce for unlawful purposes and to establish a nationwide enforcement program with respect to payment of taxes on cigarettes

Whereas, The State of New York and many other states are experiencing considerable loss of tax revenues due to the avoidance of cigarette tax payments by bootleggers transporting cigarettes across state lines; and

Whereas, Such loss is occurring at a time when most states are least able to afford this loss of tax revenues and results in the necessity of increased taxes on personal income and business activities; and

Whereas, In addition, this transport of cigarettes across state lines without payment of tax has caused the closing of many businesses and loss of employment; and

Whereas, In order to avoid further losses, the states need stronger federal penalties and a beefed-up federal enforcement program; now, therefore, be it

Resolved, That this Legislative Body respectfully memorializes the Congress of the United States to enact legislation making it a felony to transport cigarettes in interstate commerce for unlawful purposes and to establish a nationwide enforcement program with respect to payment of taxes on cigarettes; and be it further

Resolved, That copies of this resolution be transmitted to the President of the Senate of the United States, the Speaker of the House of Representatives and to each Member of the Congress of the United States from the State of New York.

WHY NOT SACCHARIN FOR DIET DRINKS?

HON. SAMUEL L. DEVINE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. DEVINE. Mr. Speaker, bureaucratic overreaction has again been demonstrated by the recent saccharin boondoggle. This Nation has become the most overregulated and overly restricted in the world while at the same time extolling our "freedoms."

We put a warning on cigarette packages, but still not only freely sell them, but our Government also subsidizes tobacco.

It seems to me the least we should do is to afford the use of saccharin the same courtesy.

Dr. Herbert Ley, former FDA Commissioner, recently spoke in Columbus, Ohio, and roundly criticized the Canadian study. An account of Dr. Ley's remarks were reported in the Scripps-Howard Columbus Citizen-Journal of April 25, 1977, which is quoted for the benefit of our Members.

The article follows:

FORMER FDA CHIEF CRITICIZES SACCHARIN STUDY

(By Sylvia Brooks)

You would have to drink 1,400 cans of diet pop per day to match the amount of saccharin fed to rats in the research study which caused a ban of that substance, a former federal official said Sunday.

Or, you would have to eat 4,375 small packets of saccharin per day for your entire life, he said.

Herbert Ley, M.D., former commissioner of the Food and Drug Administration (FDA), spoke at the Diabetes Health Fair at the Center for Tomorrow.

"Even if that could be done," Ley said, "only one in four adults would develop bladder cancer after age 60."

Ley said the FDA had no choice but to ban saccharin after a Canadian study, because of the Delaney clause in the Food, Drug and Cosmetic Act.

That clause, he said, does not allow the FDA to consider risks to the public versus possible benefits of continuing to market a substance.

"Every other piece of health and safety legislation allows those factors to be considered," the doctor said.

"The FDA must administer the law as it is written on the books. The commissioner had to ban saccharin. Laws are made by people and they are not infallible or necessarily consistent," he added.

Ley said there is "no good agreement

among scientists as to the reliability of current tests."

In the Canadian study which led to the FDA's saccharin ban, 50 male rats were fed the high dosages, and a total of 12 bladder tumors resulted, four of which were benign and eight malignant.

Among 50 female rats, there were only two tumors, both malignant.

Using the FDA figures, Ley said if a person drank one 2-ounce diet cola per day for an entire lifetime, there would be only 3.6 chances in 10,000 of getting a tumor.

Currently, the rate for bladder tumors from other sources runs to 150 per 10,000 persons.

There is no reliable study on effects of saccharin as a cancer producing agent on human beings, he said.

Ley has proposed that the Delaney clause be amended to allow one sweetener to be marketed while an entirely safe one is being developed.

He suggested the FDA choose one from among saccharin, cyclamates, and a third sweetener not yet cleared for use by the FDA, and permit it to be used as an additive.

Although availability of saccharin cannot be proven to be absolutely necessary for heart patients, diabetics and the obese, Ley said he is "strongly convinced that it contributes to a higher quality of life."

THE ROMANIAN COMMUNIST REGIME'S ABUSE OF PROTESTANTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. McDONALD. Mr. Speaker, since the World Council of Churches is far too interested in temporal political affairs, it falls to others to call attention to the unhappy situation of Christians of various Protestant denominations in Communist Romania.

Baptists, Adventists, Pentecostals and others are continually fined, demoted, harassed, and otherwise persecuted by the Romanian Government without their protests being heard or considered by the bureaucrats claiming to represent their coreligionists in the West.

In a deliberately insulting manner, groups meeting to conduct worship are prosecuted under a statute supposedly aimed at "hooligans and parasites." One need hardly point out that people at prayer do not fit into these categories, but they are so branded by their government. In keeping with its totalitarian nature, the Communist regime in Romania also decides what words mean.

Hence, Protestants are charged with expressing "a parasitic and anarchic conception of life." Not only is this very far from any normal reading of the truth, not only is it grossly insulting to a religious people, but let us note that punishing people for their alleged "conception of life" is hardly in the "spirit of Helsinki."

In the "International Pact Regarding Civil and Political Rights," article 18 states:

1. "Any person has the right to freedom of thought, conscience and religion; this right implies the freedom to adopt a religion or conviction of his choice, as well as the freedom to manifest the religion or conviction, individually or in community, in public as well as in private, in cult and in the carrying-out of ritual, in practices and in education.". . .

3. "The freedom to manifest religion or convictions cannot be suspended except through the restrictions foreseen by laws and necessary for the protection of security, order and public health, or of morality or the freedoms and basic rights of others." (Our emphasis)

In art. 21 of this Pact it is written:

"The right to peaceful assembly is recognized. The practice of this right cannot be suspended except through the restrictions in accordance with the law and necessary to a democratic society, in the interest of national security, public order or to protect the health and public morality or the rights and freedoms of others."

Any serious student of communism knows that it is laughable to imagine the Communists observing such restrictions upon their totalitarian behavior. After all, their own constitution contains similar fine words and has been meaningless from the instant of its conception.

Protestants within Romania have sent us detailed examples of the abuse to which they are subjected for their religious beliefs. Let us review some of them now:

DETAILED EXAMPLES

On June 27, 1974 an intimate meeting of Pentecostals took place in the family of Dumitru Rosca from Bucuresti, Str.Soveja #26. They were fined 62,000 lei for this, Dumitru Rosca with 3,000 lei.

In 1971, the pastor of the First Baptist Church of Bucuresti, Vasile Brinzei, celebrated his only son's birthday and invited to this a group of young people from the church which he served. They were fined 8,000 lei.

Again in 1971, Dr. Daniel Aninoiu from Cimpina, together with three other Evangelical Christians, were fined 4,000 lei.

Stefan Dobrescu from Vulcana Bai, Mehedinti County, was visited in December, 1976 by two of his co-worshippers, Evangelical Christians. They were fined 3,000 lei.

Constantin Magdici from Vintul de Jos, County Alba, was visited on January 4, 1976 by three other members of a religious group called the Lord's Army. The police came over them, insulted them and fined them: Constantin Magdici 5,000 lei, his wife 1,000 lei and the visitors 1,000 lei each.

In the village Idiciu, Mures County, in 1976, members of the Pentecostal church met at the place of worship together with the pastor, Gustav Betineanu from Tigu-Mures. They were fined by the police 7,000 lei.

In the village Ruja, members of the Pentecostal church together with their pastor were fined, in 1972, 47,000 lei for not having authorization.

The group of Pentecostals: Ion Saniu, Matei Lusca, Vintila Zoltan, Dumitru Chercea and Laurian Chercea, from Medias, were fined 19,000 on November 3, 1973.

In the village of Moravita, Timisoare County, Gheorghe Neculcea together with five Baptists were fined in 1976 1,000 and 2,000 lei each.

Lidia Barbu From Timisoare, while visiting a Baptist family with her sister and brother-in-law, in 1975, were fined 1,000 lei each. The appeal made to the Court at Satu-Mare was initially accepted but later on, after the intervention of the security apparatus, there was a reversal of the decision and a fine had to be paid.

Three elderly Baptists from Cruceni, Timisoare County, at the beginning of February, 1977, were visiting a believer, an old, sick woman. For this they were fined 1,000 lei.

Paraschiva Busnei, a Baptist from Turnu-Severin, a pensioner, was taking a treatment at Govora-Bai. There she was fined 1,000 lei because she was found reading the Bible in her room.

The Baptist pastor, Traian Ciupuliga, was visiting the Baptist, Constantin Nedelea, from the village of Fintinele, Mehedinti County. While they were eating, the police came and fined them 300 lei.

In Zalau, Salaj County, in 1974, a group of Pentecostals who met without authorization were fined 40,000 lei.

In the village of Buciumi, Bihor County, in 1975, Gheorghe Ostarschi together with some believers were fined 10,000 lei.

A group of Evangelical Christians, among them Dr. Serban Constantinescu and Dr. I. Soroceanu, were on a trip to the mountains. On the return trip, they stopped and had dinner with the family of a co-worshipper from Curtes de Arges. For this they were each fined 3,000 lei.

The Baptist pastor, Liviu Olah, was fined by the police from the village of Buchin, Caras-Severin County, with 1,000 lei because on January 13, 1976 he preached the Gospel to the Baptist church in this village on their invitation.

A TRIBUTE TO THE CHRISTOPHER COLUMBUS MARCH

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. RODINO. Mr. Speaker, on April 5 of this year my colleague, the Honorable GLADYS NOON SPELLMAN of Maryland extended congratulations to Charles T. Gabriele, a professor of business management at the University of Maryland, who composed "Christopher Columbus March" as a tribute to the Italian explorer who discovered America.

I join my learned colleague from Maryland in congratulating Professor Gabriele on his musical and patriotic achievement. I am also proud to state that prior to relocating to Maryland, Professor Gabriele was a resident of my home State of New Jersey, where he was a member of the faculty at Rutgers—the State University of New Jersey.

During Bicentennial Year 1976 Professor Gabriele noticed many varieties of celebrations, but felt that little or no attention was being accorded to Christopher Columbus. He embarked to correct this situation by composing "Christopher Columbus March" as a Bicentennial tribute to the great mariner.

The march not only fulfilled its intended Bicentennial salute but continues to grow as an enduring honor for the discoverer of the New World.

It is interesting to note that Professor Gabriele is not a musician by occupation, although he served as a bandmaster in World War II. By profession he is a professor of business management. But for him, making music is a pleasant avocation. He is a long-time member of the American Association of University Professors, but is also a member of the Institute for the Arts; National Band Association, and a director of the National Concert Band of America.

Mr. Speaker, it is indeed fortunate that Professor Gabriele has chosen the uni-

versal language of music to honor Christopher Columbus, for through his march we experience once again the majesty of that ancient voyage. It was quite pleasant to learn from my colleague of Maryland that our nuclear submarine U.S.S. *Baltimore* was recently christened to the tune of "Christopher Columbus March," and the U.S. Naval Academy appropriately included the march at its observance of Navy Day.

ELECTRONIC MAIL AND THE QUESTION OF PRIVACY

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. PATTISON of New York. Mr. Speaker, as the recent report of the Commission on Postal Services suggests, we are headed toward an era of change in the nature of postal service in the United States.

One of the changes advocated by the Commission, and apparently supported by key Members of Congress, is the advent of electronic mail. This would utilize relatively available technology to transmit mail almost instantaneously.

Apparently, a great deal of study has been directed at the issue of electronic mail. Volumes have been written on the technology, hardware, and personnel that would be required. Costs have been estimated and timetables have been projected.

However, our colleague, CHARLES WHALEN, raises the important point that little or no consideration has been given thus far to the question of maintaining privacy and confidentiality in an electronic mail system.

As you know, CHUCK WHALEN is not a stranger to the issue of citizens' rights to privacy. He is the coauthor of the Bill of Rights Procedures Act, H.R. 215, of which I am a cosponsor. In my opinion this is the most important comprehensive right-to-privacy legislation now pending in the Congress. In the 94th Congress, it was approved 5 to 0 by the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, on which I served at the time. Unfortunately, the bill did not get out of committee before the 94th Congress ended.

Mr. WHALEN recently wrote an open letter to my friend and colleague, JIM HANLEY, the distinguished chairman of the Subcommittee on Postal Operations and Services. The letter articulates the concerns that many of us have with respect to privacy and proposed electronic mail systems. And it also helps to underline the need for passage of the Bill of Rights Procedures Act, portions of which are directly relevant to electronic mail and the question of privacy.

I commend to your attention the open letter to JIM HANLEY. The text follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 31, 1977.

Hon. JAMES M. HANLEY,
Chairman, Subcommittee on Postal Operations and Services, House Committee on Post Office and Civil Service.

DEAR JIM: I was very interested to read your recent announcement of hearings next week on the subject of "electronic mail." There clearly is a need for a thorough Congressional review of how the Postal Service will cope with technological advances in communications.

The press release you issued is somewhat troubling to me, however. In explaining why your panel is looking into electronic mail technology you said, "The purpose of these hearings is to hear from the experts what the impact of new communications systems may be on future mail volume, service levels, rates and subsidies."

I am writing to suggest that you expand the scope of your inquiry to include an examination of the issue of privacy as it relates to electronic mail. Despite the crucial importance of this issue, very little attention seems to have been paid to it thus far.

Jim, I must apologize in advance for the length of this letter. It is probably unfair of me to impose upon your valuable time to this extent, but the complexity of the subject matter forces a detailed exposition by me.

A review of the several public studies of electronic mail shows only one specific, substantive discussion of the privacy issue. I refer now to the two paragraphs that were dedicated to the topic of privacy in the report prepared for the USPS by the National Research Council (NRC) of the National Academy of Science. The NRC report said, "A key element to public acceptance and confidence in the use of electronic message services is the public perception of the privacy afforded by the system."

In effect, the National Research Council sounds a tiny warning that all of the studies of technological capabilities, systems designs, hardware costs, personnel requirements, etc. will be moot unless more thought is given to privacy implications of electronic mail. If the public does not believe the confidentiality of messages sent via electronic mail can be assured, then they cannot and should not be expected to patronize the service.

This is a very real, very reasonable concern and it bothers me very much that until now nobody seems to have looked at it very seriously. Yet, it is fundamental to the public acceptance of the basic concept of electronic mail.

Thus far, virtually all public discussion of electronic mail has focused on hardware, technology and labor-management questions. This is understandable, because these subjects are far easier to quantify than is the abstract concept of privacy rights and expectations. But privacy questions must be weighed from the very start, and your upcoming hearings appear to offer an excellent opportunity for this.

If there is going to be an electronic mail system of any dimension, and all available evidence indicates that there will be, then it seems to me imperative that we begin now to consider what steps we in the Legislative Branch must take to help assure postal patrons of the confidentiality of their communications.

For instance, current law is very clear on the point that first class mail, sealed envelopes in transit from sender to recipient, may not be opened or read. Can we offer comparable legal assurances to senders of messages that will be electronically transmitted from point to point along the way?

The NRC report said, "A knowledgeable individual with access to the system could probably gain access to any specific message if its existence were known or suspected. Realizing this, the originator of electronic messages who is unwilling to risk either casual or intentional interception of his message would be well advised to utilize another service. . . . Originators of a message that requires confidentiality as well as speed have to trade off one consideration or use a security code."

Thus, we should be thinking about statutes that would make it unlawful for postal service employees to violate intentionally the confidentiality of any electronic mail message that is entrusted to them. And I think we need to look into legislation to make it just as illegal to intercept a confidential message sent by electronic mail as it now is to intercept one sent by letter.

In fact, the Bill of Rights Procedures Act (H.R. 215 and S. 14), which I coauthored with Senator Mathias, includes a section that would amend the 1968 wiretap law, 18 USC 2510, to extend its protections to "nonaural" wire communications. The wiretap law today applies only to spoken communications and does not prohibit interception of messages sent by telegram, computer data transmission . . . or electronic mail. (A case in point: the disclosure in 1974–75 of the systematic, daily interception of all international cable traffic into and out of the United States for a period of many years.)

Another, perhaps complementary, approach is to look at the possible need for encryption codes for electronic mail transmissions. My staff has followed closely the work done by the National Bureau of Standards' Institute of Computer Science and Technology and concludes that there is a wealth of information available on this subject.

A second example for the need to consider legislative policy regarding confidentiality of communication via electronic mail is the case of "mail covers." This, of course, is the practice of regularly monitoring information found on the outside of envelopes in order to learn information about who is writing to a subject individual.

Two years ago the Church Committee on the CIA, the House Judiciary Committee, and your own Committee all looked into the then-newly-revealed fact that there had been rather widespread postal surveillance, including mail covers involving myriad subjects and tens of thousands, perhaps millions, of pieces of mail.

Of course, those mail covers had involved conventional letter mail and the logistics of truly massive or, conversely, highly sophisticated mail cover operations made that difficult to do and difficult to conceal. I wonder, though, whether that will still be true when records of electronic mail transmissions could be logged instantaneously and readily stored and retrieved by computer.

Consequently, I call your attention to Title II of the proposed Bill of Rights Procedures Act, which would provide statutory limits on the practice of mail covers. Perhaps we should consider adapting such a proposal to take further into account the prospects of electronic mail.

Well, I could continue, but I think you can see the drift of my thoughts. In short, I would hope your panel, at its hearings next week, might consider taking up the question of privacy in electronic mail. Certainly, information must also be sought about volume, rates, hardware, etc., but let's keep in mind the human side of the equation as well.

Thanks for your forbearance, Jim.

Sincerely,

CHARLES W. WHALEN, Jr.,
Member of Congress.

WHO RUNS THE STATE DEPARTMENT?

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. KASTENMEIER. Mr. Speaker, I would like to call to the attention of my colleagues the Washington Post editorial of April 22, regarding George Meany's self-anointed role as arbiter in determining which foreign nationals may or may not obtain visas to enter the United States.

Indeed, it may be true, as the Post states, that the three Soviet trade unionists who were denied visas are Soviet Government "stooges." But, that is not the issue. The major point of the Post editorial is that it is absolute anathema to a free society, such as ours, that one man, George Meany, can determine that the people of the United States cannot tolerate the presence of these Russian trade unionists in our country.

The denial of these visas runs counter to our support of the Helsinki conference commitment to free travel, and it also represents a departure from President Carter's own statements on the subject of human rights and the freedom to travel. Even the People's Republic of China, with which we have major differences, has allowed American visitors within its borders and it even invited a congressional delegation to visit this past month.

Yet, the State Department and the administration have bowed to the whims of one person and have given him veto power over the issuance of visas. To embrace and to allow to prevail the point of view that Mr. Meany holds against certain representatives of foreign countries can render meaningless the Helsinki and human rights commitments. Instead of following Mr. Meany's narrow-minded purpose, we should be encouraging freedom of travel and the free exchange of ideas. Our Nation certainly has nothing to fear from the appearance of three Russian trade unionists in our midst.

Mr. Speaker, this is not the first time that George Meany has used his influence to meddle in the conduct of our foreign affairs. It is no wonder that labor may be losing some of its credibility with the Congress, and Mr. Meany's mentality may help explain some of labor's current problems with the Congress:

"SECRETARY OF STATE" MEANY

George Meany is right in saying that Communist trade unionists are government stooges. His pride in the "free," i.e., nongovernmental, status of American unionists is well earned. But he's not the Secretary of State. It's wrong for him to use the AFL–CIO's muscle to force a too-long-pliant State Department to deny entry visas to these Soviet functionaries. Mr. Meany did just that a few days ago, not for the first time, to prevent three Russians from attending the farewell convention of retiring longshoremen's leader Harry Bridges. The Bridges union, needless to say, is not a part of the AFL–CIO.

To give Mr. Meany the best of it, he evidently believes a visa is a laurel conferring respectability. But for a country like the United States, supposedly committed to the free exchange of ideas, goods and people, a visa simply certifies that the person being admitted has acted within the law. The United States accepted a fresh commitment to free travel at the Helsinki conference in 1975. If it continues to restrict foreigners' travel arbitrarily, it will suffer embarrassment at the Belgrade follow-up conference starting in June, and it will be less able to press legitimate objections to the human-rights violations of other countries, including Russia.

President Carter has many fish to fry with Mr. Meany. Politically it can't be easy for the administration to take him on again. But if it's serious it will. First, the State Department must alter its policy and stop denying visas on political grounds alone. Then, the administration must move to amend the law that gives the department its present denial authority.

We would not want to see all restrictions on foreigners' entry removed, however. Specifically, to ensure that Americans who so desire are admitted to the Soviet Union and like countries, the United States must be able to hold up the entry of their citizens. Otherwise, as sad experience demonstrates, the Russians will cheat. Of the need for hard bargaining with the Russians to obtain equal treatment in this matter as in others, Mr. Meany, we are sure, would approve.

SMALL IS BEAUTIFUL

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. BAUCUS. Mr. Speaker, the National Center for Appropriate Technology, located in Butte, Mont., funded by the Community Service Administration, sponsored a public forum on March 21, at 8 p.m., in Washington, D.C. The guest speaker was the author of "Small is Beautiful," economist E. F. Schumacher, who spoke on "Economics As If People Mattered." Dr. Schumacher stressed the importance of developing systems that are much smaller in scale, energy conserving, and more labor intensive. In the afternoon of that day the Congressional Clearing House on the Future, with an audience of about 50 Members of Congress, gathered to hear Dr. Schumacher speak.

On the 23d of March the National Center for Appropriate Technology also sponsored a forum for both the Members of the House of Representatives and Members of the Senate. At this briefing session congressional aides staff were presented with information material plus examples on the appropriateness of appropriate technology, especially as it relates to job creation, energy conservation, and the utilization of alternative sources of energy.

The purpose of the National Center sponsoring these events is to show that the adoption of technology, which is small in scale, can be a useful tool in solving the problem, especially energy and unemployment that confront this Nation.

SURVEY SHOWS MOST AMERICANS IN DARK ABOUT HIGHWAY TRUST FUND

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. SHUSTER. Mr. Speaker, nearly 2 years ago, shortly after I was elected ranking minority member of the House Subcommittee on Surface Transportation, the administration sent to the Congress a proposal that would have destroyed the time-honored highway trust fund as a dedicated funding source for transportation programs. Although I was placed in the rather awkward position of having to oppose a proposal fostered by an administration of my own party, I felt so strongly about the integrity of the highway trust fund that I traveled throughout the Nation for several months speaking to groups, individuals, meetings—anyone who would listen—about the myths perpetrated by highway trust fund opponents.

I quickly discovered that most Americans know very little about the highway trust fund or how our highway program is financed. Although this fact made my job a lot tougher, the realization of it was ample incentive to fight even harder—and we won that battle.

A recent national poll, financed by the Highway Trust Federation, confirmed what I learned that hard way 2 years ago. The poll, conducted by the Opinion Research Corp. of Princeton, N.J., showed that only one-fourth of our population understood that highway programs are financed through special user taxes; and only 4 percent knew how much those taxes were.

Since this issue will be before the Congress again very soon, I insert in the RECORD an editorial which recently appeared in Transport Topics, April 11, 1977, discussing the highlights of that survey. I am convinced that by removing the myths and propaganda on the highway trust fund, the great majority of Americans will support it as the most reasoned approach to financing our transportation programs.

The editorial follows:

A MYTH DEFUSED

Today, more than ever before, there is an urgent need for public awareness of the true picture of this nation's highway building program, and how it is being financed. A disquieting lack of knowledge concerning highway transportation and financing on the part of the public was revealed in the findings of a recent nationwide opinion poll.

Only one-quarter of the interviewees understood that the highway system was financed through special taxes. Half of the respondents said they did not know how much they paid in taxes for the highway system, while only 4% correctly responded as to their range of tax payments.

With an overwhelming majority of the people not knowing how the highway system is financed, and/or not knowing the magnitude of special taxes being paid by highway users for highways, it becomes abundantly clear how they have been led to believe the "myth" that trucking is being "subsidized" on our nation's highways.

Some encouraging signs were found in this opinion poll, however. The findings revealed the "so-called public animosity toward highway transportation to be a fiction." The poll, financed by the Highway Users Federation, was conducted by the Opinion Research Corp. of Princeton, N.J., between May 22 and June 20 of 1971.

The poll showed that four out of every five persons have at least a fairly favorable attitude toward the nation's highway system, and that if asked to choose between public transportation and private car for their frequent trips, they prefer cars by nearly 2-to-1, or 62% to 33%. While 55% of the interviewees said they considered the pace of highway construction to be "about right" . . . nearly one-third (29%) said it is proceeding "too slowly."

It is, of course, gratifying to see this growing concern for highway transportation. In the face of the veritable barrage of anti-highway propaganda being circulated today, however, much more must be done to make people fully aware of how vital our highway system is to this nation. This, perhaps, was best done in a speech by former Federal Highway Administrator Francis C. Turner. In describing highways as the "lifelines" and "conduits" that keep cities viable, he said highways are simply "irreplaceable" and without the cities "inevitably would stagnate and die."

As proponents of the highway program, the trucking industry believes that a growing public awareness of our highway needs and how they are financed will be beneficial to all. The truth is, the more people learn about our highways . . . who uses them and who pays for them . . . the less vulnerable they will be to "fiction" circulated by opponents of good highways.

The foregoing report was prepared by the ATA Department of Interstate Cooperation.

SECRETARIES WEEK

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. WOLFF. Mr. Speaker, I would like to take this opportunity to both thank and honor the members of the secretarial profession, throughout the world, for their devoted service and fine work.

This week, April 24–30, 1977, has been designated by the National Secretaries Association as "Secretaries Week," along with the designation of April 27, 1977, as "Secretaries Day." I feel that we should all take time, not just this week, but throughout the year, to acknowledge the invaluable service which these individuals provide.

I am sure that my colleagues recognize that much of that which is done to run our Government, and every other profession, is directly attributable to the efforts of secretaries; in fact, many of us could not get along without them.

Therefore, I call on my colleagues to join with me in paying tribute to the dedicated members of the secretarial profession.

SHOE IMPORT RELIEF

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. LUKEN. Mr. Speaker, I have today introduced a resolution with 24 of my colleagues expressing our dissatisfaction with the administration's treatment of the American footwear industry. The resolution concerns the planned negotiations of orderly marketing agreements to provide import relief for the domestic nonrubber footwear industry.

The International Trade Commission has twice unanimously found that the American shoe industry has been seriously injured by a rising flood of imports. This is hard to disagree with, as imports have risen in just 10 years from 21 percent to almost 53 percent of the American market. And, in that same period, 70,000 jobs in the industry have been lost, and 300 shoe plants have closed.

In the face of this devastation President Carter on April 1 rejected the ITC recommendation of a 5-year tariff rate quota plan and instructed Special Trade Representative Robert Strauss to negotiate agreements with the major foreign suppliers of shoes.

This is just one more promise of help for an industry which has been given many promises but little help. The negotiation instructions to Ambassador Strauss are vague, and the footwear industry has little reason to expect that the negotiated agreements will actually provide effective relief.

The resolution I introduce today encourages the President to direct a broad series of negotiations on limiting imports. The resolution declares that the Congress should not hesitate to override the President's import relief decision if the agreements will be merely superficial.

Mr. Speaker, this resolution is identical to one introduced last week by Representative JAMES A. BURKE of Massachusetts. I am pleased that more of our colleagues are continuing their support for the footwear industry by cosponsoring, and I would urge the rest of our colleagues to join this effort.

I am inserting a list of the cosponsors and the text of the resolution into the RECORD at this point:

LIST OF COSPONSORS

Mr. Luken, Mr. Addabbo, Mr. Alexander, Mr. Burlison of Missouri, Mr. Cleveland, Mr. Cohen, Mr. Dan Daniel, Mr. Dodd, Mr. Gaydos, Mr. Gephardt, Mr. Gilman, Mr. Hammerschmidt, Mr. Mann, Ms. Mikulski, Mr. Miller of Ohio, Mr. Mitchell of New York, Mr. Moakley, Mr. Pepper, Mr. Price, Mr. Rinaldo, Mr. Studds, Mr. Taylor, Mr. Tsongas, Mr. Walker, and Mr. Zefferetti.

H. RES. 516

Whereas the United States International Trade Commission unanimously found that the domestic nonrubber footwear industry and its workers are experiencing serious injury due to increased imports and recommended the imposition of a five-year tariff-rate quota on shoe imports as the form of relief, and the President affirmed that finding but rejected the Commission's recommendation for a tariff-rate quota as the remedy; and

Whereas the President announced on April 1, 1977, that orderly marketing agreements will be negotiated in lieu of implementing the International Trade Commission import relief recommendation, but has not made known the volume of shoe imports that would be subject to such agreements, which supplying countries would be subject to the import limitations (either as participants or nonparticipants in the agreements), the numbers of years the limitations would remain in effect, or what administrative measures would be implemented to make the program effective; and

Whereas it is consequently not clear that the negotiation of orderly marketing agreements, or the relief measures imposed if such agreements are not reached, would result in meaningful import relief to the domestic nonrubber footwear industry consistent with the serious injury found by the International Trade Commission and affirmed by the President: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that should orderly marketing agreements, or other import relief actions taken by the President, not provide limits on footwear imported into the United States which would maintain a viable domestic nonrubber footwear industry, then the House should proceed immediately to approve a concurrent resolution (as provided for under section 203(c) of the Trade Act of 1974) disapproving the President's import relief action on nonrubber footwear of April 1, 1977, and thereby implement the five-year tariff-rate quota on such footwear as recommended by the International Trade Commission.

POLISH CONSTITUTION DAY

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. MOTTL. Mr. Speaker, I would like to join with the many Americans and others in the free world in observing Polish Constitution Day on May 1. It commemorates the adoption of the constitution by Poland.

The constitution was adopted on May 3, 1791 at a most critical time—less than two decades after Russia, Prussia, and Austria were taking away large parts of Poland. Poland, facing the possibility of being annihilated, rallied behind the new constitution and was successful in retaining its independence.

In my native Cleveland, the Ohio Division of the Polish American Congress will celebrate this most noteworthy day by conducting a grand parade in the heart of Polonia, situated on Cleveland's Southeast side.

After the parade and a brief ceremony, a "Polish Commemorative Supper" will be served at the Alliance of Poles Lower Hall.

I ask you to join with me in tribute to Polish Constitution Day and also the worthy events of May 1 that the Ohio Division of the Polish American Congress is planning to commemorate this great moment in Poland's history.

GOVERNMENT COMPETITION WITH INDUSTRY RESOLUTION

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. TEAGUE. Mr. Speaker, it is an old story. Almost as old as the U.S. Government itself. I refer to the urge for bigness, the urge to be self-contained and self-sustaining. As the Government grows and occupies more and more of our lives, its costs grow, too. Therein lies the problem.

It has long been the stated policy of the U.S. Government that needed goods and services should not be provided in-house, but should be procured from the private sector unless certain, rather rigidly defined special circumstances pertain. However, many, if not most, agencies and departments of the Government have honored this policy in the breach, continuing to add to their dynasties additional layers of supply and service functions which could be provided more economically by American business. Of all Federal goods and services, in 1974 only 52.3 percent were supplied by industry, down 8.2 percent from 1967.

There has been increasing recognition of this problem in several quarters of late. The General Accounting Office, for instance, has released a very interesting study entitled "How to Improve Procedures for Deciding Between Contractor and In-House Military Base Support Services" (B–158685). The study notes that in fiscal year 1975, the Army, Navy, and Air Force spent over $2 billion to provide base support services. Although it is the official Government policy that such activities are to be supplied by the private sector unless the Government can provide them less expensively or should do so for reasons of military readiness, 77 percent of these expenditures were nevertheless operated and managed by the Government. The GAO notes, and I would reinforce this, that changes are needed in several aspects of the military services' identification of functions to be performed in-house and by contractors and in their methods of comparing the costs of providing functions in-house or under contract.

As an example of the benefits such changes could reap, the GAO report studied 27 base support activities and found that 22 could have been conducted more cheaply by contractors for a savings of $3.7 million, while only five were actually less expensive done in-house, with a differential of $137,000. The GAO also cited some Air Force statistics which indicated that contractors could perform these types of necessary functions more cheaply over 70 percent of the time.

Of course, this problem is not unknown to the executive branch. Last year the Office of Management and Budget issued revised guidelines for computing the cost of Government performance when comparing it with contractor services in deciding whether to go in-house or contract. While these guidelines are an improvement, many think they are still unrealistically low on the Government side, thus making in-house performance look more economical when it might not be so.

A top ranking OMB official, Deputy Director James T. McIntyre, Jr., recently testified before the Subcommittee on Employee Ethics and Utilization of the House Post Office and Civil Service Committee that the OMB is conducting spot checks of agency reliance on the rules—OMB Circular A–76—and is informing them of cases in which in-house activity has not been properly justified. I applaud these efforts.

In my view, however, more is needed. The entire Government must reassess its sincerity about cutting costs and channeling the immense Government spending power into the productive sectors of the national economy. Studies have indicated, for instance, that if all costs are included, the private sector employee is at least 20 percent more productive than the Government worker.

For this reason, I am introducing today a joint resolution reaffirming the Government's reliance on the private sector for needed goods and services. For both reasons of economy and of strengthening of the free enterprise system, it is imperative that Government stop competing with business and let the free enterprise system do what it does best: Provide the most innovative reliable goods and services in the world at the most competitive prices. We will all benefit.

The text of the joint resolution follows:

H.J. RES. 413

A joint resolution to clarify and reaffirm Government purchasing policies

Whereas it is the function of the Government to carry out policies and programs established by the Congress;

Whereas it is a role of the private sector to provide goods and services needed by the Government;

Whereas optimum economy, efficiency, and productivity are achieved when the Government relies on the private sector for goods and services when it is cost effective to do so:

Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

That it is the general policy of the Government of the United States to rely upon private commercial sources for the goods and services required to meet Government needs; and

That this policy shall be administered by the Office of Federal Procurement Policy in accordance with the authority granted to that Office under Public Law 93–400.

PUBLIC PROTECTION FROM ASBESTOS FIBERS

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. STEERS. Mr. Speaker, today I am introducing a bill to protect the public health and safety from contamination of the ambient air and water from asbestos fibers. Originally this problem was one that centered in my home district of Montgomery County, Md., and some surrounding areas. However, there is every reason to believe that the asbestos fibers that cause a potential health problem in the Eighth Congressional District of Maryland may cause the same problem in any part of the United States due to the ubiquitous use of the asbestos mineral.

I would like to take this opportunity to provide you with a list of the uses of asbestos in American life and industry. Mr. Paul Brodeur in New Yorker magazine provided a fairly comprehensive list on October 12, 1968:

The asbestos-cement industry which is the principal consumer of the mineral, makes shingles for roofing and siding, sheets for exterior and interior walls, insulation board, clapboard, casings for electric motors, pipes to carry water, sewage, and gas, and numerous other products. Asbestos textiles are used not only in fireproof theatre curtains but also in lagging and other insulating wrapping, in conveyor belting and safety clothing, in pot holders, ironing-board covers, draperies, rugs and motion-picture screens, as filters in gas masks and in the processing of fruit juices, acids, beer, and medicines, and in mailbags, prison-cell padding, airplane fittings, stove and lamp wicks, sparkplugs, and fire hose. The electrical-equipment industry has depended for years on asbestos yarn and tape for insulating conductors ranging from fine-gauge wire to heavy cable, and woven asbestos friction materials—such as brake linings and clutch facings—are found in cars, trucks, tractors, power shovels, hoists, and other industrial machines, as are asbestos-cloth packings, seals, and gaskets. Asbestos papers and felts are used for roofing, for piano padding, for lining stoves, heaters, filing cabinets, military helmets, and the mufflers and hoods of automobiles, and they also are found in armored cars, carpets, and cartridges, and as boiler jackets and radiator covers. Asbestos millboard, which is a heavier verison of asbestos paper, is used for acoustical ceilings, as plasterboard and fireproof wallboard, and in electric switch boxes, safes, table pads, stove mats, ovens, and dry kilns. Vinyl and asphalt floor tiles contain anywhere from thirty to fifty per cent by weight, of short asbestos fibres, and the floor-tile industry has become the second-largest user of the mineral. Since the development of phenol-formaldehyde resins in 1909, asbestos has been used in large quantities as a reinforcement and filler by the plastics industry, and today there are countless plastic products that contain asbestos, ranging from frying-pan handles to rocket nose cones. Asbestos is also an ingredient of many paints and sealants, of compounds used for roof coating and road building, or putties, caulking and other crack fillers, of clays used for pottery and structural steel and of undercoating sprayed stucco, of fireproof insulation sprayed on structural steel and undercoating sprayed on on automobile bodies.

As a result of these multiple and miscellaneous applications, asbestos has become practically ubiquitous in modern society. There is not an automobile, airplane, train, ship, missile, or engine of any sort that does not contain asbestos in some form or other, and it has found its way into literally every building, factory, home, and farm across the land.

While the uses of asbestos are widespread, the controls over the use of asbestos are not nearly so complete. There is some protection afforded to mine workers by the Mining Enforcement

and Safety Administration standards regarding asbestos particles in the air at the mine or quarry site. Recently, there has been a proposed standard issued by OSHA for the protection of workers in factories that use asbestos. However, there is no control or standard over the asbestos dust that is in the ambient air and water, in your home, or office buildings. At an elementary school in Gaithersburg, Md., there was road construction going on nearby. When someone mentioned the threat of asbestos contamination to the school children, 300 students were kept home the next day. My bill does not impose standards, rather, it calls upon the appropriate Federal agencies to develop the knowledge and standards necessary to protect our citizens.

The health effects from asbestos are serious. Mesothelioma is a cancer of the chest lining and/or cavity. It is a rare but fatal cancer, which does not develop for approximately 30 years. There is no known treatment or cure. In the general population mesothelioma accounts for 1 out of every 10,000 deaths, but among unprotected asbestos workers it can kill 1 out of 10. This serious health problem is further complicated by the fact that there is no agreement in the scientific community as to what is a safe level of exposure to asbestos. Protection for our citizens is the highest priority, an action by the Federal Government is long overdue.

Mr. Speaker, in the next week I will be circulating a "Dear Colleague" letter among the Members of the House. I call upon all Members of the House to join with me in this endeavor.

B-1 VERSUS B-52 BOMBERS

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. MARRIOTT. Mr. Speaker, the B-1 bomber is being developed and produced by the Air Force to modernize the strategic bomber force. As a key element of the Nation's strategic triad of manned bombers, land-based and sea-launched missiles, the new bomber will be able to serve the U.S.'s nuclear deterrence objective through its ability to deal heavy payloads of long ranges and through a hostile environment.

The B-1 has the flexibility to carry nuclear air-to-surface missiles, nuclear or conventional gravity bombs, mines, or other weapons, as required by varying mission requirements.

In comparing the B-52 with the B-1, the B-1 will: First, carry nearly twice the weapon payload; second, fly supersonic at high altitudes, and high subsonic at treetop altitudes; and third, have a faster takeoff from shorter runways; fourth, possess greater hardness to the effects of a nuclear blast; fifth, have a far faster penetration speed; sixth, have a lower penetration altitude; and seventh, finally, have a greatly reduced radar cross section.

Through a combination of the above factors, the B-1's ability to survive a surprise enemy attack, launch, and penetrate the enemy's defense, is far greater than that of the B-52.

In regard to the environment, the B-1's virtually smokeless engines are among the cleanest and most efficient ever built. The emissions are lower than the other jet aircraft. The B-1 force will consume considerably less fuel than used by today's B-52 force, and the noise level of the B-1 compares favorably with other jet aircraft. The supersonic portion of B-1 training flights will be limited to establish corridors which will minimize possible disturbance.

And from a cost standpoint in the absence of inflation, the B-1 costs have changed very little since the program went on contract in 1970. If we could purchase B-1's with 1970 dollars, the cost would be reduced by more than half.

The B-1 is absolutely essential to an effective triad, and I urge the Congress to move ahead without delay in developing this program so that we might achieve our objectives to improve our defense capabilities.

CONGRESSMAN JOHN MURPHY'S COMMENTS ON NAVY AUTHORZATION FOR TUGS AND OIL TANKERS

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. McCLOSKEY. Mr. Speaker, following our floor debate last Friday on the defense authorization bill's provisions for Navy tugs and oil tankers, I was pleased to read a speech delivered a week earlier by Chairman JACK MURPHY to the Propeller Club of New York.

The gentleman from New York had some very succinct things to say relevant to last Friday's debate on the point as to whether the Navy should build its own oceangoing tugs—at $17 million each—and its own fleet oil tankers—at $161 million each—or whether U.S. Merchant Marine ships should serve in this capacity.

Among the chairman's most persuasive comments were the following:

The Department of Defense relies heavily on our merchant ships in order to carry out its military functions. Unfortunately, at the present time we do not have the number of vessels needed; we do not have the type of vessels needed, and we do not have the size of vessels needed for this purpose.

I think this is a national scandal and I intend to do something about it.

In order to overcome this problem, I believe the Maritime Administration should work with leaders of the maritime industry to develop a long-range program as to the commercial sealift requirements of the United States. Then a coordinated effort between the Department of Defense, Maritime Administration and the maritime industry should be undertaken to develop standardized vessels, representing a reasonable balance between Department of Defense and commercial requirements to fill their requirement.

Part of the national security role of the U.S. flag merchant marine consists of serving as a naval and military auxiliary in time of war or national emergency. Such auxiliary functions can consist of *fuel and other logistic supply to warships*, cargo transport, missile range and space support, research and surveying, *tug services* and other specialized services. (emphasis added)

I believe that greater use of U.S. flag merchant vessels to perform the auxiliary functions currently performed by Navy ships in peacetime could enhance our sea power and reduce costs.

Mr. Speaker, the last point, so ably urged by the gentleman from New York, was the point Messrs. EMERY, TRIBLE, and I were trying to make in the debate last Friday—that our Navy and merchant marine by coordinated action, using merchant marine tugs and oil tankers instead of Navy support vessels, can both enhance our sea power and reduce costs.

I am pleased that the distinguished gentleman from Florida (Mr. BENNETT) chairman of the Armed Services Subcommittee on Sea Power, has agreed to consider joint hearings to resolve this problem this year. Such joint hearings could indeed assist in our desire to return the United States to a position of at least equal sea power strength with the Soviet Union, and will make the time taken in last Friday's debate well worthwhile.

I am attaching the complete remarks of Chairman MURPHY in New York:

REMARKS OF HON. JOHN M. MURPHY, CHAIRMAN, HOUSE MERCHANT MARINE AND FISHERIES COMMITTEE, BEFORE THE PROPELLER CLUB, PORT OF NEW YORK, APRIL 15, 1977

Thank you Mr. Blackwell for that very kind introduction.

Fellow New Yorkers—it is a genuine honor for me to be with the dedicated people who make the Port of New York what it is today.

It is a port that continues to serve as the Nation's primary gateway for general cargo moving in our foreign trade. Since 1966, this Port of New York has invested more on specialized general cargo facilities than any other North American port facility.

And as a result the value of the port's general cargo imports and exports are more than twice that of any other U.S. port.

It is because of your dedication, your hard work and your ability that every State in the continental United States routes exports and imports in our foreign commerce by way of the Port of New York.

For these reasons, New York is the greatest port in the world, and I am proud to represent all of you in the Congress. I feel there is nothing more "right" and more fitting than to have a New Yorker as chairman of the House Merchant Marine and Fisheries Committee—the only committee in the Congress exclusively devoted to maritime matters. You may be sure that I will do my part to see that you continue to prosper.

On the other hand tell me, if New York is such a prosperous and well run port—what in the hell is pier 76 doing as a parking lot?

I will say here that I have started to develop on the committee a national port lobbying force to protect the legislative interests of shipping ports and related industries. For the first time the committee will make it possible for our Nation's ports to develop a working relationship with the Congress on legislation affecting them and I guarantee that this great Port of New York will benefit as well as all port facilities in the United States.

The Port of New York is the corporate base

of many U.S.-flag liner operators—Sea Land, U.S. Lines, Farrell, Moore-McCormack, American Export, Prudential, and so on. Our liner operators rely on the cargoes moving in our foreign commerce to provide the United States with the merchant fleet required to protect our trading interests in peacetime and to assist our defense forces during periods of national emergency.

Although our international trade would appear to be in good shape, these, and other U.S. flag liner operators are encountering certain cargo problems that require legislative relief.

Although our foreign trade is steadily growing, carriage in American bottoms is falling off. There is no lack of cargo moving in international trade. The basic problem is obvious—U.S.-flag liner operators are not capturing enough of this cargo.

If the United States is falling behind, the natural question arises who is moving ahead? I doubt if any of you would be surprised to learn that leading the world today in this merchant marine race is the Soviet Union, whose fleet now comprises about 10.5 percent of the total world fleet.

And the vaunted United States? We have about 4 percent of the world fleet.

The Soviet Merchant Marine now has the capability to carry simultaneously more than half of all Soviet foreign seaborn trade, to deliver military and economic aid to Communist Bloc nations and other nations receiving aid, to satisfy domestic requirements for coastal shipping, and to earn currency from foreign nations by operating in the "cross trades."

And the vaunted United States?—We can only hope to be so lucky!

This phenomenal growth of the Soviet merchant fleet has severely impacted on our foreign trade. Between 1971 and 1975, the Soviet merchant fleet increased its cargo tonnage participation in the U.S. trades from about 160,000 to 1 million long tons; an increase of over 52 percent. In 1971, the Soviet merchant fleet carried cargo on only two U.S. trade routes: From the Pacific coast to the Far East, and a negligible amount to Western Europe. During 1974 and 1975, the Soviet merchant fleet carried substantial tonnage on seven trade routes. In order to achieve this trade penetration, the USSR has established regular liner service from all four U.S. coasts.

Of particular concern are the practices of the Russians entering the various existing established trades with their newly acquired maritime capability, refusing to join the existing conferences, and undercutting the normal conference rates.

It is obvious that if these practices are permitted to continue, the conference system will be destroyed, and the U.S.-flag liner fleet will ultimately be driven from the seas.

In the last Congress, we commenced action on this problem and dealt exhaustively with legislation commonly known as the third-flag bill.

The third-flag bill would generally require state-controlled carriers to charge rates that are "just and reasonable". In considering whether the rate charged is just and reasonable, the Federal Maritime Commission, which would have responsibility for administering the law, would consider whether the rates are fully compensatory, assessed by other carriers in the same trade, required to assure movement of the particular cargo, and other appropriate factors.

The state-controlled carriers whose rates are challenged would sustain the burden of proof, and the FMC would have authority to suspend the rates in question for a period of seven months while a hearing on the lawfulness of the rate is pending. This legislation was strongly supported by the maritime industry, but was opposed by the Great Lakes interests and the shippers.

Shortly after the hearings on this legislation were completed and before the committee could act, the Chairman of the Federal Maritime Commission concluded an agreement with the Soviet Ministry of Merchant Marine, known as the "Leningrad Agreement".

In this agreement, the Soviet Union agreed to charge rates which were not lower than those actually used by the lowest non-Soviet carriers in the particular trade, and to begin discussing their membership in the appropriate liner conferences covering United States trades. The Federal Maritime Commission, until recently, claimed that the Russians are taking the necessary actions to implement the Leningrad agreement.

However, my own conviction is that the intended results from the Leningrad agreement are not forthcoming rapidly enough.

Karl Bakke, chairman of the Federal Maritime Commission, is currently in Moscow, meeting with the Soviet Minister of Merchant Marine and other officials in an effort to expedite the effective implementation of this agreement.

I have directed Chairman Bakke to give me a full report immediately upon his return to the United States. If—after these discussions—I determine that the Russian bear is giving us more fancy footwork than anything else you can be sure that I will move forcefully and quicky on this type of legislation. As you can well understand legislative action will be absolutely necessary to protect not only our U.S.-flag liner fleet, but also our international trade.

And as a result of lengthy discussions I have had over the past several weeks with President Carter's White House Task Force on Maritime Affairs, I am convinced we would have administration support on the moving of third-flag legislation through the Congress.

In an effort to keep abreast of the rapid development of the Soviet Merchant Marine, I have retained on the Merchant Marine Committee an ex-naval officer—still active in the Reserve—to keep tabs on the development of the Soviet and other state-controlled merchant fleets—with particular emphasis on the Russians. Part of this assignment will be to pay particular attention to the military auxiliary function of the Soviet merchant fleet.

This military auxiliary function of the Soviet merchant fleet is important, because there is reason to believe that they are doing a better job in this area than we are.

Since the enactment of the Merchant Marine Act of 1936—over forty years ago—the United States has traditionally looked to the commercial marketplace to provide a U.S.-flag merchant marine for two very fundamental puropses:

During peacetime—to protect our legitimate economic interests as the leading trading nation in the world.

During periods of national emergency—critical times such as World War II, the Korean war and the Vietnam conflict—to provide the merchant vessels required by the military to successfully carry on their operations.

The Department of Defense relies heavily on our merchant ships in order to carry out its military functions. Unfortunately, at the present time we do not have the number of vessels needed.

We do not have the type of vessels needed; and,

We do not have the size of vessels needed for this purpose.

I think this is a national scandal and I intend to do something about it.

One of the objects of the current subsidy system provided by the Merchant Marine Act of 1936, is to procure national security at a minimum Federal outlay, and to the greatest degree possible as a by-product of commerce. As a result, only the most efficient commercial vessels are constructed and operated under the United States flag. It is axiomatic that the most efficient commercial vessels are not always the most suitable for Department of Defense sealift requirements.

In order to overcome this problem, I believe that the Maritime Administration should work with leaders of the maritime industry to develop a long-range program as to the commercial sealift requirements of the United States. Then a coordinated effort between the Department of Defense, Maritime Administration, and the maritime industry should be undertaken to develop standardized vessels, representing a reasonable balance between Department of Defense and commercial requirements to fill this requirement. Such a course of action will permit the United States to procure national security in this area at a minimum Federal outlay.

Part of the national security role of the U.S.-flag merchant marine consists of serving as a naval and military auxiliary in times of war or national emergency.

Such auxiliary functions can consist of fuel and other logistic supply to warships, cargo transport, missile range and space support, research and surveying, tug services and other specialized services.

In the past, U.S.-flag merchant vessels have been used as naval auxiliaries when necessity demanded it. However, despite the best efforts of all parties, the effort was more expensive and less efficient than if the Department of Defense and the U.S.-flag vessel operators had an ongoing program whereby our merchant ships are used as auxiliaries in peacetime.

This problem could be overcome by coordinated efforts between the Department of Defense, the Maritime Administration and the maritime industry to use U.S.-flag merchant vessels during peacetime in as many auxiliary functions as is reasonably possible.

I believe that greater use of U.S.-flag merchant vessels to perform the auxiliary functions currently performed by Navy ships in peacetime could enhance our sea power and reduce costs.

As part of the national security role of U.S.-flag merchant vessels, the Secretary of Commerce is generally authorized to pay for so-called national defense features. These are generally noncommercial features incorporated in a vessel at the request of the Navy Department to enhance utility and survivability in times of national emergency.

In the past, when our merchant vessels were called upon to serve as naval auxiliaries, substantial conversion projects were often necessary at considerable cost and at a time when shipyard space was at a premium.

It would appear that we would be in the same boat figuratively speaking in the event of future emergencies.

The authors of the '36 Act would be shocked I am sure to find out that CDS funds for national defense features amounts to .03% of those funds.

If we are to become more efficient in this area, I believe that there must be improved efforts between the Navy Department and the Department of Commerce, with a view to upgrading national defense features. Improved national defense features incorporated in merchant vessels when initially constructed would not only enhance the capability of U.S.-flag merchant vessels to serve as naval or military auxiliaries, but could also represent substantial savings to the government and to the taxpayers.

Up to this point, I have been generally commenting on areas of mutual interest with respect to the U.S.-flag liner fleet.

I would now discuss with you the U.S.-flag tanker fleet engaged in our foreign commerce—because as a practical matter we do not have one.

The reason that the United States does not have a viable tanker fleet, is because of our

traditional reliance on American-owned, foreign-flag tankers under so-called "effective U.S. control." This is generally no more than a contract between the government and the American owner of "flags of convenience" vessels, specifying that certain of his foreign-flag vessels will be available if called.

In view of the established principle of international law that allows only the country of registry to seize a vessel on the high seas, it has always been highly questionable whether the United States has sufficient legal authority to gain control over "effective U.S. control" vessels in an emergency Additionally, as most of us know, the argument that nations promoting "flags of convenience" would never exercise their right to control vessels of their registry was tested on November 2, 1973. It failed the test when President William Tolbert of Liberia issued an executive order prohibiting any vessels flying the Liberian flag from participating in the carriage of arms to the Middle East.

Regardless of ownership.

American or otherwise.

In any case, we no longer need to wring our hands over this esoteric legal problem.

Since September 7, 1975, the vast preponderance of these contracts, covering the most modern tanker tonnage, are no longer in force.

Without these contracts, there is no legal basis for "effective U.S. control."

As a practical matter, most of these foreign-flag vessels are not employed in our foreign trade, so that in an emergency the U.S. could not call upon very many of them without creating serious economic and political consequences.

Further, the physical size of most of these foreign-flag vessels is too large for our ports.

Finally, the concept has never been tested, and whether these foreign-flag vessels would be available would be a function of where they are registered, the nationality of the crew, the nature and type of emergency, and their location at the time of the emergency.

We now are fairly certain that the United States until now has depended on a "phantom fleet" that would never have materialized in any real emergency.

And our own fleet? At my recent meeting with the White House task force even they agreed the greatest nation in the world has a "dying fleet."

And it is not getting any bigger—it is just getting older.

My concern with respect to the reliability of the foreign-flag tankers that now transport over 98 percent of our oil imports is one of the major reasons I am actively promoting legislation that would reserve a certain percentage of these imports to United States-flag vessels.

The life-blood of American industry is oil. As American industry expands and domestic oil production falls off, we have been—and will continue to be for some time—resigned to import more and more oil from foreign sources. The problem is compounded by declining oil production in nearby foreign sources, so that we are forced to turn to oil that is produced half-way around the globe.

In 1974 the maritime administration told the Merchant Marine and Fisheries Committee, "whereas somewhat over half of our total petroleum imports now originate in the western hemisphere, with the middle eastern countries supplying less than 20 percent, by 1985 the share of total imports supplied by the middle east will approach 50 percent, while that of the western hemisphere suppliers will decline to above 20 percent."

And events in the past four years have conclusively demonstrated that these foreign sources can be cut off at any time. This oil lifeline from unreliable sources is currently provided almost exclusively by foreign-flag tankers, manned by crews picked up all over the world.

It adds up to a sad picture for America.

Until such time as the United States can promote efficient energy alternatives to oil, we will be forced to use these unreliable foreign sources. As chairman of the Merchant Marine and Fisheries Committee, there is little I can do about that.

But I can do something about the lifeline that moves foreign oil to the United States. It doesn't take a profound thinker to quickly conclude that these foreign-flag vessels do not provide the reliable transportation required by this Nation.

And history supports that conclusion—they never have.

The solving of this problem is my number one priority on the Merchant Marine and Fisheries Committee agenda in this Congress.

And not only do I intend to do something about it, I intend to do it quickly.

American flag ships are the only ships on which the United States can rely in the event of war or emergency. I cannot believe that an American owned, foreign registered and foreign-manned tanker would deliver oil to the United States if the situation should arise that we were at odds with either the Nation of registry or the homeland of the crew. As I just mentioned during the war in the middle east, Liberia—number one among convenience-flag Nations—forbade all ships flying the flag of Liberia to deliver goods to the middle east.

That order was obeyed.

And one-third of all ships registered in Liberia are owned by American companies.

The only viable solution is our cargo equity legislation.

Going back, again, to 1974 Marad told the merchant marine committee, "the development of an adequate and modern U.S.-flag tanker fleet has been a major maritime goal of this administration. The reasons for this goal include such considerations as the balance of payments, seagoing and shipyard employment, and national security. These reasons become even more compelling as the quantity of petroleum and petroleum products required to be imported from distant foreign sources rapidly increases."

I feel strongly that the last administration did not come close to achieving the development of "an adequate and modern tanker fleet". If this was a major goal of Marad during the last eight years, then the administration failed and failed miserably. In order to accomplish this goal one thing is necessary above and beyond all others: A guaranteed supply of cargo.

And the cargo equity bill does just that.

What we need is a minimum number of U.S.-flag tankers that can be routed to different oil sources as the occasion arises. Should one producing nation refuse us oil we would be free to draw on another. In times of actual hostilities, the need for dedicated citizen crews would be especially critical.

The major opposition to this legislation comes from the multinational oil companies who are very ably represented in the Halls of Congress. Their strength is formidable.

During our recent hearings, a witness for the American petroleum institute recommended that the American consumer be encouraged to conserve energy by allowing the price of oil to go up—to go up well above any possible cost increase that could be associated with my cargo equity bill, H.R. 1037. The very same witness strongly opposed the proposed legislation because it would result in increased costs to the American consumer.

That my friends. is what we New Yorkers would call real hutzpah!

I do not mean to minimize any possible cost increase to the American consumer. On the surface, this is a very persuasive argument. In actual fact, however, our hearings indicate that this may not be true. And during the course of our hearings in early May I intend to put this argument to rest once and for all.

I might point out that one of the major objections to my bill is the argument that its implementation would cause other countries to do the same thing. It was the subject of a four hour harangue when I presented this position to 700 international shippers in London two weeks ago. But I told my foreign friends this objection is totally invalid; you—the foreigners—have already done it. To date some forty nations have enacted some type of cargo-preference legislation.

For example, Algeria requires a fifty percent cargo clause in export contracts for both oil and LNG giving preference to Algerian-flag vessels.

In Ecuador, the hydrocarbons law of 1971 reserves fifty percent of all oil to national-flag vessels. Fifty percent of Ecuadorian general cargo is reserved for national flag ships.

In France, a decree requires that two-thirds of French oil imports be carried in French-flag vessels or approved charters.

In Guatemala, law 41/71 of May 6, 1971 reserves all import cargoes to Guatemalan national-flag lines.

The Indonesian freight board has unlimited authority to discriminate in favor of national-flag carriage at any time in the future.

Morocco requires that 40 percent of its imports and 30 percent of its exports be shipped on national-flag vessels.

In March 1972, Nicaragua established cargo preference laws calling for fifty percent carriage of the country's trade goods by national-flag vessels.

In January 1975, Saudi Arabia passed legislation that required five percent of Saudi exports to be carried by Saudi vessels. The percentage quota is to increase to fifty percent by 1980—three short years away.

In Venezuela, the law for the protection and development of the national merchant marine requires that fifty percent of all exports and imports, including oil, be carried in national vessels, which are defined as ships 75 percent owned by Venezuelan nationals.

The United Arab Republic requires that 30 percent of its imports and exports be carried on its own vessels.

It is obvious that rather than causing other countries to enact legislation similar to H.R. 1037, we are merely protecting our interests in light of the growing, international trend toward government control, management and participation in the field of international shipping.

In any event, even if it does cost a few cents a gallon more for gasoline—as President Carter announced during his campaign—it is worth the price for an independent American Flag Fleet. While we know that—depending upon the size of the vessel—the cost of importing oil in U.S.-flag vessels is more than the same transportation provided by foreign-flag vessels, we have no assurance that the price charged the American consumer for the transportation of this oil bears any relationship to the cost involved. The problem arises because in a vertically integrated oil company, the cost of such ocean transportation is just a paper transaction, and there may be good reason to have corporate profits earned abroad show up in the foreign-flag tanker operations of the corporation.

As you can imagine, accurate cost figures are extremely difficult to determine, but I intend to do everything possible to insure that the committee has reliable information before attempting to report out our cargo equity bill, I have requested the General Accounting Office to assist us in analyzing the differing cost estimates submitted by the industry *and* government witnesses.

These are just a few of the items on which the Committee on Merchant Marine and

Fisheries will be working during the 95th Congress.

However, I cannot do it alone. The cooperation of the entire maritime industry is requested if the United States is to have the port facilities, merchant marine, and other transportation services required by our international trade. Because I feel my program is good for the Port of New York—(and perhaps because I am a hometown boy)—I know I can count on your support.

Thank you.

UNITED STATES PRESENTS POSITION AT INTERNATIONAL SUGAR NEGOTIATIONS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. DRINAN. Mr. Speaker, the deliberations of sugar products and consumers meeting to formulate an international sugar agreement got underway in Geneva 1 week ago. For the first time ever, the U.S. delegation was accompanied by a consumer representative. On April 19, Assistant Secretary of State Julius L. Katz, the chief U.S. delegate, outlined our objectives in drafting a sugar agreement. Assistant Secretary Katz emphasized the importance of achieving price stability within a range equitable to producers and consumers alike. He pointed out that the United States intends to remain a part of the free sugar market. I hope that the ongoing negotiations will serve to fulfill these admirable objectives. The complete text of Mr. Katz's statement follows for the information of my colleagues:

STATEMENT BY JULIUS L KATZ

Mr. Chairman, my delegation is pleased to participate in this negotiating conference for a new international sugar agreement. The United States is at the same time a major producer, consumer and importer of sugar. My Government therefore attaches great importance to this conference. The United States seeks an effective international sugar agreement as the cornerstone of our national sugar policy. Our delegation will make every effort to reach an agreement that benefits consumers and producers of sugar through the stabilization of world sugar prices at reasonable levels.

It is out intent to play an active and constructive role in this conference. We want an agreement that is technically sound, flexible, and to the greatest extent possible, utilizes established trade channels and practices. In our view, the objective of an agreement should be to stabilize prices around long term market trends, eliminating the excessively high and low prices which have characterized world sugar markets during the past several years.

Since January 1, 1975, the United States has been an integral part of the free market in sugar. This has been a period of dramatic change for world sugar markets. We have seen extreme fluctuations in prices and rapid growth in the production of substitute sweeteners. It has also been a period of uncertainty for sugar producers in which investment decisions have carried a much higher risk than in the past.

The United States intends to remain a part of the free market. An effective international sugar agreement is thus important to us. If such an agreement cannot be achieved, the United States will, of course, need to reconsider the measures it might take to assist its own domestic producers. I will state frankly, however, that it is neither our intention nor desire to return to the preferential import quota system which existed for forty years under the old Sugar Acts.

As I said at the outset, the United States is a major producer and importer of sugar. As a producer we are fully aware that world sugar prices in recent months have been well below the production costs of even our most efficient producers. As the world's largest sugar importer, we recognize that our stability of supply could be endangered if prices were to be excessively depressed over a prolonged period of time. The task that we face here is to negotiate an arrangement that can provide over the long term stable supplies at reasonable prices to consumers and steady, profitable markets to producers.

The United States accepts in principle that export quotas will be a necessary mechanism to defend the lower end of any price range negotiated.

At the same time the United States also believes that any agreement must contain features that protect consumers against excessively high prices. We believe that the most effective means of achieving this is through a strong system of internationally coordinated stocks accumulated while supplies are in surplus. We will be prepared to elaborate our ideas on these matters in the appropriate committee of the conference.

As this conference opens, we face the challenge of creating an effective new arrangement to improve the marketing system of a commodity of major importance to us all. The United States delegation will contribute actively and constructively in this effort.

GERALD R. FORD BUILDING

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. SAWYER. Mr. Speaker, on behalf of all the constituents of the Fifth District of Michigan, I wish to express appreciation to the House for its passage of H.R. 2210, designating the Federal building in Grand Rapids, Mich., as the "Gerald R. Ford Building."

It has been a great honor for our district to be the home of our 38th President of the United States, Gerald R. Ford.

President Ford has been an outstanding leader whose qualities of honesty and integrity have set a shining example of public service to the people of Grand Rapids, the State of Michigan and the entire Nation. As Congressman, Vice President and President, Jerry Ford will always be remembered as having given his best when it required the most.

I commend the subcommittee chairman, Mr. MINETA and ranking minority member Mr. WALSH for their expediting this legislation and also the chairman of the House Public Works and Transportation Committee, Mr. JOHNSON.

I ask that the general statement of the House report accompanying H.R. 2210 be included at this point in the RECORD:

GENERAL STATEMENT

Gerald R. Ford, born in Omaha, Nebr., in 1913, attended Grand Rapids public schools and graduated from the University of Michigan with a B.A. degree 1935 and from Yale University Law School with LL.B. degree 1941; honorary doctorate degrees from Michigan State University, and from Albion, Aquinas, Spring Arbor, Buena Vista, Grove City, Parsons, and American International Colleges, admitted to the Michigan bar and to practice before the U.S. Supreme Court.

After 47 months in the Navy during World War II, he was elected to Congress in 1948, and reelected for the succeeding 12 Congresses. In 1965, he was selected by his colleagues as the minority leader of the House of Representatives. He served as minority leader until nominated to fill the vacated Vice Presidency in 1973.

With the resignation of former President Nixon in August 1974, he assumed the Presidency at a most difficult time in our Nation's history. During his 2½ years as President, this country saw a continuation of Gerald Ford's honesty and courage that won the respect of his constituents in Michigan and of his colleagues in the House of Representatives.

It is a fitting tribute to pay to the 38th President of the United States by naming the Federal building located at 110 Michigan Avenue NW, in Grand Rapids, Mich., the "Gerald R. Ford Building".

WAYS AND MEANS OVERSIGHT SUBCOMMITTEE CHAIRMAN ASKS CONGRESS TO APPROPRIATE FUNDS TO ENABLE THE IRS TO PUBLISH SECRET RULINGS AND ENFORCE THE TAX LAWS AGAINST THE NARCOTICS TRAFFICKERS AND OTHER RACKETEERS

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. GIBBONS. Mr. Speaker, recently I and the ranking Democratic member of the Ways and Means Oversight Subcommittee, Representative J. J. PICKLE, had the privilege of testifying before the Subcommittee on Treasury Appropriations of the House Committee on Appropriations. Since the issues which I presented are of great importance in the administration of the income tax laws, without objection, I would like to place in the RECORD a copy of my statement before the Treasury Appropriations Subcommittee:

STATEMENT OF CONGRESSMAN SAM M. GIBBONS BEFORE THE SUBCOMMITTEE ON TREASURY APPROPRIATIONS OF THE HOUSE COMMITTEE ON APPROPRIATIONS

Chairman Steed and Members of the Subcommittee: Thank you for this opportunity to discuss with you briefly some matters concerning appropriations for the Internal Revenue Service for the coming year.

I am here today in my position as Chairman of the Oversight Subcommittee of the Ways and Means Committee. As you know, the Oversight Subcommittee of the Ways and Means Committee was created two years ago to try to oversee the operation of those agencies that were under the jurisdiction of the Ways and Means Committee, and we started an investigation of the Internal Revenue Service. The Internal Revenue Service, of course, is one of the most important agencies of Government because it ultimately has to produce all the money that we dispense up here.

We have learned a great deal about the Internal Revenue Service. It was my thought

that some observations drawn from this monitoring experience might be useful to your Subcommittee in your deliberations about the proper level of funding for IRS operations for the next year.

There are two matters, though, that are of particular importance because while most things in the Internal Revenue Service seem to be going ahead properly, two matters stick out in the budget. The Administration has not requested sufficient appropriations with which to publish secret rulings nor to properly enforce the tax laws against narcotics traffickers and other racketeers.

PRIVATE LETTER RULINGS

Very briefly, I would like to address myself to the question of funding with which IRS can proceed to publish private letter rulings issued prior to November 1, 1976. IRS witnesses before your Subcommittee on March 1, estimated that it would cost between $4 million and $7 million to publish the 122,000 rulings which fall into this category. As was explained at that time, private letter rulings are issued to individual, corporate and other taxpayers on specific questions raised by such taxpayers. The substance and, I might add, the import of such rulings is withheld from the general taxpaying public and, of course, from general Congressional review.

So long as these rulings are hidden from view, the public has no way of knowing whether the recipients of private letter rulings are receiving undue favored treatment in tax matters or are getting the fair shake that all taxpayers rightly feel is their due. When the average taxpayer begins to feel that he isn't getting a fair shake, the voluntary tax system is threatened, and the practical, unwanted result can very well be reduced tax collections. In times like this, we can ill afford to let tax collections falter.

Last year, in the Tax Reform Act of 1976, Congress established a schedule for publication of private tax rulings. It directed that all such rulings issued after November 1, 1976, be published by the IRS. Those issued prior to that date were to be published when appropriations for that purpose were made available.

In a suit brought by a private litigant, the Supreme Court has held that private rulings are available to the public under the Freedom of Information Act. A public interest group, Tax Analysts and Advocates, has gone into court to require that the IRS publish all private rulings. The trial court has upheld their position, and most knowledgeable observers expect the court of appeals to uphold the lower court. Thus, the IRS will very likely have to publish these rulings by court decision, if not by act of Congress.

For these reasons the IRS sought an appropriation to publish the pre-November rulings. But OMB under the previous Administration rejected IRS's request for such a budget item, and OMB under the new Administration has likewise denied IRS's request.

My staff's review of the IRS testimony before your Subcommittee on March 1 indicates some degree of sensitivity, if not embarassment, on OMB's part concerning this issue. Our staff examination of the transcript of that hearing indicated an Administration attempt to keep the public from knowing that IRS was pressing OMB to reconsider its previous disapproval and authorize a supplemental budget request during this fiscal year for publication of prior rulings.

The most recent IRS submission on this point for the record of your March 1, hearing shows that, instead of a supplemental request for the current 1977 fiscal year, what is now contemplated by IRS—and very probably by OMB—is a supplemental request for Fiscal Year 1978. Since Fiscal 1978 does not begin until October 1, it will be another year or more before funds for this purpose would ever be requested, much less considered by your Subcommittee. And that would mean another year of secrecy.

Last February, the executive director of Tax Analysts and Advocates, Mr. Tom Field, wrote the Director of OMB, the Honorable Bert Lance, setting forth in considerable detail the basis of TA&A's expectation of funds for IRS to publish the earlier tax rulings. When I asked for a copy of this letter and Mr. Lance's reply, I was told that there had been no reply. Thereupon, I wrote to Mr. Lance myself requesting his answers to the issues and questions raised by Mr. Field's letter, and seeking also OMB's reason for denying IRS's request for funds to publish the old rulings.

I have just received Mr. Lance's reply to my letter. In it, he notes that the previous Administration refused a similar request for two reasons: First, "fiscal restraint in the budget" and, second, the view that publication of past rulings was "questionable" in light of the cost involved and the fact that "more pertinent" rules are now being published.

Mr. Lance's letter goes on to say that the new Administration has not yet had an opportunity to explore the matter fully. Therefore, he adds, he is asking the Department of Treasury to do such a study and determine whether a new budget proposal for this purpose is warranted. My only comment on that is that it should take nothing like another year to reaffirm the rightness of this cause.

Mr. Chairman, I request that copies of all correspondence to which I have referred be placed in the record.

Several aspects of this matter strike me as curious. Mr. Chairman. We're not talking about billions of dollars for a B-1 bomber or for an energy program. We're talking about a relatively small sum, $4 million. Congress and the courts have determined that the publication of these rulings are "pertinent". Moreover, groups like the American Bar Association, the American Institute of Certified Public Accountants, ranking members of the Ways and Means Committee, and IRS and the Department of Treasury itself—all believe these back rulings should be published. And, as I mentioned earlier. it appears that the courts will be very shortly ordering the IRS to publish them. Yet, OMB is holding out—and, so far as I can tell, it is the only principal holdout.

Mr. Chairman and Members of the Subcommittee. this whole issue can be quickly resolved by exercising your own initiative and placing in the budget for IRS an amount sufficient to publish these old rulings immediately. It is a small price for the public to pay toward the public's right to know.

SPECIAL ENFORCEMENT PROGRAMS

I am surprised and disturbed that the fund starved Special Enforcement Program is not getting greater attention from the Carter Administration.

The IRS fraud program is divided into general and special enforcement. Agents in the special enforcement program work criminal tax cases against people who are suspected of deriving their income from illegal sources. Different techniques and criteria are needed in this program from those utilized in the general program in which an average citizen's 1040 is reviewed.

The Special Enforcement Programs were cut by approximately 50% over the past four years. It was my hope that the new administration would totally revitalize special enforcement programs. I am particularly disturbed that one such program, the Narcotics Traffickers Tax Program, which was abandoned during the previous administration after some years of success, is still being left on the shelf.

Many of those who hoped to see this program revived were heartened during the Presidential campaign when Mr. Carter indicated that he intended to reinstitute this program if elected. In a law enforcement speech in Detroit on October 15, 1976, he naid: "Mr. Ford likewise let the highly effective narcotics traffickers tax program wither on the vine. I will revive the program to catch drug dealers through tax evasion indictments."

However, in President Carter's message on revisions to the Ford Administration budget, it was stated: "The revised budget does not provide for the expansion of IRS enforcement activities targeted at high-level drug traffickers beyond the 1976 program level, as proposed in the (Ford) January budget. Before increasing this activity, it is necessary to develop a comprehensive drug strategy, re-examine tax administration policies, and evaluate the effectiveness of tax enforcement in combating drug trafficking."

The Ford budget submitted in January called for an expanded program against narcotics traffickers only after considerable criticism of sharp cutbacks in the program last year by Members of the Oversight Subcommittee. Despite the Carter promises in Detroit, the Ford expanded budget for narcotics tax enforcement was reduced by the Carter Administration by $4 million for Fiscal 1977 and by an additional $7 million for Fiscal 1978—for a total of $11 million through September of 1978.

We are thus back to where we were during those bleak days in 1975 and 1976 when, as Mr. Carter said in Detroit, the Narcotics Traffickers Tax Program was being allowed to wither on the vine. All I can recommend at this point, Mr. Chairman and Members of the Subcommittee, is that this $11 million at least be restored and that the IRS be instructed to use these additional funds in developing and implementing aggressive initiatives against narcotics traffickers.

Today, not only is the Narcotics Traffickers Tax Program not being reconstituted, but there is still an apparent reluctance on the part of the IRS management to take any initiative against narcotics traffickers. As the Assistant Commissioner for Compliance testified before you on March 1: "Frankly, we would rather see these people (narcotics traffickers) prosecuted for narcotics violations than for income tax violations for two reasons. It's quicker and usually involves a more severe penalty."

That is a sweeping generalization by the Assistant Commissioner that does not square with the facts developed by the Oversight Subcommittee. We find that because major narcotics traffickers never touch the drugs in which they traffick, it is very difficult if not impossible to make a narcotics case against them. But, because they do deal in money, they leave a trail that is best picked up and followed by the special agents in the IRS Intelligence Division, a trail that usually leads to evidence of tax evasion. That is where the major narcotics trafficker is most vulnerable—in the pocketbook.

Mr. Chairman, I recall how well you stated this same principle in IRS budget hearings of March of 1974. Speaking of tax enforcement against narcotics traffickers, you said: "This one tool seems to be the best way that has been developed to get at the character who sits back safe, away from the crime itself . . . and cashes in on the operation. There have been other historic cases of how criminals who could not be brought to justice otherwise have been able to be punished for the violation of tax laws."

It is my understanding from reviewing the IRS testimony on March 1 that the only additional funds which IRS is requesting in this area for the coming fiscal year would go toward funding positions for receiving and distributing within IRS information about narcotics traffickers from the Drug Enforcement Administration. There is still no initiative within IRS, apparently, to go

after narcotics traffickers as tax evaders, even though the IRS acknowledges that they don't usually pay taxes on their illicit profits. The IRS is still relying on the DEA, not its own fraud agents, to tell the IRS what drug traffickers it should go after.

Finally, Mr. Chairman, I am disturbed that the trend toward diminished effectiveness of special enforcement which began during the previous Administration is carrying forward into this Administration. After an increase of personnel in special enforcement during the current fiscal year, the new Carter Administration budget shows a cutback of 97 positions recommended for Fiscal 1978 compared with this year's total of 1,423 positions. In one sense, this could be interpreted as good news for big tax evaders with plenty of money to defend themselves.

This proposed imbalance in allocation of increased resources between special enforcement and general enforcement should be redressed. More important is the need to provide a substantial increase to special enforcement alone—at least as much as is allocated to general enforcement. We need to send a message to the big tax evaders—narcotics traffickers, gamblers and other racketeers that their reprieve is over and that they are obliged to pay all taxes due on their illegal income just as the rest of us pay taxes on our hard earned income.

Thank you, Mr. Chairman and Members of the Subcommittee.

ALVIN TOFFLER LOOKS AT CONGRESS

HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. ROSE. Mr. Speaker, late in January, over 70 of our colleagues had the privilege of hearing the noted writer, Alvin Toffler, author of "Future Shock," speak about ways the Congress can work toward creating a desirable future for all Americans. His remarks and the ensuing discussion were part of the series of "Dialogues on America's Future" sponsored by the Congressional Clearinghouse of the Future.

I believe, Mr. Speaker, that the ideas set forth by Mr. Toffler on that evening are of value to us all as we work toward making our institutions more responsive to the many changes occurring in our society. It is with pleasure that I take this opportunity to share his thought-provoking comments with my colleagues. The transcript of the meeting follows:

"INDUSTRIAL STYLE" PLANNING

Thank you for inviting me here to speak with you. Although I can't tell you anything new about the Congress, it seems to me that, coming from the outside as I do, I can offer a difference of perspective. The problems confronting this institution are not so different from the problems confronting a lot of other institutions in our society. In an era of rapid change, it becomes necessary for decisionmaking institutions to devote more energy to scanning the future possibilities and to assessing the consequences of decisions.

The difficulty is that if we develop a society in which governments, corporations, and other institutions are good at forecasting and planning, we will find ourselves living in a totally technocratic society not to the taste of anybody with the remotest interest in democracy. And that leads me to believe that if we are to solve our problems of coping with change in a democratic context, we have got to find completely, new ways of doing it.

I think it's going to be absolutely essential that we plan our way during the next thirty years. But when I look at how others have tried to do this, I can well understand why people are afraid of planning. What we've had until now has been "industrial style" planning, which is generally from the top down, centralized, heavily influenced by experts, short-range, and overeconomic in emphasis.

BREAKDOWN OF INDUSTRIAL SOCIETY

It is my belief that our industrial society is in the early stages of breakdown and regeneration. Industrial society is a system of interlocking institutions and values, with a family structure based on the nuclear family, an energy system dependent upon nonrenewable resources, a set of social institutions such as hospitals and schools, and mass communication. One could find these and other characteristics in every industrial society, regardless of political coloration. Each of the components of the system is now in crisis and is transforming itself.

If we were moving into a period of further classical industrial development, we would need only to apply the same remedies as in the past. But if in fact, as I believe, a disintegration and regeneration of society are occurring, then the old remedies are likely to exacerbate the problems rather than cure them. We will be forced to invent new solutions, to be creative, to experiment. It seems to me essential that we adopt a "nonindustrial style" of planning which, rather than being technocratically dominated, is open to feedback and citizen input. This planning style should not be econocentric; it should not assume that economics are going to solve our problems. And it should have a long time horizon.

We must plan in a tentative, decentralized, very open fashion as we move into the extremely turbulent years ahead. Although we may have a breathing spell right now, it is not likely in my view to be a very long one.

CROSS-DISCIPLINARY APPROACH

Congress has a lot of problems in common with other institutions. For example, the committee structure divides the world up in a certain way. Universities have the same problems with their department divisions. We are living with essentially a nineteenth-century organization of knowledge that is embodied in our structures, institutions, and budgets. In order to cope with these artificial divisions, the Congress has begun to create a whole set of other organizational forms like the Clearinghouse on the Future, the Clearinghouse on Women's Rights, the Rural Caucus, the Black Caucus, or the New England Caucus. A set of horizontal information channels is developing which criss-cross the vertical ones. However, when a bill moves through Congress I still don't see questions being asked as to what effect it will have on transport, agriculture, health, or anything else. The information system does not as yet parallel the organizational system. We ought to be looking at how to get a cross-disciplinary approach and a futures projection into our legislation: what are the potential consequences of this bill and what is the time horizon? We need to employ many techniques which are growing up for forecasting, systematic analysis, and futures research.

QUESTIONS AND ANSWERS

Q. Are there ways that we as Members of Congress can go back to the people and involve them in discussing the future with us?

A. If we anticipate without participation, it's not going to be very flexible or democratic. At the same time that we're inventing forecasting techniques, we also have to encourage citizen involvement. I would like to describe a recent Swedish experiment which is suggestive of what we might do. The Swedes, concerned about the lack of a sound energy policy, tried to involve a large number of citizens in the formation of such a policy. To the objection that the people were not well-enough informed about energy, the government responded by designing a ten-lesson course which every Swede was invited to take. Those having completed the course would have the right to make recommendations about energy policy. Citizen response was much higher than anticipated: over 70,000, as compared to the expected 15,000. There is a dramatic footnote to the story. Those taking the course generally switched from a pronuclear to an antinuclear stance. The feedback to the government was to moderate the nuclear program. This is one of many models of new attempts to involve people in policy processes.

Q. Does that necessarily mean they make the right decisions for the future?

A. No. I don't know that there is a "right" decision, but I've learned to be careful of decisions that seem right when made by experts and interested parties without some outside feedback. Obviously we need expertise, but experts are better at seeing ahead and deep into problems than at providing peripheral vision. Participation by the people may bring in common sense.

Q. Are your methods susceptible to use by computers or to systems analysis?

A. Yes, but with poor results. That's no different from a lot of other things. That doesn't mean we shouldn't be trying, recognizing the limitations.

CITIZEN PARTICIPATION

Q. What can we do to help our constituents gain a better appreciation of the problems facing us for the future?

A. You are besieged every day by groups who want you to do things for them. There's a very honest and legitimate *quid pro quo* you could ask: that they survey their own membership about long-range goals for their particular organizations.

Q. Could you suggest how our newsletters might be used toward this end?

A. I would suggest reversing the franking privilege. That is what the Canadians have just done. Let the people write to you, too.

Proper use of radio, television, cassettes, and community organizations can be highly effective. I would like to see a National Participation Act which would provide incentive to community organizations to take a long look at the future of their communities. We need a society, not just a Congress, in which all our institutions are future-oriented. We ought to state openly that such an approach is legitimate and responsible.

ASKING THE RIGHT QUESTIONS

Q. In my district, as well as throughout the nation, there is a concern about education and what it ought to be. How would I go about getting a futures study done on this?

A. You would have to design a model, and encourage participation, not just by teachers, but by parents, students, and the community at large. The basic question would be: is the education they are receiving appropriate for the world they're going to be living in? That requires a set of assumptions as to what the society of their adulthood will be like—and nobody knows the answers. But asking these questions is a terribly energizing and valuable process for everyone who participates. Out of that can come a set of alternatives.

Another model that has been used is the state of Washington's Alternatives for Washington program, which elicited eleven different images of alternative futures for that state. Out of this came an innovation which I call a legislative grid: across the top they listed their goals, and down the side they

listed every bill introduced in the legislature and checked off how they compared to the goals.

Hawaii, starting in 1970 with a conference on the future of the state, developed a series of regional and town meetings, and now has sectoral ones on the future of business, the future of the legal system, and the like. You do not get answers or forecasts, but rather a lot of people beginning to think about these issues. The significance of all this is that you are building a constituency for the future.

Q. It seems to me that one of the things we do most poorly in the Congress is exercise hindsight or oversight to see where we are now and how past plans worked out in fact. Would you comment on that?

A. Clearly, we need a history, a past. The question is: How do you use that in looking forward? Oversight is a matter of evaluation. There's no contradiction between having an evaluation process that looks back and a planning process that looks ahead.

PROCESS OF CULTURAL CHANGE

Q. What evidence do you have that consciousness-raising can lead to action?

A. We are talking about a process of cultural change that's going to continue for ten to forty years. I see us as being in the consciousness-raising stage of this process. What strikes me as powerful is the fact that there is now, for example, a Congressional Budget Office—the beginnings of a mechanism which requires longer-range projections.

Q. What are some of the specific changes you have in mind for our institutions?

A. It seems to me that the two largest global issues are the safety of the biosphere and the danger of collision between the industrial and nonindustrial nations of the world. So there are two fundamental changes I would like to see fairly soon. One is a change in our attitude toward the relationship of the industrial world to the non-industrial world. People have to understand that it's a new ball game with respect to the nonindustrial world, that they will no longer provide us with cheap raw materials. Second, I would like to see a change which would bring about a better balance between our technology and our ecology.

In other matters, it seems to me that the problem of inventing new institutions, especially political ones, has extremely high priority since it is through these decision-making structures that we make all the other decisions affecting society.

Q. Could you characterize the "extremely turbulent years ahead" you mentioned during your talk?

A. My sense of things is that there has been since World War II a stable international system, and that this system is now falling apart. I think we're likely to see severe oscillation in the international economic system as a result of changing relationships among nations. Also, I sense a change in the character of our national economy. Rather than being a uniform national economic market, the U.S. is breaking up into a set of regional and local submarkets, each large enough in its own right to be a national market. The consequence is high disparity from region to region. A uniform national economic policy may not be able to deal with such diversity.

Q. We in Congress have developed various models for citizen participation. Do you see any of them working effectively?

A. Although I have tried to learn how many programs there are and how they're working, I don't think anyone knows the answer to that. I think we should find out the answer. It seems to me that the Congressional Budget Office and the new Congressional budget procedures represent an enormous leap forward.

NO SINGLE CAUSE

Q. Could you elaborate on what you see as the causes of the breakdown of industrial society?

A. One of the things I learned when reading the history of the Industrial Revolution is that nobody knows what caused it. There are all sorts of explanations, but maybe there is no single cause. We're talking about a civilizational process occurring over a long period over vast parts of the globe. This process is a consequence of a lot of things happening at the same time.

Q. Do you think that one of our jobs in Congress should be to face up to changing some of the checks and balances established by our founding fathers?

A. Yes. I don't know how to rebalance legislative, executive, and judicial—and I wouldn't try. But we're going to have to design institutions which will be as appropriate to our new stages of development as the present institutions were appropriate to the old ones. I think it would be responsible for us to talk to our constituents about some of these questions and to make the discussion of institutional change legitimate instead of calling such an approach subversive or dangerous. Although we shouldn't rush to make changes too hastily, we should direct our thought to the type of changes we want.

MARYLAND NATIONAL GUARD ASSISTED LOCAL COMMUNITIES DURING THE 1977 FREEZE

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mrs. HOLT. Mr. Speaker, now that spring and warmer weather are upon us and as we begin a new week in Congress with daylight saving time, it seems that one of the worst winters experienced by our Nation may fade all too rapidly into our dim past. Everyone knows that our National Guard played an important role in mobilizing aid to the victims and communities afflicted by the wintry onslaught of 1977.

In this connection, I recently came across the April 1977 issue of the National Guardsman containing an article entitled "The freeze of '77—or how the Guard won the new cold war." On this day when the House of Representatives is concluding its consideration of the fiscal year 1978 Defense authorizations, I commend to my colleagues this excellent reportage on the memorable humanitarian efforts made by Guardsmen. As a member of the Maryland delegation, I am particularly proud to insert in the RECORD, that part of the article cited above, contributed by H. R. Gray, regarding the accomplishments of the Maryland National Guard on Smith Island, as follows:

THE FREEZE OF '77 (OR HOW THE GUARD WON THE NEW COLD WAR)

(By H. R. Gray)

Maryland—When members of the Maryland National Guard arrived at Smith Island Jan. 19, staple food supplies and heating fuel were nearly non-existent, and less than three days' supply of diesel fuel remained to power the island's two electric generators.

Bitter and prolonged freezing temperatures coupled with northern winds had frozen the water surrounding the islands in Chesapeake Bay and created ice floes 20 feet high.

Ice on the bay averaged 8 to 12 inches thick and prevented boats from bringing supplies from the mainland. It wasn't too long after the last bargeload of diesel fuel and supplies had become ice-bound a short distance from the island that the 700 residents requested emergency assistance from Maryland Gov. Marvin Mandel.

He authorized the Maryland National Guard to provide necessary support to ease the problem, and soon the Adjutant General Maj. Gen. Edwin Warfield, ordered the Aviation Support Facility at Aberdeen Proving Ground into action.

Under the command of Lt. Col. Thomas Donovan, several helicopters set out for Crisfield, Md., a small community on the mainland and closest supply point to Smith Island.

When the colonel and his crew arrived, they found more than 50 islanders stranded because ice had frozen water around the boat that ferried them to and from the island.

Immediately the Guardsmen acted. A control point was established at Crisfield's airport and billets were established for flight crews. Fuel and maintenance equipment also were headquartered at the control point.

In the next 12 days Guard choppers airlifted 19 tons of cargo, approximately 350 passengers and 8,421 gallons of fuel oil and kerosene to the island. Crews guided helicopters containing bread, milk, meat and even mail, from Crisfield to Smith Island's stores and residents.

Four-man crews flew missions throughout the daylight hours and at night during medical emergencies. By Jan. 31 the helicopter pilots had logged 92 hours.

The Guard's major task on Smith Island was to provide fuel for electric generators. Working with volunteer firemen on the island, the Guardsmen constructed a wooden raft adjacent to the stranded oil barge. The raft was nailed to the ice to prevent chopper propwash from blowing it away.

The Guardsmen then removed oil from the forward section of the barge to lighten the load and allow the bow to be used as a wedge to break through the ice.

The oil was pumped from the stranded barge into containers which were slung under hovering helicopters and flown to the island to replenish dwindling supplies.

When the job was completed, the island had received 4,000 gallons of life-giving fuel oil and the barge had been able to move through the ice and discharge remaining cargo.

The airlift and barge recovery brought nothing but praise for the Guardsmen. The island's lone nurse said "I don't know what some of my patients would have done without their help."

Colonel Donovan called the 12-day effort "a real learning experience for my men." Despite the conditions, he said his men had extended the Maryland Army Guard's 10-year accident-free-flying record, which he called "the longest of any Guard unit in the country."

"This in itself speaks highly for the pilots, their crews and maintenance personnel. Flying the 500-gallon metal containers is a trickly operation in winds near the gusting limits of the aircraft. This further attests to the skill and competence of the crews," he said.

DEFENSE AUTHORIZATION BILL

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. STUMP. Mr. Speaker, it has been 3 days now since we began general debate on the fiscal year 1978 defense authorization bill. I am pleased to see that the essential strength incorporated in the administration's request has been retained, and in some areas strengthened by the

careful and considered examination conducted by our Armed Services Committee. It is my personal belief that this Congress should give serious consideration to increasing the Department of Defense budget for national defense.

It is necessary for this Nation to acquire existing defense equipments in numbers that provide meaningful deterrence and battlefield support to our combat forces. Toward this end it is gratifying to see that the Armed Services Committee redirected almost $1 billion to provide for additional military hardware. At the same time, it is equally necessary for the Defense Department to be looking to the future to sense the direction that new weapons developments and advanced technology provide for future weapons designs that will become the hardware of the next decades. Mr. Speaker, it is to this subject—the research and development area—that I wish to address myself today.

We can ill afford another series of technological surprises such as we witnessed in the 1950's when the Soviets provided this Nation with a graphic demonstration of what can occur when significant amounts of money are directed into the creation of a strong technology base from which to evolve new hardware. Soviet satellite and intercontinental missile developments found weak counterparts in this country, necessitating crash developments in an attempt to make money buy us lost time. Such efforts are both a costly and unforgiving jolt to the economy of this Nation, as well as extremely wasteful of our critically short dollars and skilled manpower resources.

It was to avoid such extremes that the President shifted the emphasis in his defense budget so as to provide moneys for research and development. These research and development programs are the lifeblood of our future defense capabilities. Development of this technology base provides the essence of the future capabilities to which our NATO allies and free world friends look for the continued protection of our valued way of life.

In light of all that, Mr. Speaker, what I do not understand is the further adjustments made by the Armed Services Committee in this critical area of the budget. As I understand the numbers I have seen, the President cut almost $2.5 billion from the defense budget he inherited from the Ford administration. About $200 million of that was research and development money—that was only 8 percent. The rest of the cut came in production funds. Yet, when I look at the House bill, I find almost $1 billion was removed in addition to the $200 million cut made by the President. I would have thought that support for the future capabilities represented by this research and development money would have been encouraged as one way to assure this country of obtaining superior and affordable weapon systems for our armed forces.

I understand the committee's concern that we must guard against allowing the glitter of technology's promise to blind us, feeling that quality somehow compensates for quantity, and that "made in the USA" means the equipment is inherently better. But, if there are no funds for exploratory development, none to examine future aircraft and submarine technology, and no incentives to explore such potentially cost savings areas as training and simulator technology, then where will we be in the 1980's and 1990's.

Last year the Congress responded positively to the general decline in our technology base and the trend towards further decreases in research and development funding by providing a real and constructive increase in research funding. That action was an important step toward assuring that we would be able to seize and maintain our technological initiatives. We must not hobble that commitment. I hope my colleagues will join me in encouraging the administration to present the fullest measure of needed defense requirements to the Congress, providing for our consideration both the need for current hardware and the seeds for development of future capabilities. The creative genius of our research community must not be allowed to atrophy.

LAETRILE AND FDA TYRANNY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. McDONALD. Mr. Speaker, perhaps the inhuman, statist mentality of those who seek to regulate the lives of innocent people who are harming no one is best exemplified by the Food and Drug Administration.

Consider the FDA's war on laetrile, a harmless substance which reduces the suffering of cancer patients and in many cases cures their cancer. Given the authority to ban ineffective drugs as well as those which are unsafe, the FDA arbitrarily declared laetrile a "new drug" even though drugs marketed prior to 1962 were "grandfathered." There was no hearing or administrative procedure whatsoever; the FDA merely declared laetrile a "new drug" and banned its interstate shipment.

The case of Glen Rutherford is illustrative of the FDA mentality. In 1971 several doctors tested Mr. Rutherford and concluded he had cancer in his colon. Not wishing to risk surgery, which the doctors said was necessary, Rutherford traveled to Mexico and was treated with laetrile. His cancer was arrested, his rectal bleeding stopped and Mr. Rutherford has felt fine ever since—possibly because he has continued to take laetrile.

But in 1975 the Government jailed Rutherford's supplier, leaving him without means of acquiring laetrile. So Rutherford went into Federal district court seeking an injunction preventing the FDA from blocking his acquisition of laetrile. The court granted the injunction and held that in denying Rutherford's freedom of choice in cancer treatment the FDA was unconstitutionally depriving him of life, liberty, or property without due process.

The Circuit Court of Appeals, Tenth Circuit, upheld the injunction but remanded for further proceedings on the grounds that the FDA's administrative record was so "grossly inadequate" that there was nothing for the court to review in determining whether the FDA acted properly in classifying laetrile as a new drug.

The district court then ordered the FDA to develop an administrative record to support their determination that laetrile is a new drug. Incredibly, the FDA then requested the court to lift the injunction allowing Rutherford to obtain laetrile during the time the FDA is developing its administrative record.

Consider the full meaning of all this. The FDA made a totally arbitrary decision that laetrile is a new drug, without, by its own admission, a scintilla of evidence to support its claim. But now that this has been brought to light by the courts, officials at FDA are blindly clinging to their position, like cornered rats. Apparently protecting their reputation and power supersede any other considerations, including the fact that Mr. Rutherford might die if he cannot obtain laetrile, to say nothing of the thousands of other cancer patients whose lives might be saved.

It is ironic that while the Supreme Court declares the right to abortion on the grounds that a woman's right to privacy protects her right to control her own body, the FDA is denying dying cancer patients the right to select their own treatment.

An update on FDA's war on cancer patients, including an excellent characterization of the FDA's ugly attitude toward those it is supposed to protect, is provided by James J. Kilpatrick in the following article from the April 19, 1977, Washington Star:

LAETRILE AND FDA TYRANNY

(By James J. Kilpatrick)

More than a year has passed since I last reported on the Great Apricot Kernel Gang. It's time for an update. There's good news and bad news.

The good news is that the federal courts increasingly are getting to the heart of the issue. The bad news is that the Food and Drug Administration continues to exhibit an obstinacy embedded in steel and concrete. Meanwhile, the gang is getting some help from several state legislatures.

For those who came in late, the Great Apricot Kernel Gang is composed of several thousand men and women, including quite a few certified doctors of medicine, who cling to the notion that there is, or may be, some therapeutic value for cancer patients in a substance identified as amygdalin. Chemically speaking, amygdalin is a member of the class of substances known as cyanogenetic glycosides. Amygdalin occurs widely in nature, but can be extracted most readily from apricot kernels, peach pits and bitter almonds. In its refined and purified form, amygdalin is marketed under the trade name of laetrile.

But it is not marketed legally in the United States. It can be obtained in a dozen other countries, notably Mexico, but the FDA regards laetrile as an unlawful drug and the Bureau of Customs regards it as contraband.

In the FDA's view, amygdalin is therapeutically worthless, which it may well be, though the testimonial evidence is getting to be impressive.

Our government's position is unbelievably pompous, dictatorial and hoitytoity. Imagine, if you will, a patient who falls victim to cancer. The patient goes through every treatment recommended by the medical establishment: radical surgery, radium therapy, chemotherapy. Nothing works. The patient is dying. His body is riddled with cancer. In desperation he says, "I have heard of other cancer victims who seemed to get relief from pain, and sometimes remission, from laetrile. Please, may I now try that?"

Our government's response, to put the matter plainly, is precisely: Go to hell. Die! We say laetrile is worthless, therefore you can't have it, and we will prosecute any doctor or supplier who tries to make it available to you.

This is the government's stuffy rationalization, from the Federal Register of February 18: "The availability and use of drugs that have not been demonstrated to have objective value make no contribution to cancer management. Such use can, in fact, interfere with the measures that are known to save lives because swift appropriate diagnosis and prompt effective treatment are delayed. The consequence of delay may be needless and untimely death. For this reason, the Commissioner is of the opinion that a drug intended for use in cancer which lacks scientific evidence of effectiveness cannot be regarded as safe."

U.S. District Judge Luther Bohanon, in Oklahoma City, has flatly rejected this specious reasoning. He has ordered laetrile made available to petitioning patients. Judge Bohanon has company. On April 7, Federal Judge Mark Constantino in New York ruled "decidedly" in favor of providing laetrile for a 69-year-old retired carpenter, Joseph Rizzo, who is suffering from inoperable cancer of the pancreas.

In response to such court order, the FDA has scheduled a hearing for May 2 in Kansas City, but it is a stacked and rigged proceeding. The FDA's hearing notice is a grudging, resentful, sulky affirmation of its fixed position. Plainly, the FDA will not budge. Appeals in the name of freedom of choice leave the government unmoved.

State legislatures are demonstrating better sense. Indiana just the other day passed a bill defying the FDA's autocratic rule. Alaska adopted such an act last year. Efforts to legalize laetrile continue in Hawaii, Illinois, Iowa, Kansas, Louisiana, Massachusetts, Michigan, New Jersey, New York, North Carolina, Mississippi, Ohio, Oklahoma, and Washington. The efforts may be futile, for the FDA's preemptive powers under the Commerce Clause may be supreme, but the movement has meaning all the same.

The gut issue here is freedom. By every rational indication, amygdalin is harmless. Members of the Apricot Kernel Gang eat it all the time. This being so, in the name of a free society, why can't a free people have it if they want it?

HUMAN RIGHTS

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. HARKIN. Mr. Speaker, a recent editorial by Anthony Lewis which appeared in the Des Moines Tribune on April 18, 1977, places the current debate on human rights in the proper perspective. Mr. Lewis is quite right when he says that the "argument" about human rights is "conducted on two different planes." One plane deals with the abstract; the other deals with the concrete.

In the many contacts and discussions that I have had concerning human rights over the last several years, these two contrasts of human rights have become quite clear: When I travel to foreign countries or when I speak with exiles in this country who have been tortured and who have had family and friends murdered by repressive governments, human rights is a very human and personal issue. On the other hand, when I speak with most of the people in the State Department, the Treasury Department, or the multilateral lending agencies, human rights becomes a very esoteric and impersonal abstraction. It is academic to them.

In his closing paragraph, Anthony Lewis reminds us once again of what human rights is really about. His editorial follows:

ARGENTINA: ENDS JUSTIFY MEANS?

(By Anthony Lewis)

The argument about American policy on human rights is conducted on two quite different planes. One is an argument of abstract ideas: our political system and theirs, national interest, internal affairs. The other is personal and concrete: about bodies and minds, suffering and death.

The contrast was vividly illustrated by two recent comments on the situation in Argentina, a country that poses a test of United States attitudes. The Carter administration reduced military assistance to Argentina on the ground of systematic human rights violations; its military government, reacting angrily, accused Washington of interfering in its "domestic life."

One comment was written for the New York Times by John Davis Lodge, former U.S. ambassador to Spain (1955 to 1961) and to Argentina (1969 to 1973). Revisiting Argentina, Lodge found its condition healthy—business improving, the crime rate low, the threat from left-wing terrorists diminishing. But the Argentines and other Latin Americans need our help, Lodge said, and "instead they get sanctimonious lectures on human rights."

"If we intervene to help our freedom-loving friends in Chile and to help defend American national security interests in that country," Lodge said, "there is a quixotic hue and cry as though somehow it were evil to confound the enemy. . . .

"If we could stop preaching, we might even be able to learn something from our friends in Argentina, Uruguay and Chile regarding how they have successfully handled and are handling the most cunning, cynical, vicious, brutal, relentless challenge of our time. . . .

"They are winning the undeclared war of of our time and generation. They are setting the stage for an eventual revival of free representative institutions."

Lodge contrasted what he termed "the healthy zest for the struggle in South America" with the "decadent defeatism rampant in Western Europe." For example, he said Spaniards remain as opposed to the Communists as they were under Franco but "feel obliged to flirt with Communism" because they are "anxious to enter the Common Market, which is dominated by left-leaning democracies."

The other article appeared in the Sunday Times of London. It followed publication of a report by Amnesty International giving nauseating details of torture in Argentina—a report denounced by the Argentine government as based on "hearsay." A Sunday Times reporter, Philip Jacobson, interviewed a victim who survived and made it to London: Enrique Rodriquez Larreta, a noted Uruguayan journalist.

Last July Rodriquez went to Argentina to look for his son, also a journalist, who had disappeared there. Many Uruguayans and persons from other Latin countries now governed by rightist dictatorships have been killed, tortured and detained in Argentina. Rodriquez, fearing that such had happened, filed petitions in court and took other public actions to get information on his son.

On July 13 in Buenos Aires, 12 armed men seized Rodriquez and his daughter-in-law, with whom he was staying. They were taken to a building where his son and other Uruguayans were held. The next night Rodriquez was put through what the guards called "the machine." He described it as follows:

"I was stripped completely, and with my arms pinned behind me I was hung by the wrists 30 centimetes (a foot) above the floor. They put on me a sort of loin cloth, with several electrical terminals. This apparatus was connected while I was questioned, threatened and beaten in the most sensitive areas."

During this treatment Rodriquez saw a portrait of Adolf Hitler on the wall. He said the guards spoke of their admiration for the Nazis—and asked every prisoner whether he was a Jew.

Rodriquez said he saw one prisoner drowned in a water tank by the torturers, on the night of July 19. He said the men who kidnaped him were Argentine soldiers and civilians—and they were joined in the torture, including the drowning, by Uruguayan army officers.

At the end of July Rodriquez and his son and daughter-in-law were taken back to Uruguay. They were held in an interrogation center in Montevedio and pressed to "confess" to crimes. He was released in December. So far as he knows, the other two are still there.

If Lodge saw a human being treated as Enrique Rodriquez was, would it change his view that Argentina and Uruguay and Chile have "successfully handled" the challenge of Communism? Would his concern about the undoubted threat of terrorism harden into a belief that the end justifies any means? Or would he remember John Donne's warning that the bell tolls for us?

In any event, the Rodriquez case is a useful reminder that human rights policy is not about abstractions. It is not designed to make Argentina adopt Robert's Rules of Order, or the Soviet Union's a two-party system. It is about elemental humanity.

RENEGOTIATION—AN IDEA WHOSE TIME HAS COME AND GONE

HON. ROBERT W. DANIEL, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. ROBERT W. DANIEL, JR. Mr. Speaker, I believe the time has come for the Congress to recognize that a law passed for a good reason during World War II may no longer be justified.

During World War II, Congress felt a strong need existed to promote the public interest by preventing profiteering by Government contractors.

The contracting process today bears no resemblance to the contracting proc-

ess that existed when the Renegotiation Act was originally approved. Advances in procurement, contracting, auditing, and data collection by the Congress and the executive branch make the renegotiation process a redundant and wasteful activity.

During recent hearings before a subcommittee of the House Banking Committee, a corporate executive pointed out that legislative proposals to expand the Renegotiation Board and the renegotiation process would mean simply that we would be setting up an agency to "audit the auditors."

In his statement, Mr. Edmund B. Fitzgerald, chairman and chief executive officer of Cutler-Hammer, Inc., pointed out that the existing defense contract monitoring system effectively performed by thousands of Government auditors is sufficient to protect the public interest.

We may soon be asked to vote on proposals to set up yet another group of Government auditors to audit existing auditors.

Mr. Fitzgerald's statement, which I commend to you, fellows:

STATEMENT OF EDMUND B. FITZGERALD

Mr. Chairman and members of the Subcommittee on General Oversight and Renegotiation. My name is Edmund B. Fitzgerald. I am Chairman of the Board and Chief Executive Officer of Cutler-Hammer, Inc. For a period of nearly four years in the early 1970's, I also served as Vice Chairman of the Industry Advisory Council of the Department of Defense. I am accompanied here today by Mr. Alvin G. Waggoner who is Vice President—Financial Management of Cutler-Hammer's AIL Division. We deeply appreciate this opportunity to appear before this Subcommittee to discuss proposed legislation H.R. 4082 and its likely impact upon defense procurement and monitoring procedures.

Cutler-Hammer is a producer of electromechanical and electronic components, assemblies and systems. We are primarily oriented toward industrial and commercial markets. We are, however, a supplier to the Department of Defense and several other Federal agencies. In the past five years, approximately one-third of our total sales has been subject to review under authority of the Renegotiation Act of 1951. Our company is one of the 100 largest contractors to the Department of Defense. We were also one of the particpating companies in the Department of Defense's Profit '76 Project.

In our government business we believe that we enjoy a reputation of being a capable contractor. We believe that we are perceived by our customers to possess advanced technology in the areas of our expertise, to complete our contracts on a timely basis and to perform our work within allotted funds. Based on data produced by various DOD studies, it is apparent that we conduct our defense business on a more profitable basis than the defense industry in general. During the past five years, the profit to sales ratio of the AIL Division, our division primarily oriented to defense work, has averaged 72% of the profit to sales ratio of our industrially and commercially oriented domestic divisions. With its somewhat higher rate of asset turnover, our AIL Division achieves a return on investment comparable to that of our industrial and commercial domestic divisions.

We are concerned by proposed legislation H.R. 4082. We believe that it would significantly alter the intended objectives of the renegotiation process, that it would create activities within the Renegotiation Board that are redundant to those already being performed by others in a better position to perform them and that it would dramatically increase the staff size and budget of the Renegotiation Board. In short, we believe the proposed legislation would have a negative cost benefit primarily because it is based on a management concept of achieving financial control through a process of auding the auditor rather than a management concept of providing the tools, the professional skills and the authority necessary to get the audit job done correctly in the primary audit process.

As we all know, renegotiation was initially implemented during World War II and then again during the Korean War as a measure of broad oversight to review profits generated by the wholesale conversion of commercial enterprises into the production of war material. It was conceived as an economic safety net to provide an orderly review of total corporate profits which may have been excessively inflated by extraordinary economies of scale or other causes not perceived when the conversion to unfamiliar defense production was undertaken. In these two war-time environments the process served our country well. However, today's environment is vastly different from those war periods for which renegotiation was originally designed.

Today's defense industry is not made up of commercial enterprises converting on a forced draft basis to defense production. It, instead, consists of many companies who have long and broad experience in the defense business, in essence, defense specialists. These companies are knowledgeable of the defense procurement process, of the required monitoring procedures, of the ASPRs and other Department of Defense requirements.

These contractors are rigorously monitored by the office of Defense Contract Administration Services (DCAS) and the Defense Contract Audit Agency (DCAA). Since July of 1970 defense contractors have also been subject to the requirements of the Truth in Negotiations Act and its accompanying Certificate of Current Pricing on firm fixed price contracts. In July 1972 the basic structure of the new defense cost accounting standards system came into being with the required Contractors Disclosure Statement and the first two standards CAS–401—Consistency in Estimating, Accumulating and Reporting Costs, and CAS–402—Consistency in Allocating Costs Incurred for the Same Purpose. Since that time an additional eleven cost accounting standards have been issued for the defense industry. These standards are intended to provide visibility, trackability, accountability, consistency of application and assignment of costs to proper cost objectives. These standards are aimed at correcting many of the reported underlying problems associated with defense procurement during the 1950's and 1960's.

In assessing the performance of the current defense procurement monitoring system, we believe it is interesting to note that the Annual Reports of the Renegotiation Board reveal that in the period 1971 through 1975 the Board reviewed renegotiable sales in the amount of $172.6 billion on which renegotiable profits of $4.3 billion had been realized. Excess profit determinations were made in the amount of $231 million or 5% of reported profits. On an after tax basis, the net realized gain by the government was $115 million. Adjustments of $115 million in after tax profit on sales of $172.6 billion would hardly seem to support the connotation frequently applied to the term "excessive profits" in the defense industry. It does seem to suggest that the current defense contract monitoring system, indeed, is working well.

It should also be recognized that the contracts reviewed by the Board in the 1971–1975 period are completed contracts and probably were not extensively subject to the requirements of the Truth in Negotiations Act, the Certificate of Current Pricing and the Defense Cost Accounting Standards system. The full impact of these new procurement tools, legislated by the Congress, is, therefore, not yet apparent in the most recently available data.

We do not mean to imply that a saving of $115 million by our government over a five-year period is not a desirable accomplishment. However, against this savings we must also charge the Board's operating expense of $24 million and the additional administrative cost burden of the defense industry caused by the renegotiation process. The Financial Executives Institute has estimated that this additional cost burden may be as high as 1/20th of 1% of renegotiable sales. On $172.6 billion of renegotiable sales this additional cost would amount to $86.3 million which, when added to the Board's operating cost of $24 million, would total $110 million, almost equal to the supposed savings from the renegotiation process.

In view of the current environment in the defense industry which, as we have noted, is vastly different from the active war environments in which renegotiation was originally conceived, we would like to recommend the following alternative courses for Congressional action in the area of defense contract monitoring:

(1) Sponsor legislation which would extend the Renegotiation Act of 1951 but with the enforcement of the Act suspended except in times of national emergency. During periods of peace, prime responsibility for financial control and audit of defense contracts would reside with DCAS and DCAA who would be applying to this responsibility the recently legislated monitoring aids of the Truth in Negotiations Act, the Certificate of Current Pricing, the Contractors Disclosure Statement and the cost accounting standards system.

Few people fully appreciate the wide range of activities of the Defense Contract Audit Agency (DCAA) which is a 3,000 man force of skilled professionals constantly engaged in detailed audits of all aspects of negotiation, cost and performance on individually negotiated contracts, before, during and after the periods of contract performance.

The DCAA not only audits individual contracts but also does performance audits of overhead cost centers which underlie contract costs. During the months of January and February, 1977 alone the DCAA undertook a functional audit of our AIL Division's Computer Services Department and operational audits of AIL's Quality Assurance Department and its cost estimating systems. By doing its job effectively, the DCAA makes it virtually impossible to justify on the basis of zero-based budgeting the continued activity of the Renegotiation Board during periods of peace.

(2) For those who find our first alternative "politically insensitive," we suggest legislation which would simply extend the Renegotiation Act of 1951 without alternation. Under this alternative, prime monitoring responsibility for defense contracts would remain with DCAS and DCAA but with the Renegotiation Board still in place to act in a role of broad oversight on a total corporate basis and to act if and when the statistical scatter of individual contract results might impact on individual contractors too favorably.

The current staff of the Board is capable of performing this function. Additional staff to take on activities redundant to those now being done by others would make this alternative economically counterproductive.

(3) Sponsor legislation to extend the Renegotiation Act of 1951 in its current form for a five-year period, while at the same time

establishing a Commission to objectively review and assess the renegotiation process and its relationship to the total procurement and monitoring environment.

In particular, this Commission would be able to review an adequate sample of defense contracts performed under the previously mentioned, newly legislated control mechanisms and assess what impact these new mechanisms might have on the need for continuation of the renegotiation process.

We do not look upon H.R. 4082 as a viable alternative. We feel it is an expensive and redundant approach to the effective but equitable auditing of defense contracts. During his recent campaign and in his first days in office, President Carter has stressed his desire to make government more efficient. His remarks have been enthusiastically endorsed by the American people.

In the case of defense contract monitoring, we firmly believe that efficiency in government can best be served by giving the professional skills, the right tools, the authority and the mandate to get the job done right to the first level of contract audit and not to rely instead on a cumbersome and expensive concept of redundantly auditing the auditor.

THE 29TH BIRTHDAY OF THE STATE OF ISRAEL

HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. BURKE of Florida. Mr. Speaker, the American Israel Public Affairs Committee is visiting Washington for its 18th annual policy conference and to celebrate the 29th birthday of Israel. This committee has a long record of conducting public action to maintain and strengthen the friendship between the United States and Israel. It has done a commendable job.

Although the 29th birthday of Israel does not occur until May 15, I want to take this opportunity to observe with the people of Israel, the members of the American Israel Public Affairs Committee, and the many friends of Israel in the United States the 29th birthday of Israel.

The renewal of Jewish national independence after centuries of dispersion and persecution only 29 years ago is one of the great human and ethical affirmations of our time.

Israel has ample cause to be proud. In the face of great hostility and against all odds, it has developed a democratic government, an expanding economy and a stable society.

I want to commend the people of Israel for their success against adversity, even though I know the adversity will continue, and I want to applaud the fight they have made to exist, even though I know the fight will continue, but most of all I want to say well done and keep up the good work.

Israel is experiencing internal problems. Free governments always have internal problems and must cope with them. Freedom is not the easy path—just the best.

Israel is experiencing international problems. Arab leaders are pushing harder than ever for a Palestinian state. The Arab world is also determined to adhere to its boycott of Israel.

The Arab boycott has brought the fight for Israel to the United States because American principles and ideals are at stake in the controversy. This boycott has taken essentially three forms:

One. Arab governments have refused to trade with the Jewish nation.

Two. As a condition for conducting business with Arab countries U.S. companies are required to stop trading with Israel or with Israel companies.

Three. American companies wanting to continue business relations with Middle East countries are required to cut off dealings with other American companies that trade with Israel or have Jewish owners or employees.

The U.S. Department of Commerce reports that the number of transactions containing one or more Arab requests for boycott information by U.S. firms was 5,028 in 1970, 4,435 in 1971, 23,617 in 1972, 10,884 in 1973, 785 in 1974, 7,545 from January–September 1975, 24,710 from October 1975 to March 1976 and 72,781 from April to September 1976.

Despite U.S. action on antiboycott proposals the petrodollars of the Arabs seem aimed more and more at economically undermining Israel.

While we celebrate this 29th birthday of Israel, we cannot look ahead to good years. There are trials still to come, and we will need all the strength and wisdom we can get to survive them.

So today, with the many other voices who admire Israel, I want to say loudly and proudly—happy birthday Israel, and many, many more. Perhaps the most difficult years are not behind, but ahead, and I hope and pray the people of Israel and the United States will have the courage and wisdom to work together to overcome the challenges to survival whatever they may be.

OUR NATION SALUTES THE CITY OF CLIFTON OF THE STATE OF NEW JERSEY UPON ITS 60TH ANNIVERSARY CELEBRATION

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. ROE. Mr. Speaker, it is indeed my privilege and honor to call to the attention of you and our colleagues a most historic event that is being celebrated in my Eighth Congressional District, State of New Jersey: The 60th anniversary of the city of Clifton. On April 24, 1917, by public referendum, the city of Clifton was incorporated under chapter 56 of the Laws of the State of New Jersey. I know you will want to join with me in observing and commemorating the 60th anniversary of this most outstanding all-American community, which is my singular great honor to represent here in the Congress with a special salute to the Honorable Frank Sylvester and William Holster, the distinguished mayor and city manager respectively of Clifton. I also respectfully request that you join with me in extending our heartiest congratulations and best wishes to all of the good people of Clifton who throughout the past six decades have sought and achieved a quality of excellence in their hometown which bespeaks the pioneering efforts of our forefathers and the traditions of a freedom-loving people dedicated to the American principles of democracy and a good family life for themselves and future generations to enjoy.

In commemorating this 60 years of progress in America's history the elected representatives of the city of Clifton have indeed earned our respect and esteem and I wholeheartedly commend them to you for their outstanding public service and administration of a thriving community of America in the interest of all of our citizens. The current members of the governing body are as follows:

MEMBERS OF GOVERNING BODY

The Honorable:
Frank Sylvester, Mayor.
Robert Baron, Councilman.
Louise Friedman, Councilwoman.
Israel Friend, Councilman.
Mervyn R. Montgomery, Councilman.
John W. Surgent, Councilman.
Gerald Zecker, Councilman.
William Holster, Manager.
Arthur Sullivan, Attorney.
Betty J. Lutz, Clerk.
Joseph J. Lynn, Administrator.
John T. Murphy, Tax Collector.
Alfred J. Greene, Tax Assessor.
Frank D. Mileto, Building Inspector.
Frank Dorigatti, Treasurer.
William R. Walters, Housing Director.
Joseph A. Nee, Chief of Police.
Stephen J. Lendl, Fire Chief.
Stuart Palfreyman, Health Officer.
Walter Sidor, Director of Recreation.
Arthur Mazowiecki, Director of Public Works.
Frank Richardson, Plumbing Inspector.
William Adelhelm, Director, Weights & Measures.
Harry Fengya, Magistrate.
William Stanley, Welfare Director (Acting).
Richard Hoffman, Court Clerk.

Mr. Speaker, the city of Clifton is richly endowed with America's historic beginnings. This week, under the leadership of the Clifton Chamber of Commerce, a gala celebration of Clifton's 60th anniversary, revolving around the actual date of the city's incorporation, April 26, has been planned under the direction of the chamber's civic affairs division. The Honorable Christopher A. Sinton, director of the chamber's civic affairs division, is in charge of arrangements. The Honorable Janet Hendley, a member of the civic affairs division advisory board, is general chairman. May I commend Chris Sinton and Janet Hendley to you as well as each and every member of the Chamber of Commerce of Clifton, Inc. who have been diligently pursuing a full citizens participation and observance for this anniversary celebration. Members of the chamber are representative of the ideal citizens of an ideal American community. Officers and directors are as follows:

OFFICERS AND DIRECTORS

The Honorable:
Charles F. Bishop, President.
James E. Dean, First Vice President.

Christopher A. Sinton, Vice President-Civic Affairs.
S. M. (Terry) La Corte, Vice-President-Commercial.
John A. Johnson, Vice President-Industrial.
William Becker, Vice President-Professional.
Benjamin V. Delancy, Vice President-Retail.
Kenneth H. Van Saders, Treasurer.
Robert B. Doolittle, National Councilor.

STAFF

George J. Homcy, Executive Vice President.
Mrs. Robert Staudt, Secretary-Office Manager.
Mrs. Joan Tarrant, Secretary-Receptionist.

1977

William S. Clarke.
Thomas A. Cupo.
D. Donald Droelle.
Gerald G. Friend.
Martin Goldberg.
Mrs. Vera Nixon.
William Papke.
Frank R. Shewchuk.
Vito D. Spinella.
John Troast.

1978

Joseph A. Abbott.
Austin C. Drukker.
Dr. Harold Greene.
William N. Moody.
Robert G. Nusser.
Philip Pampinella.
David L. Templeton.
John Traynor.
John H. Vargo.
Siggi B. Wilzig.

1979

Joseph M. Angello.
Thomas J. Bizub.
Frank A. Carlet.
Lawrence Fette.
Edward J. Foster.
Joseph E. Gibbs.
William Hansen.
Paula Malberger.
Eugene F. Maki.
John Szogyen.

Mr. Speaker, in manifesting the great civic pride that the Clifton residents have in their community, with your permission, I would like to insert at this point in our historical journal of Congress several excerpts from the history and highlights of the city of Clifton which provide an understanding of the land area known as Clifton insofar as it relates to its origin and the extraordinary evolution that has taken place over its early characteristics. These excerpts were published in the anniversary issue of The Clifton Leader, one of New Jersey's prestigious newspapers, upon the celebration of the newspaper's 50th anniversary in December 1976, as follows:

[Excerpt, The Clifton Leader, 50th Anniversary Issue, December 9, 1976]

CLIFTON HAS GROWN FROM A SMALL FARMING COMMUNITY INTO THE SECOND LARGEST CITY IN PASSAIC COUNTY—CHARTERED IN 1917, CITY HAS HAD PHENOMINAL GROWTH WITH DIVERSIFED INDUSTRY

Though the City of Clifton was only incorporated in 1917, there has been a community on its site since 1679 when Captahem, an Indian sachem or chief, gave to Hans Frederick and others a deed for 11,000 acres on the shores of the Passaic River.

From the Indian name, Haquequenunk, came the name Acquackanonk Township, by which title the area was known from 1693 to 1917.

In the early parts of what are now Paterson, West Paterson, Little Falls and all of what is now the City of Passaic were in Acquackanonk. Over the years subdivisions occurred and the horseshoe outlines of present day Clifton took shape. * * *

The earliest settlers were Dutch, and as the trapping of fur bearing animals gave way to agriculture, more Netherlanders came to Acquackanonk, giving their names in streets and other geographic locations. Oddly, little remains today to link the area to its native inhabitants, the Leni Lenaper Indians, who were part of a larger nation, the Delawares. Clifton does use an Indian head as its city symbol however. * * *

By 1867, with Paterson well established as the Silk City on one side and Passaic known as America's Wool City on the other, the potential of the sprawling area between was not lost to everyone, and thought it consisted only of farms, and fewer than 200 residents, a straw was blowing in the wind.

A group of citizens thought the township might do better if it could be unified with a name to replace the titles of the scattered settlements. Accordingly, they set out on a walking tour in October, and discussed names. * * *

Finally, Mrs. Charles D. Spencer pointing towards Weasel Mountain, said "There are your cliffs and the name shall be Clifton."

The propos l was immediately seconded by Scotto C. Nash, a Brooklyn man who had settled locally four years previously, buying up considerable acreage. The name was approved unanimously.

On November 5 the Clifton Land and Building Association was formed and took title to all land on the west side of Main Avenue (then Paterson Plankroad) to the 100-acre Groocock Farm, which was eventually subdivided to create Washington Avenue from First to Eighth Street.

In the center of its holdings the company laid out the business hub, bounded by Main, Madison, Clifton and Railroad (now Getty) Avenues, and a city was well on the way to formation. * * *

Industry starts arriving. In 1899 Magor Car Company established on Van Houten Avenue, growing to be one of the state's largest manufacturers, and in 1907 Athenia Steel opened for business, adding a sizable Swedish colony to the already mixed population. In the first years of the century Passaic's woolen and cotton industry spilled over, giving Acquackanonk much impetus.

Among the biggest were Botany Worsted Mills, Forstmann Huffman, Gera Mills, Passaic Worsted Spinning Company and Passaic Cotton Mills in Allwood. Jacques Wolf, Manhattan Rubber, Pitkin Holdsworth and Brighton Mills were other big employers.

As in Passaic and Paterson, specialized industries imported skilled personnel from abroad, and the textile influx brought many middle Europeans to Acquackanonk, just as silk had brought a sizable Syrian colony to Paterson.

In 1967 it was estimated that Clifton's population numbered 9,250 Italian born or of that descent, 6,500 of Polish extraction, 4,100 German, 3,400 Austrian, Hungary, Czechoslovakia, Great Britain and Russia, 2,800 each. The Netherlands, 2,300, and Ireland, 1,400.

Flags of some 90 nations flew along the route of the Golden Jubilee Parade, representing the ethnic mixture of a city of 90,000.

Industry brought jobs and employes wanted to live locally, so in the first decade of the century the population doubled to 11,869, and the surge of home building saw establishment of Clifton Building and Loan Association in 1909.

By 1915 Clifton Bank and Trust was open for business, and in the years since eight banking institutions have grown up to service the city's needs.

SCHOOLS DEVELOPED

Population meant children and better schools sprung up around the 12 square miles. The need for a high school also became pressing, and in 1906 Acquackanonk's supervising principal Edwin J. Nelson organized one in which teaching principal George J. Smith administered a curriculum of English, Greek, Latin, mathematics, history, bookkeeping and shorthand. * * *

Today's high school houses more than 3,200 pupils in 104 rooms covering 274,000 square feet in the ultra-modern complex on Colfax Avenue, and boasts a curriculum of 206 subjects including specialized college preparatory courses for 10th, 11th and 12th grade students.

The first baseball team was fielded in 1909, a track team was established in 1921; football, cross-country and basketball in 1922; tennis and golf in 1932 and, because of the large European population, soccer in 1935. * * *

A POLICE DEPARTMENT FORMS FROM FAIRYLAND PARK

Acquackanonk got its first police chief in the person of William Coughlan, a constable, whose appointment as a one-man municipal department, was made by the Township Committee May 15, 1905. * * *

In 1914 the town hall was built at Main and Harding Avenues, and four years later, after a referendum authorized spending $30,000, the first police building was built on the west corner of the same intersection. Today it is headquartered in city hall.

INCORPORATION CLAMOR

By 1917 there were approximately 24,000 residents in town, and many clamored for incorporation as New Jersey's twelfth city.

Of 3,067 registered voters, 2,263 turned out and incorporation drew 1,276 votes to 948 opposed. Two days later the designation of city was formally applied.

Clarence Finkle, chairman of the Township Committee, became interim mayor until the November election. Others on the outgoing committee were William O. Jackson, Abraham La Rue, James Marsh Jr., Richard Handy, Adam Ritter, Dr. Lester F. Meloney, George F. Schmidt, Peter Varentoni, Alexander Fulton and George P. Meyers.

In November La Rue, Jackson, Meloney, Varetoni, Dr. George Connors, Harold Godwin, Max Kraft, Jacob Van Bruekoven, Darius Wood, Alexander Fulton and Schmidt were elected, with Schmidt becoming mayor.

In 1920, after Dr. Connors had succeeded Schmidt, a referendum was held to consider changing to commission form of government. Some 1,172 voted for change, but the form was retained with 1,266 votes.

WINDS OF CHANGE

With the city well on the way to becoming an industrial center, many thought farming would disappear, but between 1925 and 1927 Mayor S. Grant Thornburn extended water and sewage lines through Richfield, and intense culture made smaller truck farms profitable so that they continued to operate well into the 1940's.

In 1920 Scotto Nash, then a venerable 92, died, and much of his acreage passed to the city. His largest tract became Nash Park and still bears his name. * * *

The next important milestone was 1934, when Clifton Taxpayer's League circulated petitions for a referendum that would change government to council-manager. There were 20,000 voters by then, and under the law, 30-percent of those registered for the previous general election were required to approve the change.

Only 7,000 voters went to the polls but 4,313 favored the change, 85 more than the legal minimum, which put the measure across. Clifton became the fifth city in the state to adopt the form, following Hackensack, Keansburg, Asbury Park and Teaneck.

At the election May 29, 1934, Godfrey Meyer, Ernest Remig and Edward Birmingham, who was sightless, represented the taxpayer's league and were elected. Joining them

were John J. Hamil, Frank Neyland, Harvey Fornelius and Wilson Brower, who became mayor. There was 96 candidates.

The Meyer group was against appointing a local man manager, but the majority prevailed and City Clerk William A. Miller was named.

Miller served from July 3 until his retirement in 1951, and was replaced by John J. Fitzgerald, who served until 1957 when incumbent William Holster was appointed.

Thought to be of doubtful value when first proposed, the manager form of government has been hailed as a resounding success in Clifton and much coveted by neighboring communities.

Clifton looks back proudly on a growth pattern that closely parallels that of America, for within its borders agriculture gave way to industry, hopeful immigrants from most of the nations on earth found their way here to carve out new lives, and the prosperity of the city is testimony to their success.

Just as surely, the emphasis on making and maintaining a better life in Clifton, with dedication to education, is typical of the American evolution, nurtured and brought to fruition by the underprivileged of other nations who determined here that their children would enjoy benefits they had not, and worked hard to make it so.

Mr. Speaker, the foregoing historic facts highlight the great heritage that the residents of Clifton and their families before them have fostered and nurtured with strength and vitality of purpose these many years where people, purpose, and progress have gracefully intertwined to form a nucleus of achievement in family community living. The magnificence of the city of Clifton is well expressed by one of the most active and respected citizens of Clifton, the Honorable Ernest T. Scheidemann, in a poem he wrote for Clifton's 50th Jubilee Celebration in 1967 as follows:

THE KEYNOTE OF CLIFTON'S SUCCESS

(By Ernest T. Scheidemann)

Flags are proudly flying! Bunting drapes the town!
Cliftonites are vying to win wide renown.
And their hometown city, on its Jubilee,
Never looked so pretty. What a sight to see.

Colors of each nation, decorate the street;
Such consolidation makes the scenes complete.
Clifton was first founded by folks seeking soil,
Fundament'ly grounded, to reward true toil.

Strenuous, their labors brought forth fruits of joy;
Working with good neighbors, talents they'd employ
To create a hamlet, then, town of size—
Finally a city "Clifton," which we prize.

As their proud descendants, with our progeny,
Sharing independence and prosperity.
Clifton's loval people, grateful to the Lord,
Raise their eyes in worship, asking "Peace restored!"

Steeped in deep religion, for our sons we pray,
Waging war for Freedom, dying, day by day.
Standing at the curbside, as the banners pass,
On "Our Own Parade Day," citizens, "en masse."

All salute our colors, Red and White and Blue.
Symbol of Americans, who would die and do.
Those, who fought before us, who preserved our land.
All deserve the tribute, as in awe we stand.

From the tiny acorn to the mighty oak,
Clifton's population speedily awoke.
Suddenly, to find that toil and industry,
Working well, together, full creatively.

Had become a city, ninety thousand strong,
Citizens of stature, knowing "they belong;"
Striving hard, united, with ideals and aims,
Building for the future, not on boastful claims!

Hear those bugles blaring! Beating of the drums!
Tramping of those marching feet! Escort! Here it comes!
Thousands hearts are thumping! This is Clifton's way
To tell all the universe, "Tis our holiday!"

"'Twas participation," which made Clifton great!"
"Join with us, Our Nation! Help us celebrate!",
"With you, all, we're waiting for the big parade,
"Of returning heroes, whose deeds never fade!"

Mr. Speaker, the people of Clifton have made the difference in achieving an ideal all-American community and I am pleased and privileged to seek this national recognition of all of their good works. We do indeed salute the citizens of Clifton in commemorating and celebrating this 60th anniversary of the city of Clifton.

FISCAL RESPONSIBILITY AND CONGRESSIONAL PAY RAISES

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. CRANE. Mr. Speaker, it is hardly any secret that the American people are far from happy with the recent congressional pay raise. Even though I was publicly opposed to it, constituents keep writing me to protest both the size of the raise and the manner in which it was passed. Many question Congress compensating itself for the adverse effects of inflation when Congreessmen are largely responsible for it. And many others resent the fact that it was done without benefit of a vote. In short, the lack of objective criteria for determining whether or not a pay raise was deserved has left the American people confused and angry—and for good reason.

Theoretically, the idea that an employee should not be the sole determiner of his salary level—particularly when the employee is a public servant on the payroll of the taxpayers—is a good one. It was in response to such an idea that the so-called Quadrennial Commission was established by the Federal Salary Act of 1967, to act as a personnel department would for any private corporation, determining appropriate pay scales for employees based on their performance. However, no specific performance goals were set out in the legislation which the public could understand and accept as legitimate grounds for a pay increase for Members of Congress. Thus, the suspicion lingers that when Congress takes a pay increase, it is lining its own pocket at the taxpayers expense or, at the very least, has fallen victim to a basic conflict-of-interest.

When one realizes that, as congressional pay and the national debt have both increased 97.1 percent since 1968—the former from $30,000 to $57,000 per year and the latter from $350 billion to $669 billion—can you really blame people for thinking that pay increases and budget deficits are linked by more than pure coincidence? And are they really wrong? Keeping in mind that the Legislative Reorganization Act Amendments of 1975 provide for a cost-of-living escalator for Members' salaries and given the fact that one of the major rationales for the increase recommended by the Quadrennial Commission was the increase in the cost of living, it must be admitted that Congress has financially benefited from its votes in favor of deficit financing policies that have driven up the cost of living, even if that were not the intent. Or, to put it another way, unless something is done to eliminate the financial reward that now accrues from voting for budget deficits, it will become increasingly hard to refute charges of conflict-of-interest.

What makes the problem more difficult is that Congress, in the final analysis, must be the arbiter over matters affecting the pocketbooks of the taxpayers. In all fairness to the latter, Congress should not delegate to some commission responsibility for raising salaries of Federal employees even if the Members themselves happen to be the employees. Recognition of this fact is what prompted Congress to attach, to the Unemployment Compensation Extension Act—H.R. 4800—the amendment calling for any future congressional pay increases recommended by the Quadrennial Commission to be formally voted by Congress. However, this does not cover cost-of-living increases for Members of Congress; moreover, without some objective standard or standards to indicate when a pay increase is a legitimate reward for a job well done, voting on increases will not completely dispel the suspicion that the raises are not merited.

Most Americans can relate to the concept that, if an employee's department makes a profit—takes in more money than it spends—reaches a certain volume of sales or production, or saves a certain amount of time or money, then that employee is entitled to a raise. Conversely, if that employee's department spends more money than it makes, or becomes inefficient, or does not reach production goals, he may be denied a raise or reprimanded or even fired. Of course, the people do have the right to fire their Congressmen, and they may well exercise it, but currently there is no provision for denial of a pay raise when generally accepted performance levels are not met. Adoption of such a provision would not only act as a stimulus for improved performance by Congress but would put pay raises on an objective "merit" basis rather than a subjective "qualification" basis.

The provision I have in mind would not only accomplish those two objectives but it would also promote fiscal responsibility while, at the same time, eliminat-

ing the prospect of conflict-of-interest allegations relative to pay raises. Briefly stated, what I am proposing, and have introduced in bill form (H.R. 6016), is that no pay raise for the Vice President, Senators, or the Members of Congress go into effect if the budget were not in balance the previous fiscal year. Thus, as long as Congress engaged in deficit spending it could not collect any extra benefits from having adopted that policy. Futhermore, there would be an incentive to fight inflation by keeping expenditures in line with revenues which would be of benefit to all Americans, both on April 15 and every time they went shopping. Finally, I believe most Americans would think Congress more deserving of a raise based on a policy of fiscal responsibility than one simply recommended by an unknown and unelected commission.

Passage of my bill would not eliminate the requirement that any raise be voted on; it would simply add a new requirement that the budget be balanced the fiscal year before any such vote could take effect. Nor would this legislation do away with either the Quadrennial Commission or the cost-of-living escalator; it would simply complement both by providing, in the case of the former, an additional frame of reference and, in the case of the latter, relief from possible conflict-of-interest charges. Thus if inflation were caused by factors other than deficit spending, such as an increase in the price of imported oil, Congress would still be eligible for a raise provided it voted for it. Of course, Congress would be free to turn it down, just as it did the cost-of-living increase that would have gone into effect in 1976.

Critics of such an approach may argue that public policy will be tilted a certain way by adoption of a balanced budget requirement for pay raises. However, if such a requirement is not adopted an incentive to engage in inflationary deficit spending will remain and public concern over congressional conflict-of-interest will never abate. People can understand a merit raise, provided the merits are clear, but raises based on something other than performance are suspect, particularly when the end result, $57,500 per year, represents tremendous wealth to most people.

Mr. Speaker, I am hopeful that the Post Office and Civil Service Committee, to which H.R. 6016 has been referred, will soon act upon this bill so that Congress may have a chance to put it into effect before the end of this session. Given the current low esteem in which Congress is held, there is no time to lose.

A TRIBUTE TO THE PRESIDENT'S YOUTH JOBS PROGRAM

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. RODINO. Mr. Speaker, I would like to call the attention of my colleagues to a column which appeared in the Afro American, one of the newspapers in my district. As you well know, the President announced a $1.5 billion youth jobs program, designed to establish jobs for our young people.

The article follows:

TO BE EQUAL—CARTER'S YOUTH JOBS PROGRAM IS GOOD START

(By Vernon E. Jordan)

First, the good news. The Carter Administration has announced a $1.5 billion youth jobs program that it expects will create meaningful jobs for 200,000 people in the 16–24 age brackets.

And the bad news? Well, the program stops far short of the kind of comprehensive youth deve.opment program our nation needs. It's an important first step toward the goal, but no one should mistake the initial step forward for the final destination.

And it's not an unflawed first step, either. Unless Congress and Labor Department officials plug the gaps, the program could well go the way other well-intentioned programs have gone.

That's because the bulk of the money will go to some 466 state and local governments for youth work projects. The history of other national programs left to local governments to administer reveals a pattern of neglecting the most serious problem areas the programs were originally intended to deal with.

In the youth job program, the intent is clearly to do something to solve the persistent unemployment of economically disadvantaged young people. Many are black—teenage black unemployment is triple that for whites, and in many inner-cities affects two-thirds and more of all black teenagers who want to work.

Targeting the program to fit the needs of poor and minority young people would mean very strict federal guidelines and the funneling of program funds through community-based agencies with a history of serving the disadvantaged, and with deep roots in the affected communities.

By diffusing the youth job funds to 466 governmental units to distribute, the Administration inevitably leaves the program vulnerable to subsidizing jobs for youngsters not in urgent need of assistance while neglecting other youngsters who desperately need help.

While an urban neighborhood improvement program will be set up, putting young people to work refurbishing inner-city neighborhoods, more money and jobs will go to a similar program for parks and recreation areas, most of which are removed from central city areas where youth unemployment is highest.

And while a large block of money has been set aside for experimental projects, the Labor Department has to take steps to ensure that the same old universities and think-tanks with no real ties of minority and poor communities won't repeat past performance by skimming off most of the funds.

Despite these and other faults, the program holds great promise; it's an important first step. Still on the horizon is a comprehensive youth employment program that aims to provide every young person with the education, skills, training and work habits to enable him to become a fully productive member of our society.

That's something that requires more than just creating work opportunities; it means a carefully designed program geared to the needs of youth.

And a central part of such a plan should be an educational component that repairs the damage done to so many youngsters by inadequate schools. Alongside of the jobs, there should be classes that teach basic reading writing and math skills needed for today's decent jobs.

And part-time jobs should not be neglected either. Providing work opportunities need not encourage dropping out of school if jobs and stipends become available to enable young people to continue their schooling.

That's the difference between an emergency crash program to get kids off the streets and into work experiences, and a comprehensive long-term program that seeks to widen individual opportunities and encourage independence.

With enlightened foresight and close cooperation with minority groups and community-based national organizations, the Administration's program can be refined and sharpened to ensure success. Then, it can serve as a base from which a truly all-encompassing program to serve our nation's youth can be developed.

GENOCIDE BY TURKS ON ARMENIANS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. DERWINSKI. Mr. Speaker, as we observe the 62d anniversary of the crime of genocide committed by the Turks on the Armenians, I believe that this anniversary must not be allowed to pass without a sorrowful tribute to the 1,500,000 Armenian men, women, and children who perished during the 1915–18 period. This was the first modern instance of genocide warfare and remains one of the most shocking and deplorable ever perpetrated by one nation against another.

This tragic event was intended to threaten the Armenian people with extinction and to eliminate the possibility that Armenia might someday become independent of the Ottoman Empire. The history of the Armenian people has been marked by long periods of subjugation to foreign rule. In the 16th century nearly the whole country was overrun and held by the Ottoman Turks. Today this area, which is now in Turkey, is totally devoid of Armenian population, while the Soviet Union holds the Armenian people captive in an area presently referred to as Soviet Armenia.

Despite the years of subjugation, the Armenian people have managed to hold together and retain their national consciousness through their church, traditions and language. The Armenians were the first nation in the world to accept Christianity as their state religion, and were perhaps the oldest of the civilized races in western Asia.

Their sense of unity and national aspirations became so intense by the mid–19th century that the Armenians developed a burning desire for attainment of their goal of self-government. However, at that time, the Turks set out to exterminate the whole Armenian Christian population within its borders and called for the elimination of some 2 million Armenians in the Ottoman Empire through deportation, contrived famine, and large-scale massacres. While many hundreds of thousands were able to flee abroad to neighboring lands, others, mostly women and children, were

forced to adopt the Moslem faith and submit to servitude in Turkish homes.

The Armenians paid with their lives for having entertained the elemental idea of human dignity and freedom. No provocation on the part of the individual Armenians could justify such a crime against the whole race. As we have done in past years, I believe that we must once again remember those martyrs who sacrificed their lives and rededicate ourselves to a renewed reverence for human life.

Therefore, we should be confident that this historical injustice will one day be corrected and a free and independent Armenia will once again exist. The Armenian people have demonstrated throughout history their fortitude, stamina and tenacity in maintaining their church culture, and language. The existence today of this Armenian spirit is the foundation that will lead to the ultimate restoration of a modern Armenian nation.

PHILADELPHIA HONORS HOLOCAUST MARTYRS

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. LEDERER. Mr. Speaker, on Sunday, April 17, 1977, my colleague from Philadelphia, the Honorable JOSHUA EILBERG, was honored when he appeared as keynote speaker for a major community event—the memorial service for the 6 million Jewish martyrs. More than 5,000 persons attended to hear this important address by Mr. EILBERG, and I believe that his comments on two specific areas warrant our attention: the effort by Mr. EILBERG to determine why alleged Nazi war criminals living in the United States have not been brought to justice, and the importance of U.S. leadership on international human rights. Mr. Speaker, Mr. EILBERG'S comments follow:

ADDRESS BY U.S. REPRESENTATIVE JOSHUA EILBERG AT MEMORIAL SERVICE FOR THE 6 MILLION JEWISH MARTYRS, PHILADELPHIA, PA., APRIL 17, 1977

Mayor Rizzo, Council President Schwartz, Consul General Naim, and my dear friends:

First, I must thank all of you for the invitation to speak here today on this solemn occasion.

When I considered the absolutely awesome point in history that we are here to mark, I felt truly humble.

In past years, I have sat with you in this audience. In some years, I have sat on this platform, and now, following all that we have heard today, I hope that I can do justice to the memory of the martyrs who perished in the Nazi holocaust.

We can do justice to their memories by continuing the campaign in Washington to uncover information about alleged war criminals who now live here in the United States, and by securing their removal.

To date, there are 96 alleged Nazi war criminals now living in the United States.

Since their entry into this country, many have been naturalized and are living comfortably, breathing the free air of our democracy as good citizens.

Over the past 30 years, these murderers have received much publicity in the American press, and some have been tried in absentia and sentenced to death in their native countries.

However, in the 32 years since the end of the war, none of them have been deported to Europe to face their long overdue punishments.

Why this has happened, I do not know—but it is one of my goals to find out and to rectify it.

I have been working on this problem for several years now, and as a result of these efforts, a great deal of movement has occurred.

On my trip to the Soviet Union and to Israel, I was informed that both governments are very willing to cooperate in every respect to bring Nazi war criminals in the United States to justice.

Nine cases of denaturalization or deportation have been initiated based upon eyewitness accounts of victims now in Israel.

About two hundred eyewitnesses in Israel and the Soviet Union have been identified, and statements have been taken from them.

Many of them will be called to testify at proceedings in this country.

As Chairman of the Immigration Citizenship, and International Law Subcommittee of the Judiciary Committee, I have initiated an investigation by the General Accounting Office—the investigating arm of Congress—as to why the Immigration and Naturalization Service did not thoroughly look into these Nazi war criminals long ago.

If I find any trace of wrongdoing in the INS or elsewhere, I assure you that my subcommittee will investigate further and bring to justice any person involved in any wrongdoing or coverup.

Just last week, I again asked the Departments of Justice and State to go to the Soviet Union and interview witnesses, collect their statements and prepare further legal action.

Let me guarantee that I will not stop my campaign on this problem until all of the cases are closed, with the criminals stripped of their citizenship or forcibly removed from this country upon the showing of proper legal evidence.

On another front, let me say that I was very glad to hear your chairperson, Esther Polen, refer to the deep concern which this community has demonstrated for the struggle of Soviet Jews to secure religious freedom and emigration rights.

I believe that this concern is especially relevant to what we are doing here today, because as you might know, at this very time in Washington, a debate is being waged regarding what tactics the administration and Congress should apply to the issue of human rights.

For me, this debate goes to the very heart of just how we in Government will define our responsibility in this post-holocaust era.

As we meet to mourn our Jewish martyrs, and to express our resolve that never again shall the world witness such abominable inhumanity, I feel it is absolutely vital that all of us follow this debate . . . that we take part in it . . . and that we express ourselves with an effective, unwavering voice on this issue.

I remember that in 1969, I stood with my wife, Gladys, in front of the monument which stands in what had been the center of the Warsaw ghetto . . . a magnificient monument, incidently, created by the same Nathan Rappaport who designed our monument right here.

And as we stood there, I envisioned the utter destruction that had been the ghetto at the end.

I recalled what I had read about the brave resistance which was carried out right to the bitter and tragic last moments.

As never before, I realized then that if there is any lesson in the holocaust, it is that quite possibly there is no limit to man's inhumanity toward his fellow man.

Certainly we saw then—and we still see today—that there is little or no international protection of human rights, or even human life.

Yet, still, people of conscience recognize that government does have a role to play here.

The current debate, as I see it, pits a set of the most basic human rights against the need for détente.

Polls reported by the news media show us that the administration's strong stand on human rights is backed up by a majority of Americans.

But at the same time, that stand is under attack by some, notably from the business community and some foreign affairs intellectuals.

They state that it is not in America's best interests to use every resource at our command to push for an end to the violation of human rights.

But I would like to know, especially as we sit here in the shadow of this sacred monument, since when is it not in America's best interests—whether we're talking about the Soviet Union, Latin America, or South Africa—for this nation to state quite squarely that it is not on the side of tyranny, not on the side of discrimination, and not on the side of harassment, torture and imprisonment of people whose only crime is that they dare to speak out, dare to assert their right to live in freedom.

We're told that we might endanger "détente", and that in the arena of international politics, one must be "sensitive."

But I ask you, where is the sensitivity for the young Avital Scharansky, of Israel, who is forcibly separated from her husband, Anatoly.

He remains in Moscow, unemployed, alone, and as of the middle of last month, a prisoner with no communication to the outside world.

Those of us who know Anatoly must be outraged at any suggestion that we play down his right to freedom.

Where is the sensitivity for Soviet activists who have waited, unemployed for literally years—yes, years—for exit visas?

And where is the sensitivity for people whose lives are doomed at birth because of discrimination, and for people who, according to documentation, face tortures so horrible as to rival in brutality nearly anything which was carried out by the Nazis against our Jewish martyrs?

I ask you, can we turn our conscience away from these people?

Can we, as Jews and as Americans, be anything less than "sensitive"?

Let me suggest something else about sensitivity:

If certain countries who want to count themselves as among the civilized nations of the world are so sensitive, I think they might figure out some way to deal with their sensitivities if they need America's wheat, America's computers, and America's aid for their economic systems.

For me, as a person who believes that government has a moral responsibility to act against oppression, this argument is not an academic one.

It is a very real, very human one—an argument with dimensions of human tragedy.

I saw and met some of the people who are on the front line of this debate, when I traveled as chairman of the House Subcommittee, with several of my colleagues, to the Soviet Union.

I want to tell you that I came away from those meetings with those Soviet Jewish activists more firmly convinced than ever that if we have any responsibility at all, it is to raise our voices loudly and—yes—even stridently.

We're told that we are interfering in the internal affairs of other countries.

I say, we're demanding human rights

which are guaranteed by international law—no more, and no less.

I say that we're demanding that the nations of the world meet the standards of civilization which they themselves have agreed to.

We're told that we're grandstanding, and that our actions will have no effect.

I say, if we're not having any effect, then why are there such outspoken reactions from certain regimes?

And why has the Carter administration's stand caused such a profound stir?

I believe that all of this does relate to why we are here today.

Because just as some people urge us to be less firm on human rights, others urge us to forget what happened less than 35 years ago.

But we will not forget.

We cannot forget!

We should not be less firm.

Not after the holocaust, and not as gross violations of human rights—even genocide—are being carried out against our fellow human beings around the world.

Be less firm?

When six million members of our Jewish family, and almost an entire culture, were wiped out?

When another six million people—and this often is overlooked—were slaughtered with the Jews?

When even today, genocide and discrimination are facts of life on this earth, sometimes, I think, with barely a whisper of protest?

Let me close by saying that I don't want to suggest that the issue and battle for human rights is an easy one.

In fact, I think it's one of the most complex that we face in Washington today.

This struggle will require patience—an extraordinary amount of patience and determination, as well as ingenuity.

We don't want to be preachy, and we don't want to single out any one country or ideology.

But at the same time, we want to make it clear that as far as justice and human freedoms are concerned, there should be no question as to which side the American people are on.

What's most important, I think, is for us to remember that the battle for human rights—just like this memorial service—is not about abstracts.

It is not about getting another country to adopt our ideology.

But the battle—just as the holocaust—is about elemental humanity.

POLISH CONSTITUTION DAY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Ms. MIKULSKI. Mr. Speaker, I am proud to call to the attention of my colleagues the 176th anniversary of the Polish May 3 Constitution.

This holiday is being observed throughout America during the month of May in honor of Poland and to pay tribute to Poland's role as one of the pioneers of democracy in Europe.

On May 3, 1791, just 2 years after the United States adopted its Constitution, the people of Poland adopted the first democratic constitution to be recognized by a European nation. Their proclamation of liberalism was formulated in these words:

All power in civil society should be derived from the will of the people, its end and object being the preservation and integrity of the state, the civil liberty and the good order of society, on equal scale and on a lasting foundation.

Since then, Poles everywhere and citizens of Polish origin in many countries celebrate this birth of European liberalism as a Polish national holiday. The Constitution serves as a symbol of liberty and as a source of inspiration to all people throughout the world.

It is appropriate that the commemoration of the May 3 Constitution should coincide with the observance of three other significant events in Polish history. May 3 marks the 160th anniversary of the death of Thaddeus Kosciuszko, the great Polish patriot, who served not only his native land, but also the efforts of this Nation to win its independence; the 60th anniversary of the death of Henryk Siekiewicz, the brilliant Polish novelist whose works are a significant part of Western culture; and the 110th anniversary of the birth of Mme. Marie Sholdowska-Curie, whose discovery of radium is considered to be one of the most important scientific discoveries of all time. The citizens of the United States acknowledge the great debt that they owe to the Polish people for the many contributions they have made to this country and to the world.

Unfortunately, Poland was and is surrounded by powerful, acquisitive neighbors, and her periods of freedom have been short. Just 4 years after adopting the Constitution, Poland was partitioned by Russia, Prussia, and Austria for the third time. In this century Poland has been devastated twice by war and has been dominated by Communist regimes for the past 32 years. In this context the Polish Constitution assumes a special significance; it represents not the government of a free country but the spirit of a people who desire to be free.

In closing, I am happy to send my sincere greetings to the people of Poland and also to express the genuine appreciation and immense debt which the United States owes our citizens of Polish ancestry. The dedication of the Polish people to the principles of their Constitution is the best assurance that one day their land will again stand in full freedom and independence. I am proud to be a Polish American.

UNAVOIDABLY ABSENT

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. KASTEN. Mr. Speaker, on Friday, April 22, I was unavoidably absent from the House of Representatives and missed one recorded rollcall vote on an amendment to H.R. 5970, the Department of Defense authorization bill for fiscal year 1978.

For the RECORD, I wish to state my position on the vote I missed. Had I been present, I would have voted "Nay" on the amendment offered by Congresswoman SCHROEDER which sought to prohibit procurement of the airborne warning and control system aircraft unless NATO agrees to purchase these aircraft.

WRONG WAY TO AID CONSUMERS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. DERWINSKI. Mr. Speaker, it is my understanding that there is an effort by the administration to ram through Congress a new agency for consumer protection as a result of a deal between President Carter and Ralph Nader.

Presumably, this is to repay Mr. Nader for his political support in the last election.

I commend the Members' attention to a powerful editorial which appeared in the Chicago Daily News of April 11, under the heading, "Wrong Way To Aid Consumers," which is I believe, the issue we face. The article follows:

WRONG WAY TO AID CONSUMERS

It is hard to reconcile President Carter's pledge to reduce the federal bureaucracy with his support of a bill to create a powerful new consumer agency within the government. But even during the campaign, Carter followed this contradictory line, once boasting that he hoped to challenge Ralph Nader "for the title of top consumer advocate of this country." His backing for bills that would establish an Agency for Consumer Protection (ACP) thus comes as no surprise.

Congress has been down this road before. The push for ACP began in 1970, and in 1975 both houses passed bills to create the agency. The margin in the House was too small to override a promised veto by President Ford, and the measures were allowed to die. This year could be different.

But the objections to such a specialized agency remain, beginning with the effrontery of the assumption that consumers are a breed apart. The plain fact is that all Americans are consumers, but their needs and wants will not always coincide. There are many who would rather not have the federal government—or Ralph Nader—as their sole spokesman on all consumer matters.

As conceived by the consumer advocates, the ACP would be able to intervene in the proceedings of other federal regulatory agencies, and haul an agency into court if a decision failed to please it. The opportunities for meddling, conflict and delay would be almost endless. The ACP could also demand business records to a degree that would amount to "fishing expeditions," placing added burdens on businesses already awash in a sea of paperwork required by the federal bureaucracy.

Protection of the consumer against fraud and chicanery of all kinds is of course essential. But there is already a body of law to provide that protection. If these laws need strengthening, let them be strengthened. Reform of the existing regulatory agencies is also of prime concern; plainly, they have not always served the consumer well. Some steps were taken by the Ford administration to safeguard consumer interests within the agencies. These efforts would be abandoned under the plan to con-

solidate consumer advocacy within a separate agency.

Carter's message proposed a spending limit of $15 million a year for the ACP, and added the vow that it "will not be another regulatory agency." But it is interesting to note that the 1975 bill carried a price tag of only $10 million for the first year. Already the price has risen by 50 percent. And anyone who supposes that a federal agency, once it's born, will just lie there without growing has not been keeping track of the goings-on in Washington.

With this President committed to signing a bill creating an Agency for Consumer Protection, any hope of blocking it lies with Congress. We wish the opposition well.

BALANCING AUTO EFFICIENCY AND AIR QUALITY

HON. VIRGINIA SMITH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mrs. SMITH of Nebraska. Mr. Speaker, I have cosponsored H.R. 4444 to strike a reasonable and realistic balance between continued air quality improvement and increased automobile fuel efficiency. With the passage of the Clean Air Act in 1970, Congress declared that cleaner, healthier air is desirable. As with many idealistic national policies, however, we must implement it carefully to avoid harmful side effects on our economy.

In setting new auto emission control standards, the arguments favoring the Dingell-Broyhill criteria are simple and clear: energy and employment.

An unjustifiably stringent auto emission standard could injure our central national goal of energy self-sufficiency. Weighty air pollution control devices mounted in each auto to meet unrealistic standards will raise auto prices and result in higher auto maintenance costs to the consumer, not to mention the added gasoline consumption. Last year when the Clean Air Act amendments passed the House, 324 to 68, carrying the language now embodied in H.R. 4444, a three-way interagency study demonstrated the energy savings of this emission standard. The EPA/DOT/FEA study showed that the Dingell-Broyhill criteria would save 1.65 billion gallons of gasoline as compared to the stringent Waxman standards—similar to recent EPA recommendations. This amounts to a savings of 107,000 barrels a day for the life of these standards. Since the H.R. 4444 alternative provides adequate environmental protection, expending that energy would be wasteful.

These same studies indicate that levels of hydrocarbons and carbon monoxide will be no different under the H.R. 4444 standards than under the stricter standards. While nitrogen oxide levels would be slightly lower under the stricter standards, a reasonable cost/benefit analysis reveals that this tiny difference does not outweight the energy savings of the Dingell-Broyhill approach. Dollar for dollar, the Dingell-Broyhill bill provides the best air quality.

Almost 1 out of every 6 employees in the United States has a direct stake in the auto industry. There is no way Congress can impose substantial costs upon this industry, deter its consumers from making new purchases, and create general uncertainty about standards from year to year without exacting a toll from these employees. The industry has reduced polluting emissions more than 80 percent in the past 8 years, and under the Dingell-Broyhill approach that progress would continue. Instead of a penalty for this progress, I recommend that we reward our auto industry with enactment of this compromise.

We must not totally subordinate other social goals, such as energy self-sufficiency and ample employment opportunities, to our lust for a pristine environment. This legislation strikes a careful balance in terms of energy, employment, and the environment.

JIM MATTOX SUPPORTS PRESIDENT CARTER'S HOSPITAL COST CONTAINMENT ACT

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. MATTOX. Mr. Speaker, we have all heard from constituents who have suffered major illnesses and suddenly discovered that their insurance was inadequate. But we are beginning now to hear complaints from other consumers, people who no longer are willing to accept a 15-percent and higher inflation rate each year for hospital costs as rational. The President has urged us to pass the Hospital Cost Containment Act of 1977, legislation which aims to restrain hospital cost increases in the short term by limiting hospital revenue increases to a minimum level that recognizes general inflation and that includes a small increment for possible added intensity of patient services.

This limit on hospital revenue increases would be achieved by applying limits to average reimbursement per admission received from each of the major cost reimbursers—medicare, medicaid, Blue Cross—and to average charges per admission received from all charge payers—insurers and self-paying patients. Exceptions would be permitted in cases where there are exceptional changes in patient loads. In addition to the short-term restraints on revenues, the administration's bill attempts to control inappropriate capital expenditures in the hospital industry by establishing a national ceiling on new hospital investment which local health planning agencies would have to approve.

What is most heartening to me is to see the major outreach effort undertaken by HEW in formulating this proposal. Consumers, providers, business, and labor were extensively consulted and listened to in the deliberations.

It is important that this proposal does not place a freeze on hospital revenues. It does, however, attempt to place reasonable limits on the rate increase in hospital revenues. These limits would still be in excess of what the inflation rate has been in other sectors of the economy.

I feel there is a great need for this Presidential proposal on health care costs and I hope we in the Congress can follow through in quick order.

OSHA WHIPPING BOY OF THE CONGRESS

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. HANSEN. Mr. Speaker, I call your attention to an article in the February 1977 issue of Atlantic magazine entitled "Whipping Boy." The presentation concerns my good colleague Congressman JOE SKUBITZ of Kansas and the Occupational Safety and Health Administration.

The article written by Sanford J. Unger is most interesting and informative concerning the functional problems of OSHA in design and operation. However, I must take issue with the conclusion in the last paragraph and point out that OSHA has now been successfully hauled before the U.S. Supreme Court on fourth amendment grounds. The future of the agency is very clouded in view of the fact that OSHA's inspection authority has been declared "unconstitutional and void."

WHIPPING BOY

Congressman Joe Skubitz, Republican of Kansas, was in a frenzy when he took to the floor of the House of Representatives during the debate over the 1977 appropriations bill for the Departments of Labor and Health, Education and Welfare and related agencies. An appropriations bill offers a perfect opportunity for angry legislators to wreak vengeance on their least favorite government agencies—to force them to operate according to strict congressional rules—and on this occasion Skubitz aimed his fire at a controversial section of the Labor Department, the Occupational Safety and Health Administration, known to its friends and enemies alike as OSHA.

When the legislation that created OSHA was passed in December 1970, in the waning days of the Ninety-first Congress, Skubitz reminded his colleagues, "it was the intent of Congress to create within the Department of Labor a cadre of experts effective in the improvement of the safety and health of our country's workplaces." But, thundered the congressman, who represents the southeastern corner of his state, "we did not create experts; we did not create improvements; we created a monster, a monster which does not have the guts to question big business but centers upon small business that cannot afford to . . . strike back. What started out to be a laudable program has turned into a nightmare, in part because of arrogant inspectors who feel they have not done a job unless they find something wrong in every little plant."

What really offended Skubitz, though, was that OSHA now wanted, as he put it, "to expand its horizons"; it was beginning to exercise its jurisdiction over farms and farmers. He ridiculed the agency's dictum that any farm with five or more employees must

have a toilet available within five minutes' walking distance to all employees at all times. (If a man could walk half a mile in five minutes, the congressman calculated, "that means that on every square mile [of cultivated land] a farmer would be required to construct a minimum of nine privies. . . . OSHA [is] the mandator of the 'privy on the plains'.")

Then there was OSHA's declaration that farmers shall equip their tractors with seat belts and require their farmhands to buckle up before setting out on the fields. "Oh yes," said Skubitz to the delighted laughter of his fellow OSHA-loathers in the House, "and now OSHA is going to require roll-over bars—so if the tractor operator enters a drag race they will be protected if a tractor overturns." Yet the action that most amused and upset Skubitz and other congressmen from agricultural areas was OSHA's publication of a pamphlet intended to help farmhands dealing with beef cattle to understand and comply with new safety regulations. Written in elementary language for people of limited literacy, it included the statement: "The best way to stop an accident is to prevent it," and the warning: "When floors are wet and slippery with manure, you can have a bad fall. You could also trip over junk or trash." ("The material in these pamphlets seems to be written for a New Yorker about to visit a farm for the first time," complained Congressman Thomas Hagedorn, Republican of Minnesota.)

Skubitz's revenge was to sponsor an amendment to the appropriations bill exempting all farms with ten or fewer employees from OSHA's jurisdiction. Originally, he had hoped to exempt farms with up to twenty-five employees: to suggestions that this might "castrate" OSHA. Skubitz replied, "If castration is the only solution, I would sooner castrate the zealots who are drawing up regulations at OSHA than let them destroy the smaller farmers of America." "But now he was compromising, and with much of the House riled up over the sins of OSHA, his amendment to exclude the smallest farms passed by a vote of 273–124.

A pained expression appears on the face of Morton Corn, the industrial hygienist from the University of Pittsburgh who is the third administrator of OSHA, whenever he is reminded of the cowmanure pamphlet. "Being a city boy, I gave them [the opponents of OSHA] some very good ammunition," he admits with a shrug—but adds quickly that the pamphlet was only one of 119 audiovisual aids produced by the same "reliable contractor," was intended for limited distribution by the Agricultural Extension Service, and cost a mere $10,000 to turn out.

Then, perhaps a bit tired of defending OSHA, Corn sounds bitter: "If I can get as much mileage out of the gas in my car as they did from this, I will be doing okay." As for the portable toilets on the farm (in bureaucratic jargon, "field sanitary facilities," one for "each forty employees or fraction thereof"). Corn insists that the regulation was only a proposal, still subject to hearings and revision at the time it was revealed, and he admits that it may have "stemmed from a misperception." Nevertheless, it was recommended by OSHA's own agricultural advisory committee, composed of people from larger farms. "I feel," says Corn, "like someone who tests the water with his foot, only to have a tidal wave break over him."

For a professional in the field of occupational health and safety—and one of those Ph.D.'s who come to Washington, insist upon being called "Doctor," and try to remain above the sordid political battle—Corn's service at OSHA since November 1975 must have been very disillusioning indeed. Whatever his intentions, he found himself presiding over an agency that had become the latest, handiest political whipping boy in town. In the view of the small businessmen and farmers who have borne the brunt of its enforcement activities, and of the congressmen who receive the complaints, OSHA is the symbol of all that is wrong with the federal bureaucracy: it is arrogant, petty, insensitive, and a waste of effort and money.

Viewed from another perspective, however, OSHA is a historic development in American government and the regulation of a free economy. Labor unions crusaded for decades for the establishment of just such an agency, which would require employers to worry not only about their workers' productivity but also about their safety from job-related injuries and illnesses. The legislation approved in 1970, which created OSHA and its companion research and investigation arm, the National Institute for Occupational Safety and Health (NIOSH), under the control of HEW), amounted to a recognition that the American workplace was not, on the whole, a safe place. The more sophisticated the research and the statistics become, the worse the picture: occupational accidents are now estimated to take the lives of at least 13,000 Americans a year and to injure perhaps five times as many. Occupational health hazards are believed to contribute to about half of all deaths from cancer in the United States and at least 5 percent of those connected with heart disease, the country's leading killer. Although the threat becomes obvious and dramatic only occasionally (as in the poisoning of dozens of residents of Hopewell, Virginia, and the pollution of the nearby James River by derivatives of the pesticide Kepone, which was manufactured in Hopewell without appropriate safety standards), it lurks as a major social and medical issue. These are the problems OSHA is meant to uncover and cure.

Yet a view of OSHA as a nuisance, and even an evil, is one point readily agreed upon by people who are otherwise poles apart politically, such as Senator Edmund Muskie, Democrat of Maine, and Ronald Reagan, the former Republican governor of California. How did an agency with such noble goals and missions come to be a governmental pariah, the topic of nasty jokes and bipartisan movements for abolition?

One colossal error was the congressionally authorized method by which OSHA adopted its initial standards: rather than go through the cumbersome process of drafting regulations and then holding public hearings on them, the agency simply borrowed wholesale from the "consensus standards" already used as voluntary safety guidelines by business and professional groups. (The existence of such guidelines was one of the major arguments of those who opposed the creation of OSHA during congressional debate.) That meant, for example, that OSHA's standards on fire prevention came from the National Fire Protection Association—whose standards were out-of-date, narrow, misdirected, and very difficult to comply with under ordinary circumstances. Another consensus standard dictated that employers could not put ice cubes in their employees' drinking water; it dated back to the time when ice cubes were made from polluted river water.

The rules on the guarding of machinery so that exposed parts will not injure workers or passersby took 46 pages of small print to set out in the Code of Federal Regulations. When OSHA inspectors made their earliest rounds of plants under their jurisdiction, they sometimes seemed to overlook major safety hazards in favor of nitpicking lists of "nonserious" violations based on old-fashioned standards and carrying a fine of ten or fifteen dollars each. Thus, a small businessman might be cited and fined because the railing along one of his stairways was not exactly forty-two inches from upper surface to floor.

Another problem that plagued OSHA was its early politicalization. Although President Richard Nixon praised the bill creating the agency as "one of the most important pieces of legislation . . . ever passed by the Congress," his choice for its first administrator was George Guenther, a hosiery manufacturer from Reading, Pennsylvania, who had already held a political appointment in the Labor Department. Under Guenther, OSHA missed its initial opportunity to set a tough, meaningful industrial health standard—one governing the degree of acceptable contamination of the air in certain plants by lethal asbestos fibers. Against the advice of NIOSH, the unions, and the medical community, the agency decided not to rock the boat in an election year, and in June 1972 it adopted a permissive asbestos regulation favored by business. A week later, Guenther wrote a memorandum to his superiors in the Labor Department that became notorious. It promised that "no highly controversial standards" would be promulgated at politically inopportune moments and urged the White House to view the "great potential of OSHA"—a "properly managed OSHA" as a means of raising campaign contributions from the business community. (The memo surfaced only later, during the Watergate hearings.)

Guenther's successor was a Republican unionist, John Stender, a vice president of the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers. Having served as a Republican state senator in Washington, Stender had a sense of how to deal with a grumbling Congress, and he also restored some of OSHA's credibility with the labor movement. He supervised the issuance of standards governing the use of fourteen toxic substances, including vinyl chloride, a plastic used in many consumer products and suspected of causing a form of liver cancer. Stender was accused of bias of another sort—in favor of stringent noise standards, even at the expense of other forms of regulation, because he himself suffered a hearing impairment after years of work in a shipyard.

Compared to his two predecessors, Morton Corn "has the political sense of a gnat," according to a colleague and admirer in the Labor Department. When President Gerald Ford, fighting with Reagan for the Republican presidential nomination, set up a White House task force to review the operation of OSHA, Corn failed to perceive it as a threat to his agency's integrity. It didn't matter: the task force reviewed all the arguments against OSHA and concluded, reluctantly, that the agency was not expendable after all.

But Corn's lack of political sense and his naivete about the rules of bureaucratic survival in Washington may be his strongest weapons in the drive to gain greater effectiveness and acceptance for OSHA. Last October, just ten days before the presidential election, he pressed ahead with controversial standards governing the acceptable level of exposure to coke oven emissions. Meanwhile, he has instituted a systematic review and revision of the most hotly disputed and outdated consensus standards taken on by the agency in 1971. Corn insists that although this process is slow and sometimes painful, on OSHA's reputation as a nuisance—better, it is the only legitimate way to cut down on OSHA's reputation as a nuisance—better, say, than simply telling inspectors to ignore minor violations. Says Corn, "An inspector is sworn to cite what he sees; otherwise he can get nailed to the wall himself! . . . You can talk to the inspectors and flavor things . . . but you can't literally say to them, 'Disobey the law.' "

Because of his own academic background,

which includes research for the National Institutes of Health and the National Cancer Institute, Corn has also promised to build up a corps of health experts as big as, or larger than, OSHA's crew of safety specialists, so that occupationally induced cancers and other diseases can be dealt with more forcefully.

Still, the complaints, attacks, and imposision of restrictions continue. In addition to exempting small farms. Congress attached a rider to the last aproriations bill which prohibits OSHA from assessing penalties against any employer who has fewer than ten "nonserious" violations the first time around. Some of the founding fathers of OSHA, such as Senator Harrison Williams, Democrat of New Jersey, and Congressman William Steiger, Republican of Wisconsin, are vigilant in their defense of the agency, but organizations like the House Republican Task Force for Government Executive Agency Review (GEAR) and the American Conservative Union's "Stop OSHA Committee," both headed by Congressman George Hansen, Republican of Idaho, may be gaining adherents.

Some people who feel they have been persecuted by OSHA vow Thoreau-like disobedience. Howard Dearborn, for example, the owner of a precision machine shop in Fryeburg, Maine, has spent $3000 in legal fees rather than pay a twenty-five-dollar fine assessed against him for failing to replace a cable that had damaged insulation and exposed bare conductors; he says the government will have to put a lien on his plant to collect. Two construction firms, which were fined $600 and $5000 respectively by OSHA in connection with the deaths of workmen in North Carolina and West Virginia, have asked the Supreme Court to declare the agency's enforcement procedure unconstitutional; they claim that OSHA violates the Constitution's guarantee of a jury trial in all cases "where the value in controversy shall exceed twenty dollars," and that it illegally circumvents the judicial process.

Many legislators advocate a redistribution of OSHA's functions to the states. Congressman Skubitz, having done his part for the small farmer, now plans a rescue mission for the small businessman; his first priority after re-election was a series of public meetings in each country in his congressional district, "to let the people come in and tell how they've been harassed."

Congressman Steiger, for his part, insists that despite OSHA's problems in arriving at the right balance on safety issues, "it has performed magnificently in the health field." He speculates that the controversy surrounding the agency's earliest efforts is probably no more serious and shrill than that which accompanied passage of the Social Security Act and the Taft-Hartley Act. Eventually, he predicts, OSHA will gain just as much acceptance as those two laws have.—SANFORD J. UNGAR.

THE 25TH ANNIVERSARY OF GARDEN AND FARM PROGRAM

HON. MARC L. MARKS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. MARKS. Mr. Speaker, on Thursday, April 28th, television station WICU in Erie, Pa., will observe the 25th anniversary of the program, "Garden and Farm." The half hour program is the longest running agricultural program of its type on television in the United States. It has been hosted and produced by Dr. Biron E. Decker since its inception in 1952. Garden and Farm is seen in nine northwestern Pennsylvania counties, in eastern Ohio, southwestern New York State, and southern Ontario, Canada.

Garden and Farm was first televised on WICU–TV in April of 1952. It was presented live until the advent of video tape in 1961. In the early days of the series, nearly every type of farm animal appeared on the program. Garden and Farm was primarily directed to high school students in the beginning, who were members of the FFA. Students developed their assigned topics in the classroom, then participated in the television programs, using homemade props, signs and other visual aids. Filming was done on various projects in the field, on farms and elsewhere.

Besides high school students in the Future Farmers of America, FFA, others were also associated with the program, including members of the wildlife associations, Pennsylvania Fish and Game Commissions, and others. Garden and Farm was not limited to the "farm" or "garden" theme by any means. Sewing, canning, household ideas, forestry, environmental protection topics, and land management were also included as topics.

Dr. Decker, who still hosts each program, was employed for 46 years by the bureau of vocational-technical and continuing education departments of the Pennsylvania Department of Education as a vocational field consultant. Dr. Decker retired from active teaching in 1972, but at the request of WICU–TV his program and his associations with the high schools continue.

I commend both Dr. Decker and WICU–TV for their pioneering and for their long and continuous effort in providing this very valuable service to the public.

WATER AND COLORADO

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. WIRTH. Mr. Speaker, during the recent district work period I was privileged to address the water task force of the Denver Regional Council of Governments on an issue that is of vital importance to the West. I would like to share my thoughts with my colleagues, and I ask unanimous consent that the text of my remarks appear at this point in the RECORD:

REMARKS BY CONGRESSMAN TIMOTHY E. WIRTH

I'd like to spend most of my time today talking about why I think we are in danger of racing backwards in the area of water policy, and what I think we can do to get turned around and get headed in the right direction. But first let me put to rest one issue which clouds the larger question of water policy in Colorado. That issue is the construction of the Foothills Treatment Plant.

First, to the best of my knowledge there is no serious dispute about the fact that Denver badly needs the 125 million-gallon-per-day treatment capacity which Foothills would provide.

Second, even if there were a dispute about whether Denver needs this added capacity, it is a dispute which in the ideal world ought not involve either the U.S. Government or the Colorado Congressional Delegation. Clearly this is an issue best left up to local citizens and local elected officials. However, as I understand it, construction of the Foothills plant will involve some activities and installations on Federal lands, and under a law enjoying wide public support both in Colorado and elsewhere, and enacted before I arrived in Congress, the Federal Government must in such circumstances prepare an Environmental Impact Statement. Contrary to both open assertions by some, and subtle innuendo by others, I have never been party to a scheme to slow down or halt the completion of that review process. I have never made a statement either to a private citizen or a public official in which I opposed construction of Foothills or even urged delay in its construction. I have further stated that my files on this subject are open to anyone who wishes to review them.

Third, as to the assertion that I am opposed to Foothills because I am a "no growth" advocate, I will merely point out that since being in Congress I have worked vigorously to bring to Denver sound growth-oriented facilities such as the Solar Energy Research Institute, and such promising commercial ventures as the Space Telescope project at Martin-Marietta. The no-growth contention is clearly false and I suspect motivated by rather crass political considerations.

Finally, it has been, and will continue to be my position as long as NEPA is on the books, that that law should be firmly and efficiently administered. When presented with convincing evidence that its enforcement is either on the one hand obstructionist, or on the other hand, lax, I shall not hesitate to speak out. To date I have received no such evidence. I will be eager to find out whether such evidence is brought out in discussions which I understand you have had or will have with the Governor and Interior officials.

With that, let me turn to the bigger question. Water development in Colorado is controlled by two major influences. The first is Colorado's own state water law, which through the doctrine of appropriation treats water basically as a property right. Though always under the watchful eye of the courts, water has nonetheless been largely a free market good, governed by market forces.

More recently, however, we have seen the arrival of a second major influence: Federal construction subsidies. In simplest terms these federal subsidies represent distortions of free market forces, and cause one use of water to become more desirable than another. The chief disadvantage here is that whatever economic preferences are built into federal law automatically get injected into water decisions in Colorado. In the case of both Colorado law and federal law, however, the effect is the same: water flows uphill toward money.

Until only a few years ago the effect of federal subsidies was particularly heavy because of the firm hand of then Colorado Congressman Wayne Aspinall. As Chairman of the Interior Committee, Aspinall secured construction of a vast network of federally funded dams, power plants and irrigation projects. Still others were planned. In many respects this was the golden age of federalism and local public works. The fruits of that era are everywhere around us.

But as all good things eventually do, this golden age has, I believe, come to an end. Even if we in the Colorado delegation are successful in restoring those projects which the President has deleted, I think there can be little question that the days of "you support my dam and I'll support yours" are

fast disappearing. The reasons are many and have been pointed out by others:

Belt tightening at the federal level.

The devastating effect of inflation on previously established cost benefit ratios.

Rising interest rates.

The declining power of agricultural interests in Congress.

The rise of the environmental movement.

Increasing unwillingness of Eastern politicians to support Western reclamation and power projects.

Finally, most of the projects with high regional or national benefits have been completed. Many of those which remain are more marginal and local in importance.

These developments were ones which neither you nor I caused, but they are nonetheless real. I would suggest that those public officials who fail to recognize these facts are racing frantically backwards into a past which will forever elude them. If officials in Colorado persist in this course, we are all going to be up the proverbial creek without a paddle or a policy.

For too long we in the west (and in Colorado in particular) have relied on the Federal government to make our water policy for us. Even where it may have distorted our priorities, we have accepted it, as long as Uncle Sam has been willing to pick up the lion's share of the tab. Now the Federal government continues to control much of our water policy. But it has begun to seriously question the flow of benefits—and we don't like it.

What is to be done? I'd like to make several suggestions. But first let me congratulate this group for some of the steps it has taken—most importantly the step of realizing that water is a subject where people must work together. Water policy is no place for the lone ranger: I would also urge that you carry your efforts at cooperation a step further by incorporating into your deliberations a stronger statewide perspective. A united voice from Metropolitan Denver does not change the fact that it is Colorado as a whole, not just Metro Denver, which must identify and solve the water problems which are faced by all Coloradans.

Currently we lack a reliable statewide forum, a reliable data base, and a shared list of priorities from which to work. Each of us has a responsibility to help create this statewide perspective. But of course these responsibilities are different for different levels of government. Here we can take a lesson from the history of state-federal relations during the 1960's. In that time I think we learned that the federal government is unrivaled as an efficient collector of revenue and writer of checks. We also learned (and I was then at HEW where the lesson is clearest) that the federal government is typically a disaster at identifying special local problems and bringing to bear the necessary resources to solve those problems. Repeatedly federal administrators misread local priorities and threw good money after bad in a well-meaning effort to "do it for us." In all such efforts they had the help of a red tape machine which succeeded in tying everyone in knots. The checks got written, but too often the money went down the drain.

Recognition of this problem resulted in the concept of revenue sharing . . . a policy which itself has some problems, but which I believe is correctly anchored on the principle that local priorities are best set at the local level. If Colorado is to learn from this lesson of the sixties as it relates to water policy, it means first and foremost that our state and local officials must begin to cooperate in the establishment of a set of long-term, statewide priorities for water use. Colorado officials, not federal officials, must sit down and establish reliable figures on how much water is available to our citizens statewide. Colorado officials, not federal officials, must work out a long range plan detailing how much of our water we wish to devote to agriculture, to municipal use, to recreation, to industry, and to the development of energy and other mineral resources.

Having set these priorities, presumably with strong public involvement, Colorado and her citizens must be prepared to commit some of their own resources to the pursuit of those goals. (I might just note that in this regard the Foothills project is on firm ground. It will be paid for by voted approved and locally provided funds. Yet how well the Foothills project and related projects fit into a larger statewide plan, is less clear at this point. I doubt that today anyone has this answer, and that is grounds for concern.)

To restate my point, solving Denver's problems without regard to the problems of Grand Junction or Golden, or without regard to the needs of our industrial and agricultural sectors, is no solution at all. Stubborn refusal to adopt this common perspective at the state and local level will cause the problem to land in the lap of the federal government where it doesn't belong.

Almost a year ago I introduced into the House a bill designed to provide each state with up to 800,000 dollars to engage in statewide water planning. My goal was, and is, to direct federal funds away from Washington and into the hands of those most knowledgeable about a specific state's water needs and problems. This bill, HR 13498, also calls for a much closer tie between the agencies charged with planning water development and use, and those federally funded agencies engaged in water research. The sort of planning which you at the local level must do should be backed by whatever research is necessary, and water research agencies must be kept more in tune with policymakers' needs.

Since introducing HR 13498, I have solicited comments from numerous individuals both in and out of Colorado. As a result of comments received and as a result of the recent experiences with the Carter Administration, I am strongly inclined to amend my proposals to include a program of federal matching funds to support the needs of states which adopt statewide water plans. Under such a proposal local officials would, by adopting a state plan, set priorities for the use of Federal funds, but they would also have to pay a meaningful share of project costs with local tax dollars.

To summarize on this point, what I think we need are:

Federal water planning grants;

Locally set priorities; and

Joint federal/state funding of construction.

In addition to careful planning, meeting our water needs is going to require greater attention to water reuse and conservation. Here, also, federal and state officials have separate contributions to make. The Denver Water Board as you know has participated in important research on water reuse, but has found that funding for such research projects is an important barrier. Obviously federal help to speed along the development of water reuse technologies is desirable, and there is legislation pending in Congress to do precisely that.

Yet at the same time, one of the key barriers to use of such technologies may exist here at home and may require state action. Current court interpretations of Colorado law forbid recycling of water within its basin of origin. In my view, to the degree that water can be safely recycled, such rulings may be irrational. Local groups such as this must begin to take the leadership in pushing for action by the state legislature to legalize within-basin recycling. It is also time for a careful examination of some of the legal barriers which frustrate imaginative cooperation between contending users of water, such as municipalities and agriculture, or agriculture and industry.

Most of you are probably familiar with the concept of land application of sewage, a simple technology allowing localities to cut sewage treatment costs, to increase regional agricultural productivity, and exploit natural filtration and water purification processes. When I first heard of the opportunities represented by land treatment, I assembled a briefing team of local experts on the subject to go around the Second District informing municipalities and citizen groups of the possibilities. Here is a technology which will allow homeowners in one of our local suburbs to realize annual savings of $20 to 65 dollars per household, while at the same time maintaining agricultural employment and adding some $400,000 worth of agricultural production to the local economy. Often land treatment will also allow us to more quickly achieve water quality goals in currently substandard streams.

Ironically as this briefing team which I sponsored moved from community to community they often encountered opposition, rudeness and sometimes reactions bordering on hysteria on the part of local sewer and water boards. In spite of that kind of opposition, however, I think that the Northglenn/Frico Agreement, and the proposed Westminster Regional Wastewater Plan prove what can be done when local talent and leadership come together to solve common problems.

Other issues to which Coloradans must supply that same approach include:

(1) A review of the laws governing the intermingling of surface and subsurface water;

(2) Establishment of regulations to prevent the waste of potable water (at a minimum, plumbing codes and guidelines for municipal water systems must be made conservation-oriented);

(3) We must all take a hard look at the conditions which encourage or discourage the rededication of a water right from one use to another, and collectively we must decide whether current water law serves the common good and insures our common future. Inadequate protection of instream and recreational uses is but one example of how current water law fails to provide for our future.

In my view, either Coloradans meet these challenges at the state and local level, or as the recent actions of the Carter Administration portend, others will step in to provide us with solutions we may not want.

FINANCING CONGRESSIONAL CAMPAIGNS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. MURTHA. Mr. Speaker, one topic Congress will consider closely is public financing of congressional campaigns. Recently, Mr. Ken Bode wrote very perceptively about this possibility in the New Republic. I would like to insert his article from February 19 for my colleagues to consider:

MONEY FOR CAMPAIGNS

(By Ken Bode)

A short time ago, a distinguished-looking man named Tom McCoy arrived at my office in an agitated state. McCoy, normally out-

fitted in a good humor and grey suits these days, is a man about Washington. He is known as a fellow able to raise a few bucks in campaign contributions for aspiring politicians, and he has plied that trade on behalf of people like former Governor Daniel Walker of Illinois, Rhode Island's Senator Claiborne Pell, former Indiana Senator Vance Hartke, Governor Jay Rockefeller of West Virginia, Senator Dick Clark of Iowa—and so forth. What is causing friend McCoy's present consternation, and what brought him by my office, is that he is picking a bone with John Gardner and other high pooh-bahs of this town and he was out shopping for an ally. Gardner, as you may know, heads up a "citizens lobby" known as Common Cause. He is an important figure in Washington because, as the columnist Mary McGrory says, "What Common Cause says should happen often does." What Gardner, Common Cause and others are onto right now is an idea whose time, they figure, has come. What they say should happen is that last year's method of financing presidential elections with public monies, Federal Elections Commission and all, should be extended to next year's congressional elections and ever hence. Tom McCoy is not so sure.

To Gardner, whose group had a strong hand in shaping last year's law, public financing of presidential elections was nothing short of a "quiet revolution." "It is hard to believe," he says, "that just four years ago, the presidential race involved money-raising methods that approached extortion, money-stuffed satchels passed be shadowy figures, the selling of ambassadorships and many downright criminal activities. This time, tens of millions of Americans took the game away from the fat cats and paid for the campaigns themselves through the one dollar check-off on their tax returns."

Gardner contends that *the law* enabled an almost unknown peanut farmer and ex-governor to win the Democratic nomination, and *the law* caused an incumbent president to come close to losing the nomination of his own party and to become the first incumbent to be defeated in a general election in 44 years. Now set aside for a moment the oversimplification of these assertions. Forget also that if Jimmy Carter actually had a fraction that much to learn from Gerald Ford's experience, future federal financing would be a dead duck indeed. What is important in the context of the present debate is that John Gardner and his allies are engaged in a serious job of public relations, they have powerful sway over public and congressional opinion, and they are selling one commodity by promoting the virtues of another.

The current plans for federal financing of congressional elections provide either for federal dollars to match private contributions (like the scheme used in the presidential primaries) or for lump-sum grants to each candidate (like those given to Ford and Carter for the general election). Either way there are problems.

For example, in certifying the 15 presidential candidates who qualified for matching funds last year the Federal Elections Commission employed up to 150 auditors. Political money may have escaped careful accounting for too long, but consider the bureaucracy that would necessarily be involved in accurately auditing and matching the contributions of at least 1000 congressional candidates in a campaign period that spans only a few months, or, in some instances, weeks. That bureaucracy would be avoided by using block grants instead of matching funds—give, say, $30,000 or $40,000 to each nominee of a major party for a House seat (more for the Senate, of course). What about independent or third party candidates? They would not be at the receiving end of Gardner's largesse.

Proponents of federal funding claim it will make congressional races more competitive—a laudible goal, indeed. As the safest bets for reelection, incumbents consistently attract more money, and substantially more special-interest money, than their opponents. The objective seems to be to provide a "floor" of federal, money as an equalizer at the starting gate. But of the 435 House seats, no more than 50 to 75 are won with less than 55 percent of the vote in each general election. The rest are safe seats, one-party districts and gerrymandered to remain so, or potentially competitive districts in the temporary hold of an incumbent who suits his constituents.

Until the power to draw district lines is removed from the purview of the two parties, or until retirement becomes mandatory after three or five terms in office, neither block grants nor matching funds will make congressional elections genuinely competitive. New York, for example, is by most standards a two-party state, yet 80 percent of its congressional seats are safely in the hands of one party or the other.

Providing their general election opposition with $40,000 in start up capital will not much interfere with the prospects of reelecting representatives like Joseph Addabbo, Benjamin Rosenthal, Edward Koch, Elizabeth Holtzman, Shirley Chisholm, Charles Rangel, Herman Badillo or Sam Stratton. These members hold their seats as long as they are renominated, no matter how much of the public's money is invested on behalf of their opponents. In short, because their districts are reliably one-party, they can be beaten only in a primary. And it is conventional wisdom that the House of Representatives—dominated, as it is, by safe-seat holders—will pass no bill that includes the federal funding of congressional primaries.

Democracy probably is in better health when the right to govern is not already settled before the polls open, but the truth is that even granting the questionable assumption that if it was federal money that made last year's presidential campaign more competitive than usual, no system with any chance of passing could have a comparable effect on Congress. But any such "reform" obviously will drive up the cost of politics, especially for the public.

Part of the campaign to extend public financing to congressional elections includes some high-flung rhetoric, much of it directed at Congress itself, and that also bothers Tom McCoy. Consider the following statements from one paragraph of a recent article by John Gardner: "Congress took the presidency off the auction block, but rejected public financing for itself because the reform would have done too much to even up the relative positions of incumbents and challengers. . . . Result: A lot of congressmen were bought and sold in 1976, just like the good old days, except the going rates were higher. . . . The money-heavy special interests couldn't buy themselves a President so they tried to buy as many members of Congress as they could." Now, even if you agree with Gardner's general point, this is strong language from a normally responsible citizen. As McCoy puts it, "The way John Gardner talks, Congress is nothing more than a vending machine—you put in your money and you get out your law. When he talks about congressmen being bought and sold, John Gardner should be called upon to name names—which congressmen and by whom?"

Herbert Alexander, director of the Citizens Research Foundation and the country's most experienced expert on money and politics, agrees: "I don't know why members of Congress sit by and listen to Gardner talk about the auction block. They ought to be offended." Well, at least they're curious. Congress just paid the pollster Lou Harris $58,000 in public money to find out why the institution is in such bad odor these days.

Unsubstantiated allegations of the sort noted above from the likes of John Gardner must contribute something to Congress's unflattering image, at least among the several thousand good citizens who faithfully pay their dues to Common Cause each year, not to mention the millions more who find his allegations reprinted in community newspapers all over America, and who conclude that Gardner must have the facts to back them up. If he can itemize his innuendos, he ought to just come forward and do so.

There also are some assertions bandied about concerning the alleged popularity of federal financing of elections. But there is a perfectly objective barometer of public opinion on this issue that merits some notice. For the past two years, American taxpayers could indicate to the IRS on line 8 of Form 1040 whether they wanted $1 ($2 on a joint return) of their tax payments to help pay for presidential elections. The form contained assurances that either way it would cost no more in taxes, nor affect the size of any refund.

On the 1974 returns, 24 percent said yes, 42 percent said no and the balance didn't bother checking either box. Last year, it was 26 percent yes, 44 percent no.

In other words, federal financing of elections may not be an idea whose time has come. If the Congress is serious about polls, it will take notice of the one conducted free each year by the IRS. As our journeyman friend McCoy gets into the ring with the likes of John Gardner, the income-tax check-off results should be the most useful ally he can find.

HEARING SCHEDULE

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. PERKINS. Mr. Speaker, since the Subcommittee on Elementary, Secondary, and Vocational Education has received so many requests for information about our plans for hearings on the Elementary and Secondary Education Act, the impact aid laws, and related legislation, I would like to insert today at this point in the RECORD a copy of our hearing schedule for the remainder of the year.

If any Member of Congress or any public or private individual would like to testify on any one of these days, I hope that they will contact the staff of the subcommittee at the following address:

Subcommittee on Elementary, Secondary, and Vocational Education, B–346–C Rayburn House Office Building, Washington, D.C. 20515.

Mr. Speaker, the schedule follows:

SCHEDULE FOR SUBCOMMITTEE HEARINGS THROUGH THE REMAINDER OF THE 1ST SESSION OF THE 95TH CONGRESS

MAY

10th—General overview of Elementary and Secondary Education, including a report from the Office of Technological Assessment.

11th—General overview of Elementary and Secondary Education.

12th—General overview of Elementary and Secondary Education.

24th—Paper work problems in Elementary and Secondary Education programs.

25th—Paper work problems in Elementary and Secondary Education programs.

26th—Paper work problems in Elementary and Secondary Education programs.

JUNE

7th—Bilingual Education.
8th—Bilingual Education.
9th—Bilingual Education.
14th—Emergency School Aid Act.
15th—Emergency School Aid Act.
16th—Emergency School Aid Act.
21st—Impact Aid.
22nd—Impact Aid.
23rd—Impact Aid.
28th—Impact Aid.
29th—Impact Aid.
30th—Impact Aid.

JULY

12th—Adult Education.
13th—Miscellaneous Programs.
14th—Special Projects Act.
19th—Special Projects Act.
20th—Special Projects Act.
21st—Special Projects Act.
26th—E.S.E.A. Consolidated Programs.
27th—E.S.E.A. Consolidated Programs.
28th—E.S.E.A. Consolidated Programs.

AUGUST

2d—E.S.E.A. Consolidated Programs.
3d—Administrative structure of the Education Division and the General Education Provisions Act.
4th—Administrative structure of the Education Division and the General Education Provisions Act (advisory councils).

SEPTEMBER

Title I, General Aid/Equalization.

OCTOBER

Title I, General Aid/Equalization.

NOVEMBER

Title I, General Aid/Equalization.

JAY FORRESTER PROBES THE FUTURE

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. COHEN. Mr. Speaker, on May 11, Prof. Jay Forrester of the Massachusetts Institute of Technology will be the fifth speaker in our series of "Dialogs on America's Future" sponsored by the Congressional Clearinghouse on the Future.

Dr. Forrester, a pioneer in computer developments and author of World Dynamics, is currently director of MIT's system dynamics program, a project which is developing a national model of our social and economic behavior in order to evaluate long-term and short-term effects of alternative policies on the quality of life in our Nation.

Mr. Speaker, I believe Dr. Forrester's insights will be useful to all of us and I urge my colleagues to read this Washington Post article and come to our dinner on May 11.

The text of the article follows:

PROBING OUR FUTURE: FROM THE COMPUTER, A REVOLUTION IN VALUES

(By Haynes Johnson)

The Sixties witnessed one kind of change; now some people are groping toward another type of historical evolution. You won't find exactly a new religion along the banks of the Charles in Cambridge these days, but ideas are being generated here that deal with the shape and direction of a new American society. They challenge virtually every assumption of the American experience. They are unsettling; relinquishing many of our basic liberties, rethinking our religious and humanitarian traditions, rejecting the belief that size and economic growth are a virtue, minimizing the choices available to individual citizens, facing up to the necessity for long-term planning over many aspects of oui lives.

These ideas promise to become increasingly influential and controversial. If they are correct, America is at a turning point and faces harsh alternatives to past and present policies. They argue that the nation is in a transition stage and a time of turbulence as the old patterns give way to the new. Forces are at work that inexorably are propelling us either toward a new form of future equilibrium, in an altered society with different values, or toward collapse. And, they suggest, the time to make national choices to mitigate the dislocations is critically short.

These ideas spring not so much out of theology and philosophy as they do out of scientific and technological research. It is the world of the computer that is now speaking to us. The very heart of the industrial process, ironically, that helped forge many of the forces creating untenable pressures. Thus, the premise,

HOW SOCIAL SYSTEMS BEHAVE

On the corner of Amherst Street, diagonally across from the modernistic Alfred P. Sloan School of Management, is an old, red-brick building that looks more like a mill or warehouse than a center for advanced thinking.

"Energy Laboratories, Building E-40," a sign on the front door proclaims. Inside, on the first floor, are more signs: Community Fellows Program . . . Center for Policy Alternatives . . . Program in Industrialization of the Housing Sector . . . Project Mobile Home . . . State Building Code Regulation Study. Follow the signs from the lobby, down the corridors past cinder block walls painted a vivid yellow, up the stairs to the second floor and you come to another sign posted alongside a large map of the world: System Dynamics Group, Room E 40-253.

Here at the Massachusetts Institute of Technology, for the last three years, a group of doctoral students and professors working under the guidance of Jay W. Forrester have been developing a model of social and economic behavior in the United States. They are using the computer in attempting to forecast not only our lives but our children's and their children's lives.

Earlier efforts at MIT had examined corporate behavior, pinpointing the factors that cause a company to grow and then eventually to stagnate. Next, the systems dynamics work led into analyzing the behavior of cities. Forrester and his assistants used their computerized model to look at such questions as what cause cities to grow over a 150 to 200-year period and eventually to exhibit signs of decay with all the symptoms of unemployment, poverty, crime, slums and abandonment that are present in many urban centers today.

From there Forrester proceeded to carry his work into urban world dynamics structures. His writings and his thesis about the inevitable limits to growth brought him worldwide recognition, and made him the subject of controversy.

The present project is the most ambitious yet. It is a thousand times more complicated. By compiling a computer model of American social and economic behavior, Forrester and his aides hope to gain substantial new understandings of the major pressure confronting the United States, and to suggest alternatives to present policies.

"Our national model will differ in a variety of ways from some of the previous efforts," says Nathaniel Mass, the young project director who earned his doctorate at MIT while studying under Forrester. "It will deal with some of the longer-term issues of energy, resources, population, capital investment and pollution. It will be a model that will probably have a 250-year time span. We hope to start off in the year 1850 and run it through to the year 2100. It will look at the long-term issues, but it will also go much more into the short-term aspects of what's going on.

"What distinguishes the person who is drawn to system dynamics from other forms of analysis is that he does think there is an underlying structure, an orderly set of processes going on, and he looks for what is causing the problems. He really wants to know what it is that we have done over the last years or that's been happening in the country to give rise to the problems. In an important way this is the kind of thinking we're going to have to foster—the belief that the energy crisis and other problems evolve from what's been going on in the last 100 years in this country.

"The problems aren't transitory; they're of a more enduring nature. I think we'll have leadership in this country and real guidance insofar as public policy is concerned when a leader, as Forrester has suggested, can make six speeches on six different days dealing with foreign policy, inflation, recession, the domestic economy and have each of them be mutually and internally consistent, have one relate to the other—and show some recognition of the trade-offs between the short and long term. People will be drawn to that kind of leadership, and it will be an effective form of leadership. I don't see that in the country now."

HUMAN MIND INADEQUATE

As those words indicate, Jay Forrester has attracted a bright young cadre of believers. They are not, however, grimly earnest disciples worshipping a guru of computer technology. Despite the staggering ambition of their project, they are approaching their task with modesty and a sharp sense that they might be wrong. Nor is Forrester himself a likely candidate for a philosopher king of the future. He is a spare, slim man with an understated manner who grew up on a cattle ranch in Nebraska, the son of one of the last homesteaders.

He comes to his present position from an engineering background that led him, successively, into World War II work with fire control devices and radar, on into early digital computer work and then into developing computers for military application on defense systems. Since 1956 he has been leading the development of what he calls system dynamics—a process that relies upon computer models to furnish an analysis of how social systems behave and interact. It is his belief that the human mind alone does not possess the necessary skills to interpret properly the complexities of modern life. He is convinced it is now possible to combine the power of the human mind with the power of the computer to achieve deeper insights into the causes of social change and stress. In short, he wants to remove the guesswork from national planning and policy with a view to developing long-range, workable alternatives.

GROWTH: A TEMPORARY PROCESS

At his best, Forrester expresses himself clearly and forcefully.

On his basic thesis about growth:

"Growth is a temporary process. Physical growth of a person ceases with maturity. Growth of an explosion ends with destruction. Past civilizations have grown into overshoot and decline. In every growth situation, growth runs its course, be it in seconds or centuries. . . . In the United States the use of energy has been doubling each 10 years. For the world, population has been doubling every 30 years. A 20-year doubling time is typical of modern industrial society. Any growth that repeatedly doubles will, in time,

overwhelm its host environment. At some time growth produces its own termination."

On the nature of cities:

"I see no solution for urban problems until cities develop the courage to plan in terms of maximum population, a maximum number of housing units, a maximum permissible building height, and a maximum number of jobs. A city must also choose the type of city it wants to be. To become and remain a city that is all things to all people is impossible."

On the role of religion:

"Through his religious concepts, man has established for himself, in his own mind, a unique position at the center of the universe. At one time, this meant literally the physical center, with the sun and stars revolving around the earth. Far more recently, it has meant man as a uniquely chosen creature in nature, with special rights and privileges over the natural surroundings. But that egocentric view of man at the center, with nature at his disposal, is becoming as untenable as the geocentric theory of the world at the center of the universe . . .

"Much more recently has grown the contention that all of humanity falls within the boundary; but it has remained permissible to be selfish toward anything outside of mankind, that is, toward the natural surroundings. This latest view drives churches to help men everywhere, but with what consequence? By helping the human population to grow, and by protecting man from the retaliation of nature, mankind is showing the height of social selfishness toward the environment. One must ask, "When is generosity a virtue and when is it a sin against the world?"

On technology:

"Technology has been improving while at the same time many aspects of our social conditions have been worsening. Some people are beginning to wonder if there might not be a connection between the two. Is it possible that the time is past when better technology automatically means better living?"

MORE GOVERNMENT CONTROL

Out of such thinking comes Forrester's basic thesis: that given the pressures, it will be impossible for the United States to maintain its present quality of life if population and industrialization continue to grow. The country no longer can afford to squander its natural resources, extol the virtues of size, sustain its standard of living and plan haphazardly for tomorrow without paying the price of what Alvin Toffler has termed "future shock." Time he believes, is short to make decision to reverse the trends. The next decade will be critical.

In his view of the future, laws, attitudes, goals, expectations, traditions, religions, and government and corporate activities must all change—not might, or should—must.

His implications are jolting. They lead toward a society with less individual freedom, more government control. He raises these prospects:

Cities will be controlled in size and composition. Migration to them might be banned. Building permits and water connections could be denied to newscomers to maintain sufficient resources for those living there. One consequence would be for far more local control over the destinies of towns and municipalities. Instead of the present similarity of our urban centers, there would be more diversity, a return to more local and regional characteristics.

Population will be limited. This can be done by fiat, or encouraged by removing tax benefits given to heads of families. If population continues to increase, higher unemployment, more welfare and rising governmental costs will result.

People will begin moving back to the country from the city. More workers will be needed on farmland. The cost of agriculture will become increasingly higher as it is forced by prices and shortages to reduce its dependence on petroleum-based products.

Churches have taken an overly simplistic view of right and ethics. Traditional concepts of altruism and of helping one's neighbor must be reexamined in light of economic and social realities. The church should begin to look at the limits and consequences of humanitarianism.

Forrester recognizes that many of these ideas—such as controlling the size, composition and migration to cities—appear undemocratic and immoral. He knows it may seem he is advocating control where none has existed. Neither, he argues, is true. Take the matter of cities.

"Every city has arrived at its present size, character and composition because of the actions that have controlled the city's evolution in the past. By adding to the water system, sewers and streets, a city has, in effect, decided to increase its size. By building a rapid transit system a city is often . . . deciding to change the character of its population by encouraging new construction in outlying areas, allowing inner areas to decay and attracting low-income and unskilled persons to the inner ring at the same time that job opportunities decline."

His point is that control has been guided by short-term considerations with long-range consequences. He sees the issue not as one of control or lack of it. The issue is what kind of control, toward what end.

SENSE OF ACCOMPLISHMENT

Critics of Forrester and his advocates argue that they are modern-day Jeremiahs, professional doomsayers preaching a philosophy of pessimism. Forrester and those working with him don't see it that way. They see themselves as optimists.

"One would be pessimistic if he were devoted to the continuation of all the past trends," Forrester says. "If he insisted on more economic growth, more population, more standard of living, I believe he would be wishing for something that isn't going to happen."

Then he adds:

"I think that material standard of livings has relatively little to do with happiness, as near as I can tell. It doesn't seem as if those communities that have a higher standard of living are necessarily any happier than the low standard of living ones. And I've lived in both. There doesn't seem to me anything intrinsic about happiness going with an everrising population. In some ways a sense of accomplishment goes with dealing with the present problems. There are plenty of those to deal with so there's lots of room for a sense of accomplishment."

THE SHELTERBELT ACT OF 1977

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. PRESSLER. Mr. Speaker, today I am introducing the Shelterbelt Act of 1977. Today, April 25, is Arbor Day, and I can think of no better day on which to introduce legislation designed to encourage tree planting and cultivation.

Arbor Day traditionally has been a time set aside to celebrate our Nation's wealth of trees and greenery. But this year, South Dakota and many other States are suffering from the worst drought since the Dust Bowl of the 1930's. The worst wind erosion in 20 years has stripped nearly 6.8 million acres of land in the Great Plains States, with the worst damage in Colorado, north and south Texas, and New Mexico. To save our precious land resources from severe drought, wind erosion and to preserve our wildlife habitats, we need a comprehensive national shelterbelt program.

The Shelterbelt Act of 1977 will benefit the Nation, as well as South Dakota, by bolstering agricultural production, providing more wildlife and recreational areas, as well as enhancing the natural beauty of the landscape. Specifically, my bill would offer tax credits to farmers who develop and maintain shelterbelts; provide for the removal of qualified shelterbelts from local tax rolls, reimbursing local governmental units for lost tax revenues, and limit these credits to those who farm as a main source of livelihood.

In my home State, South Dakota, approximately 2,855,501 trees were planted during 1976. It is not known, as of this date, how many of these trees survived the drought conditions of the past year. In a report issued in January 1977 entitled, "The Status of Shelterbelts in South Dakota," the South Dakota Department of Game, Fish and Parks concluded that—

> We [South Dakota] face an accelerated detericration rate which will occur in the next 10 years involving excellent, good, fair and poor [shelterbelt] conditions. There is evidence to support the possibility of a declining momentum to plant new shelterbelts for supplemental or replacement purposes.

Many of the existing shelterbelts in South Dakota were planted in the 1930's and 1940's. These stands of trees are dying off, and the cost of replacement and cultivation has discouraged many South Dakotans from replanting their shelterbelts. Another important factor mitigating against shelterbelt replacement is the increasing value of agricultural land in South Dakota—and the Midwest in general.

There are many States that share the same general problem of shelterbelt loss. South Dakota is but one example of dwindling windbreaks, and it is a problem which is of national concern. Agricultural production is increased by the improvement, replacement or establishment of shelterbelts, moisture is conserved and duststorms similar to those which plagued Colorado in recent months could be averted by a comprehensive system of shelterbelts on our agricultural lands.

I urge my colleagues to join me in sponsoring the Shelterbelt Act of 1977.

THE INCIDENCE OF TAXATION IS NOT THE SAME AS THE BURDEN OF TAXATION

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. KEMP. Mr. Speaker, over the weekend I saw an interesting report in the Philadelphia Inquirer which said

that Nobel Prize-winning chemist Dr. Francis Crick is leaving England for the United States because of high tax rates. These rates are so high, 70, 80, and 90 percent in some cases, as to be confiscatory and make it no longer worth his while to work in England. I think that this incident illustrates Great Britain's economic malaise very clearly and has important lessons for the United States as well, lest we follow the British path.

In England the highest marginal rate of taxation is 98 percent on investment income. Obviously one would have to be a fool under these circumstances to earn enough taxable income to fall into this bracket. But if a person is talented, clever, resourceful, determined and therefore successful, what has he earned for his efforts? Virtually nothing. So if he decides to either leave England for some area with more enlightened tax policies or voluntarily forgoes income opportunities because of the high tax rate, who is the ultimate loser? Clearly, the country as a whole has lost the benefit of this individual's ability and the Government has lost whatever tax revenues this individual would have produced. Last year alone tax exiles are estimated to have cost the British Treasury £1 billion in revenue.

I think that we can now see the crucial difference between the incidence and burden of taxation. The incidence in that of taxation fall on the so-called wealthy 98-percent rate designed to "soak the rich." But if all the rich people leave the country or forgo income opportunities, where does the burden lie? It lies on all the people in the lower brackets—precisely those who are presumed to benefit from high tax rates. In the case of Dr. Crick, the burden of taxation on the poor is increased by exactly the amount of tax revenue he would have produced at whatever rate is low enough to induce him to stay and work, rather than desert the country.

The same thing happens in a less dramatic way in the United States as well, though the highest marginal rate is 70 percent here. Though there are probably few people who actually leave the country for tax reasons, there are still a great many investment and work decisions which are made at the margin which are discouraged by the high tax rates. As a result, high income people put their money into tax-free municipal bonds, rather than profitmaking investments which would create jobs and tax revenues in the private sector, or simply forgo work and investment altogether and engage in "conspicuous consumption."

The total loss in tax revenues is impossible to calculate, but one can assume that it is far greater than the 5 percent or so of tax revenues that are collected in all the rates above 50 percent. Consequently, a reduction in high marginal rates will actually increase tax revenues. This would mean a shifting of the tax burden upwards, onto the backs of the rich who are presently unaffected by the high incidence of taxation.

I am convinced that no person ought to be required to pay more than 50 percent of his income in taxes except in wartime. The only reason why the rates are that high now is because of misguided egalitarianism. There is no economic justification at all for the system as it exists now. After all, simple arithmetic will show that a flat rate of about 21 percent will raise all the revenues now collected in all the brackets from 14 to 70 percent. It would be a simple matter to redesign our present tax code with a top rate of about 30 percent of the lower rates at 10 and still raise all the revenues the Government needs.

Sooner or later we must learn the lesson that tax incidence is not the same as tax burden if we are to get the economy going again without inflation.

[From the Philadelphia Inquirer, Apr. 24, 1977]

BRITONS FLEEING TAXMAN

(By Anne Rubinstein)

LONDON.—For centuries, Britain beckoned to refugees fleeing oppressive regimes in other countries.

These days, there is a reverse movement. More and more people are leaving Britain to escape the clutches of the taxman.

This applies particularly to the big money earners like pop music stars. The Rolling Stones, Rod Stewart and Led Zeppelin have all declared themselves tax exiles. Last year, their absence cost Britain an estimated one billion pounds ($1.7 billion) in lost revenue.

Recently, writers and eminent scientists have joined the emigres, motivated by the same desire to keep more of what they earn and thus maintain their standard of living.

Critics of Britain's tax system see the tendency as a blow to Britain's ability to sustain a cultural community where new ideas can flourish.

Dr. Francis Crick, who shared a Nobel Prize for one of the most important scientific advances of the century, has left the country because of the tax laws.

Dr. Crick, together with American Dr. James Watson, discovered the structure of the genetic substance DNA at the molecular-biology laboratory at Cambridge. Now he is planning to take up a permanent post at the Salk Institute in La Jolla, Calif.

Shortly after this became known, Dr. Max Perutz, another Nobel laureate, announced that he and other senior Cambridge scientists were contemplating similar steps.

A chief factor was the tax law of 1974. This aimed at blocking tax evasion through the payment of salaries by overseas agencies. At the same time, however, it blocked academics from bolstering their relatively low British salaries with American lecture tours.

The cases of Drs. Crick and Perutz prompted the Times of London to comment in an editorial on "the ridiculous level of British taxation."

The editorial said that when eminent people leave, the country almost certainly loses more than it gains. "First, there is the social loss of the contribution which these individuals could make to society in the widest sense. . . . The socialist stereotype is that very high income is almost exclusively associated with inherited wealth and a particular social class. In fact, many tax exiles are actors, entertainers, writers and others. . . ."

In the early 1970s, the government of the neighboring Irish Republic introduced in a measure exempting creative artists from paying any income tax at all.

This attracted a large colony of English authors and television writers, including novelists Len Deighton and Frederick Forsyth, whose "Day of the Jackal" amassed him a small fortune.

Forsyth commented: "It is an automatic assumption (in Britain) that any man who has made money has done it parasitically by swindling or speculating. . . . In fact, of course, most have done it by sheer hard work, coupled with talent, energy, drive and determination."

His views were echoed by an American banker who said, "The amount of cash which the (British) top marginal rate of tax (98 percent on investment income and 83 percent on earned income) brings into the treasury is absolutely minimal. The reason for it cannot possibly be for the good of the economy, and must be part of the politics of envy."

In the wake of criticism of the 1974 law, Chancellor of the Exchequer Denis Healey has announced that Britons who work overseas for more than 30 days a year will be relieved from paying tax on the first 25 percent of their income earned abroad.

This should help businessmen, as well as pop stars and others. The initial reaction was unenthusiastic, however.

Jeff Lyne, leader of the Electric Light Orchestra, said: "It's a bit too late in the day. If we come back to Britain from California, we would still only see 17 pence out of every pound earned in Britain."

IDAHO LEGISLATIVE MEMORIAL REGARDING TELEPHONE COMPETITION AND INTERCONNECTION

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. HANSEN. Mr. Speaker, I have been officially advised by Mr. Craig Stephen Harvey, chief clerk of the Idaho House of Representatives, that the Idaho Legislature has adopted House Joint Memorial No. 8, which requests Congress to consider the effects of any legislation which may cause adverse affects on telephone rates, particularly to low-income individuals and small business.

It is further the request of this memorial that the Federal Communications Commission delay full implementation of its policies fostering competition until Congress has had the opportunity to complete its investigation and develop national policy.

I include in the RECORD at this point a copy of House Joint Memorial No. 8.

HOUSE JOINT MEMORIAL NO. 8

A joint memorial to the Congress of the United States to request Congress to consider the effects of legislative action on telephone rates applicable to the general public

We, your Memorialists, the House of Representatives and Senate of the State of Idaho assembled in the First Regular Session of the Forty-fourth Idaho Legislature, do hereby respectfully represent that:

Whereas, increased competition within the telecommunications industry and its effect on basic residential telephone rates is a matter of great public concern; and

Whereas, much discussion has been generated regarding the possible benefits of such competition to the large users of telecommunications services and to the manufacturers of customer-provided devices; and

Whereas, it is pointed out in these discussions that the widespread use of private transmission services and customer-provided devices may cause increased costs for residual telephone service, with the result that much if not all the increased costs will, of necessity, be paid by the utilities' small business and residential customers, including per-

sons in lower income groups and those on fixed incomes; and

Whereas, it is the duty of every public utility serving Idaho customers to furnish adequate, efficient, just and reasonable service, instrumentalities, equipment and facilities as are necessary to promote the safety, health, comfort and convenience of its patrons; and

Whereas, it has come to the attention of the members of the Legislature that the United States Congress has had under its consideration legislation concerning possible limitations on competition in the telecommunications industry.

Now, therefore, be it resolved by the members of the First Regular Session of the Forty-fourth Idaho Legislature, the House of Representatives and Senate concurring therein, that the members do hereby express their interest and concern regarding the Congress' investigation into telephone competition and interconnection; and

Be it further resolved that the Congress be requested to include in its deliberations a full inquiry into the possible economic impact of any action it may contemplate, with the view of providing complete assurance that its action will not have an adverse effect on telephone rates applicable to the general public, and particularly to low-income individuals and small business, so that the public interest will be served; and

Be it further resolved that the Federal Communications Commission is requested to delay full implementation of its policies fostering competition until Congress has had the opportunity to complete its investigation and to develop national policy; and

Be it further resolved that the Chief Clerk of the House of Representatives transmit copies of this resolution to the President, the President of the Senate and the Speaker of the House of Representatives of Congress, and to the Senators and Representatives from Idaho in the Congress of the United States, and to the Federal Communications Commission.

BILLY DOES NOT LIKE OSHA EITHER

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. HANSEN. Mr. Speaker, in the April 21 CONGRESSIONAL RECORD I cautioned President Carter that Amy's tree house had apparent deficiencies which might lead to her receiving a citation by the Occupational Safety and Health Administration. Items of obvious concern were the platform, railings, ladder and safety net.

Strangely it was not Amy's super bird house but Billy Carter's gas station which ran afoul of OSHA. On April 14 Billy was cited for nine nonserious violations which the President's brother took seriously enough to complain about publicly in his own inimitable manner.

Apparently Billy was too busy collecting beer cans to read either the newspapers or the Good Book. If he had read the papers, he would have known that OSHA inspections have been declared unconstitutional and you can refuse to let them in. If he had read the Scriptures, he would have known that only the meek shall inherit the OSHA inspection.

I submit for the RECORD two articles from the Washington Star which appeared in the April 21 and April 23 editions which concern Billy's bout with big brother—and he did not like it any better than the rest of us. The articles follow:

BILLY, YOUR BEER CANS MUST GO

Billy Carter, the President's younger brother, has been ordered by the federal government to clean up debris around his Plains, Ga., service station to meet federal health and safety requirements.

A spokesman for the Labor Department's Occupational Safety and Health Administration said today that Carter was ordered to clean up junk and debris around the station, including a large supply of beer cans.

OSHA officials inspected the station April 14 after the agency's Macon, Ga., office received a complaint in the mail from a Columbia, Ohio, resident. The complainant, who apparently visited the station, sent two pictures depicting "junk and scrap" around the station the spokesman said.

Carter was not available for comment.

Carter was cited for nine non-serious violations and was given 15 days to correct them, the spokesman said. The violations carry no penalty, but if Carter refuses to comply the spokesman said he could be cited for serious or willful violations which could carry a small fine.

Details of the violations could not be disclosed, the spokesman said, until OSHA received official notification from Carter that he had received the citation.

The person making the complaint was not identified, in keeping with OSHA procedures.

Recently, Carter's station was cited by state authorities for illegally selling beer on Sunday.

TIME FOR A COLD ONE

Billy Carter says he feels "rotten as hell" about an order of the Occupational Safety and Health Administration requiring him to clean up his gas station in Plains. Billy called OSHA "a ridiculous outfit" and complained the agency has sent "kids around to inspect peanuts who don't know the difference between a peanut sheller and a cotton gin." The complaint which resulted in the clean-up order was filed by an OSHA employee who was passing through Plains on vacation.—John McKelway.

ADMINISTRATION URGES CAUTION ON CAMP SAFETY LEGISLATION

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. ANDERSON of Illinois. Mr. Speaker, I want to commend the Carter administration on the cautious and prudent approach it is taking to the suggestion of Federal enforcement of youth camp safety regulations. Last Thursday, April 21, 1977, Deputy Assistant Secretary Designate for Health Legislation, Mr. C. Grant Spaeth, testified before the House Subcommittee on Compensation, Health and Safety, and urged the subcommittee to "defer action on the youth camp safety proposals before you today, and that further committee consideration be postponed until the 2d session of the 95th Congress." Mr. Spaeth revealed that the administration is undertaking "a comprehensive review of the appropriate Federal role in youth camp safety in the context of the overall health and safety strategy of the Carter administration" and that it will make its recommendations next January in connection with the President's fiscal year 1979 budget.

The administration spokesman also released the results of an HEW survey of camps in the States of Washington, Pennsylvania, and Florida during the 1975 camping season. Those results, based on a very thorough and sound methodology, tend to confirm the findings of a 1974 study which has been faulted on its methodology—namely, that campers are far safer than their peers in the general youth population at large. These latest findings again call into question the need for the drastic step of Federal enforcement of camp safety regulations as proposed in several bills.

All this is not to say that camps could not be made even safer or that each camp accident, fatality, or serious illness is not a matter of grave concern and often personal tragedy for the families affected. Obviously, this is a matter of continuing concern and attention on the part of parents, camp operators, and public officials alike. But the fact that youngsters are safer in camps than in their own communities would not seem to indicate a need for massive and direct Federal intervention into an area which traditionally, and constitutionally, falls within the police powers of the States.

My own feeling is that the Federal Government can provide assistance to the States in setting up their own youth camp safety programs if they so desire. That is the central feature of my own Camp Safety Incentive Act (H.R. 5167) which has some 14 House cosponsors. This bill would provide a one-time, 3-year grant program to the States, on a voluntary basis, to develop and implement State camp safety programs. The bill would authorize a total of $22.5 million over that 3-year period, solely for grants. The Federal enforcement bills, on the other hand, while authorizing the same amount, could cost up to $6 million per year for Federal inspections alone, thus leaving little for grant purposes to encourage States to set up their own programs.

Mr. Speaker, I would hope the Carter administration will give my alternative serious consideration in connection with the decision it will make by next January. In the meantime, I would hope that the Education and Labor Committee will follow the advice of the Carter administration and defer further action on this legislation until that decision has been made by the administration.

At this point in the RECORD I include the full text of Mr. Spaeth's testimony:

STATEMENT BY C. GRANT SPAETH

Mr. Chairman and Members of the Subcommittee: It is a pleasure to be here today to testify on proposed new legislation related to youth camp safety.

Youth camp safety has been a matter of interest and concern to many Members of Congress since hearings were first conducted on this subject during the 90th Congress. A large number of thoughtful bills have been introduced this session by more than 40 Senators and Representatives. These include H.R. 1000, H.R. 1326, H.R. 2518, H.R. 4286 and H.R. 5167, all of which are under consideration by your Subcommittee today. The many different Federal approaches represented in those bills are strongly indicative to the new Administration of the depth and sincerity of your concern. The Administration believes very strongly that safety in youth camps is a very important goal. The Department of Health, Education, and Welfare is committed to the objective of helping to make camps safer for young Americans.

In addition to Congressional and Administration interest in youth camp safety, a significant number of States have also underscored their concern by enacting laws in this area. To date, 11 States have passed laws governing youth camp safety. And while we recognize, with you, that those laws vary widely in their effectiveness and comprehensiveness, we believe they reflect a high level of attention to the problem you are addressing today.

Finally, the Department of Health, Education, and Welfare shares your deep concern for the health and safety of children who attend camps throughout the nation. The Department, through the Center for Disease Control, has developed comprehensive Federal standards for youth camp safety, an extensive program of technical assistance to the States, and the development of model State laws and regulations, with strong encouragement to States to adopt them.

DEPARTMENT POSITION

As you may know, President Carter and Secretary Califano have asked for a one-year extension of all expiring health programs. This general proposal was made in the context of our quick review of the previous Administration's FY 1978 budget submission and President Carter's own recommendations to Congress for the FY 1978 budget. We have now turned our attention to developing an overall Federal health and safety strategy for FY 1979. Consistent with this activity, we intend to undertake a comprehensive review of the appropriate Federal role in youth camp safety in the context of the overall health and safety strategy of the Carter Administration. We would hope that you, Mr. Chairman, and the Members of your Subcommittee would join us in this effort.

Moreover, we want broad public participation in this process and intend to meet with interested groups and individuals in the course of the next few months, including State officials, camp owners, parents, camping groups, youths, and others. We also invite your participation and assistance in evaluating our own previous studies in this area, and in analyzing all the other available information about youth camp safety which may be relevant to our review.

We anticipate this activity will be completed by January 1978 with recommendations to be included in the President's FY 1979 budget.

Because of this effort, Mr. Chairman, we request that your Subcommittee defer action on the youth camp safety proposals before you today, and that further Committee consideration be postponed until the second session of the 95th Congress. At that time we will be in a position to advise you on our views on the long-term needs in this area and our perception of the Federal government's proper responsibilities.

Finally, while this comprehensive review is taking place, we can assure you that we will continue to assist States to adopt and enforce youth camp safety standards of their own. We will continue to assist States: to coordinate their existing educational and enforcement activities relating to youth camp safety; to create or design appropriate State agencies which will be responsible for administration of a youth camp safety program; to develop and implement safety and health programs directed toward specific camping activities such as aquatics, water skiing, arts and crafts, archery, horseback riding, mountaineering, whitewater canoeing and rafting, caving, and firearms; to develop and conduct other short-term training sessions for camp health, safety, and supervisory personnel; and to design and implement systems and procedures relative to the reporting of illnesses and injuries in youth camps within their jurisdiction.

In addition, we can assure you that we will undertake to develop programs for States to monitor compliance with youth camp safety standards and regulations. We will also make every effort to develop standards regarding such matters as the qualifications and certification of camp staff, including health and medical personnel; and environmental sanitation, including food sanitation, water supplies, sewage disposal, building construction, vector control, solid waste management and related aspects. And finally, we will review, possible incentives to stimulate camp operations to voluntarily upgrade their facilities.

CONCLUSION

In summary, the Administration wishes to reiterate that we are strongly concerned about safety in youth camps. We wish to carefully study all previous Federal efforts in this area, in the context of our overall evaluation of federally administered child health and safety programs; and in consultation with interested parties to determine the most coherent and effective approach to this problem. For that reason, we request the Subcommittee to give us an opportunity to conduct such a review, and to report back to you in January after it is completed. In addition, we ask for your active interest and participation in our process of determining the appropriate Federal role in this area, and that you defer any action on pending legislative proposals until that time.

Mr. Chairman, that concludes my formal testimony; my colleagues and I will be pleased to respond to any questions you or other Members of the Subcommittee may have.

DR. FRANK R. BONDI, PHYSICIAN AND FRIEND

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. GAYDOS. Mr. Speaker, someone once said a man's reputation is like his shadow. Sometimes it follows; sometimes it leads. Sometimes it looms larger than life size and sometimes it is much smaller.

That epigram does not apply to Dr. Frank R. Bondi of McKeesport, Pa., one of our Nation's most prominent and distinguished surgeons. His reputation always precedes him and stretches from coast to coast.

It is understandable, therefore, why Dr. Bondi was selected by Catholic War Veterans Post 1559 and its auxiliary to be the 1977 recipient of the CWV's annual Good Fellow Award. This honor, the latest in a long series of awards bestowed on him, will be presented Dr. Bondi at a testimonial dinner Sunday, May 1, in McKeesport.

Dr. Bondi's name is synonymous with McKeesport Hospital. He now holds the position of chairman of the department of surgery and his association with the hospital dates back to 1935, when he interned there following graduation from the University of Pittsburgh's medical school. His service to the hospital and the community has been uninterrupted except for 3 years of military service from 1943 to 1946 when he served with the U.S. Army in Europe.

McKeesport Hospital was and is a most important part of this outstanding gentleman's life. He has dedicated his career to making the surgical staff one of the finest in the Nation. It was Dr. Bondi who established a surgical residency program at the hospital and who initiated an ongoing educational program to keep his surgeons aware of the latest techniques and developments in their respective fields. It was Dr. Bondi who organized a Medical Explorers Scout Troop for young men interested in medicine as a career.

Although McKeesport Hospital has been the prime beneficiary of Dr. Bondi's professional talents, he also has achieved national recognition in another particular area. There is, perhaps, no other individual in the country with a deeper desire to conquer and cure that dreaded of all diseases—cancer. More than 20 years ago, Dr. Bondi launched his personal crusade against this killer. He has not spared himself in this fight as attested by the numerous offices he has held in local, county, and State divisions of the American Cancer Society, including terms as president and member of the boards of directors.

There is another project with which Dr. Bondi has been closely linked over the years. In 1963, he helped found a revolving student aid fund at Elizabeth-Forward High School to help deserving graduates attain a college education. To date, that fund has raised nearly $82,000 and enabled approximately 200 students to further their education.

Mr. Speaker, time and space prohibit the listing of the many accomplishments this dedicated man has achieved over the years. It is enough to say that Dr. Bondi is recognized as a leader in the medical profession as well as in social, civic, and philanthropic work.

Dr. Frank R. Bondi is a man I am privileged to have as my personal physician and proud to have as a friend.

PROPAGANDA IN THE WAITING ROOM

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. SYMMS. Mr. Speaker, the following article, "Propaganda In the Waiting Room," by Ralph Smeed appeared in the Lewiston Morning Tribune on April 23.

There seems to be no question that the majority of doctors—and the majority of the public—is against socialized medicine. And yet, there is still an effort going on in the Federal Government to make our medical system as "good" as the British system by letting the Government take over.

Mr. Smeed conducted a survey in the area encompassing Boise, Idaho, and discovered one possible reason why the public has not been as vocally opposed to socialized medicine as would be expected. Not one magazine or newsletter favoring private medicine was found after surveying the literature in 100 doctors' waiting rooms.

I urge my colleagues to read this interesting article and then to contact the doctors in their districts and ask them what they have done to fight socialized medicine.

The article follows:

PROPAGANDA IN THE WAITING ROOM

(By Ralph Smeed)

CALDWELL.—Next to the federal government the American Medical Association probably comes in for more scathing criticism than any other organization in the USA.

Oh sure, there are many decent and well meaning citizens who seem to have an almost blind faith in government, but generally speaking the only blind faith almost universally shared by Americans is in their own family doctor, if not the doctor's trade association (AMA).

Freely chosen and selected by the outcome of no political monkey-business whatsoever, with the possible exception of occupational licensing, medical doctors inspire and enjoy more real confidence than any other profession in the world.

In the light of all this esteem, there is great respect for their advice which, by the way, runs all the way from how to choose a mate, clear across the spectrum to urban renewal or even land-use planning or wife swapping.

Sound ridiculous? Well, such tremendous regard do people hold for their paternal painkillers that, typically, even the most ardent church going deacon is apt to grab his first copy of "Playbody" magazine, provided his family physician were to suggest a casual reading of that publication's feature, "sex life after 80."

If all this prestige and influence is truly present, why are these same doctors, nearly all of who claim to be vehemently against socialized medicine, losing the race against it? Of all the doctors I've ever met and, of those who do care, nearly all frequently express great sorrow for the sorry direction medicine is headed.

Now, then, I think these doctors are without a doubt as sincere and dedicated a profession as exists. They work long hours and again, generally, deserve their prestige and pay. So why are they so consistently losing their war on government medicine?

Since I've been such a long-time crusading comrade of the private medicine story I, too, wondered why. So I had a survey made. A rather honest one, too, since I paid for it, but its approach was clean and unusual and revealing.

The survey was to see what the doctors were doing with their waiting room literature. Of all the captive audiences in the world with the exception of the government's compulsory school system, doctors' offices are no doubt the biggest and, in terms of this fight certainly, the best, i.e., made to order.

A random survey was made of the literature to be found in the waiting rooms of 100 doctors in Caldwell, Nampa and Boise. Over 1,000 magazines, publications and periodicals were carefully counted and catalogued to see how many we could find in which one would likely find the case against socialized medicine.

We didn't expect to find many, since those magazines favoring private medicine are in the minority, but they do exist. For example, Private Practice, National Review, Reason, Conservative Digest, Human Events. The Freeman, to name only a few, plus a host of excellent newsletters.

Result? We found not one. Not one. Now I'm sure there must be some doctors who do provide good anti-government medicine publications. In fact I've seen one or two. But our random survey found none and I think, therefore it is alarmingly representative. What a golden opportunity lost to state their case.

REAL STABILITY IN A REAL WORLD

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. DORNAN. Mr. Speaker, in the last few weeks, the words "stabilization" and "destabilization" have sent many Americans back to their dictionaries. The recent remarks by a U.S. representative before an international body have seemed to redefine those apparently simple terms. The controversy which has resulted from the equation of armed invasion with "stability" has started a battle of semantics which has not been seen since the days of that other multidefined term, "détente."

Since that first utterance by a former Member which referred to the "stabilizing" effect of conquering foreign troops in Angola, the phrase has been bandied about with remarkable imprecision. But, I must say that, in a certain ironic sense, I agree with the description of Cuban troops in Angola as "stabilizing." There are few things more stable than a dead man—and there are plenty of them in Angola to testify to the "stabilizing" influence of the Cuban Communists.

But this is the only sense in which the Communists can be considered "stabilizing." The way Adolf Hitler stabilized Europe. Or the way Gen. Amin stabilizes Uganda.

Webster, on the other hand, defines "stability" as "the strength to stand or endure" and it is in this sense—the real sense—that I would like to discuss the stability of the United States and the world.

I would like to examine just one small part of the U.S. defense network to illustrate how real stability in a real world can be achieved.

The Department of Defense has initiated plans to develop and eventually deploy the MX, a new, larger intercontinental ballistic missile to replace a part of the present Minuteman force. Concerns have been expressed regarding the impact of such a deployment on the stability of the strategic relationship between the United States and the Soviet Union.

Although the term stability is sometimes used in several contexts, the most important of these is crisis stability since it bears directly on the avoidance of nuclear war. A crisis would be unstable if either side were to perceive that it would be more advantageous to preemptively attack instead of permitting its opponent to strike first. This type of instability is the condition of the currently projected U.S./U.S.S.R. strategic arms balance. Each side would be in a more advantageous position if it preempted rather than allowing the other side to strike first. The instability, however, is somewhat onesided.

The Soviets have a greater incentive to preempt since they could end a conflict with a major and probably dominant military advantage, and that advantage would be about double what it would be if the United States preempted. The United States would have a much lesser incentive to preempt since, even though such a move would cut in half the Soviet's potential advantage, it would still leave the United States in a militarily inferior position. The United States would have an incentive to preempt only if certain that a Soviet attack was inevitable. Hence, the problem relating to MX is not stability per se but how to restore stability to a situation that is now unstable.

One possibility would be to deploy MX missiles in the present Minuteman silos. This would worsen the existing instability because it increases the disparity between the outcome of preempting versus being preempted. This is based on 1990 forces, since by that time all Minuteman III missiles could be replaced by MX missiles. The Soviet's greatest advantage is obtained by preemptively attacking U.S. forces, allocating two warheads to each U.S. MX silo and one warhead to each Minuteman II silo, bomber base, and SLBM base. The U.S. greatest advantage is by preempting with a similar attack, allocating either two or three warheads to each Soviet silo, depending on what is assumed about fratricide. Such a situation is seriously unstable since whichever side preempts would hold the superior position at the end of the exchange. Hence, the effect of MX in a silo deployment is to worsen the presently projected instability.

An MX mobile deployment would be quite stable. Regardless of which side preempts, the relative advantage at the outcome would be about the same. At a deployed level of 550 missiles, the outcomes would favor the United States, unless the Soviets developed the "high threat," in which case the outcomes would be nearer parity. For the "best estimate" Soviet threat, a 300-missile mobile deployment would produce outcomes closer to parity.

Possible Soviet responses to a U.S. MX deployment would be to try and overpower the system by strengthening their offensive capability or to move some of the ICBM's into a mobile basing mode. Mobile systems can be designed so that the cost of proliferating aimpoints is low. The so-called hard capsule system is one such approach. Given such a design, the

costs to the United States of maintaining constant effectiveness would be lesser than the cost to the Soviets of trying to overpower the system. Hence, a more logical Soviet response would be to mobilize a portion of their own ICBM force. This alternative would increase stability. Specifically, whichever side preempts would lose, that is, be in a position of military inferiority at the end of an exchange.

PROSPECTS FOR AGRICULTURE IN THE NEAR FUTURE

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. HARKIN. Mr. Speaker, a constituent of mine, Mr. David Garst of Coon Rapids, Iowa, recently visited with me concerning the prospects for agriculture in the near future. Mr. Garst is, of course, well known to many in the Congress and to many people, both in this country and abroad, who are involved in agriculture. Because of his family's long involvement in hybrid seed corn production and cattle breeding, Mr. Garst pays very close attention to what farmers are doing and what farmers plan to do in terms of crop production. I have valued Mr. Garst's advice and counsel over the years, and I have found his insight to be remarkably keen and his predictions pretty much on target.

David Garst is concerned about the probability of a tremendous corn crop this year with resulting low prices for corn. He feels that farmers should plant less corn and more soybeans. His advice is to have the Secretary of Agriculture immediately place a high loan rate—in the neighborhood of $6 a bushel—for this year's soybean crop. Not only will this stimulate the shift from corn to soybeans, thus reducing corn production, but it can also have other beneficial effects, such as tremendous savings in energy usage.

Mr. Garst has outlined his ideas in a very thoughtful and provocative paper which I would like to bring to the attention of the Members. Mr. Garst's paper follows:

LESS CORN AND MORE SOYBEANS ARE NEEDED

(By David Garst)

U.S. farmers must plant less corn acres and more soybeans or forage in 1977 to keep the price of corn above the cost of production. If the switch from corn to soybeans is not substantial, U.S. farmers may grow 25% more corn than we will need. This could reduce the price of corn 75¢ per bushel, and put feed grain producers in the same financial crisis as farmers who grew wheat last year. Here is the story.

A record corn yield is assured in 1977. This record corn yield is predictable for the following reasons:

U.S. farmers will be planting the most productive seed in history. Since the first hybrid corn was made 50 years ago, hybrid seed corn has improved genetically about 1% per year. Thus, the seed corn U.S. farmers will plant this spring will be 5% better than the seed corn they planted in 1972. That year U.S. farmers raised a record yield of 97 bushels per acre.

This year's crop will be the best fed in history. Crops that follow droughts are fed better. The exchange rate that releases nutrients from the soil improves when soils dry out. Thus, more phosphate and potash than normal will be available in the root zone for this year's crop. Decomposition of organic matter also increases. This makes more nitrogen available.

Carryover fertilizer will be greater too for crops stressed by drought in 1976 could not completely use some of the fertilizer applied last year. In addition, fertilizer is readily available and reasonable in cost compared to other inputs. The total of all nutrients applied this year will be greater than ever before in history.

An ideal planting season is most likely. The soil profile throughout the corn belt has not yet been recharged with moisture. Excess moisture can move down in to the soil profile and get away. Thus, farmers will be able to get in the field a day or so earlier following rains or wet weather than is normally the case . . . and crops throughout the corn belt will be planted in a timely manner.

Soil moisture reserves in more than 90% of the corn belt are always replenished by spring rains. Good soils can only hold about 12 inches of useable moisture, and usually three fourths of the rain that falls gets in the ground. Normal rainfall in March, April, May, and June is sufficient to completely recharge the soil profile in all but the western edge of the corn belt.

Crop prospects in marginal rainfall areas of Kansas, Nebraska, and South Dakota will be more than offset by increased irrigation. In 1976 Nebraska farmers increased irrigation 500,000 acres. In 1977 Nebraska farmers will irrigate more than 6 million acres of land. About 80% of this irrigated land is planted to corn . . . and only about a third of Nebraska's total corn acreage is still planted on dry land. Additional corn acres planted on irrigated land in Nebraska, Kansas, Colorado, and South Dakota will more than offset lower crop prospects possible in marginal rainfall areas.

Rains throughout the corn belt through April 1 have already provided half of the soil moisture needed. Although this year it's not probable that soil moisture reserves will be completely recharged until after the planting season, it's nearly certain that soil moisture reserves will be recharged before the middle of June when the corn crop first needs it.

Farmers know from experience that moisture reserves will be recharged by the end of June. During this time of year they've more concerned that excess moisture will interfere with corn planting and cultivation. Historically excess moisture in April, May, and June has reduced corn yields more in the central and eastern corn belt than have the July and August droughts.

Rainfall in July and August is also likely to be more abundant in 1977. In 1976 when corn yields averaged 87 bushels per acre farmer experienced a record drought in much of the corn belt. Climates are cyclical in nature. Cyclic variations usually move toward the average that can be expected. Dry periods come about every 20 years. U.S. farmers experienced droughts in 1934 and 1936; in 1954 and 1956; and again in 1974 and 1976.

There is a two year cycle too. A good year usually follows a bad year and is followed by a good year, etc. History tells us that two bad years seldom come in a row. Thus, based on either the two year cycle or the 20 year cycle, we can expect more rainfall than we had last year.

A U.S. national average corn yield of 90 to 100 bushels per acre is probable. Last year farmers harvested nearly 71 million acres of corn for grain and the rest was cut for silage. USDA January planting intentions indicated earlier this winter that farmers will plant about the same amount this spring.

A 95 bushel yield times 70 plus million acres will produce 6.7 billion bushels of corn. Add the carryover of about 700 million bushels from this year's crop and U.S. farmers will have 7.4 billion bushels of corn to feed, export, or store in 1978. This is substantially more than we need.

This year farmers will use about 5.9 billion bushels . . . and carryover will increase about 300 million bushels. Without an increase in exports or livestock feeding, next year it will double. This certainly would lower corn prices below the cost of production.

Increased exports of corn are not likely in 1978. Farmers throughout the world raised too much wheat in 1976. This year they experienced the same low wheat prices that U.S. farmers have. For this reason, acreage is being switched to feed grains such as corn, grain sorghums, and barley. These feed grains have been in short supply and are relatively higher priced.

Yield prospects for world feed grain crops will also improve. Other world producers only raise about a third as much corn per acre as we raise in the U.S. The good feed grain prices of recent years have given these farmers the incentive they need to apply more fertilizer and improve production techniques. Thus, bigger acreage and higher yield will let our foreign customers grow more of the corn they need. This may well reduce export opportunities more than domestic use of livestock feed increases.

The drought, the tight supply and high price of feed grains has caused U.S. livestock numbers to go down. In the last two years U.S. farmers have reduced cattle numbers from 131 to 123 million head and cow numbers by 8 percent. The same story is true abroad.

The energy crisis, the world wide inflation, and unemployment have also caused a lot of belt tightening so the demand for livestock products has not been strong. This has been bad for U.S. livestock producers. Foreign customers also are spending their money for energy instead of meat and milk. Their livestock producers have suffered too so breeding herds have been reduced. It is unlikely that livestock numbers can be rebuilt fast enough in either the U.S. or the rest of the world to use the extra feed grains that will be raised in 1977.

For this reason U.S. farmers need to switch about 10 million acres from feed grains to soybeans. A 10 million acre switch would give one billion bushels less corn and 300 million bushels more beans and profitable prices for both crops. Since feed grains are ample, a 10% increase in supply can easily cause a 20% cut in price. By contrast, soybean supplies are currently inadequate. Chances are great that a 20% increase in production will only lower prices about 10%.

It is unlikely that farmers will shift enough acres from corn to beans. There is not yet enough price incentive for them to do so. Note April 1 Price Futures and price relationships below.

	Corn	Beans	Ratio corn to beans
May	2.53	9.23	3.6
July	2.59¼	9.26¼	3.5
August	------	9.17	---
September	2.62½	8.12	3.5
December	2.65¼	7.31	2.7
January	------	7.31	---
March	2.71	7.39	2.7
May	2.75	7.41	2.7

NOTE.—May 1978 corn is 23¢ per bushel higher than cash corn. May 1978 beans are

$1.82 less than cash beans. The cash price ratio of corn to beans is 3.5. The price ratio of corn to beans that will be harvested next fall is only 2.7. Most farmers use future price relationships to plan their crops . . . for they will not have crops to sell until this year's harvest is complete. It takes a ratio of 3 to 1 to make beans more profitable than corn. Thus, farmers can stay with corn and hedge their corn crop to maximize their profit and many are doing this . . . instead of shifting acreage to soybeans. Hedging alone could cause present price relationships to change dramatically in the months ahead.

Most farmers don't like to raise soybeans. On hilly land soybeans cause erosion . . . and lots of farmers are already committed to corn. These farmers have already applied their fertilizer or have carryover herbicide. And farmers don't like to walk bean fields for weeds. Bean seed this year is scarce, low germinating, and high priced . . . and in the Delta area where beans are a principle crop, lots of land has been in beans too long. This land should be rotated to avoid root rot and other disease.

The shift from soybeans to cotton in the south will, in addition, tend to offset some of the shift from corn to beans in the midwest. Thus, it is unlikely that U.S. farmers will grow enough beans to meet demand.

Practically all of the world grows wheat and wheat was overdone last year. A big portion of the world grows feed grains and this may well be overdone this year. Only the United States, Brazil, and China grow soybeans. The U.S. produces half the crop, and China uses practically all the beans it raises domestically. With the present world demand there is no way that U.S. farmers can produce too many beans.

Planting more acres to soybeans has other advantages too. Some of these advantages fit modern energy conservation concepts. Soybeans require no energy to dry. Most feed grains do. According to the USDA it takes as much energy to dry our corn crop as it does to raise it.

Soybeans also produce their own nitrogen plus a little extra for next year's crop. Soybeans add to the soil about a pound of nitrogen for every bushel raised per acre. A soybean crop yielding 30 bushels per acre will add about 30 pounds of nitrogen. This is no small factor in an energy crunch that may raise the price of nitrogen up to 20¢ per pound in the next five years.

Soybeans because they are three times less productive and higher priced than corn only cost a third as much to store. If the U.S. wants reserves or carryover to protect its customers, soybeans are the most logical alternative. If U.S. farmers would switch 10 million acres from feed grain to soybeans, no additional storage space would be required.

Soybeans also best fit the needs of current livestock production. At present poultry and pigs are the types of livestock that can be most rapidly expanded. They need to be expanded too, to offset the reduction in cattle numbers. Soybean meal—the world's best and most efficient vegetable protein supplement is required to balance the ration of hogs and chickens. Urea which is a much cheaper source of protein can be used only for ruminants—cattle, sheep, and goats. Thus, the world needs more soybeans if it is to use its feed grains with greatest efficiency.

Not only does the U.S. need to plant more acres of soybeans, but farmers need to produce them in the best possible way. Soybeans today will buy plenty of the two elements—phosphate and potash—needed to produce top yields. At current prices one bushel of beans will buy 90 pounds of K20 and 50 pounds of P205. Experience shows that this application can give an extra 5 or 10 bushels of soybeans per acre. It doesn't take an economist to see the extra income that this will give.

Why does a seed corn salesman promote more acres of beans? The answer is simple. Seedsmen want their customers to make the best possible profit from the seed they sell and selling seed is a year after year business. If farmers raise too much corn this year, there will be no profit and farmers will raise less corn next year. In the long run the size of the market will be the same, but the profit to the farmer might be a whole lot less if we plant too much corn this year.

THE FEDERAL ANTIBUSING ACT OF 1977

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. EVANS of Delaware. Mr. Speaker, I am today introducing legislation designed to prevent Federal courts and agencies from issuing orders to require the assignment of a student to a school on the basis of race, color, religion, or national origin.

I take this action because I have become convinced that people in my State and across the country have grown tired of watching the Federal judiciary and bureaucracy go beyond their powers as enumerated in the Constitution and preempt prerogatives which only belong to the Congress and to the people.

Study after study has shown that the American people, both black and white, are opposed to forced busing of schoolchildren. In cities across the country, the people have demanded that forced busing stop. Yet the Congress has been powerless to act in the face of unwise court decisions. Time and again, the courts have shown that they are more interested in racial quotas than in quality education of children.

I am a strong believer in the neighborhood school concept. Neighborhood schools and neighborhood institutions have given us a backbone for community involvements, community awareness, and community betterment. Neighborhood schools have become the focal point for social and recreational activities. And neighborhood schools have given us the ability to govern educational opportunities for our own children.

Yet the Federal courts have turned their backs on the success of the neighborhood school concept, and instead have opted to send children miles away from the neighborhood schools. This tactic has broken down our neighborhoods, wasted vast amounts of money and energy, and has done absolutely nothing to improve the education of any child, black or white.

Therefore, I am introducing the Federal Anti-Busing Act of 1977. Under my bill, no court of the United States shall have the jurisdiction to make any decision, enter any judgment, or issue any order which would have the effect of requiring the assignment of a student to a school on the basis of their race, color, religion, or national origin. Additionally, no department, agency, officer or employee of the United States empowered to extend Federal financial assistance to a school through grants, loans, or otherwise, shall withhold or threaten to withold this financial assistance in order to coerce or induce schools to require the assignment of students to a school on the basis of race, color, religion, or national origin.

Further, my bill requires that any order on the part of the U.S. District Court requiring busing be postponed until all appeals in connection with the order has been exhausted.

Finally, my legislation, if enacted, would end existing requirements in effect from the day of enactment requiring the assignment of students to a school on the basis of race, color, religion, or national origin.

I have also joined in signing Discharge Petition No. 1 to force a vote in the full House on a constitutional amendment to prohibit forced busing of school children. I regret that the leadership of the Congress has refused to let such antibusing legislation come to the floor in the past and I hope this petition will encourage scheduling of consideration of constitutional amendments on busing.

Mr. Speaker, freedom is more than just a word. Freedom is a spirit, a spirit which has brought all of us here to this great land over the course of some 300 years. If our Nation is to endure as a free nation, we must fight to preserve that freedom. Without freedom of choice and a strong educational system, our country will not continue to be a leader in the free world for very long. We must strive to provide all American children with equal educational opportunities. Forced busing, however, does not provide that freedom of choice. I urge the Congress to enact legislation which will end forced busing in this country for good.

I insert the text of the Federal Anti-Busing Act of 1977 in the CONGRESSIONAL RECORD at this point:

H.R. —

A bill to remove the remedy of busing from the jurisdiction of federal courts and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Antibusing Act of 1977".

LIMITATIONS ON FEDERAL COURTS AND AGENCIES

SEC. 2. (a) No court of the United States shall have jurisdiction to make any decision, enter any judgment, or issue any order the effect of which would be to require the assignment of a student to a school on the basis of their race, color, religion, or national origin.

(b) No department, agency, officer, or employee of the United States, empowered to extend Federal financial assistance to any program or activity at any school by way of grant, loan or otherwise, shall withhold or threaten to withhold any such Federal financial assistance in order to coerce or induce the implementation or continuation of any plan or program the effect of which would be to require the assignment of a student to a school on the basis of their race, color, religion, or national origin.

(c) In the case of any order on the part of any United States District court the effect

of which is or would be to require that pupils be transported to or from school on the basis of race, color, religion, or national origin, the effectiveness of such order shall be postponed until all appeals in connection with such order have been exhausted.

REOPENING OF CASES

SEC. 3. (a) No person who, by reason of any Federal court order in effect as of the date of the enactment of this Act, is required to assign a student to a school on the basis of their race, color, religion, or national origin shall be so required on or after that date.

(b) Any case in which such order was granted shall be reopened on the motion of any party to such case for such further or alternative relief as may be necessary.

WYOMING, MINN., DEDICATES ITS NEW MUNICIPAL BUILDING

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. OBERSTAR. Mr. Speaker, the earliest settlers of what is now the city of Wyoming, Minn., held their first community meeting in a one-room shack where they gathered round, sitting down on gunnysacks. Community meetings have not been that rustic or intimate in many years and after the dedication on Saturday, April 23, of Wyoming's sparkling new municipal center, the gunnysack days are happily gone forever.

The new center includes convenient, spacious city offices, the fire department, the police department, and a large community center where town meetings, community dinners, dances and other activities will be held.

Wyoming has experienced very substantial and rapid population growth in the last decade and a half, which has put increasingly heavy demands on city government and community services. The old wood-frame building which housed the former village hall had deteriorated so badly that it had to be torn down in 1972, forcing government services into scattered and inadequate space. Even before 1972, city officials had begun planning for a new municipal building, but were stymied by one key problem: Cost.

Lacking adequate financial resources to do the job themselves, they discussed with me early in 1975 the possibility of Federal Government assistance and I brought them together with the HUD community development grant program from which Wyoming received a grant of $60,000 toward the total construction cost of $140,000. The community raised the balance of the cost on their own, has made the final payment on construction costs and, to the everlasting credit of the city fathers, no additional tax levy was necesssary for the project.

It was my great privilege and honor to participate in the dedication and open house ceremonies this past Saturday—one of those heart-warming programs that makes you feel confident and encouraged about the future of America. It was a total community effort, including a welcome by Mayor Rodney Hestekin, who also gave a very warm salute to all the past mayors of Wyoming, including a special tribute to former Mayor Robert L. Burg during whose tenure the planning for the building was initiated.

Master of ceremonies Glenna Minogue very thoughtfully and smoothly gave fitting thanks to the numerous individuals and civic organizations who volunteered their labor, funds and craftsmanship to finish off the building and added the equipment and finishing touches not covered by the grant funds. It was complete community involvement, from the Cub Scouts and Brownies to the fire department and their auxiliary, the Snowmobile Club and the Women's Club, the Forest Lake American Legion Post and local Wyoming businessmen, as well as the pastors of the St. Paul Lutheran Church and United Methodist Church who respectively gave the invocation and benediction. The program was evidence of the kind of community effort that has made America great and a very clear indication that community spirit is alive and well particularly in small towns where community pride is strong and growing.

But without a doubt the high point of the afternoon was a magnificent ballad created by 16-year-old Kristen Van Nispen who wrote the lyrics and the music, sang and accompanied herself on the guitar, a history of Wyoming in the tradition of troubadours of old. It's the kind of thing that makes a community feel good about themselves and about their future.

WYOMING

(By Kristen Van Nispen)

There's a dot on the map, with a name attached, and in letters big and bold,
Reads Wyoming, and in 1855 they arrived here tired and cold.
It was ten families from Pennsylvania, that started out traveling West.
And out of all the mountains and the vallies and the lakes, they liked Wyoming the best.
Yes, when they started to settle, they hadn't a church, so they gathered in a one-room shack.
They didn't have an altar and they didn't have a church, they just sat down on an 'ol gunny sack.
Now, they sound like hillbillies just living on the land, but that just wasn't true;
'Cause they wanted to flourish and they wanted to be smart, so they worked and built themselves a school.
In the 1890's when the town was in its bloom, business started to grow.
With a factory of carpets, a potato warehouse the town built its own depot.
With a railroad now, the business really boomed and on the map they drew our dot.
With our name on the map, and our history in the book, Wyoming will never be forgot!
Yes, to much surprise, you can realize, Wyoming has a history, as huge as its blue sky.
And though it's small, many folks recall, its memories that never shall die.

So long as this kind of community action continues to thrive in America, our national spirit will continue vibrant and strong.

NEW YORK'S LAND OF DREAMERS AND DOERS

HON. WILLIAM F. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. WALSH. Mr. Speaker, I would like to call the attention of the Members of the House to an article in the May 1977 edition of National Geographic in which Ethel A. Starbird discusses the auspicious beauty of the Finger Lakes Region of New York State. I have had the pleasure of enjoying this beauty which graces my congressional district all my life and I would like to share this excellent article, Mr. Speaker, with you and my colleagues. Unfortunately, the fabulous photographs taken by Nathan Benn showing some of the history and beauty of this famous and picturesque area cannot be reproduced here.

The copyrighted article follows:

NEW YORK'S LAND OF DREAMERS AND DOERS

(By Ethel A. Starbird)

Leaning on the black box of a carriage that marked him as a Mennonite, Harry Fox told me why he had come to live in that scenic slice of central New York State fondly known as the Finger Lakes.

"This is fine farm country, as good as any in the East. I doubt a man could find pleasanter surroundings for his toil or for raising up a family."

Rachel Malin said much the same things: "The woods offer their shades, and the fields their harvest. . . . this new world. . . . abounds with almost everything we could wish for."

Both settled on fertile slopes above a misshapen wishbone of water called Keuka Lake. But they will never meet. Harry moved in from Lancaster County, Pennsylvania, in 1975; Rachel migrated from Philadelphia almost two hundred years ago.

The similarity of their views is not surprising. For in this large low-census area, change comes more as a whisper than as the turbulent high wind that has toppled traditional life-styles elsewhere. Even the rush for rural real estate, evident in other places, has done little to disturb the status quo.

Not that anyone I met was seriously anti-progress. It's just that Finger Lakers are a pretty conservative lot, not easily convinced that bigger means better or that new notions always suit their needs.

By nature, they're about as free of sharp edges as the countryside they cherish. The Ice Age created its gentle contours some million years ago. Glaciers, grinding away at a plateau already veined with valleys, mounded some sections into whale-shaped hills called drumlins. Then, gouging debris from former riverbeds, the ice dug deep basins for a chain of dazzling lakes.

NONCONFORMISTS FIND FERTILE GROUND

By definition, the Finger Lakes district is a movable feast. Some say it stretches westward from Syracuse to Rochester and south from Lake Ontario to the Pennsylvania line, an area covering 9,000 square miles and 11 slender lakes (map, page 710).

Others claim that only the environs of the six largest lakes—Canadaigua, Keuka, Seneca, Cayuga, Owasco, and Skaneateles—really count. Either way, the region nurtured a remarkable roster of dreamers and doers, introducing to 19th-century America such movements as women's liberation, spiritualism, and the Mormon faith. Here, too, the native grape put spirit in New

York's famous wine industry. And the classes of Cornell and the glass artists of Corning made the local quest for quality known throughout the world.

The north-flowing Finger Lakes divide the district into two distinctive areas, each with its own cultural flavor. New Englanders opened the northern section. The towns they built, especially those along the route of the old Erie Canal, retain a Yankee flavor with their thin-spired churches, tree-shaded streets, and commercial blocks of mellow brick dating from Civil War times.

Most early immigrants brought along their God-fearing, straitlaced ways. But not all hewed to puritanical paths. Some turned the place into a hotbed of reformers, religious zealots, instant prophets, and self-styled mystics. Never have so many in so small an arena claimed so direct a line to the Almighty.

One of the first to stump for new-method salvation was Jemima Wilkinson, a Rhode Islander who said she had "left time"—died—briefly, returning to life with a special mandate to interpret God's will on earth. In 1792 her followers funded a New Jerusalem not far from Keuka's shores, where she parlayed her powers of persuasion into a personal fiefdom of more than 23,000 acres.

Joseph and Rena Florance now own the handsome hilltop house Jemima's devoted disciples built for her and staffed with hand maidens committed to her comfort.

"She called herself the 'Publick Universal Friend,'" Joe said, "and the story spread that she had only to say, 'The Friend hath need of these,' to part members of her sect from whatever struck her fancy."

Rena pointed to a stair landing above the center hall. "That was her pulpit. She'd appear up there in a flowing purple robe over a shirt and cravat. Being heaven-sent, she put herself above mere matters of gender."

Neither her estate nor her cult long survived the spellbinding spinster after she left time with a one-way ticket in 1819.

PREJUDICE MELLOWS INTO PRIDE

Four years later a gangling farm youth from Palmyra testified that he had—with divine guidance—discovered inside nearby Hill Cumorah ancient gold tablets telling of a lost American civilization that knew Christ after His Resurrection.

The young man's story attracted more irate detractors than believers, so Joseph Smith and his followers, including a chairmaker named Brigham Young, were forced to migrate westward. But the faith Smith started—the Church of Jesus Christ of Latter-day Saints—fared far better than that of the Jemimakins.

"Local prejudice lasted a long time," I heard from Edythe Boyd. "It was still evident in 1930, when I converted. As a 16-year-old, I was ridiculed by my classmates and denied friendships because of my convictions."

Attitudes have softened since: The Mormon community around Palmyra now exceeds 500 members. And every July at Hill Cumorah more than a hundred thousand people of diverse faiths applaud a spectacular reenactment of the Smith experience.

With all its pageantry and pilgrims, Palmyra no longer knows the bustle of earlier times, when its tidy main street throbbed with the trade conveyed by the Erie Canal. Nowadays little traffic passes along the still-working sections of that once vital waterway or newer links that, together, form the New York State Barge Canal System.

"Railroads were siphoning off canal business back in the 1840's. Now trucking and pipelines are killing the trains." Peter Swider, 45-year-old skipper of the *Morania #6*, shoehonored 295 linear feet of tug and barge into the concrete cradle of Lock 25 at Mays Point.

As the barge rose, "Poughkeepsie Joe" Kopser checked the temperature of its cargo: 450,000 gallons of hot asphalt destined for Lyons, 20 miles farther west. Pete relaxed on his swivel stool. "There's many miles of roadway in those holds, enough to fill a whole train of tank cars. So here we are, paving the way for our own obsolescence."

IRON HORSE OUTPULLS MULES

The battle between wheel and keel dates from 1825, when the 363-mile Erie "ditch" opened between Albany and Buffalo. Turnpike service soon bowed to boat and barge, and goods flowed to markets all but inaccessible before. But in a few decades the iron horse was outdrawing towpath mules, and the canalboat era plodded to a close.

To coming of trains stimulated growth of lake-end communities like Skaneateles, an appealing 19th-century village undiluted by serious updating. Marvelous old houses of great dignity and size attest to fortunes made from typewriters and teasels, a thistle-like plant once used to process wool.

Piloting one of the last of the lakes' mail boats, Phil Peterson filled time between dock-end deliveries with lively commentary on the Skaneateles scene. "If you found property for sale along here, it might cost you $150 a front foot. Two hundred years ago much of this Finger Lakes land was being given away—free tracts to veterans of New York's Revolutionary War regiments. Many who took them sold their holdings, sight unseen, to speculators for a few cents an acre."

Land deals and legal fees fattened the bank accounts of many early residents of Auburn, sited beside the outlet of lovely little Owasco Lake. Now a city of 36,000, it counts as major employers the world's largest ropemakers, a Japanese-owned steel mill, and a state prison that's been doing a steady, year-round business since 1817.

Cayuga Indians built their ceremonial longhouses here some four hundred years ago. They joined the Senecas, Onondagas, Oneidas, and Mohawks in the Iroquois federation, which functioned as an effective, representative government in "upstate" New York long before colonists settled on a similar association for their new nation.

Silver-haired and sixtyish, Adelphena Logan is both a product and promoter of Iroquois culture. "We know who we are and what our heritage is all about; it's the outsider who misrepresents us. For example, Hiawatha, an Onondaga like me, lived up near Syracuse, not Lake Superior where Longfellow poetically placed him. He was a real-life leader of our people who helped put together the federation and made it work.

"Which it did, keeping things pretty peaceful around here until 1779, when Gen. John Sullivan's Continental troops burned their way cross-country, driving away most of the Indian population for siding with the British during the Revolution."

If the Iroquois had been around Seneca Falls in 1848, they might well have wondered what the first national convention for women's rights was all about. Their women always had the upper hand in tribal affairs, choosing chiefs and demoting unsatisfactory ones.

STRONG WOMEN MAKE THEIR MARK

Looking somewhat like a small-scale Auburn, Seneca Falls straddles the old Genesee Trail near the foot of Cayuga Lake. Much of the original momentum for equal rights was sparked by two local ladies: Elizabeth Cady Stanton and Amelia Jenks Bloomer, whose name is better remembered for the baggy pants she wore than as a symbol of feminine freedom.

Archenemies of that old demon rum, both campaigned vigorously but in vain to have drunkenness declared grounds for divorce. "I guess it doesn't pay to be too civilized," Adelphena said with a grin. "My people settled that issue centuries ago. Any woman could banish her boozing brave from the longhouse, and it didn't take a court order."

From Amelia to Adelphena, Finger Lakes womanhood has provided an astonishing assortment of "movers and shakers." Among them: Margaret and Kate Fox from the hamlet of Hydesville, north of the canal town of Newark, who launched a lasting phenomenon with a bit of fancy footwork.

In 1848 the sisters began having rap-tap conversations with the dead. They were soon on tour, holding public seances that convinced thousands of their supernatural power. Forty years later they admitted hoaxing the whole show, cracking their toe joints to simulate messages from the beyond, though Margaret later recanted. By then, spiritualism, having attracted such notables as Horace Greeley and William Cullen Bryant, was here to stay.

The original Fox house is gone, but in its place stands a replica built by its owner on an inner compulsion he can only describe as a "calling." Rain blackened its unpainted clapboards as I awaited an answer to my knock.

A sepulchral voice inside asked my name and business. I replied. "Are you young?" came the next question.

"No. But why do you ask?"

I found out after 79-year-old John Drummond admitted me to a room casually arranged around some Maxfield Parrish prints, two antique dolls in a high chair, an Edison talking machine, and a fired-up Franklin stove.

"Don't you know? Why, when a man is past his passion and marries a young maiden of virtue, their offspring will be prophets." He gave no indication that I was the answer to his prophet-sharing plans.

John is convinced that death, as we know it, would disappear if everyone followed his rather mystical formula for biological readjustment. He shuns those who communicate with the "underworld" and says he has twice been visited by a heavenly apparition. The Fox sisters couldn't have left *their* spirits in better hands.

As I drove east along the barge canal, downpours stained the rich soil the color of Dutch chocolate. Around Savannah, muck farmers dip bumper crops of potatoes from silt-filled fields beside the Seneca River. Swinging sothwestward toward Phelps, I saw ten-pound cabbages the size of cannonballs. They feed area canneries that make this—some say—the "sauerkraut capital of the world."

By July, when redwing blackbirds perch like finials on the fence posts, highly cultivated midlands between Phelps and Penn Yan yield all the makings of minestrone—by the acre. One farmwife I met also plants almost as many sunflowers as garden seeds because "It's nice to watch something grow I don't have to can, pickle, or freeze."

To the east of Phelps, the trim and timeless city of Geneva crooks its quiet streets and pre-Victorian houses around the northwest corner of Seneca Lake. The community appears little changed since 1849, when Elizabeth Blackwell received from Geneva (now Hobart) College the first medical degree ever awarded in this country to a woman.

ADDING PUNCH TO THE TEAROOM

Cornelius "Geneva Red" Dwyer has handled thousands of cases in his long, Runyonesque career, but none had to do with doctoring.

"Started with a speakeasy up in Lyons, where I was born. With Prohibition, running ale across from Canada cost $4.50 a case. Sold it for $18." The courtly 86-year-old chuckled over the memory as we dined at Belhurst Castle, a delightful rococo restaurant he owned for more than forty years.

"Hard stuff came from Bimini via Miami under a carload of grapefruit. Nope, the police never bothered me; I was a constable at the time. Course, there might have been a ruckus if anyone had caught me dumping all that excess grapefruit in the woods.

"This was a tearoom when I bought it. I livened up the beverage list a bit, put in slots and a casino, and ran it like a private club. No mobster ever muscled me; I've never done time and paid only one fine—for $100. So now it's legal to drink most anywhere, and it's the governments that used to hassle me and my cronies that have gone into big-time gambling. A really weird world."

Still erect and sure of step, Red wears his years as lightly as many senior citizens of the Finger Lakes. I was the only one to show surprise when 87-year-old Florence Stinson entertained the Crystal Valley Grange in Dundee with a series of pushups.

And I've never seen a bouncier bunch than the Yates County Kitchen Band. At a concert in Penn Yan's Red Jacket Park, members played their kazoos, washboards, and laundry tubs with enough gusto to please a Sousa. Average age: just over 76. "Lucille hates to miss these performances," said one octogenarian of another, "but the battery on her pacemaker was running low."

Westernmost of the larger lakes, Canandaigua ends where a same-name city of considerable age and appeal begins. Here Stephen A. Douglas trained for the law and suffragette Susan B. Anthony was sentenced for breaking it by voting before women won the franchise.

Al Perrin's attachment to the lake is so strong that he located his modest auto repair shop on the public pier, where he can cast for trout a few feet from his doorway.

Several years ago this boyish, 45-year-old bachelor achieved a certain amount of fame by inspiring a lighthearted song by his good friends Erik Darling and Patricia Street. Darling, a fellow Canandaiguan, also helped write such top-rated tunes as "Walk Right In" and "Banana Boat Song."

"Erik called my song 'Al Perrin, at the End of the Month,' because that's when I pack my camper, borrow his canoe, and take off in January for the Florida Keys. Got the record out at my place if you'd care to hear it."

Driving along the west shore, Al pointed to a cluster of houses away from the water. "That's Perrinville: My parents, sister, and most of my seven brothers live there. But I decided I ought to get away from home." We stopped at his rented bungalow half a mile down the road.

NOWHERE ELSE IS REALLY HOME

The song's lyrics make quite a case for Al's carefree Florida life. Why not make the change permanent? "You're looking at one good reason." He nodded toward the picture window. None of the many waterscapes on his wall matched that view: Hills fell in gentle folds into a lavender lake; a flaming afterglow garnished their ridgetops.

A lot of Finger Lakers do a lot of traveling; some even know foreign shores better than those only a lake away. But no one I talked with wanted to live elsewhere. "Try calling a February reunion of Finger Lakers in Florida, though," said one old-timer, "and you're going to need the Orange Bowl to hold them all."

South of Canandaigua, an imaginary east-west line passing through Penn Yan separates the northern counties from the southern ones, largely pioneered by Pennsylvanians. At this latitude the New England look has faded, and the landscape begins to rise and fall with greater variations.

Along the shores of Keuka, of southern Canandaigua and Seneca, vacationists vie with vineyards for control of the gentler slopes. While campers seem to have won the waterfront, growers for wineries like Taylor, Pleasant Valley, Gold Seal, Bully Hill, and Widmer hold firm beyond the beaches.

The fruity, or foxy, flavor of wine from New York grapes is not for everyone, and there are strong and conflicting opinions on how local viticulture should be changed to meet a change in tastes. However, native strains like Delawares, Niagaras, and Concords (the principal source of kosher wines) still dominate the industry.

Despite the ever increasing popularity of California wines, New York vintners are better off today than during Prohibition, when all grape squeezings went into jellies and juice. If a few gallons turned into something stronger, it surely wasn't wily Will Widmer's fault. He posted a warning on casks of grape concentrate that its reconstitution without refrigeration might cause it "to ferment."

Hammondsport's Pleasant Valley Wine Company has operated since 1861 under the first bonded winery license issued in the United States. Fifty years later a homegrown hero with Tom Swift tendencies received the nation's first license to fly.

. Born in 1878, Glenn Hammond Curtiss was in a hurry most of his life. From sail skating and bicycle racing, he graduated to setting speed records on motorcycles he built in his Hammondsport shop. One of his motorcycle engines powered an airship in 1904; those famous World War I JN trainers called Jennies were Curt'ss creations.

In 1907 Curtiss became associated with Alexander Graham Bell and a select group of air-minded associates in experiments. The next year at Hamondsport, the shy genius, not yet 30, lifted their joint-venture *June Bug* off a Pleasant Valley meadow in the world's first pre-announced flight of a kilometer or better He actually flew more than a mile.

TINKER TOY SPECIAL FLIES AGAIN

"We hadn't planned on duplicating that feat," said Mercury Aircraft President Joseph Meade, Jr., from the pilot's seat of an identical biplane. "Our idea was to build a static facsimile of the original as a Bicentennial project. But our volunteers got carried away."

Working from photos and rough drawings, his ten-man production team remained true to the Curtiss concept; the results look as if elves of little aptitude got loose in the Tinker Toys (left). This second *Bug* flew fine, though tiny ailerons and absence of brakes—as with the original—made landing tricky. But nobody tampers with history in Hammondsport, not even for safety's sake.

At the head of nearby Seneca Lake, Watkins Glen has emulated Curtiss in turning speed into an economic asset. On a hilltop near town, a 3.37-mile track with 11 challenging curves attracts the world's driving elite to three major meets a year. October's main event, the Grand Prix of the United States, offers one of the largest purses in road racing—$350,000—for a test of skill and endurance that lasts almost two hundred miles.

Watkins's 3,000 residents take this annual invasion of some 100,000 spectators in stride, for the race has been an off-season bonanza ever since it was first held in 1948.

"It started out for amateurs only, run on regular roads in and around the village," said Malcolm Currie, executive director of the Watkins Glen Grand Prix Corporation. "Entries in those days included such notables as yachtsman Briggs Cunningham, *New Yorker* cartoonist Charles Addams, entertainer Dave Garroway. We moved to the present course in '56, went professional two years later. We got the Grand Prix because we were ready with the right track at the right time."

Today, Formula One-class "big wheels" are as familiar to Watkins folks as the markings on a trout. And their little hometown, tucked in a back pocket of Finger Lakes country, is as familar in Grand Prix circles as Monaco, Buenos Aires, Johannesburg, and other famous cities on a 16-nation circuit.

DIVERSITY MARKS CORNELL'S CURRICULA

An international reputation of broader scope and influence springs from a lofty bluff overlooking the city of Ithaca and Cayuga, longest of the lakes. Here Ezra Cornell, who made millions with the telegraph, founded a school of academic excellence "where any person can find instruction in any study." Today his university offers 2,000 courses each term, and it becomes ever more difficult to name a spot above, below, or on this earth some Cornellian hasn't staked out for study.

Home base for all this activity is a conglomerate of 11 schools and colleges sprawling across 740 acres of Ithaca uplands. Sampling the Cornell scene, I dined at the student-run Statler of the world's first and foremost hotel school, and glowered back at peregrine falcons being raised at Sapsucker Woods to re-establish this vanishing species in the wild. After creating the image of a fictitious Greek island on a computer-graphics screen, I pedaled the half-mile length of a circular tunnel enclosing the world's largest electron synchrotron.

In such a cerebral environment a collection of human brains came as no surprise. Among the Cornell specimens, most donated by scholars and writers of some note, the largest belonged to a multi-murderer hanged in 1871. So much for overachievers.

At Lansing, north of Ithaca, things also happen "far below Cayuga's waters." "We're now mining 2,000 feet down," said amiable Jack Stull, an official of the Cargill Salt Company. "Some of our old tunnels under the lake go two-thirds of the way across. Actually, most of the Finger Lakes recline on a vast bed of salt."

Dust as dense as fog shrouded the eerie underworld Cargill has created. "It won't hurt you," Jack assured me. "It's salt and soluble. Nobody has sinus trouble down here. What a place for a time capsule: Salt sops up moisture and nothing rusts. Any equipment we leave behind when we exhaust this shaft should still work years from now."

Aboveground I headed for Harris Hill outside Elmira, where sailplaning has been a major sport since 1930 when the first national soaring championships were held here. A meet was in progress; sleek ships, lined up three abreast, awaited their turn for takeoff.

Backpacking a youngster, comely Ellen McMaster tugged on her tennis hat and went loping down the runway, leveling the wings of her husband's plane until it began to lift. Returning to the sidelines, she sank down beside me and two other sons. The boys stair-step in age up to 8.

"I'm better balanced for wing running with thirty pounds of kid aboard. As you see, the supply has been pretty constant. But I don't plan any more replacements." She beamed at her rosy-cheeked brood. "Looks like we'll have to change our style of wing running, or daddy'll have to get himself a new wife."

CORNING: CITY OF ARTISTIC ENDEAVOR

Drifting over the valley in motorless flight, my physicist-pilot, Marshall Hudson, banked to give me a better view of the Chemung River and the two major southern-tier cities it bisects: Corning and Elmira. In 1972 a flood raged through both communities, leaving in its wake a billion-dollar disaster.

"Statistically, it shouldn't have happened," Marshall said as he spiraled lazily in an updraft. "But then, if you put one foot in the oven and one in the freezer, you are—statistically—comfortable."

At Corning, a sudden flood topped river dikes, crippling the major industry—Corning Glass Works and its artistic affiliate, the Steuben Glass factory. But they, like the city, recovered rapidly, improving as they rebuilt.

Mixing sand with imagination, Corning continues—as it has for well over a century—to make glass do things common sense says it can't. Which gives the firm a staggering product line of some 60,000 items.

Greatest crowd-pleasers in the Corning complex are Steuben's "glory hole" gangs. Teamed around fiery, gas-fed furnaces, they

nonchalantly blow, spin, press, and trim gobs of molten crystal into gleaming works of art. One delicately cut design, in limited edition, sells for $7,000; the engraving alone takes more than a month of working hours.

"That's one reason for holding down the 'print run,'" said design coordinator Jack Hultzman, a third-generation glassmaker. "An engraver would climb the wall if he had to do the same design over and over again."

His educated eye picked out an almost invisible imperfection in a three-hundred-dollar vase of superb sparkle and simplicity. I thought about buying it at a markdown; none of my friends would notice the flaw.

"Smash it!" Jack ordered, and my hopes shattered with the glass. Steuben is as likely to let a "second" slip into circulation as Tiffany's is to put in a notions counter.

BATTERED CITY GETS BACK ON ITS FEET

Twenty miles to the southeast, Elmira still dreams of the comeback Corning has already made. Here population drops as employment opportunities decline. Bare patches, left by high water and wrecking crews, give the downtown section a dreary, threadbare look that tends to eclipse significant improvements already made and others in progress.

Stanley J. Douglas, a county legislator and effervescent Elmira booster, speaks with optimism about the future. "Without the flood we'd still be talking urban renewal instead of doing it. Sure, we took an awful beating, but we also took a ten-year leap forward in the process. So what's another ten years if the job's done right. We needed more vitality here, more things going on, a more attractive city. And that's what we intend to have."

Elmira will probably fulfill Stan's expectations; people around the Finger Lakes don't discourage easily. For some seventy years, Skaneateles farmers made a big thing out of teasel growing, selling the prickly plants to raise the nap on woolen cloth. Ever since the bottom fell out of the market in the late '30's, one determined villager has been trying to find another use for teasels.

"Might make a back scratcher," he suggested. I tried one and itched for a week. If he doesn't solve the problem, some other Finger Laker may. After all, they figured out that the weed would thrive here in the first place.

JAMES F. BAER HONORED

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. YOUNG of Missouri. Mr. Speaker, the people of St. Louis County have good reason to be proud of James F. Baer, an outstanding Vietnam veteran who led a drive to raise thousands of dollars to help a young man paralyzed from the neck down.

Jim Baer who is sports editor of the St. Louis Suburban Newspapers, Inc., served his country well during the Vietnam conflict and has gone on to serve his community.

After graduating from the University of Missouri-Columbia, Jim entered the Navy in 1967 and worked as a Navy journalist for the next 4 years. He wrote copy for broadcast stations on Johnson Island and then edited the newspaper and magazine and ran the public affairs office on the U.S.S. *Intrepid*.

Last year, Jim found out about 19-year-old Bill Davis, a former football letterman who had been injured in a touch football game in south St. Louis. Bill Davis was paralyzed from the neck down, with little hope of improving his condition.

But Jim Baer was determined to help raise funds that might give Davis some hope of rehabilitation. In a series of newspaper articles and by organizing a fundraising drive, Jim Baer helped raise more than $63,000 from the generous people of the St. Louis area to buy needed equipment for Davis and to send him to a rehabilitation center.

In recognition of his efforts, I presented Jim Baer with an award this month as the outstanding Vietnam-era veteran in my district. The competition was sponsored by the "No Greater Love" organization, which has honored outstanding veterans across the country. After the outstanding veterans in each State are chosen, 10 national finalists will be flown to Washington, D.C., to receive top awards.

We need more men like Jim Baer, and I commend the "No Greater Love" group for its efforts in giving well-deserved recognition to them.

BACKBONE NEEDED ON AFRICA

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. CRANE. Mr. Speaker, on April 13, 1977, the Washington Star printed an article by Mr. Carl T. Rowan entitled "Backbone Needed on Africa." I found Mr. Rowan's evaluation and criticism of the U.S. attitude toward Africa precise and thought provoking. A "Vietnam-blind" America has, in fact, isolated itself into believing that anything more than distant observation would be tantamount to imperialism and that "emergent" African nations will become stable in the process of replacing past realities of colonial Africa through a sense of "nationhood." But Africa is fertile, manipulable soil for Soviet intervention. A persistent and highly visible Soviet presence in Africa is assumed to be stabilizing and legitimate, according to our U.N. Ambassador. The truth of the matter is that passive acceptance of the Soviet threat to isolate the West and the United States from the Third World, its resources, and its markets, encourages the Soviets to create further instability in Africa. We must not and can not continue to ignore the Soviet presence in Africa in the hopes that they, too, will become isolationists.

The article follows:

[From the Washington Star, April 13, 1977]

BACKBONE NEEDED ON AFRICA

(By Carl T. Rowan)

A few days ago, when Soviet President Podgorny and Cuban President Castro were leaving Africa, an African diplomat went to the State Department and asked:

"What are you Americans going to do to stop the Russians in Africa?"

This very same diplomat in previous years had twitted and scolded Americans for "always reacting to the Russians."

His State Department visit was ironic evidence that the Africans have become aware of something that Vietnam-blind Americans are slow to see: the Soviets are moving vigorously all over Africa to exploit every possible conflict while the U.S. is mesmerized by fears of "another Vietnam."

The Russians are scoring substantial successes by giving Africans, not the food, medicine, schooling that they need, but only arms with which to kill each other.

What the Soviet Union did in Angola, with the help of Cuban troops, is now known to all the world. But few Americans seem to understand that the Russians have made inroads in Somalia by providing 76 MIG fighters, rockets, tanks and other weapons; that the Soviet Union helps keep Idi Amin in power in Uganda by providing him with at least 50 MIGs and by replacing the planes and other armaments which were destroyed in the Israeli raid on Entebee; that, again using arms as a diplomatic tool, the Soviets took away the heavy influence that the People's Republic of China had in Mozambique, and the Russians are now making a move on Ethiopia.

And, of course, the Soviets have provided arms to Cuban-trained rebels who are trying to capture the copper-rich Katangan area (Shaba province) of Zaire.

The Soviet Union has always regarded Zaire as strategic. In 1961 the first "crisis" I got enmeshed in as a new State Department official was the effort of Moise Tshombe and his Katanga buddies to secede from Zaire, then called the Congo.

Ironically, the forces now trying to grab Katanga with Soviet and Cuban support were the darlings of U.S. conservatives and Belgian mining interests in the early 1960s. The only thing that remains constant is that the Soviet Union is there, encouraging warfare, dismemberment and economic chaos for Zaire, hoping to pick up the pieces and fit together a colossal Soviet beachhead in the heart of black Africa.

Zambia's President Kenneth Kaunda has told U.S. officials that he is deeply upset over the prospect of further Soviet encroachment into Africa. Nigeria, Africa's most populous country, is also concerned, for Nigerians know that the territorial integrity of African countries is at stake. Nigerians fought a civil war to prevent the secession of Biafra, so they and other Africans do not look kindly on efforts to rip the richest part of Zaire away.

Nigerian officials have been running from Lagos to Kinshasa to Luanda, carrying on a traditional African "palaver" to try to halt the fighting in Zaire. Moroccan officials have become concerned enough to send troops to help President Mobutu Sene Seko's Kinshasa government to beat back the rebels.

Meanwhile, the U.S. just licks the scars of Vietnam and watches in virtual impotence as the Soviets operate. U.S. officials remember that when Kenya realized her not-too-friendly neighbors, Somalia and Uganda, were loaded with MIGs and other Soviet arms, the Kenyans cried, "Help!" The U.S. agreed to sell Kenya a dozen F-5 fighters, and even this produced howls of disapproval in the Congress and from the new isolationists.

To learn a bitter lesson in Indochina is one thing. But to crawl from over-involvement in Asia to timid impotence everywhere is something else. We can do a lot to keep the Soviets from cheap triumphs in Africa without "wading into another Vietnam."

REPEAL OF OSHA

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. SYMMS. Mr. Speaker, I have but another example of the widespread har-

assment by OSHA's rampant power. In an article appearing in the Tulsa Daily World last week, the president of the Oklahoma Farm Bureau stated that the proposed health standards for cotton dust could force the closing of a number of cotton gins in Oklahoma. He further stated that the industry standard of 200 micrograms of cotton dust per cubic meter of air "is neither technologically nor economically feasible for cotton gins to meet."

As you may already know, I have introduced legislation to stop this flagrant interference on the part of the Occupational Safety and Health Administration. H.R. 1348 seeks a repeal of the Occupational Safety and Health Administration Act of 1970 on the grounds that the act does not fall within the responsibilities assigned by our Constitution to the Federal Government.

The bill has received wide support from American farmers. In fact, at the 58th annual meeting of the American Farm Bureau Federation, its members gave H.R. 1348 their full support. Furthermore, the U.S. Supreme Court has agreed to hear the case of an Idaho man and the problems OSHA has made for him. As a result, OSHA's responsibilities and jurisdiction are being questioned.

I urge my colleagues in the House to investigate and become knowledgeable over the problems OSHA is creating. The list of its arbitrary standards that have had adverse effects on our Nation's economy grows daily. I believe it is high time Congress does something about this interference.

The article follows:

OSHA RULES THREATEN GINS

OKLAHOMA CITY.—Proposed health standards for cotton dust could force the closing of a number of cotton gins in Oklahoma, the president of the Oklahoma Farm Bureau has told the Occupational Safety and Health Administration (OSHA).

Jim Lockett, an Osage County rancher, said the proposed industry-wide standard of 200 micrograms of cotton dust per cubic meter of air in all industry operations except harvesting "is neither technologically nor economically feasible for cotton gins to meet."

"We view these proposed standards with alarm," Lockett said. "Similar standards in other industries have had disastrous effects. As an example, the Mine Safety Act and the EPA regulations closed 22 per cent of the coal mines of the nation in 1970—at the very time we needed more production of coal."

"Cotton gins are an integral part of Oklahoma's agricultural production process. The best available technology for reducing dust levels in cotton gins would cost the industry more than $580 million, according to engineers. This figures out at approximately $180,000 per gin," Lockett said.

Most cotton gins in Oklahoma couldn't afford an expenditure of that size, he said, and "would simply have to close down their operations."

Lockett also said that even though some medical people feel that cotton dust is a contributing factor of byssinosis, a respiratory disease, no case of byssinosis has ever been diagnosed as a result of exposure to cotton gin dust.

"The standard shouldn't even apply to cotton gins since it has not been determined that the actual health hazard exists.

"The list of arbitrary government standards that have had adverse impact on our nation's economy grows daily," Lockett said in his statement to OSHA. "We suggest there must be additional research on the cause of byssinosis before such sweeping changes are ordered.

"At this time, we recommend the proposed cotton industry standards be withdrawn."

U.S. SUPPORTERS OF IRANIAN TERRORISTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. McDONALD. Mr. Speaker, in recent months the Iranian Student Association, ISA, has received considerable favorable publicity in the mass media for its claims of "persecution" for "merely opposing the Shah." For example, Jack Anderson whitewashed the ISA as a "dissident student group" which is as accurate as describing the Symbionese Liberation Army/New World Liberation Front as being a prison reform organization.

As I have documented previously—CONGRESSIONAL RECORD, May 22, 1975 and October 20, 1975—from the ISA's own materials, the Iranian Students Association is the U.S. branch of the Confederation of Iranian Students, National Union, active throughout Europe, which is fanatically Maoist in ideology with elements of Islamic extremism as well. ISA and the CISNU are support groups for several Maoist terrorist groups operating in Iran.

On August 28, 1976, three U.S. citizens were gunned down in Teheran by terrorists. They were civilians employed by Rockwell International which has a contract with the Iranian Government. The previous year, two U.S. Air Force officers were murdered by terrorists in Teheran. In both cases, when Iranian authorities tracked down the terrorists, they were discovered to have connections with the overseas Iranian Students groups.

In November 1976, evidence of the Iranian Students group's involvement in international terrorism developed when the Reza Rezai Movement, named for an Iranian terrorist leader killed in 1973, took credit for the attempted assassination of an Iranian Embassy official in Paris. Two CISNU leaders have been charged with the attempted murder; one of them, Nader Oskoui, had been studying in the United States and was active with the ISA.

The Iranian Students Association has compiled a record in several U.S. cities as militant "cop-fighters." In San Francisco, the terrorist Red Guerrilla Family, RGF, in an expression of "proletarian internationalism" bombed the Iranian consular offices which have been the target for numerous ISA demonstrations and attempted takeovers.

In March, on the CBS "60 Minutes" program, the Chicago police were accused of "spying" on the ISA. According to the Chicago Daily News, March 7, 1977, a deputy police superintendent named Michael Spiotto denied any interest in the Iranian Students Association saying the police "Would not have any reason to have any interest in this group." What Spiotto was saying, in fact, is that Chicago law enforcement authorities have no interest in protecting the citizens of Chicago from street disturbances, no interest in protecting foreign consular property, no interest in protecting Iranian officials who visit Chicago, and no interest in monitoring the local activities of an internationally active terrorist support group which is apparently directly involved in terrorism itself.

An excellent article on support for Iranian terrorists in this country appeared in the April 22 edition of the Information Digest, a newsletter on security and terrorist matters, which I commend to my colleagues, with the comment that the ISA would be a worthy subject for a full investigation by a reconstituted House Committee on Internal Security.

The article follows:

IRANIAN TERRORIST SUPPORT

The "human rights" issue is being manipulated by a number of Marxist-Leninist groups in order to gain support for revolutionary armed struggle against several pro-U.S. governments with varying ratios of authoritarianism and civil liberties. One of the chief targets of the human rights advocates is Iran, an oil-producing, strategic key to the Middle East which has a two thousand mile border with the Soviet Union on its north and east, and borders Soviet-allied Iraq on the west.

The Iranian Students Association (ISA) is the principal U.S. organiaztion supporting armed struggle in Iran. The LSA is the U.S. branch of the World Confederation of Iranian Students (National Union) (CISNU) based in West Germany and with chapters in several European countries. The ISA and its parent group have vocally and physically supported terrorism both in Iran and against Iranians abroad. In November 1976 the CISNU apparently became involved in acts of transnational terrorism. On 11/2/76 an Iranian diplomat was shot and wounded in Paris. Responsibility for the shooting was claimed by the International Brigades which had in 1975 assassinated the Turkish consul general and in 1976 murdered the Venezuelan ambassador. French police arrested CISNU leaders Reza Takbiri and Nader Oskoui and charged them with the attempted assassination. Four other CISNU leaders were deported from France to Sweden. Oskoui had been studying in the U.S.

In response to the arrests, ISA held a violent demonstration at the French consulate in Houston in which 91 ISA members were arrested.

In December 1976, ISA and the closely associated Revolutionary Organization of the Tudeh [masses] Party [a Maiost terrorist split from the pro-Moscow Tudeh Party of Iran] issued statements condemning the deaths in shootouts with Iranian security forces of 8 "revolutionary patriots" and the arrests of 12 others. One of those killed in the fighting was Parviz Vaez Zadeh, a member of the ROTP Central Committee. In a leaflet headed "8 Patriots Murdered * * * Condemn Shah's Fascism in Iran," ISA stated that Vaez Zadeh "had been an active member of the * * * CISNU" who had "continued and further promoted the struggle upon returning home * * *. Vaez Zadeh was the fourth ex-member of CISNU to be murdered this year under torture or by the Shah's troops."

The ISA also noted that "Safaii, Boroumand and Soleimani, all ex-members and ac-

tivists of CISNU continuing revolutionary struggle inside Iran, were captured and tortured to death last April (1976)." However a press release from the U.S. branch of the Iranian Maoist Revolutionary Organization of the Tudeh Party, which states its address as A.B.P., P.O. Box 40063, Palisades Station, Washington, D.C. 20016, noted the three were killed in a gun battle, that Khosro Saffaii was a member of the ROTP Central Committee, and that the other two were "comrades of our organization."

With chapters in New York City, Baltimore-Washington, Chicago, Houston, and the Bay Area of California, ISA publishes a newsletter, Resistance, from P.O. Box A3575, Chicago, IL 60690; and operates an ISA Defense Fund at P.O. Box 4000F, Berkeley, CA 94704. ISA has its New York offices at 2 W. 31st Street, Room 200, New York, NY 10001 (212/560-9189).

ISA has received considerable attention in the press and on the 60 Minutes program of 3-6-77 for its claims of harassment in the U.S. by the Iranian intelligence agency, SAVAK (Sazemani Etlaat Va Ammniat Keshrar—State Security and Information Organization). In an interview with Mike Wallace on CBS-TV's "60 Minutes" last fall, the Shah of Iran candidly stated that SAVAK was to "check up on anybody who becomes affiliated with circles, organizations hostile to my country."

ISA has proceeded to claim that the police departments of most of the cities where ISA has chapters and has conducted sometimes violent demonstrations are "agents of SAVAK." According to the 3-6-77 "60 Minutes" production, Chicago police "spied" on ISA, an allegation then denied by First Deputy Police Superintendent Michael Spiotto who was quoted by the press as stating Chicago law enforcement "would not have any reason to have any interest in this group."

Certainly those concerned with the operation of an internationally active revolutionary Marxist-Leninist terrorist-support organization composed principally of foreign nationals in the U.S. have great reason to have an interest in the ISA.

In the aftermath of its ideological split in 1974, the ISA maintains the Maoist orientation of its favored ROTP. However, Peking's recent support of the Shah of Iran as a counter to Soviet expansion into the Indian Ocean and Middle East has undercut ISA to some extent. However it is using the "human rights" issue to maintain high public visibility.

ISA works closely with the Revolutionary Communist Party (RCP), but also accepts support from the independent Trotskyite Workers World Party (WWP) and its Youth Against War and Fascism (YAWF) cadre. On 2-15-77, ISA and the Revolutionary Student Brigade (RSB), the youth group of the RCP, staged a sit-in at the Statue of Liberty demanding that the ISA members arrested in Houston not be deported. It has cosponsored a number of demonstrations with other "third world liberation movements" such as the Eritreans for Liberation, the Organization of Arab Students, and the Organization of terrorism in February 1977.

ISA demonstrated its continuing support of the Washington-Baltimore ISA chapter and YAWF celebrated the Siahkol Night (2-8-71), the "Anniversary of the launching of the armed struggle in Iran * * * under the leadership of the Organization of Iranian People's Fedayee Guerrillas (OIPFG) and the Organization of Mujahedeen of the People of Iran (OMPI)," territorist derivatives from ROTP.

The ISA has maintained a feud with the Iranian Trotskyists whom it expelled from ISA some four years ago, and who work through the Committee for Artistic and Intellectual Freedom in Iran (CAIFI), a front of the Socialist Workers Party (SWP). CAIFI is headquartered at room 414, 853 Broadway, New York, N.Y. 10003, which is a part of the suite of offices which forms the headquarters of the New York SWP.

CAIFI developed out of the SWP's effort to prevent the deportation of one of its members in 1972-73, Babak Zahraie. When Zahraie and his supporters were expelled from ISA, CAIFI became the SWP's principal Iranian support vehicle. Chairman of CAIFI is Reza Baraheni who was detained by Iranian authorities for 102 days in 1973, then released.

As customary, the SWP had a workshop on defending "Iranian Political Prisoners" at its 1976 national convention led by John Benson, for several years the SWP's representative at the Fourth International's Brussels headquarters and a member of the National Committee. Two Iranians, "Ahmed" and "Cyrus," vote with the SWP's faction on the International Executive.

Some of CAIFI's campus meetings have been disrupted by Maoist ISA activists charging that Baraheni is an "agent of SAVAK." During his 1977 speaking tour for CAIFI, Baraheni urged his audiences to "work together so that we can create a public opinion that no administration overlooking the human rights of the people will be able to disregard."

CAIFI has particularly targeted research and other academic contracts between various U.S. universities and Iran's National University and government. Among the many recent CAIFI panels on "Political Repression in Iran" have been:

February 17, 1977—panel at the University of Pennsylvania, Philadelphia; cosponsored by Amnesty International's Philadelphia chapter, the Iranian Student Society (ISS), and the National Black Feminist Society. Panelists included Baraheni; Clare Fraenzl, an SWP member who is vice president of liaison of the Philadelphia chapter of the National Organization for Women; and Penn professors Sonia Sanchez and Norman Glickman.

April 12, 1977—George Washington University, Washington, D.C. Panelists included Baraheni; Bahram Atai, another CAIFI leader; Livette Echolz; I. F. Stone; and Morton Halperin of the Center for National Security Studies and Campaign to Stop Government Spying.

A principal goal of both the ISA and CAIFI is using the political prisoner issue to persuade Congress to end arms sales to Iran. CAIFI and ISA both use Amnesty International figures claiming 100,000 political prisoners currently incarcerated in Iran. The figure represents one out of every 250 people in Iran—a ratio considered unsupportable in even an advanced economy.

FEDERAL COURTS GIVE HEROIN DEALERS A SHOT IN THE ARM

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. DORNAN. Mr. Speaker, I have recently learned of some frightening statistics on heroin use in our country. Addiction is continuing at epidemic proportions: There are over one-half million full-time addicts at present and nearly 2,000 Americans were killed from overdoses last year alone. My county of Los Angeles leads the Nation in importing this poison.

But more shocking still is the evidence that efforts to stop the flow of heroin into this country are largely ineffective. The flow is too great and the Federal courts do not appear to be supporting with stiff sentences the fine efforts of our overworked drug enforcement officials.

These and other facts are related in the April issue of Reader's Digest in an article entitled "New Kings of Heroin."

The "new kings" are those who have stepped in to fill the void created by the breakup of the infamous French Connection and the temporary cessation of production of heroin in Turkey. The new traffickers were able to establish a new heroin smuggling network in a matter of months after the dismemberment of the French Connection. Their bases of operation—and prime sources of opium—are Mexico and Southeast Asia.

It is clear that America's heroin habit is being fed as easily as ever and is growping with alarming rapidity. But, remarkably, our efforts to eradicate or control this plague are pathetically insufficient. Because of budget cuts, the Internal Revenue Service has diverted to other areas special funds that were to be used in detecting traffickers' illegal profits. Moreover, the so-called privacy statute has severely hampered efforts to investigate illegal profits of suspected offenders.

The problem is here in the United States and it is here that it should be dealt with. Efforts to stop the source have not succeeded. The United States has poured nearly $20 million worth of aircraft and technology into Mexico to help that Government eradicate poppy-fields—but the results have been negligible. As one drug enforcement official was quoted as saying:

We could double the size of this agency, but it would not make that much difference. The problem is here in the United States . . . There are just no effective deterrents for drug traffickers here.

Why are there no effective deterrents? The Reader's Digest article, lays the blame squarely where it belongs: on the Federal courts. The courts—with some distorted notion of protection of criminals—have made a travesty of justice. The few examples listed in the article give some idea of the extent of this travesty: 2,000 arrested drug traffickers in Mexican heroin released by the Phoenix U.S. Magistrate, Richard C. Gromley; a Baltimore judge suspended all but six months of a 15 year sentence of a major trafficker; a heroin dealer who attempted to shoot and then bribe an arresting officer and later pleaded guilty was put on 2 years probation in New York.

Is it any wonder that heroin smugglers are undaunted in their efforts to flood America with heroin? The profits are immense—and virtually tax-free—and the risks are minimal.

Mr. Speaker, so my colleagues may learn of the extent of the growth of heroin use in the last few years and can give some serious thought to who is to blame, I call their attention to the text of the Reader's Digest article:

NEW KINGS OF HEROIN

(By Nathan M. Adams)

At least 1700 Americans died last year from heroin overdose. And the figures have been rising steadily. Indeed, despite the crackdown on Turkish-grown and French-manufactured heroin—largely responsible for the "heroin crisis" in the late '60s and early

'70s—the problem, unless checked, threatens to become worse than ever. In New York City, police estimate that 100,000 addicts inject 120 pounds of heroin into their veins each day. Once limited to the squalid inner cities, heroin abuse has branched out. Nationally, there are more than a half-million full-time addicts, approximately 20 percent of whom support their habits through crime.

Is heroin a permanent habit in American society? Or can it be broken?

As late as 1974, many experts believed that the siege had been ended. Diplomatic pressure had enlisted the support of France, and the mighty "French Connection" was broken. Next, Turkey, the world's largest producer of opium poppies, was persuaded to cease its centuries-old production.* Within months, the supply of heroin on U.S. streets was cut by more than 50 percent in some areas. The battle, claimed Washington, had been won. It was not.

What, then, has happened? "Congress and the American public deluded themselves into thinking that the problem was solved," says Peter Bensinger, director of the Federal Drug Enforcement Administration (DEA). "A temporary void was created. But that void has been filled."

Who are the new traffickers, and how have they managed to take over heroin smuggling in so brief a time? To find out, The Reader's Digest interviewed dozens of narcotics intelligence officials here and abroad. The result is a chilling glimpse into a multi-national chain of organizations whose profits in the United States alone are up to $10 billion. (See box, page 121.) The products? Misery and death.

ROAD FROM DURANGO

There are nearly 25,000 individual opium-poppy crops under cultivation in Mexico. Some cover no more than an acre, where the opium grows hidden among other crops of maize and tomatoes. DEA authorities estimate that there are six separate organizations that control production and smuggling of an estimated ten tons of pure heroin into the United States from Mexico each year. (After this heroin is "cut" and "recut," it grows to 100 tons when it reaches the street, but it has been diluted to ten percent of its original purity.)

The largest single source of Mexican heroin is the Herrera family, of Durango, one of the wildest, most remote states in the country. The Herreras are no strangers to American narcotics agents—they have been in the heroin business for nearly 20 years. And the business has never been better. Today, DEA officials estimate, this single organization controls a major part of the lucrative Chicago market, and is expanding to Boston, New York, Baltimore, Washington, Miami, San Juan and Los Angeles. Its annual profits: $12 million.

What is unique about the Herrera family is the absence of middle men—the Herreras control their product from the poppy fields until it is cut and sold to a "retailer" in Chicago, one step from the street. Thus, most of the profits remain in the family. Agents have identified nearly 300 Herrera relatives now living, legally and illegally, in the United States.

In 1974 and 1975, agents arrested 57 Herrera family members, most on narcotics charges. Last year, in the first six months, 26 more were arrested. "All they do," says one officer, "is send up another cousin or brother-in-law to replace a loss, and it's business as usual."

The top command post for the Herrera family ties some 1500 miles south of Chicago amid the dusty, rutted streets and tin-roof shacks of Victoria de Durango, capital city of the state of Durango. It is said in the smoky cantinas of small Durango towns that the government of Mexico does not own Durango, the Herreras do. Indeed, to ensure the security of the family's business, Carlos Herrera, a key figure in the organization, allegedly has given the governor of Durango an airplane, a villa and a stipend of 500,000 pesos a month (approximately $10,000). Occasionally, police make an arrest. But not often.

The "godfather" of the family is 60-year-old Jaime Herrera, a former police sergeant himself. A distinguished-looking man with iron-gray hair, Herrera watches over the seven laboratories in Durango where the heroin is refined.

Several times each week, in small garages in Durango, Herrera courier automobiles are painstakingly loaded with heroin for the long drive north of the border. The drivers, often paid as much as $5000 for the trip, then ferry the shipment to Chicago, where the heroin will be removed from door panels, spare tires, even drive shafts. Without advance warning, these shipments are all but impossible to stop.

How did the Herreras become so powerful? "Simple," says a Los Angeles DEA agent. "After the French were driven from the business, there was an insufficient supply. The Herreras foresaw this and were ready. With their network of relatives in this country, it was easy."

SECRET SOCIETIES

Southeast Asian sources were also ready. One typical heroin-trafficking network began in the late 1940s in Canton, China. There, behind bolted doors, a dozen or so men met to revive the triad (secret societies) movement of the 1600s, which had plotted to overthrow the hated Manchu Dynasty. The name they adopted was the address they use as headquarters—14. Later, the society called itself 14-K—K as in karat.

In time, the 14-K Society abandoned its original goals for criminal activities, including heroin trafficking. It is based in Hong Kong, and its tentacles today reach from Bangkok, Thailand, and Singapore to Amsterdam, Frankfurt, Seattle, Los Angeles and New York. Worldwide, there may be as many as 8000 hard-core members. And the 14-K Society is not alone; it is but one of a myriad of secret organizations which control the underworld in Chinese communities throughout Asia.

Typically, a shipment of heroin begins its journey in the "Golden Triangle" area of Burma, also known as the Shan Plateau. Harvested by Shan tribesmen, the opium crops are under the protection of private armies—remnants of defeated Nationalist Chinese divisions driven into Burma in 1949. The commander of the largest of these "armies"—the 3rd Division, Chinese Irregular Forces (CIF)—is a former Nationalist general, Li Wen-huan. A heavy-set man, with brooding features, he may well be the biggest single heroin trafficker in all of Asia.

At harvesttime, Shan poppy farmers carry the opium to trading stations operated by Li Wen-huan and barter it for gold trinkets, rice and weapons. At one of these posts, Pan Pi, is a heroin-processing factory capable of producing 220 or more pounds of pure heroin each week. Once refined, the drug is packaged in plastic bags and carried by mules and horses down tortuous jungle trails to the Thai border. Seldom do the border guards intervene—most have been bribed or are outgunned by the caravan's guards.

From northern Thailand, the heroin is shipped south to Bangkok by train, train and, frequently, via Thai army helicopters whose pilots are paid $200 to transport the drug. Within days of its arrival in Bangkok, the heroin, now repackaged into smaller lots, is turned over to couriers recruited by the society in Hong Kong. Recently, these couriers, paid as much as $10,000 per trip, have been non-Orientals, many of them unemployed, deep in gambling debts. One, a Canadian arrested by Danish police last April in Copenhagen, had been smuggling heroin from Bangkok to Europe, Canada and Australia, using a false-bottom golf bag which contained nearly ten pounds of the drug. He confessed that he had smuggled nearly 40 pound of heroin from Bangkok in six months.

What has enabled triad societies to operate largely free of police interference? "Secrecy," explains a DEA intelligence man in Seattle. "When you arrest a member, he does not cooperate." And for good reason. When a member is initiated, he is told that if he breaks his vow of silence, his entire family will be killed. It is not an empty threat.

OUR PROBLEM

Unfortunately, organizations such as 14-K and the Herreras are just the tip of the trafficking iceberg. The DEA reports that 14-K, for example, is one of many secret societies shipping drugs to the United States from Amsterdam and Bangkok. In addition to the Herreras, the DEA has targeted no fewer than 61 traffickers in Mexico, many capable of shipping just as much heroin. In Los Angeles, federal agents have discovered a vast Thai trafficking ring called "The Thai Mafia" which is funneling heroin to and through Southern California from Bangkok.

Meanwhile, in New York City, organized crime has made a decision to regain its share of the heroin business lost to inner-city blacks, say DEA officials. Already, contacts have been made between Carmine Galante family members and Bangkok suppliers like 14-K.

Clearly, America's heroin habit is back—and on the increase. And once again, law-enforcement agencies are unprepared. For example, the DEA has had three administrators in as many years. Agents in the front lines are dispirited, unsure of policy.

In Washington, because of budget cuts, the Internal Revenue Service (IRS) has diverted to other areas special funds that were to be used in detecting traffickers' illegal profits. Even worse, the IRS is now restricted under privacy-act regulations in its probing of illegal profits by suspected offenders. Thus, enforcement efforts against major traffickers can be crippled.

Internationally, the United States has poured nearly $20 million worth of aircraft and technology into Mexico to help the government eradicate poppy fields. But the heroin continues to flow north. "We could double the size of this agency," says a DEA agent in Los Angeles. "But it would not make that much difference. The problem is here in the United States. The addicts are ours—not Mexico's or Thailand's. There are just no effective deterrent for drug traffickers here."

GREEN LIGHT

Why no effective deterrents? Quite simply, the courts have made a travesty of justice. Consider the following:

In early October 1976, the DEA launched a massive nationwide roundup of traffickers in Mexican heroin. More than 2000 arrests were made, 109 in Phoenix, Ariz., alone. There, U.S. Magistrate Richard C. Gormley—who has referred to DEA agents as "night raiders"—released most of those arrested in one 48-member conspiracy, all without bail. Phoenix DEA head Phil Jordan says that, while awaiting trial, a large number returned to the heroin business.

In Baltimore, Md., a major violator was convicted of selling five pounds of heroin and sentenced to 15 years. With no explanation, the judge then suspended all but six months of the sentence. And in New York recently, a heroin dealer first attempted to shoot arresting federal agents, then tried bribery. Indicted on five charges, he pleaded guilty and drew two years' probation.

These cases are but a meager sampling. With such non-existent justice, it is small

*Last year, Turkey resumed opium-poppy production with strict controls.

wonder that the traffic is surging back to pre-1970 levels. Can anything be done? Here are some steps which should be taken at once:

1. Clearly, Congress must clarify the criteria under which major traffickers should be awarded bail. Currently, the federal Bail Reform Act considers only one factor—whether an offender will return for trial. The fact that he will continue trafficking while on bail is ignored. Says U.S. Judge Carl Meucke of Phoenix, known for his tough position on traffickers: "It's up to Congress to provide magistrates and judges with alternative criteria for bail."

2. The DEA—with its three different directors in three years and three different sets of policy—has had little, if any, top-level direction from the White House. The new Administration must make a commitment to stabilize the agency.

3. Generally, U.S. magistrates set bail for federal drug-law violators. Appointed by federal judges, sometimes as a patronage gesture, they should all get special training to recognize and deal more stringently with major traffickers who tend to take advantage of leniency.

Nothing, however, will be effective without a serious commitment by the new Administration to renew the war on heroin. Otherwise, it will be clear that the United States intends to tolerate heroin traffic, addiction and the resulting high incidence of crime. Already, international traffickers have read the signals—and they are all green.

CITIZENS SPEAK OUT AGAINST OSHA

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1977

Mr. HANSEN. Mr. Speaker, for some time now, many citizens have considered the Occupational Safety and Health Act to be an unconstitutional and unwarranted intrusion into their private lives and businesses. In the heat of debate over the constitutional and philosophical issues involved in this controversy, I believe there is a danger of depersonalizing the problems of the small businessman, the farmer, and the individual worker whose business or job is threatened by the excesses of OSHA.

Correspondence has been received from all parts of the Nation on this problem and these messages constitute a poignant reminder of the anger and despair which OSHA has caused. They also demonstrate the determination of the people to fight this ill-conceived and miserably executed plan which threatens the integrity of the free enterprise system and jeopardizes our individual liberty without making any solid contribution to the health and safety of the Nation's work force. Excerpts from the correspondence follows:

THREAT TO FREE ENTERPRISE

You are doing a tremendous job in the fight against OSHA. I support you all the way in doing away with this unrealistic government harassment.

Our safety is not worth losing our freedom. The free enterprise system cannot survive under such laws.

May I congratulate you on your efforts against OSHA. I give you my support in helping rid ourselves of this destroying government agency.

Security is not worth losing our freedom. We and the free enterprise system cannot survive under such laws.

POLICE STATE

If the police state enforcement provisions of this act are allowed to expand too much further, all legitimate business in America will be wallowing so deep in bureaucratic quagmire that our economy will collapse.

Thank you for your courageous stand against the dictatorial tactics of OSHA. . . I would further support outright repeal of this police state bureau.

OSHA VIOLATES CONSTITUTION

Thank you for your patriotism and respect for the Constitution of your native land. . . You have rightly concluded that OSHA's activities violate the basic principles of the Constitution of the United States of America. What OSHA is doing is the kind of thing that has been done in Soviet Russia, Red China and Hitler's Nazi regime.

LACK OF DUE PROCESS

More power to you for your efforts to control OSHA. We have been appalled by the unbridled authority of this organization. It is equalled only by the Bureau of Internal Revenue. The printed rules and regulations of both organizations are equally mind-boggling. Their awesome authority permits bringing an establishment to a grinding halt without due benefit of counsel. This is contrary to the liberty that this country stands for.

We are not being dealt with according to our established system. We have been charged with wrongful acts, tried and found not guilty by judges, but the charges have not been dismissed. We have been accused of wrongful acts but have been denied trials by jury even though the Constitution of our great country guarantees this right.

BLATANT HARASSMENT

We . . . suffered an inspection at the hands of OSHA which lasted eight days of eight hours each and an eighty-three page complaint of citations. While the complaint is being contested and while a pre-trial hearing was pending yesterday, four more OSHA inspectors appeared and they were refused admission pending resolution of the present citations . . .

We protest this action of OSHA as blatant harassment and invasion by the government . . . we have complied with all regulations; however, we are now confronted with additional unnecessary inspections and need your assistance.

OSHA SHOULD BE ABOLISHED

Please accept my sincere thanks for your work opposing the OSHA. Such organizations as this are organized by Congress, probably with the best intentions, but then they are turned loose on their own and the hunger for power is overwhelming and they become corrupted from top to bottom.

I think this outfit ought to be abolished completely and start over again. Personally, I feel no inclination to apply for their protection . . .

BUREAUCRATIC BLACKMAIL

We appreciate hearing of your continued efforts to bring OSHA under some kind of restraint from the continued harassment of business. We are sure OSHA recognizes that their appeal procedures, more often than not, make it cheaper for a company to pay the penalties rather than appeal. This amounts to bureaucratic blackmail!

DANGER TO BUSINESS AND THE NATION

The stories of incredulous stupidity continue to mount concerning the arbitrary, dictatorial antics of the OSHAcrats. They seem to be united in a program of destruction of all business activity . . . If anyone complied completely with the insane regulations exacted by this organization, nine out of ten companies or individuals would go broke.

All America is confused with the way standards are written and the enforcement of the same. It appears that OSHA must be curtailed. It was created in good faith by our U.S. Congress to protect and preserve human life. Instead, like many other agencies, it has created a home for the opportunist to be protected while flexing their muscles to the American people.

If this monster continues to grow and fester, it will tend to crumble the internal mechanism of our nation and will place America in an ideal position for communist take-over.

WORKERS OPPOSE OSHA

Today . . . we were issued our protective "hard hats" . . . the company is in the business of manufacturing mining equipment. And, although we don't like them, we have no choice but to wear them, or suffer termination of our jobs . . . At this point, no one seems to know for sure how to fight OSHA. Everyone feels it is like fighting city hall. But, as I have told many of the men, I may be forced to wear a hard hat to keep my job, but I will never stop fighting OSHA.

. . . the company intends to close one third of their plants because of OSHA and government regulations . . . my bulk plant is one they intend to close . . . I have been with the company for thirty-three years and I'm sixty-one years old. I would certainly like to continue for just a few more years . . .

LEGAL JARGON AND LOBBYISTS

Confusion exists within the OSHA heirarchy . . . which means that the majority of compliance is controlled by legal jargon and lobbyists with disregard for the need for protection of life and health.

As a typical example, at our little factory with less than twenty-five workers, we were fined on several petty accounts:

1. a wastepaper basket without a lid
2. two counts on a small house fan belonging to an elderly lady accountant
3. improper guard
4. fan was not four feet off the floor

OSHA IGNORES FREEDOM OF INFORMATION ACT

The Department of Labor, however, does not feel that the Freedom of Information Act has anthying to do with them. Even though I have requested from the Department of Labor specific documentation pertaining to me and my corporation, I have received a letter, from which I quote as follows:

"The above mentioned records are not furnished to you for the reason that such records are within the category of law enforcement files or law enforcement records compiled by law enforcement policies as defined by 29 CFR Section 70.27 of the Department of Labor Regulations.

"Disclosure of such records to any person could:

1. Interfere with present enforcement proceedings and;
2. Disclose investigative techniques and procedures of the compliance officers of the Department of Labor . . ."

"I did not realize that the Department of Labor had the same type of law enforcement operation as the Gestapo. . . . I think that their refusal to release the type of information is an affront to the Members of Congress

who passed the Freedom of Information Act. Obviously the Department of Labor feels that it cannot be touched by anyone while disrupting private industries."

OTHER REMARKS

My business is a rural gasoline distributorship. It is a good business and I have just completed my twenty-fifth year following my father who began the operation in 1929. The atmosphere I work under these days approaches a bad dream situation. . . . My fear is of the vulnerability that a business such as mine is to the whims of the OSHA, FEA, EPA and only the good Lord knows many more that I'm not aware of . . .

Thanks for your stand against our sometimes mindless bureaucracy. . .. Some people say OSHA is something Stalin could be proud of . . .

And many feel that OSHA is too big to fight. But I keep telling them that if every man felt this way nothing would ever be accomplished. I have vowed that I will fight OSHA as long as God gives me breath. . . .

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, April 26, 1977, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 27

8:00 a.m.

Agriculture, Nutrition, and Forestry

To continue markup of S. 275, to amend and extend through 1982, the Agriculture and Consumer Protection Act of 1973.

322 Russell Building

8:30 a.m.

Commerce, Science, and Transportation.

Science, Technology, and Space Subcommittee

To hold hearings on S. 1069, increasing authorizations for programs under the Toxic Substances Control Act for fiscal years 1978 and 1979; and S. 899, the Toxic Substances Injury Assistance Act.

235 Russell Building

9:00 a.m.

Governmental Affairs

Governmental Efficiency and District of Columbia Subcommittee

To hold hearings on S. 1060, to restate the charter of George Washington University; S. 1061, to allow continued Treasury borrowing by the District of Columbia; S. 1062, to change the fiscal year of the Armory Board; S. 1063, to allow the issuance of revenue bonds by the District of Columbia for the building of university facilities; S. 1101, to terminate the District of Columbia borrowing authority from the Treasury for sewage works; S. 1102 to allow the District of Columbia to enter into interstate compacts; and S. 1103, to allow the States to sue for taxes in the District of Columbia Superior Court.

Until 11:00 a.m. 5302 Dirksen Building

9:30 a.m.

Commerce, Science, and Transportation

Consumer Subcommittee

To hold hearings on S. 403, the proposed National Product Liability Insurance Act.

5110 Dirksen Building

Environment and Public Works

To consider proposed Clean Air Act Amendments, committee budget, Disaster Relief Act amendments, and S. 1279, the Community Emergency Drought Relief Act of 1977.

4200 Dirksen Building

Human Resources

Subcommittee on Labor

To continue hearings on S. 995, to prohibit discrimination based on pregnancy or related medical conditions.

Until noon 4232 Dirksen Building

Veterans' Affairs

To hold hearings on S. 1189, H.R. 3695, H.R. 5027, and H.R. 5029, authorizing funds for grants to States for construction of veterans health care facilities.

Until 12:30 p.m. 318 Russell Building

10:00 a.m.

Appropriations

State, Justice, Commerce, Judiciary Subcommittee

To continue hearings on proposed budget estimates for fiscal year 1978 for the Judiciary.

S-146, Capitol

Appropriations

Transportation Subcommittee

To continue hearings on propcsed budget estimates for fiscal year 1978 for the Urban Mass Transportation Administration.

1224 Dirksen Building

Energy and Natural Resources

To consider pending calendar business.

3110 Dirksen Building

Foreign Relations

Foreign Assistance Subcommittee

To meet with Representative Findley, Ranking Minority Member of the Subcommittee on Europe and the Middle East of International Relations Committee, to discuss the implementation of title XII of the Foreign Assistance Act.

6202 Dirksen Building

Foreign Relations

International Operations Subcommittee

To hold hearings on proposed fiscal year 1978 authorizations for the Department of State.

4221 Dirksen Building

Human Resources

Health and Scientific Research Subcommittee

To consider S. 706, to revise and strengthen standards for the regulation of clinical laboratories, and S. 621, 945, and 1217, to establish guidelines for regulating research relating to Recombinant DNA.

Until noon 1318 Dirksen Building

Judiciary

Subcommittee on Juvenile Delinquency

To hold hearings on S. 1021 and S. 1218, to amend and extend programs under the Juvenile Justice and Delinquency Prevention Act.

2228 Dirksen Building

SENATE—*Tuesday, April 26, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 2 p.m., on the expiration of the recess, and was called to order by Hon. PAUL S. SARBANES, a Senator from the State of Maryland.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

For the things which are seen are temporal; but the things which are not seen are eternal.—II Corinthians 4: 18.

Lord of all life, Giver of all wisdom,

we do not ask for special favors above others, or exemption from the stress, or sickness or the temptations which confront other men. But we ask Thee to take us as we are, indwell us by Thy spirit, and use us for Thy kingdom's sake. While we are laboring in the fields of the temporal and the visible keep us loyal to the values which are eternal and invisible. And what we pray for the Members of this body we pray also for the President and all others in the service of this Nation that we may ever remain a people whose God is the Lord of Creation, our Redeemer and Judge, Father of our Lord Jesus Christ, in whose name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 26, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. PAUL S. SARBANES, a Senator from the State of Maryland, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. SARBANES thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Monday, April 25, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate tomorrow.

Mr. HANSEN. Mr. President, reserving the right to object——

The ACTING PRESIDENT pro tempore. Reservation is heard.

Mr. HANSEN. I wish to say that we are having a markup on the surface-mining bill. I happen to be ranking Republican member on the Energy and Natural Resources Committee, and I have some amendments that are to be presented, and I would just say that it is going to be extremely difficult for me to try to discharge my duties as a member of the Finance Committee here and to be on hand at the same time for that committee over there.

Mr. ROBERT C. BYRD. Would the Senator be agreeable, then, to making an exception for that one committee, all committees except that one committee?

Mr. HANSEN. To all committees except that one, I would be agreeable.

Let me ask the Senator this: Senator METCALF would like for us to go back in session, and I understand it has been agreed to, from 2:30 until 4 o'clock this afternoon. I am not certain how many members there will be on hand over there, but I think that is a pretty important bill—as I know this bill is important, too—and it is a little bit difficult to try to be both places.

Mr. ROBERT C. BYRD. Does the Senator——

Mr. HANSEN. Will there be any votes here before 4 o'clock?

Mr. ROBERT C. BYRD. No votes before 4, unless there would be a vote in connection with the establishment of a quorum. I do not foresee that happening. It could happen, but I do not expect it to.

Mr. HANSEN. Well, then, as I understand the unanimous-consent request as modified, it would provide that all committees may meet tomorrow with the exception of the Committee on Energy and Natural Resources?

Mr. ROBERT C. BYRD. Except the one committee to which the Senator raised some opposition.

Mr. JAVITS. Mr. President, reserving the right to object, we are supposed to be, as I understand it, voting tomorrow on this proposition. We have 2 hours for debate; it seems to me we should not encourage our Members to stay away. Therefore, I hope very much the majority leader will limit that request until 12, or whatever time the Senate session begins. I think it is 11.

Mr. ROBERT C. BYRD. Well, the Senate comes in at 10:30. Committees automatically can meet until 12:30 without consent.

For the moment, Mr. President, I withdraw my request. I just hope the Senate will be able to proceed, and committees will be able to proceed. We have a lot of work down the road.

I realize Members do have problems. I hope we will be able to accommodate ourselves to the Members, and that they likewise will help the leadership in its efforts to move ahead.

I ask unanimous consent that the Subcommittee on Science, Technology, and Space of the Committee on Commerce be authorized to meet during the afternoon on Wednesday, May 4, while the Senate is in session.

Mr. BAKER. Mr. President, reserving the right to object——

Mr. ROBERT C. BYRD. That has been OK'd.

Mr. BAKER. It has been, yes; I OK'd it a minute ago. But in view of the remarks by the distinguished senior Senator from New York——

Mr. ROBERT C. BYRD. Mr. President, I withdraw the request.

JOINT REFERRAL REQUEST—H.R. 5675

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when H.R. 5675 is received from the House of Representatives, it be jointly referred to the Committee on Banking, Housing, and Urban Affairs and the Committee on Finance.

First, I want to be sure that the chairmen of the respective committees have given clearance for this joint referral. Therefore, I withdraw the request until we are sure of the clearance.

EXTENSION OF LEADERSHIP RECOGNITION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for recognition of the two leaders, which ordinarily is for 10 minutes each, today be extended to 20 minutes each, for today only.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CIVIL DEFENSE

Mr. BAKER. Mr. President, I and a number of my colleagues have been concerned for some time over the apparently growing disparity in the civil defense capabilities between the Soviet Union and the United States. For that reason, I am pleased to note that in passing yesterday the fiscal year 1978 DOD authorization bill, the House included $134 million for civil defense.

This action of the House in increasing the civil defense budget by approximately 40 percent over the fiscal year 1977 figure, indicates a growing and, I believe, a healthy awareness that we need to take a long and serious look at this element of our strategic defense. As you know, Mr. President, strategic defense has evolved considerably since the dawn of the nuclear age—through the forties our possession of nuclear weapons was a monopoly; through the fifties and early sixties we had a clear superiority; and now, at least in the minds of most, our strategic deterrence is based on the concept of mutually assured destruction—the balance of terror.

For some time now we have assumed the balance of terror was a tiger on whose back both we and the Soviet Union were clinging with an equal degree of caution and determination. But with the massive Soviet investment in civil defense measures, their natural and planned dispersion of both industry and population, their program to harden essential industries and train the civilian population, their potentially effective plans to evacuate the Soviet citizenry from major metropolitan areas—I have to wonder if the Soviet Union is clinging to the back of that tiger with the same sense of prudence as are we. I think the time has come to reexamine the concept, because if destruction is not mutual, and if destruction is not assured, then neither is it deterrence.

Mr. President, $134 million will not restore the balance to this apparent asymmetry, but it is at least an indication that we in Congress are willing to

consider the possibility that an asymmetry exists; and there is a need to do something about it. I believe the action of the House on this matter is a positive sign, and I would urge my colleagues to follow their lead.

Mr. ROBERT C. BYRD. Mr. President, I yield such time from my time under the order as the distinguished chairman of the Appropriations Committee may require.

CRITERIA FOR THE IMPOSITION OF THE SENTENCE OF DEATH—S. 1382

Mr. McCLELLAN. Mr. President, I introduce a bill to establish rational criteria for imposition of the sentence of death, and for other purposes.

Present Federal law provides that the death penalty is an authorized sentence upon conviction in at least 10 instances, including murder, treason, espionage, rape, and air piracy where death results. (18 U.S.C. 34, destruction of motor vehicles or motor vehicle facilities where death results; 18 U.S.C. 351, assassination or kidnaping of Member of Congress; 18 U.S.C. 794, gathering or delivering defense information to aid a foreign government; 18 U.S.C. 1111, first degree murder within the special maritime and territorial jurisdiction of the United States; 18 U.S.C. 1114, murder of certain officers and employees of the United States; 18 U.S.C. 1716, causing death of another by mailing injurious articles; 18 U.S.C. 1751, Presidential and Vice Presidential murder and kidnaping; 18 U.S.C. 2031, rape within the special maritime or territorial jurisdiction of the United States; 18 U.S.C. 2381, treason; and 49 U.S.C. 1472(i), aircraft piracy).

In June of 1972, the Supreme Court handed down its decision in the case of Furman against Georgia, one of the Court's most significant decisions in recent years. For it was in the Furman decision that a bare majority of the Court—five of the nine Justices then sitting—determined that the death penalty could not constitutionally be imposed in the cases before the court, and thereby effectively eliminated capital punishment throughout this country as an authorized deterrent and punishment for even the most violent, brutal, and horrible crimes.

It is important to remember that the Furman decision did not declare that the death penalty itself was unconstitutional. In fact, there was no majority opinion in the case at all. Instead, each of the five Justices in the majority filed his own opinion in which none of the others joined. Of the five, only Justices Marshall and Brennan felt that the death penalty was, per se, unconstitutional. Justices Douglas, Stewart, and White were unwilling to reach that conclusion, but rather focused on the unlimited discretion given to the judge and jury under the then existing statutes in determining whether the penalty was to be imposed. The essence of their opinions, particularly those of Justices Stewart and White, was not that the death penalty itself was unconstitutional, but rather that, because of this unfettered discretion, it had come to be imposed so arbitrarily and capriciously as to constitute cruel and unusual punishment in violation of the eighth amendment.

Although the precise meaning of the Furman decision was unclear, the logical conclusion drawn from the separate opinions rendered in the case was that if a procedure could be devised whereby the death penalty would be imposed in a more rational manner than was then being invoked, Justices White and Stewart would likely join in making a majority upholding the constitutionality of the death penalty.

The response to the Furman case has been overwhelming. Already, in 35 of the 50 States the representatives of the people have enacted new State statutes providing for the death penalty under procedures designed to satisfy the constitutional objections raised by Furman. Those States include Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, Tennessee, Texas, Utah, Virginia, Washington, and Wyoming. And the Federal Government enacted the Anti-Hijacking Act of 1974, which also was designed to follow the mandate of Furman while providing a death penalty where a death is caused during an aircraft hijacking.

In the 93d Congress, I introduced S. 1401, which would have provided a more comprehensive statute to provide rational criteria for the imposition of the death penalty in certain limited cases involving serious offenses. That bill, after amendment, was adopted by this body by a vote of 54 to 33, but was never acted upon by the House.

Since that time, the Supreme Court has decided other landmark cases on the issue of the death penalty. On July 2, 1976, the court upheld State death penalty statutes in the cases of Gregg against Georgia, Jurek against Texas, and Proffitt against Florida, but struck down statutes in Woodson and others against North Carolina and Roberts against Louisiana.

Mr. President, the Court is to be commended for these latest decisions. For, at long last, it has finally eliminated any doubt as to whether the death penalty is a constitutionally acceptable sanction for the commission of certain heinous crimes. It has clearly declared to all that it is not cruel and unusual punishment, as has erroneously been argued by so many for so long. The recent cases have not only done much to clarify and expand upon the Furman decision, but have provided us with three examples of court-sustained constitutionally sound death penalty statutes.

Mr. President, the bill I introduce today is designed to meet the constitutional concerns reflected in these latest Supreme Court cases. The Department of Justice has examined this bill and concluded that it does in fact meet all constitutional requirements. I ask unanimous consent that the opinion letter which I have from the Attorney General be printed in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. (See exhibit 1.)

Mr. McCLELLAN. I shall quote the last sentence in the letter, which is as follows:

> Certainly, the bill provides a firm foundation for congressional consideration of a death penalty for a limited number of Federal crimes, and I support your effort to bring it to the attention of the Senate.

Briefly, the bill would provide that, after a conviction for an offense for which a penalty of death is authorized, the court must hold a separate hearing on whether to impose the death penalty. The hearing would normally be before the same jury which sat for trial, or, if both parties agree, before the judge. After both sides have an opportunity to present all relevant evidence, the jury would be asked to make special findings as to whether any of a list of mitigating or aggravating factors exist. The mitigating factors listed include such things as the youthfulness of the defendant, the extent of his involvement in the offense, any emotional problems or pressures, and the unforeseen nature of a resulting death. The aggravating factors would vary depending on whether the offense is one relating to treason or to murder.

After determining by unanimous vote whether any of these factors exist, the jury would be required to determine "whether or not any aggravating factors found to exist, when taken in conjunction with all the evidence, outweigh any mitigating factors found to exist, and, based upon this determination, shall return a finding as to whether or not a sentence of death should be imposed."

The bill further provides that the defendant shall have a right to appeal the sentence and that such review shall have priority over all other cases. In order to affirm the sentence, the appellate court must determine that the sentence of death was not imposed under the influence of passion, prejudice, or other arbitrary factor; that the evidence supports the special findings; and that the sentence of death is not excessive considering both the crime and the defendant.

Mr. President, this bill clearly meets the requirements recently laid down by the Supreme Court for the restoration of the death penalty, and applies such a sentence to only a small number of the most serious criminal acts. I recognize, however, that we are not only faced with the question of whether legislation can be drafted that will meet constitutional restrictions, but with a much more basic question as well—whether, even assuming its constitutionality, the Federal

criminal justice system should have a death penalty at all.

The answer to that question becomes clearer and clearer with every new mass murder, every new murder for hire, and every new kidnaping resulting in death. The death penalty must be restored if our criminal justice system is to effectively combat the ever-increasing tide of violent crimes—crimes of terror—that threaten to engulf our Nation, and if the confidence of the American people in our system of justice is to be restored.

Mr. President, those who argue against the death penalty claim that it serves no useful purpose and should therefore be eliminated. Perhaps most importantly, they say that there is no proof that it deters crime.

I simply cannot agree with that.

I can recall my youth that the knowledge that I would be punished for doing wrong was indeed a deterrent. And the more severe I thought the punishment was likely to be, the less likely it was that I would misbehave. Most likely, everyone in this Chamber has had a comparable experience.

Some will say that the real issue is not whether the death penalty deters, but whether it deters more than life imprisonment. To me the answer to that question is obvious and irrefutable.

Life is our most precious possession. So long as a convicted murderer has his life, he can look forward to the likelihood of parole and freedom—or even escape. The death penalty provides no such future. It is final and irrevocable. It is clear that if a criminal knows he may forfeit his own life if he commits one of the crimes for which the death penalty is authorized, he will certainly be much less likely to commit that act than if all he had facing him was a prison sentence and eventual parole. Where the criminal—the murderer—knows that he is going to pay a price for his crimes and that that price is his own death, he will be deterred.

Mr. President, when all is said and done, when all the talking about deterrence and retribution and incapacitation is finished, what it all boils down to is whether it is ever "just" to impose the death penalty. Can a man ever be found to have acted so viciously, so cruelly and inhumanely as to justify society in imposing upon him the ultimate punishment? I firmly believe he can. Consider some recent cases.

What other punishment is "just" for a man, found to be sane, who would stab, strangle, and mutilate eight student nurses?

What other punishment is "just" for a band of social misfits who would invade the homes of people they had never even met and stab and hack to death a woman 8½ months pregnant and her guests?

What other punishment is "just" for a man who would cold-bloodedly and needlessly execute four restaurant employees during the robbing of the restaurant?

What other punishment is "just" for a man who would lie in wait and murder a 17-year-old boy he had never met because "he wanted to do something different" and later murder two police officers who were pursuing him after he robbed a bank?

What other punishment is "just" for a man who would systematically murder 25 migratory farmworkers in one summer?

What other punishment is "just" for an escaped convict who would murder 13 people, including one woman he kidnaped and killed while he was an escapee, and another man he beat to death with chair legs and an ax handle as an initiation assignment for a motorcycle club?

What other punishment is "just" for men who would brutally murder four young children, including a 9-day-old baby, by drowning them in a sink, and kill another child and two women by shooting them at close range?

Mr. President, justice is not feeding and clothing these people for a few years and then returning them to society on parole to prey upon or pose constant threats to other innocent victims. Such a procedure inevitably burdens our society with forbidding dangers and exposes our innocent and law-abiding citizens to fatal assaults and debauchery by cruel and debased murderers.

I believe that people who commit crimes like these to which I have referred forfeit their own right to live. They must be made to know that they too shall die and not be allowed to commit wanton and savage murder again.

Justice, Mr. President—to both society and the murderer—demands no less.

Mr. President, I ask unanimous consent that a copy of the bill which I have introduced be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1382

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 227 of title 18 of the United States Code is amended by adding after section 3562 a new section 3562A, to read as follows:

"§ 3562A. Sentencing for capital offenses

"(a) A person shall be subjected to the penalty of death for any offense prohibited by the laws of the United States only if a hearing is held in accordance with this section.

"(b) When a defendant is found guilty of or pleads guilty to an offense for which one of the sentences provided is death, the judge who presided at the trial or before whom the guilty plea was entered, or any other judge if the judge who presided at trial or before whom the guilty pleas was entered is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. The hearing shall be conducted—

"(1) before the jury which determined the defendant's guilt;

"(2) before a jury impaneled for the purpose of the hearing if—

"(A) the defendant was convicted upon a plea of guilty;

"(B) the defendant was convicted after a trial before the court sitting without a jury;

"(C) the jury which determined the defendant's guilt has been discharged for good cause; or

"(D) appeal of the original imposition of the death penalty has resulted in a remand for redetermination of sentence under this section; or

"(3) before the court alone, upon the motion of the defendant and with the approval of the court and of the government.

A jury impaneled pursuant to paragraph (2) of this subsection shall consist of twelve members, but, at any time before any conclusion of the hearing, the parties may stipulate in writing with the approval of the court that it shall consist of any number less than twelve.

"(c) In the sentencing hearing the court shall disclose to the defendant or his counsel all material contained in any presentence report, if one has been prepared, except such material as the court determines is required to be withheld for the protection of human life or for the protection of the national security. Any presentence information withheld from the defendant shall not be considered in the determination of the sentence of death. In the sentencing hearing, evidence may be presented as to any matter relevant to sentence and shall include matters relating to any of the aggravating or mitigating factors set forth in subsections (f), (g), (h). Any information relevant to any mitigating factors, including those set forth in subsection (f), may be presented by either the government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials; but the admissibility of information relevant to any aggravating factors, including those set forth in subsections (g) and (h), shall be governed by the rules governing the admission of evidence at criminal trials. The government and the defendant shall be permitted to rebut any information received at the hearing and shall be given fair opportunity to present argument as to the adequacy of the evidence to establish the existence of any of the aggravating or mitigating factors, and as to the appropriateness in that case of imposing a sentence of death. The burden of establishing the existence of any aggravating factors is on the government, and is not satisfied unless established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factors is on the defendant, and is not satisfied unless established by a preponderance of the evidence.

"(d) After hearing all the evidence, the jury, by unanimous vote, of if there is no jury, the court, shall return special findings setting forth the aggravating and mitigating factors, set out in subsections (f), (g), and (h), found to exist. The jury, or if there is no jury, the court, shall then determine whether or not any aggravating factors found to exist, when taken in conjunction with all the evidence, outweigh any mitigating factors found to exist, and, based upon this determination, shall return a finding as to whether or not a sentence of death should be imposed.

"(e) Upon the unanimous finding of the jury, or if there is no jury, upon a finding by the court, that a sentence of death should be imposed, the court shall sentence the defendant to death. In all other cases, the court may impose a sentence of life imprisonment or any term of years.

"(f) In determining whether a sentence of death is to be imposed on a defendant, the following mitigating factors shall be considered:

"(1) the youthfulness of the defendant at the time of the crime;

"(2) the defendant's capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law was significantly impaired, but not so

impaired as to constitute a defense to the charge;

"(3) the defendant was under unusual and substantial duress, although not such a duress as to constitute a defense to prosecution;

"(4) the defendant is punishable as a principal for aiding and abetting the offense, under section 2(a) of this title, but his participation was relatively minor; or

"(5) the defendant could not reasonably have foreseen that his conduct in the course of the commission of murder, or other offense resulting in death for which he was convicted, would cause, or would create a grave risk of causing, death to any person.

"(g) If the defendant is found guilty of or pleads guilty to an offense under section 794 or section 2381 of this title the following aggravating factors shall be considered:

"(1) the defendant has been convicted of another offense involving espionage or treason for which a sentence of life imprisonment or death was authorized by statute;

"(2) in the commission of the offense the defendant knowingly created a grave risk of substantial danger to the national security; or

"(3) in the commission of the offense the defendant knowingly created a grave risk of death to another person.

Provided, That if the charge is under section 794(a) of this title, the sentence of death shall not be imposed unless the jury or, if there is no jury, the court further finds that the offense directly concerned nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large-scale attack; war plans; communications intelligence or cryptographic information; or any other major weapons system or major element of defense strategy.

"(h) If the defendant is found guilty of or pleads guilty to any other offense for which the death penalty is available, the following aggravating factors shall be considered:

"(1) the death or injury resulting in death occurred during the commission or attempted commission of, or during the immediate flight from the commission or attempted commission of, an offense under section 751 (Prisoners in custody of institution or officer), section 794 (Gathering or delivering defense information to aid foreign government), section 844(d) (Transportation of explosives in interstate commerce for certain purposes), section 844(f) (Destruction of government property by explosives), section 844(i) (Destruction of property in interstate commerce by explosives), section 1201 (Kidnaping), or section 2381 (Treason) of this title, or section 902 (i) or (n) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1472 (i), (n)) (Aircraft piracy);

"(2) the defendant has been convicted of another Federal offense, or a State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute;

"(3) the defendant has previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of serious bodily injury upon another person.

"(4) in the commission of the offense the defendant knowingly created a grave risk of death to another person in addition to the victim of the offense;

"(5) the defendant committed the offense in an especially heinous, cruel, or depraved manner;

"(6) the defendant procured the commission of the offense by payment, or promise of payment, of anything of pecuniary value;

"(7) the defendant committed the offense as consideration for the receipt, or in the expectation of the receipt, of anything of pecuniary value; or

"(8) the defendant committed the offense against—

"(A) the President of the United States, the President-elect, the Vice President, the Vice President-elect, the Vice President-designate, or, if there is no Vice President, the officer next in order of succession to the office of the President of the United States, or any person who is acting as President under the Constitution and laws of the United States;

"(B) a chief of state, head of government, or the political equivalent of a foreign nation;

"(C) a foreign official listed in section 1116(b)(1) of this title, if he is in the United States because of his official duties; or

"(D) a Justice of the Supreme Court, a Federal law-enforcement officer, or an employee of a United States penal or correctional institution, while performing his official duties or because of his status as a public servant. For purposes of this subsection a 'law-enforcement officer' is a public servant authorized by law or by a government agency to conduct or engage in the prevention, investigation, or prosecution of an offense.

SEC. 2. Section 34 of title 18 of the United States Code is amended by changing the comma after the words "imprisonment for life" to a period and deleting the remainder of the section.

SEC. 3. Section 844(d) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 4. Section 844(f) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 5. Section 844(i) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 6. The second paragraph of section 1111(b) of title 18 of the United States Code is amended to read as follows:

"Whoever is guilty of murder in the first degree shall be punished by death or by imprisonment for life;"

SEC. 7. Section 1116(a) of title 18 of the United States Code is amended by striking the words ", except that any such person who is found guilty of murder in the first degree shall be sentenced to imprisonment for life".

SEC. 8. Section 1201 of title 18 of the United States Code is amended by inserting after the words "or for life" in subsection (a) the words "and if the death of any person results, shall be punished by death or life imprisonment".

SEC. 9. The last paragraph of section 1716 of title 18 of the United States Code is amended by changing the comma after the words "imprisonment for life" to a period and deleting the remainder of the paragraph.

SEC. 10. The second to the last paragraph of section 1992 of title 18 of the United States Code is amended by changing the comma after the words "imprisonment for life" to a period and deleting the remainder of the section.

SEC. 11. Section 2031 of title 18 of the United States Code is amended by deleting the words "death, or".

SEC. 12. Section 2113(e) of title 18 of the United States Code is amended by striking the words "or punished by death if the verdict of the jury shall so direct" and inserting in lieu thereof the words "or if death results shall be punished by death or life imprisonment".

SEC. 13. Section 903 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1473), is amended by striking subsection (c).

SEC. 14. The analysis of chapter 227 of title 18 of the United States Code is amended by inserting after item 3562 the following new item: "3562A. Sentencing for capital offenses.".

SEC. 15. Section 3566 of title 18 of the United States Code is amended by adding a second paragraph as follows:

"In no event shall a sentence of death be carried out upon a pregnant woman".

SEC. 16. Chapter 235 of title 18 of the United States Code is amended by inserting immediately after section 3741 the following new section:

"§ 3742. Appeal from sentence of death

"In any case in which the sentence of death is imposed after a proceeding under section 3562A of chapter 227 of this title, the sentence of death shall be subject to review by the court of appeals upon appeal by the defendant. Such review shall have priority over all other cases. On review of the sentence, the court of appeals shall consider the record, including the entire presentence report, if any, the evidence submitted during the trial, the information submitted during the sentencing hearing, the procedures employed in the sentencing hearing, and the special findings under section 3562A(d). The court shall affirm the sentence if it determines that: (1) the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor; (2) the evidence supports the jury's or the court's special finding of the existence of any aggravating factor or the failure to find any mitigating factors, as enumerated in section 3562A; and (3) the sentence of death is not excessive, considering both the crime and the defendant. In all other cases the court shall remand the case for reconsideration under the provisions of section 3562A of this title. The court of appeals shall state in writing the reasons for its disposition of the review of the sentence.

SEC. 17. The analysis of chapter 235 of title 18 of the United States Code is amended by adding at the end thereof the following new item:

"3742. Appeal from sentence of death.".

SEC. 18. The provisions of sections 3562A and 3742 of title 18 of the United States Code, as added by this Act, shall not apply to prosecution under the Uniform Code of Military Justice (10 U.S.C. 801).

EXHIBIT 1

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C., March 25, 1977.

HON. JOHN L. MCCLELLAN,
U.S. Senate, Washington, D.C.

DEAR SENATOR MCCLELLAN: In your letter dated March 3, 1977, you asked that the Department of Justice review your draft bill to authorize the death penalty for certain federal offenses, and requested the Department's comments with respect to the constitutionality of the draft bill in the light of recent Supreme Court decisions.

In summary, the draft bill provides that before a sentence of death can be imposed for any offense under the laws of the United States, a hearing must be held in accordance with the bill's provisions. The hearing is normally to be before a jury of twelve with responsibility for rendering unanimous findings in the nature of special verdicts, but under certain circumstances the court also is empowered to conduct the hearing and to render the necessary findings.

The bill sets forth lists of aggravating and mitigating circumstances to be considered by the factfinder at the hearing. An aggravating factor may be proven only by legally ad-

missible evidence, and the government bears the burden of persuasion on the matter beyond a reasonable doubt. A mitigating factor may be proved by any relevant information irrespective of the rules of evidence, and the defendant bears the burden of persuasion by a preponderance of the evidence. The sentencing court is required to disclose to the defendant all material in any presentence report except such information as the court determines to withhold for the protection of human life or the national security; no information so withheld may be considered in the determination of the sentence.

At the conclusion of the evidence, the jury is required to return special findings as to the existence of any aggravating and mitigating factors, and to determine whether any aggravating factors outweigh any mitigating factors found to exist; based on this determination, the jury must then conclude whether a sentence of death should be imposed. If the jury concludes that a death sentence should be imposed, the court must sentence the defendant to death. In all other cases, the court may impose a sentence of life imprisonment or any term of years.

The bill provides that any sentence of death may be appealed by the defendant for review in the court of appeals. The court of appeals is to consider the entire record of the trial and of the sentencing hearing, the presentence report, the procedures employed at the hearing, and the special findings. The court is to affirm the sentence only if it determines that the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor; that the evidence supports the special findings as to the existence of an aggravating factor or the failure to find a mitigating factor; and that the sentence of death is not excessive, considering both the crime and the defendant.

The offenses to which the death penalty would be applicable are treason, espionage, and certain murders—all offenses for which federal statutes currently purport to authorize a sentence of death.

The draft bill is modeled to a substantial extent upon the death penalty provisions of the federal aircraft piracy statute, 49 U.S.C. 1473(c), enacted by Congress in 1974 with the specific purpose of seeking to comply with the decision of the Supreme Court in *Furman* v. *Georgia*, 408 U.S. 238 (1972). In our view, the procedures set forth in the draft bill are consistent with the decision in the *Furman* case, and are also consistent with the opinions of the Supreme Court in *Gregg* v. *Georgia*, — U.S. — 1976), and *Proffitt* v. *Florida*, — U.S. — (1976), sustaining the provisions of similar state death penalty statutes against constitutional attack.

The Court in *Furman* had struck down a Georgia death penalty law, written in the fashion of all present federal death penalty provisions except the one appearing in the revised aircraft piracy statute, on the ground that the law permitted the sentencing judge or jury to exercise unguided discretion in determining whether the death penalty should be imposed, and thus that it failed to guard against the "freakish" or "wanton" imposition of the death sentence. Thereafter Georgia revised its law in a manner similar to that employed in the draft bill in order to meet the requirements of the *Furman* opinion. In *Gregg* the Court sustained the new statute. The Court held that the setting forth of aggravating and mitigating factors of sufficient clarity and specificity substantially met the concerns expressed in *Furman* and provided the sentencing authority with standards to guide its exercise of discretion. The Court emphasized also its heavy reliance on the appellate review procedures of the revised Georgia statute, which are very similar to those in the draft bill, as a further basis for insuring that the death penalty would not be wantonly or freakishly imposed (see *Gregg, supra*, slip op. at pp. 9–10, 47–49; slip op. at pp. 16–18 (White, J. concurring)).

Because of the close resemblance (including in some instances an identity of language) between the draft bill and the State statutes sustained in *Gregg* and *Proffitt*, we believe that the proposed bill would be found by the Supreme Court to meet constitutional requisites.

I appreciate the opportunity you have afforded us to review the draft bill prior to its introduction. There are some variations in particular provisions of the draft bill that would warrant consideration, but these are matters that we can raise with you later after a more thorough review. Certainly the bill provides a firm foundation for congressional consideration of a death penalty for a limited number of federal crimes, and I support your efforts to bring it to the attention of the Senate.

Sincerely,

GRIFFIN B. BELL,
Attorney General.

Mr. THURMOND. Mr. President, today I am pleased to cosponsor and strongly support the bill introduced by the distinguished senior Senator from Arkansas (Mr. MCCLELLAN), a bill to establish rational criteria for the imposition of the sentence of death, and for other purposes.

This legislation was introduced in the 94th Congress as S. 1401, which passed the Senate on March 13, 1974, by a vote of 54 to 33. It was subsequently referred to the House Judiciary Committee, but no action was taken on the measure prior to the adjournment of the 94th Congress.

Mr. President, in June of 1972, the Supreme Court handed down its decision in the case of Furman against Georgia. The Supreme Court decision in Furman did not hold that capital punishment per se is unconstitutional. Instead, the pivotal opinions of the Court found that "as presently applied and administered" capital punishment violated the eighth amendment. The system of discretionary sentencing in capital cases failed to produce evenhanded justice.

The bill introduced today would squarely meet the Supreme Court's objection and narrowly limit the offenses and circumstances in which the death penalty may be imposed, with full guarantees for judicial review.

Those crimes under current Federal law which can be broadly characterized as treason, espionage, or murder, would be offenses for which the death penalty would be an available sanction. Prosecution for such crimes would be a two-step procedure.

In the first instance, a jury would be impaneled or, if there is no jury, a judge would hear the question of guilt. In the event the defendant were found guilty of the offense, a second proceeding would be held to determine whether or not the death penalty should be imposed.

The death penalty should be restored because of its value as a deterrent. I am convinced that the death penalty can be an effective deterrent against specific crimes. The potential kidnapper should know that if his intended victim dies, he may die. The potential hijacker should realize that if he kills a person during the course of a hijacking, he may forfeit his own life. The man who throws a firebomb to destroy Government property, the convict who assaults a prison guard, the person who attacks a law enforcement officer, all should know that if they take a life, they may pay with their own life.

Mr. President, the Honorable J. Edgar Hoover, the late Director of the Federal Bureau of Investigation, declared:

(T)he professional law enforcement officer is convinced from the experience that the hardened criminal has been and is deterred from killing based on the prospect of the death penalty.

In addition, Mr. Arlen Specter, district attorney of Philadelphia, testifying before the Senate Subcommittee on Criminal Laws and Procedures, stated:

I believe the death penalty is an effective deterrent against murder. I say that based upon more than seven years as district attorney of Philadelphia, and dealing with a great many cases in that capacity. We have the frequent occurrence in the criminal courts of Philadelphia where professional burglars have expressed themselves on the point of not carrying a weapon on a burglary because of their concern there may be scuffle, there may be a dispute, the weapon may be used and death may result, and prior to Furman, they may face the possibility of capital punishment.

Clearly a person will be slow to undertake an action that will result in the loss of something which he values highly. Since life itself is the most highly prized possession of any person, he will be hesitant to engage in conduct that would result in its forfeiture.

Mr. President, this bill represents a compromise measure which, in my opinion, does not go as far as I would like. But what the bill does do is reestablish once again the constitutional acceptability of the death penalty in certain cases where there are aggravated violent crimes and crimes which threaten the security of our Nation.

The death penalty must be restored if our criminal justice system is to effectively control the increasing number of violent crimes of terror. The confidence of the American people in our criminal justice system must also be reclaimed and the imposition of the death penalty can restore such confidence.

Mr. President, people who commit violent crimes have forfeited their own right to life. Justice demands that such inhuman action cannot be tolerated. This bill would reestablish the death penalty in certain instances and, I hope, provide protection for the innocent victims of violent crimes.

Mr. President, I strongly support this bill and urge my colleagues in the Senate to once again approve it in prompt fashion.

Mr. ROTH. Mr. President, I am pleased to join the distinguished Senator from Arkansas as a cosponsor of a bill that reinstates the imposition of the

death penalty for certain serious Federal offenses.

Mr. President, vicious and violent crime is a constant threat in the life of every American. A great many of our citizens are faced with a daily concern for their own safety and security. The recent wave of fear that struck our Nation's Capital is a prime example of intolerable terrorism and crime that occurs in our streets.

Senseless and horrible crime must be stopped. In order to preserve an ordered society, we must punish the predatory and premeditated actions of those criminals who commit serious crimes.

The jurisdiction of the Federal Government in law enforcement is limited. In our system, law enforcement is primarily a local and State responsibility. The Congress, however, can and must provide strong leadership in this area. Through this legislation, we can not only provide a needed law enforcement tool for Federal agencies, but also encourage local governments to adopt a stern stiff position on crime.

In the past, I have supported the death penalty as it applies to aggravated crimes of violence. I sharply disagree with those who believe such punishment does not serve as a deterrent. The use of certain, swift, and severe punishment—applied fairly and without discrimination—is a powerful potent deterrent. Critics of capital punishment often present elaborate statistical evidence comparing murder rates in States with and without the death penalty and comparing periods of abolition of the death penalty with periods of restoration in the same State.

However, one must remember that those persons who are, in fact, deterred by the threat of the death penalty and do not commit a serious crime are not included in this statistical data.

The death penalty does have a unique deterrent effect. Law enforcement and prison officials report widespread evidence from candid conversations with convicted criminals showing that the death penalty does in fact influence criminal behavior. A study once done by the American Bar Association showed that criminals captured after having committed an offense punishable by life imprisonment refrained from killing their captive even though they might have succeeded in escaping. These prisoners were willing to serve a life sentence, but unwilling to risk the death penalty.

Mr. President, we must correct and strengthen the machinery of our criminal justice system. We need to devote more attention to the victims and potential victims of crime. Society in order to prosper and survive must fulfill its obligation to assure the safety of law abiding citizens.

In early July 1976, the U.S. Supreme Court issued five opinions which comprehensively dealt with the constitutionality of capital punishment and with the procedures under which it can be properly imposed. The Court struck down mandatory capital punishment, but ruled that the death penalty does not per se violate the eighth amendment, prohibition against "cruel and unusual punishment." The legislation introduced today follows the procedures dictated by the Supreme Court. It assures that the defendant is afforded every protection and legal safeguard that is mandated by the Constitution.

Mr. President, I commend Senator McCLELLAN for his effort. While the proposed legislation is but part of an overall solution to the crime problem, I believe it is an essential part.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, do I have any time remaining?

The ACTING PRESIDENT pro tempore. The majority leader has 1 minute remaining.

Mr. ROBERT C. BYRD. Mr. President, I yield my minute to the Senator from Nebraska. That will give the minority leader time to get to the floor.

Mr. DANFORTH. Mr. President, I have been instructed by the minority leader to yield his time as well, to the Senator from Nebraska.

Mr. CURTIS. I am grateful to the leadership. I did not expect such recognition.

REORGANIZATION OF THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Mr. CURTIS. Mr. President, I rise to express grave misgivings over both the method and the substance of the massive reorganization now underway at the Department of Health, Education, and Welfare.

In office less than 2 months at the time of the reorganization announcement on March 8, the Secretary—by his own admission—has put in motion what he calls "the most far-reaching reorganization in the Department's 24-year history." With a budget of $160 billion and over 142,000 employees, Mr. Califano, by administrative decree, fundamentally is affecting not only all of these employees and dollars but the millions of Americans whom they serve. I would not deny—and might even applaud—his wish to reorganize the massive Department which he heads, but I do question the wisdom and the procedure which was followed in this case.

Notwithstanding his previous involvement in Government, how has it been possible for the Secretary to deal with all of the complexities of hospital cost containment, social security financing, welfare reform, medicaid and medicare fraud and abuse, and redirection of budget priorities, while at the same time preparing, completing, and announcing such a massively pervasive reorganization, all in 2 months' time?

How thoroughly has he contemplated and reviewed the incredible impact this reorganization will have upon the manifold HEW programs, the employees who administer them, or the constituencies which they serve? How carefully has he assessed the implicit and far-reaching policy effects these organizational changes will have? What new directions, new emphases, new courses of action are thus set in motion, which it will be very difficult for the Congress or even the electorate to alter if that proves to be necessary?

Let me detail some of my specific concerns:

Placement of cash assistance programs in the Social Security Administration. Means-tested programs are proposed to merge with trust fund programs. The agency which foundered under only the addition of the SSI program, which continues to be error plagued, is now to take on all cash-assistance programs. The massive bureaucracy which is Social Security must now struggle not only with its own major deficit problems but the task of supervising the administration of needs-tested programs as well. Further implications relative to General Fund financing of Social Security, or wholesale expansion of groups eligible for public assistance, emerge in this suggested change. Fundamental questions concerning Social Security's ability to deal with welfare-type issues—for example, child support, social services, or monthly redeterminations—are further raised.

Placement of all human development and social services programs in an expanded Office of Human Development. As cited above, how will social services, in one section of HEW, relate to cash assistance, now in far-off Baltimore? How will information and referral occur? How will States, already struggling with the need to relate to numerous HEW entities, bridge this gap? How will recipients relate to SSA and OHD? How will the congressional emphasis upon targeting services to current, former, or potential welfare recipients be fulfilled?

Combination of medicaid and medicare in one Health Care Financing Administration. Again, it appears most unwise to mix needs-tested and trust fund programs in such an imprecise fashion. Is medical care for welfare recipients any less a component of their needs standard than other elements within it, such as food and housing? Does the Secretary support an even further fragmentation of administrative responsibility for public assistance so that the latter two elements would also be split off and administered even more than they are now by USDA and HUD? Will the categorical linkage for medicaid no longer remain? Will all standards and payment levels become the same?

These questions simply suggest, Mr. President, the depth of my concern. I am concerned, as well, about three other implications or questions related to the reorganization. First, I am convinced that the widely heralded savings of over $1 billion will be illusory. I would be interested in seeing figures from the Department that demonstrate that savings, not added costs, accompany the reorganization. Second, I am concerned that the reorganization will make administrative relationships in fact more complex. State agencies, who must administer welfare, had but one entity to respond to previously: the Social and Rehabilitation Service. Now they have three: the Social Security Administration, the Health

Care Financing Administration, and the Office of Human Development. A simple request to HEW for a copy of the AFDC, medicaid, and social services regulations by my staff was greeted recently by the response that this would involve contacting three agencies rather than one. Third, and most important, it is clear that the administrative moves are designed to enhance the drive for a guaranteed annual income and national health insurance—well in advance of even any consideration by the Congress. Certainly, the taxpayers of this Nation will not be fooled by promises of short-range reorganization savings when the long-range fiscal and policy implications of the administration shuffle became increasingly and painfully clear.

Mr. President, the Richmond News Leader summed up these concerns in a recent very eloquent editorial. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Richmond News Leader, Mar. 25, 1977]

REFORM AT HEW?

On March 8, Joseph Califano, Secretary of Health, Education, and Welfare, announced a major reorganization of his department. Califano's fiefdom thus became the first federal agency to fulfill Jimmy Carter's pledge to "reorganize and reform" the bureaucracy.

That the monster called HEW needs a dose of reorganization cannot be denied. But despite official claims that the restructuring may save $1 billion during the next two years, it is doubtful that the American people will appreciate Califano-style reform.

The consolidation of several agencies is central to the reorganization effort. Medicare (now run by the Social Security Administration) and Medicaid (run by the Social and Rehabilitation Service) henceforth will be managed by the Health Care Financing Administration. The Social Security Administration is to assume control of all federal cash assistance programs.

Now, consolidation sounds like a good idea—and indeed it may slightly reduce fraud and abuse. But the mechanics of this plan suggest that the reorganizers have a lot more on their minds than merely saving the taxpayers some money. In fact, Califano's nostrum could be a prelude to national health insurance and a national incomes program.

There is a fundamental difference between Social Security retirement checks and welfare hand-outs. Retirement benefits are supposed to represent returns of the contributions of individual workers. That is not the case with welfare. The recipient receives money, but he has not contributed any money in the past.

The same distinction holds true for Medicaid and Medicare. One is straight welfare; the other requires patient participation. The danger in Califano's plan is that it obliterates these differences. It lumps proud pensioners and welfare recipients into the same indistinguishable category.

And when Social Security and Medicare become just two more welfare programs, then the march towards national health insurance and a guaranteed annual income will intensify. After all, once senior citizens and the indigent receive the same benefits, who will oppose making those programs mandatory for everyone?

In his rush to reorganize everything under the federal umbrella, Califano apparently has forgotten that there are other ways to cut abuse, to improve delivery of necessary services, and to insure the integrity of the Social Security system.

For example, he could have considered farming out federal health programs to private insurers. The government's record on abuse and cost control is abominable, because it never has had sufficient incentive to hold down expenses. If the Carter-Califano team wants to save money, it should put the feds out of the health business.

What's more, Social Security should remain independent of partisan pressures. Many Americans ought to know that vote-seeking politicians and social-engineering bureaucrats cannot tamper with their contributions. But the HEW plan disregards this. Rather than combining Social Security with other assistance programs, the administration should have been investigating ways to guarantee Social Security's independence.

Finally, the consolidation effort neglects the soundest reform of all: Cutting back. The single most effective way to increase government efficiency is to reduce government expenditures. It gives the taxpayers little solace to hear about grand cost-saving schemes when HEW's budget is *increased* by more than $1 billion—and that is precisely what the President's revised budget proposes to do.

No, the HEW reorganization is not a scenario for reform. It is just another way to slip expanded programs past the taxpayers. Califano should be told to go back to the drawing board.

Mr. CURTIS. Mr. President, I yield the floor.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. BAKER. Mr. President, is there any time remaining to me under the standing order?

The ACTING PRESIDENT pro tempore. Ten minutes are remaining to the distinguished minority leader.

Mr. BAKER. Mr. President, I have no requirement for the time and no request. I yield back the remainder of my time under the standing order.

The ACTING PRESIDENT pro tempore. All time is yielded back.

APPOINTMENT BY THE VICE PRESIDENT

The ACTING PRESIDENT pro tempore. The Chair, on behalf of the Vice President, appoints the following Senators to attend the sixth session of the Third United Nations Conference on the Law of the Sea, to be held in New York, N.Y., May 23–July 8, 1977: The Senator from Maine (Mr. MUSKIE), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Alaska (Mr. GRAVEL), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Jersey (Mr. CASE), the Senator from Texas (Mr. TOWER), the Senator from Massachusetts (Mr. BROOKE), and the Senator from Alaska (Mr. STEVENS).

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of H.R. 3477, which the clerk will state.

The legislative clerk read as follows:

A bill (H.R. 3477) to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

The Senate resumed the consideration of the bill.

Mr. DANFORTH. Mr. President, in the last 2 days there has been a substantial amount of discussion about the so-called permanent tax cut, which is the thrust of amendment 200, as modified.

I think most points have been pretty well made to date, but I shall avail myself of this opportunity to clear up a few matters which I think maybe have not received adequate attention.

First, it is important to understand that the question of a permanent tax cut should not be a partisan issue. It is true that last January a group of Republican Senators began meeting about the subject of the economy and what steps can and should be taken by Congress to try to put the American people back to work.

That group last January of some Republican Senators began moving on the subject of the economy and through a series of meetings with an increasingly larger number of Republican Senators fashioned what we took to be a comprehensive program for creating approximately 2 million additional jobs by the end of 1978, which we felt were lasting jobs.

We thought that this was something more than the typical partisan exercise, because so often the role of a minority party is to simply be negative and to attack the proposals of the administration and of the majority party.

But it was clear to most of us that the people of our constituencies did not elect us simply to be partisan figures, and not to be negative, and not always to be presenting ideas which would be only minority ideas and doomed to failure.

So it was with a constructive spirit that we devised a proposal which we felt, and economists agreed with us, would be helpful in trying to bring recovery to an economy which was doing very poorly.

The so-called permanent tax cut which we are proposing in this amendment is derived from a piece of that Republican program in that the original package that we put together contained within it a permanent tax cut, but it was a rate reduction which was substantially larger than the one now under consideration in amendment 200, as modified.

What has happened in the present amendment 200 is that Senator JAVITS and I then considered the changes in the standard deduction as those changes came out of the Finance Committee and developed a rate reduction which could be integrated with the alteration in the standard deduction.

It was never our view that amendment

No. 200 should be viewed as a partisan matter, but, rather, as a proposal which was worthy of bipartisan support.

I am confident that there are some members of my party who will not support this amendment, but I hope that on the other side of the aisle this proposal will be viewed on its merits, because it has been put forward as a proposal which deserves consideration on its own merits.

It is important to underscore the fact that this amendment does integrate a rate deduction with changes in the standard deduction as found in the bill reported by the Finance Committee. The Finance Committee addressed itself at great length to the question of the standard deduction. The changes in the standard deduction are supported by the administration. Changes in the standard deduction in the case would bring further simplification to the Internal Revenue Code and would go some distance in redressing the problem of the so-called marriage penalty.

The marriage penalty, as it is called, means that the way the standard deduction is written now, it sometimes pays people to remain single rather than to get married, because twice the standard deduction for a single person exceeds the standard deduction for a married couple on a joint return.

So what we have done is to integrate with the changes in the standard deduction, as they have come from the Finance Committee, additional rate deductions for the first $20,000 of adjusted gross income; and this integrated proposal is incorporated in amendment 200, and that is the issue which very shortly—that is, tomorrow—will be before the Senate for a vote.

I have made the point over the last 2 days that the lion's share of this amendment and the tax savings under this amendment are designed to benefit taxpayers in the low-income and middle-income brackets. But I think it is important to note and only fair to note that the portion of this proposal accounted for by rate reductions alone differs in percentages somewhat from the portion of this proposal accounted for by changes in the standard deduction.

So that if you consider only the rate cut portion of this proposal, 85 percent of the tax saving attributed to the rate cut alone is designed for taxpaying entities with adjusted gross income of $30,000 or less; whereas, the total benefit of amendment No. 200, as it has been modified, including both the rate cut and the standard deduction feature of the proposal, amounts to 91 percent of the benefits going to taxpaying entities with adjusted gross income of $30,000 or less.

Finally, I should like to address myself to what is known as the indexing proposal, or the indexing problem, and how this fits in with that idea.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. DANFORTH. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order at this time to order the yeas and nays on an amendment to this bill which will be offered later today by Mr. CHURCH and Mr. DOMENICI.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote on the amendment by Mr. DOMENICI and Mr. CHURCH occur today at 3:50 p.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that throughout the remaining deliberations on the tax bill today—including votes—and whatever days it continues, Judy Hefner, a member of my staff, have the privilege of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, under the standing rule of the Senate as encompassed in the Stevenson resolution, all committees may meet during the session of the Senate for a period of the first 2 hours, without consent. Hence, all committees may meet tomorrow, if the Senate convenes at 10:30 a.m., until 12:30 p.m., without consent.

I now ask unanimous consent that, in addition, all committees may meet tomorrow during the session of the Senate, beginning at 2 p.m., with the exception of the Committee on Energy and Natural Resources.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the minority leader, and I thank the Senator from Missouri for yielding.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The Senate continued with the consideration of the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the distinguished Senator from Missouri may hold the floor for an additional 10 minutes, after which the Senator from Idaho (Mr. CHURCH) be recognized to call up the amendment which he and Mr. DOMENICI are sponsoring.

Mr. CHURCH. Mr. President, will the Senator withhold that for a moment, so that I may request unanimous consent to call up the amendment following the conclusion of the remarks by the distinguished Senator from Missouri?

Mr. ROBERT C. BYRD. I include that in the request.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment will be in order.

The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, I yield to the Senator from New Hampshire.

Mr. McINTYRE. I thank my distinguished colleague.

Mr. President, I rise to express my disappointment over the way we are handling the President's tax package and to speak in support of the amendment offered by the Senator from New York (Mr. JAVITS).

As early as last November, I contacted President Carter urging him to give serious consideration to a single one-time tax rebate to stimulate a faltering economy. On January 31, President Carter recommended a tax stimulus package which included a $50 rebate along with several business tax reductions.

In January, of course, the severe cold weather experienced throughout the country was giving all of us grave concern as to its economic impact. But that was several months ago. Since that time economic indicators have improved somewhat and some who warmly supported a tax rebate in midwinter have let their ardor cool off as the weather warmed up. Well, Mr. President, those economic indicators are welcome, of course, but I do not find them reassuring enough to abandon the case for a tax break to keep economic recovery alive.

But it is clear now what has happened. Our banking and industrial communities have launched a massive campaign to sell the argument that tax rebates to the citizens of this country would be inflationary but tax reductions for business would not. I not only question this reasoning, I think reducing business taxes without giving individual citizens an equal break would be unconscionably unfair. As we all know, the assault on the rebate has been successful. The week before last, the President reversed himself and abandoned the $50 individual tax rebate. But at the same time, and I em-

phasize this point, President Carter also proposed eliminating the business jobs tax credit and the increase in the investment tax credit.

The Senate, however, apparently does not follow the logic that business tax credits should be tied to individual taxpayer relief. Last week, on a lopsided 74-to-20 vote, the Senate in its wisdom determined that the American business community was deserving of tax reductions but that the American citizen was not.

Mr. President, last week I was one of the 20 Senators to vote for recommittal of the bill to committee with instructions to delete the business tax credits. Failing that, I have consistently voted not to expand the present legislation. I voted against my good friend from Colorado (Mr. HASKELL) in his successful attempt to enlarge the jobs tax credit. I voted to place a cap on the tax credit and I will continue through the debate on this bill to vote against those proposals enlarging business tax reductions.

I do not believe, Mr. President, the American people can be convinced that tax reductions are fine for business but wrong for them. With the exception of the increases in the standard reduction, which I supported in a floor statement February 4, what we have before us is a business tax reduction bill. How can I or my colleagues in this body seriously justify sending to conference a piece of legislation that will provide billions of dollars of tax relief for our business community while ignoring the pressing tax burden on our citizens?

I must state my belief that general tax reductions should be part of a comprehensive tax reform bill. And the legislation before us certainly is not that. We are debating a piece of legislation that can no longer be justified. Either we have a rebate together with business tax reductions, or we should have no bill. If this legislation is passed without general tax relief, then we should all be prepared to explain to the American people how we justified a tax reduction for the American business community but could not justify a tax reduction for them.

I thank my distinguished friend for yielding time to me.

Mr. BAKER. Mr. President, will the Senator yield to me briefly?

Mr. DANFORTH. If I have any remaining time I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Missouri has 4 minutes remaining.

Mr. BAKER. Mr. President, will the Senator yield me 1 minute?

Mr. DANFORTH. I yield to the Senator from Tennessee.

Mr. BAKER. Mr. President, I only wanted to take a brief moment to say to the distinguished Senator that I thought his statement was cogent, convincing, and I am delighted to hear his position and his remarks on an issue of such importance. I commend him for his courage in this respect.

Mr. McINTYRE. I thank my good friend from Tennessee.

Mr. DANFORTH. Mr. President, I add my word of commendation to the Senator from New Hampshire. Really this is a question of providing tax relief for low-income, middle-income taxpayers, and it is interesting to note that without this and, as a matter of fact, even with it, over the next couple of years the real tax rate for this group of middle-income and low-income taxpayers is going to be increased; that is, even without any increase in tax rates these people are going to be pushed into higher tax brackets.

This amendment, at least on a temporary and partial basis, does something toward indexing tax rates for middle- and low-income taxpayers to take account of the effect that inflation has of pushing them into higher tax brackets.

So I add my word of commendation to the Senator from New Hampshire for the position he has taken. This indeed is not a partisan measure at all. It is a measure designed to do two things: One, to put more people back to work in an economy that is still very sluggish, to say the least; and, second, to offer a measure of relief to those taxpayers who can least afford the effect of high rates of inflation and high rates of taxes at the same time.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Idaho.

AMENDMENT NO. 190

Mr. CHURCH. Mr. President, I send to the desk my amendment No. 190 and ask that it be read.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. CHURCH) for himself, Mr. DOMENICI, and other Senators proposes amendment No. 190.

The amendment is as follows:

At the appropriate place insert the following new section:

SEC. . ELECTION OF FORMER RETIREMENT INCOME CREDIT PROVISIONS FOR 1976.

Section 37 (relating to credit for the elderly) is amended by redesignating subsection (f) as (g) and by inserting after subsection (e) the following new subsection:

"(f) ELECTION OF PRIOR LAW FOR 1976 RETURNS.—A taxpayer may elect (at such time and in such manner as the Secretary shall prescribe) to determine the amount of his credit under this section for his first taxable year beginning after December 31, 1975, under the provisions of this section as they existed before the amendment made by section 503 of the Tax Reform Act of 1976.".

Mr. CHURCH. Mr. President, this amendment would give taxpayers 65 years or older the option to claim for taxable year 1976 either the former retirement income credit or the new elderly credit.

Last year's Tax Reform Act, in effect, replaced the retirement income credit with two types of credits, depending upon the taxpayer's age and sources of income.

For taxpayers 65 or older, a 15-percent credit for the elderly is available for all types of income, up to $2,500 for single persons and $3,750 for couples filing jointly. Single persons with $2,500 in qualifying income can reduce their tax liability by $375, $2,500 multiplied by the 15-percent credit. An elderly couple entitled to the maximum credit can subtract $563 from their taxes, $3,750 times 15 percent.

These maximum amounts for computing the credit, however, are reduced dollar-for-dollar by social security benefits, railroad retirement annuities, and other tax-exempt pensions. In addition, there is an income phaseout provision, which reduces the maximum amounts for computing the credit by $1 for each $2 of adjusted gross income above $7,500 for individuals and $10,000 for couples.

The effect is that the credit is eliminated entirely for taxpayers with adjusted gross income of $12,500 for individuals and $17,500 for qualifying couples.

Persons under 65 are eligible for a retirement income credit, provided they receive a public pension or annuity. They may also claim a 15-percent credit, but only on up to $2,500 in qualifying pensions or annuities for individuals and $3,750 for elderly couples.

These amounts are also reduced by tax-exempt retirement benefits and earnings, depending upon the amount and the taxpayer's age. However, there is no income phaseout provision, as now exists for the elderly credit for persons 65 or older.

For most eligible older Americans, the new elderly credit provides additional tax relief. Some, though, have been adversely affected by the income phaseout provisions.

Every Senator in this Chamber, I am sure, has received letters from retirees 65 or older who have had their credit either reduced or eliminated because of the changes in the 1976 Tax Reform Act. Yet, these same individuals would, in many cases, be entitled to claim the credit if they were under 65.

The Tax Reform Act, which became law in October 1976, made these changes effective retroactively to January 1976 for individuals 65 or older.

Now, many moderate-income pensioners 65 or older—particularly those in the $10,000 to $17,000 income bracket—are discovering that their credit is either reduced substantially or eliminated entirely because of the income phaseout provision in the Tax Reform Act. Yet, these individuals can ill afford a retroactive tax increase.

The National Retired Teachers Association-American Association of Retired Persons sum it up well when they say:

As a matter of principle, our Associations are vehemently opposed to any retroactive increase in income tax liabilities resulting from the enactment of legislation after the start of a taxable year. We think that retroactively increased tax burdens constitute bad tax policy and erode the confidence of our own citizens in the fairness and sensitivity of their Government.

My amendment is similar to the approach adopted by the Senate Finance Committee in protecting persons entitled to the sick-pay exclusion from being adversely affected by the retroactive application of the Tax Reform Act. It would also protect taxpayers—in this case elderly retirees living on low or

moderate incomes—from being penalized by the retroactive application of the elderly credit. It would not, however, grant any additional tax relief, but would simply protect them from having their taxes raised retroactively.

This approach has another important benefit. It would provide additional time for the two tax writing committees—the Senate Finance Committee and the House Ways and Means Committee—to reexamine the difference in treatment for taxpayers 65 or older and those under 65.

I recognize that elderly taxpayers must file amended returns to claim the retirement income credit. This will add to the administrative problems already confronting the Internal Revenue Service. This is certainly an important consideration when tax policy is concerned, but it clearly should not have a greater priority than tax equity.

The retroactive application of the age credit will cost persons 65 or older $30 million in lost tax relief in fiscal year 1977. Most older Americans did not become aware of the harmful effects of the retroactive application of the income phaseout provisions for the elderly credit until well after the fact, when it was too late to do anything. Older Americans—especially those living on limited incomes—can ill afford to lose tax relief measures.

The National Association of Retired Federal Employees and the National Retired Teachers Association-American Association of Retired Persons strongly support the enactment of my proposal. Both associations are ready, willing, and able to assist their members in claiming the credit.

Mr. John McClelland, president of NARFE, emphasized:

Again I offer your amendment the full support of this Association. Let me further assure you that NARFE would use all its publication resources to advise our 275,000 members of your amendment and inform this group of steps necessary to utilize the option if enactment is attained.

Mr. Peter Hughes, legislative counsel for NRTA–AARP made a similar offer of assistance:

. . . our Associations will make every effort to inform those who would benefit through our News Bulletins, which have combined circulation in excess of 10 million. In addition, we shall do all we can to assist these elderly persons in filing amended returns through our tax aid program which operates nationwide and which is expected to provide tax counseling assistance to 500 thousand elderly taxpayers in the current tax filing season alone.

For these reasons, I urge the adoption of my amendment.

I offer the amendment on behalf of myself, the ranking Republican member of the Committee on Aging (Mr. DOMENICI), and 57 other cosponsors. I ask unanimous consent that the list of cosponsors be printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

COSPONSORS OF CHURCH RETIREMENT INCOME CREDIT TO H.R. 3477

Domenici, Humphrey, Clark, Stone, Williams, Abourezk, Brooke, Pell.

Eagleton, Huddleston, Leahy, Melcher, Hatfield, Kennedy, McIntyre, Eastland.

Matsunaga, Bayh, Sarbanes, Chiles, Chafee, Mathias, McGovern, DeConcini.

Heinz, Inouye, Anderson, Percy, Culver, Randolph, Javits.

Cannon, Jackson, Ford, Riegel, Glenn, Stafford, Bumpers, Weicker.

Case, Ribicoff, Thurmond, Sasser, Moynihan, Biden, Bentsen, Burdick.

Gravel, Durkin, Hart, Hayakawa, Hollings, Schweiker.

Nelson, Metcalf, Johnston, Hathaway, Zorinsky.

Mr. DOMENICI. I am pleased, Mr. President, to cosponsor amendment No. 190 with Senator CHURCH and 57 other cosponsors. This amendment would give taxpayers 65 years of age or older the option to claim for taxable year 1976 either the former retirement income credit or the new elderly credit.

Mr. President, the purpose of the amendment is to protect older persons from being penalized by the retroactive application of the elderly credit as initiated in the Tax Reform Act of 1976. This approach is similar to that adopted by the Senate Finance Committee in protecting persons entitled to the sick pay exclusion from being adversely affected by the retroactive application of the sick pay exclusion.

I believe that it is a violation of public trust to pass significant legislation which is retroactive, which disregards the taxpayers' need for a major financial adjustment. As it is, should this measure be enacted into law, elderly taxpayers earning income will be required to file revised tax returns for 1976 if they wish to take advantage of any former benefits to which they may have been entitled. I certainly appreciate the supportive pledges of Mr. McClelland, president of the NARFE, and Mr. Hughes, legislative counsel for the NRTA–AARP, to use their publications to inform their membership of this proposed change.

Mr. President, the cost of this amendment will be approximately $30 million in fiscal 1977. Obviously the cost to the National Treasury is relatively minimal when considering the individual circumstances of the estimated 165,000 low- to moderate-income pensioners who are discovering that their credit is either reduced substantially or eliminated entirely on a retroactive basis. I agree with Senator CHURCH that these individuals can ill afford a retroactive tax increase. Furthermore, the passage of this amendment would allow the Finance Committee and the Ways and Means Committee to consider alternatives for correcting some of the flaws in the 1976 Tax Reform Act concerning the new elderly credit.

So, Mr. President, I commend the distinguished senior Senator from Idaho for introducing this amendment, and it is my pleasure to be a cosponsor. I think the fact that 59 Senators have cosponsored it speaks for itself. I am not again going to go into the substantive reasons that justify this amendment. Suffice it to say that a very good lesson is learned through this legislation.

I am not one who claims to be expert, nor am I preaching, but it seems to me that to adopt retroactive tax laws is a very risky policy for this Nation at best. When you apply it to fixed income senior citizens who have been entitled to a certain credit for a number of years, then it leaves the arena of being risky and becomes a very significant deterrent to credibility on their part.

These people are not the type who can adjust their income here or there, or who can expect to make more money. They have been relying for years on a certain kind of credit that they have been entitled to under our laws. Needless to say, they are over 65 by definition, and when they begin to fill out their returns, they find all kinds of problems. If they are under 65, they got the credit, if they are over, they did not; which seems to be something very inconsistent in terms of American policy. Likewise, they went through a year planning their small investments, only to find we changed the rules of the game in midstream.

So it appears to me that while many parts of America's constituency are involved, the number of affected senior citizens is probably around 165,000 people who are going to be, and are entitled to be, chagrined and angry at us for doing this to them. Many of them have already filed their returns; as the Senator said, they will have to apply for a refund. Probably many of them will not, but they should, and I hope they will.

When we pass this amendment, I am sure the rollcall vote will indicate significant support for it, and then they will know that as soon as we found out about it and had the opportunity to change it, we did. I think that is important for these members of the American public to gain a little bit of faith and credence for the American system of government and taxation.

I thank the Senator from Idaho for yielding the floor.

Mr. CHURCH. Mr. President, may I say to the Senator from New Mexico how much I appreciate his support. This amendment would simply do equity for older people by eliminating the retroactive effect of the changes that were made in the retirement credit last year.

I think, in all fairness, Congress did not intend to impose those changes retroactively. But in several places in the bill the effective date was made January 1976 instead of January 1977. This amendment merely adopts the same formula that has already been approved by the Finance Committee in its treatment of the sick pay exclusion provisions, and the foreign earned income exclusion. In those cases, the effective date is changed to eliminate the adverse impact of the retroactive application, and we would do the same thing for the elderly.

Mr. President, it is my understanding that this amendment will be voted on at 10 minutes to 4, under the unanimous-consent order.

The PRESIDING OFFICER (Mr. TALMADGE). The Senator is correct.

Mr. CHURCH. I thank the Chair.

Mr. KENNEDY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KENNEDY. Is there a time limitation agreement?

The PRESIDING OFFICER. There is no control of time. A time certain has been agreed upon to vote, at 10 minutes to 4. The Senator may speak on his own time.

(Remarks made by Mr. KENNEDY at this point in connection with the introduction of a bill are printed in today's RECORD under statements on bills and joint resolutions.)

Mr. KENNEDY. Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ALLEN). Without objection, it is so ordered.

Mr. LONG. With reference to Senator CHURCH's amendment, I find it my duty to report that the Treasury Department is opposed to the amendment for a number of reasons. One reason is that last year, we liberalized the retirement income credit for the benefit of the overwhelming majority of people who enjoy the benefits of that provision, and the Treasury sustained a loss of $390 million as a result of liberalizing and simplifying the retirement income credit so that it would be useful to the elderly people of this country.

There were a relatively small number who were adversely affected by the Tax Reform Act's changes in the credit. Those are single people who had retirement income over $12,500 and married persons, who had retirement income over $17,500. The retirement income credit is completely phased out at those figures. It should be pointed out that what we did with the Tax Reform Act for the overwhelming majority of the elderly people, particularly those at the lower level of the income scale, was to increase it, to simplify it and also to streamline it, to their advantage.

We have no apologies to make for what we did in changing the retirement income credit last year, nor does the Treasury. The Senator from Idaho (Mr. CHURCH) and his cosponsors do make a point that, to some extent, the change was retroactive and that a relatively small number of people were adversely affected. I find some sympathy for the argument, although I must say that it will be very complicated for people to take advantage of the Church amendment. First, they will have to compute what their retirement income credit for 1976 is under the new law, which is the one that is simpler and was designed to make it easier for people to claim the credit. Then they will also have to compute what their retirement income credit would have been under the old law, which was horribly complicated. Then they will have to compare the two figures. Then they would claim—presumably—the one that would be more to their advantage. A lot of people who, hopefully, would benefit from the Church amendment will simply find it too complicated to fool around with it, because it will be necessary for them to apply for a refund. In any case, many would find it very complicated to take advantage of it and many would find that they do not benefit at all.

So the amendment does leave something to be desired. However, I am attracted by the arguments against the retroactive aspects of the changes in the credit and I may vote for the amendment myself when it comes to a vote before the Senate. I just want Members to understand that there is a Treasury Department objection to the amendment and that there is some merit to the Treasury position against this.

Mr. President, on a different subject, I point out that, contrary to what we heard or, at least, read in some of the publications of this country, the bill that is before us does contain what I believe to be very good balance.

Mr. President, I ask unanimous consent that a letter and a table explaining the breakdown of the tax reduction in this bill, and the extent to which the cut is divided between individuals and businesses be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., April 26, 1977.

DEAR COLLEAGUE: The charges that this bill before us is lopsided towards business is completely without merit. Most of the tax cuts go to individuals and even the parts that go to business are conditioned on business activity which provides jobs to individuals.

This bill contains the tax reductions as follows:

Reductions for calendar 1978 (billions)

Individuals:	
Standard deduction	$6.0
Extension of earned income credit	1.3
Extension of general tax credit	10.6
Total individual (77.2 percent)	17.9
Business:	
Investment credit	1.4
Jobs credit	1.6
Extension of small business cuts	2.3
Total business (22.8 percent)	5.3

Two-thirds of the new tax cuts in the bill ($6 billion out of $9 billion) goes to individuals through an increase in the standard deduction. This provision also involves a major simplification of the tax returns which individuals will have to file next April 15 and will increase the percentage of taxpayers who will not have to itemize their deductions to 76 percent. Eighty-one percent of this $6 billion tax cut goes to individuals with incomes below $15,000. A family of four with income of $8,000 would get a tax cut of $174.

Even without the $50 rebate, the bill provides tax relief for low and middle income individuals, simplifies the tax forms and attempts to deal with the problems of unacceptably high unemployment and inadequate business investment. The legislation deserves to be passed as quickly as possible.

Sincerely yours,

RUSSELL LONG,
Chairman, Senate Finance Committee.

Mr. LONG. The tax reductions in this bill for individuals are 77.2 percent of the reduction, and those individual tax reductions are directed toward the low- and middle-income people. For example, there is a $6 billion reduction in taxes by the simplification and the streamlining of the standard deduction. That amounts to a tax cut of $174 for a four-person family with income of $8,000. The change in the standard deduction is mainly geared to middle- and low-income taxpayers, because those are the ones who tend to use the standard deduction.

There is also a tax reduction of $1.3 billion through an extension through 1978 of the earned income credit. This entirely benefits the poor. This is a provision that I have worked for and supported for years. It makes work more attractive than welfare for the working poor.

We would like to find a way to get more low-income people to come in and apply for it. It occurs to the Senator from Louisiana that perhaps we could amend the bill so that the employer would apply for the earned income credit for the benefit of his employee, so that there would be a better prospect of the employee getting it. The way it stands now, there are altogether too many poor people, who either do not understand it or are reluctant to come in and claim it, who are not getting the benefit of the earned income credit. At any rate, Mr. President, that $1.3 billion is entirely for the benefit of poor people who have children.

The bill also contains an extension through 1978 of the general tax credit of $10.7 billion. This also helps low- and middle-income taxpayers.

Of course, two of these individual tax cuts are extensions of existing law, but they would expire in January were they not extended. Adding it all together, 77.2 percent of the tax reductions are geared to individuals, with an emphasis on low- and middle-income taxpayers, where the need for a tax cut is greatest.

Then, Mr. President, we look at the so-called business advantages in this bill. The investment tax credit would cost $1.4 billion. In order to get that, for every dollar of advantage that a businessman gets, he would have to spend $8 in buying new plant and equipment, which puts people to work. The investment tax credit thus far has proved the most effective stimulant that Congress has found, or that any President has recommended, to get the economy going and put people to work.

Some time ago, the Senator from Louisiana was asked that that provision be repealed because it seemed to be overheating the economy.

I was amazed at that time to find overwhelming protest from the labor leaders of my State because they were finding jobs in the construction trades for all their workers in the area building new plants. They were very much upset with their Senator in that he seemed to want to repeal a provision they felt, and rightly so, was playing a major part in building new plants and creating new jobs for construction labor in that area.

There is a lot to be said for the fact

that the investment tax credit provides jobs.

Now, the $1.6 billion for the jobs credit is almost entirely for small businesses. Much of it is to the little mom and pop grocery stores and small cafes, the filling stations, small businesses generally. Businesses do not get the benefit of that credit unless they hire more people and expand their payroll.

So it is not really the employer who is getting the benefit of that tax cut. It is the person he employs. In other words, by making it more attractive taxwise for a company to hire a marginal employee—someone they have not needed to that point—we estimate we can add somewhere between 200,000 and 400,000 additional jobs.

While it is listed as something to help business, the jobs tax credit is really something that is largely going to go to the benefit of those who are working.

Most of these people for whom we hope to provide jobs as a result of the jobs credit are presently drawing unemployment insurance payments. Reduced outlays for unemployment insurance and increased taxpayments by newly hired employees will offset much of the revenue lost by the jobs credit.

The revenue estimate of a loss of $1.6 billion does not take account of what we save by taking people off the rolls of the unemployed. Nor does it take into account that we will be saving money by taking people off the welfare with this provision and putting them in jobs where their families will have substantially more income, perhaps three or four times as much in working at a job, than what that family would have if it was simply living on a welfare check.

Then we have a $2.4 billion tax cut through extension of the small business corporate rate cuts.

Mr. President, one will see that of these provisions that affect business, almost $4 billion of the $5.3 billion is directed almost entirely for the benefit of small businesses, and most of that is for the purpose of prevailing on those small businesses to expand and put more people to work.

But look at it as we want to, the overall figures show that more than three-quarters of the overall tax cut goes to individuals. That which goes to individuals favors those in the low- and middle-income brackets and that part which goes to business, which is less than one-quarter, is devised in such a way that most of that benefit will go to the laboring man rather than to the employer.

In other words, if the man does not use the jobs credit provision to hire somebody, then there is to be no tax credit. So if the jobs are not created, then the jobs credit will cost practically nothing, rather than $1.6 billion.

I hope those interested in this matter will consider this fact and I hope our friends in the media will translate that in their stories and in their reports on what is happening here on the Senate floor, because this bill, regardless how we analyze it, is one for the benefit of workers who need jobs; and the benefit to business is only provided to the extent it encourages businesses to move forward and to put more people to work in the areas where jobs are needed.

In due course, Mr. President, we will be discussing this and related items in greater detail. I strongly urge Senators to support this bill and also to help us keep it, to the greatest extent we can, in a fashion such that the President will sign it.

I know of a number of meritorious amendments that could be offered which would increase the cost of the bill. In some respects, that might make it a better bill. But in doing so, they tend to imperil the bill itself. I hope that Senators will save some of their amendments along that line and be willing to offer them and have them considered in connection with the tax reform bill, which we would expect to be a very broad and inclusive bill, when that matter comes before the Senate this fall.

Mr. DANFORTH. Will the Senator yield for a discussion?

Mr. LONG. Surely.

Mr. DANFORTH. My understanding of the Senator's position is that 77.2 percent of this bill is designed to provide tax relief for individuals; is that right?

Mr. LONG. That is right.

Mr. DANFORTH. How much of that 77.2 percent is simply extensions of tax benefits for individuals found in existing law?

Mr. LONG. Let us look at it another way. If the Senator is talking about new items, we have $6 billion in individual tax cuts.

Then we have $3 billion in the investment tax credit and the jobs credit.

But again, I hasten to explain that most of the benefit of that $1.6 billion in the jobs credit, while it appears to be something that is for businesses, is actually going to be largely for the person who gets the job rather than the person who hires the worker.

So if we make that calculation, we still show a figure of three-quarters of the benefit going to the individuals.

Mr. DANFORTH. Hopefully, the purpose of the whole bill, which is supposed to be a tax stimulus bill, is to put people to work.

Mr. LONG. Exactly.

Mr. DANFORTH. Not just to confer benefits on corporations.

Mr. LONG. Exactly.

Mr. DANFORTH. But is it not a fact that, with respect to actual tax relief for individuals, only about $6 billion would be in the form of new tax relief for individuals?

Mr. LONG. That is two-thirds of the new tax cuts in the bill. But let me point out that much of the jobs credit will go to business people who are not incorporated. So while the jobs credit is listed as being something for business, it is not necessarily going to corporations.

Mr. DANFORTH. I understand.

Mr. LONG. A great many of those people are Mom and Pop grocery stores and drug stores, things of that sort.

Mr. DANFORTH. I understand. But talking about personal tax returns and the amount individuals pay in taxes, as the bill stands now, the only new relief found in it is the standard deduction?

Mr. LONG. The jobs credit, to a large extent, does help individuals.

Mr. DANFORTH. I get the Senator's point and, hopefully, it all helps individuals. But with respect to personal taxes——

Mr. LONG. But the point is that while we have the jobs credit listed under business on the sheet which I had placed on the Senator's desk, most of those businesses are not incorporated and they will report their income on individual tax returns, rather than as corporations on corporate returns. So when we talk about individuals, those are small businesses which are filing individual tax returns, rather than corporations.

Mr. DANFORTH. When we are talking about the working person, the blue collar or white collar worker, that would not be of any benefit to those people so long as they are emplyed.

Mr. LONG. It would be a lot of benefit to them in getting a job.

Mr. DANFORTH. But I mean that as to a person who is employed, a person who is now on the tax dollars, the only benefit is in the form of the change in the standard deduction. Is that not right?

Mr. LONG. With the qualification that I explained, it is correct.

Mr. DANFORTH. I understand the qualification.

It is true, is it not, that there are approximately 1.7 million people who actually will have their taxes increased by this bill if a permanent tax cut is not added to it?

Mr. LONG. Yes, but that is a part of an adjustment to reduce the marriage penalty. Insofar as that results in a somewhat greater tax on a relatively small number of single people, who are not low-income people by any means, that is balanced by a greater tax cut for the married couples with children.

Mr. DANFORTH. But as to single taxpayers with adjusted gross income of $13,750 or more a year, their taxes are going to be increased.

Mr. LONG. The Senator is talking about the relatively high income single taxpayers.

Mr. DANFORTH. $13,750 is not too high in this day and age.

Mr. LONG. It certainly is a long way from poverty, and that much income would compare to $27,500 for a couple.

People may differ, but in my judgment it does not make any sense at all to say that two people, living together under the same roof, if married, get only $3,200 of standard deductions, but if they are not married, they get $4,800 of standard deductions—$1,600 more. That would be the effect of keeping the standard deduction for single people of $2,400. In my judgment, that would be an unwarranted discrimination against people because they do what society wants them to do—that is, to formalize their relationship with a marriage contract which imposes obligations and duties upon both parties that the law will respect.

Mr. DANFORTH. But is it not so that the difference between the bill as it now reads, as it came from the Finance Committee, and the amendment that is of-

fered by Senator JAVITS and me is that in both versions we deal with the question of the so-called marriage penalty to the same extent? But in the bill as it now reads, approximately 1.75 million people who are single, with adjusted gross income of $13,750 or more a year, are going to be paying more taxes next year than they paid this year; whereas, under the Javits-Danforth proposal, their taxes will be cut as well.

Mr. LONG. The Senator is talking about a relatively small number of people. I make no apologies for that.

If we are going to have tax reform, we must have the courage to bite the bullet about some of these things, even the differences between the tax advantage for single people and the tax advantage for married people, on what we believe to be a fair basis.

It has been my experience that moral courage is the scarcest commodity among politicians. I have known men in the service who would have the courage to march right into the mouth of an enemy cannon but who did not have the courage to vote for something in politics for fear they might be misunderstood, for fear they might have to explain it to somebody.

In my judgment, it does not make any sense to say that two people, both of them having income and living together, would have the advantage of 50 percent more deductions, in the event that those people avoid formalizing their relationship with a marital contract and have children born out of wedlock, rather than do what society would like them to do, to accept the duties and obligations implicit in a man and woman seeking to live together, to make a life together, and to bring up a family together.

This matter was discussed on a nationwide television program, 60 Minutes, and very few people try to defend it.

Admittedly, a single person making more than $13,750 might pay another dollar or two in taxes, but that is nothing compared to the injustice we would be doing to married people by doing it the other way.

Some say that a politician cannot vote to increase anybody's taxes on any basis. If you believe that, and try to correct the marriage penalty by raising the standard deduction for married couples up to where they have the same tax treatment as single people, it would cost several billion dollars. Under the bill proposed by the Finance Committee, it costs a few hundred million dollars in one case to alleviate the marriage penalty by simply making a modest increase in the taxes paid by a few single people making $13,750 or more. I think that is a situation in which we cannot afford the revenue loss involved in alleviating the marriage penalty in a way that reduces everybody's taxes.

It is this Senator's judgment, the Treasury's judgment, and the President's judgment that we should face up to the fact that tax reform means that some people who are getting the best of it will have to pay a little more while other people get a tax cut.

Mr. DANFORTH. People who make $13,750 a year or more are hardly the privileged few, are they? They tend to be younger people, starting out in life.

Mr. LONG. But a single person making $13,750, as the Senator knows, is a great deal better off than a couple making that amount of money.

At some point, if we are going to have tax reform, we will have to vote for some provisions that some people in middle income brackets might find a little obnoxious. The House had the courage to do that. Last year we handled the matter of sick pay.

If we want the Internal Revenue Code to make sense and if we want to have uniform justice, in my judgment, some of us will have to stand up and vote for what we think is right, even if it is not entirely popular with everybody.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MATSUNAGA. Mr. President, I rise in full support of the amendment proposed by the distinguished chairman of the Special Committee on Aging the Senator from Idaho (Mr. CHURCH). Moreover, I am pleased to cosponsor his amendment to H.R. 3477 which would enable elderly taxpayers, aged 65 years or older, to have the option of claiming either the former retirement income credit or the new "senior citizen" tax credit for the taxable year 1976. This measure is needed to protect millions of older persons from the sudden impact of the retroactive application of the new elderly tax credit in the 1976 tax year.

Mr. President, the "tax break" for the middle-income taxpayer and the credit for the elderly have resulted in higher tax payments for the year 1976 than it did in 1975 for millions of elderly, age 65 or over. Compounded by the loss of retirement income credit and reduced cost-of-living adjustments, this leaves the retiree, especially those over the age of 65, without any edge against inflation. This kind of tax break the elderly can ill afford.

The 1976 Tax Reform Act replaced the retirement income credit with a new credit for older Americans, which is computed according to age and income standards. This new credit for the elderly may be claimed if a taxpayer is age 65 or older, or is under 65 and receives a pension or annuity from a public retirement system.

The act, signed into law in October 1976, effected significant changes which are retroactively applicable to the taxable year beginning January 1976. Many moderate-income taxpayers 65 years of age or older, with pensions ranging from $10,000 to $17,500 have found very little tax relief from the new senior citizen credit.

In fact, they are discovering that their credit is either reduced considerably or eliminated entirely because of the income phaseout included in the 1976 Tax Reform Act. But, if these individuals were under 65, their credit would equal or exceed the tax relief under the pre-1976 retirement income credit. We are rewarding recent early retirees and penalizing senior citizens retired for several years whose incomes are being steadily eroded by inflation.

Elderly taxpayers, 65 or older, are presently entitled to a credit of 15 percent of the initial amount of income, which includes retirement income, earned income, and investment income, up to specified ceilings. This maximum amount must be reduced by the amount of social security and certain other tax-exempt income the elderly taxpayer receives. Moreover, this credit is further reduced by part of his adjusted gross income. This is because the maximum base for computing the credit is decreased by $1 for every $2 by which a single taxpayer's adjusted gross income exceeds $7,500 or $10,000 for a married couple filing a joint return. Consequently, the elderly tax credit is phased out entirely for a single person with an adjusted gross income of $12,500, and for an elderly couple with an adjusted gross income of $17,500, making them ineligible for the new credit.

This adjusted gross income phaseout does not apply, however, to taxpayers under age 65, who receive a pension or annuity under a Federal, State, or local retirement system. Persons under age 65 are presently entitled to a 15-percent credit on retirement income, up to $2,500 for single taxpayers, and $3,750 for married couples filing jointly. While this maximum amount is reduced by tax-exempt retirement benefits and earnings, there is no additional adjustment income phaseout.

Mr. President, the most crucial concern of senior citizens is financial security. The elderly, especially those over 65, find themselves unprepared to meet the tax demands of the new provisions in the 1976 Tax Act. We need to assure them time and assistance to prepare to meet their new tax obligations. I therefore urge that we cushion this tax impact by voting "aye" on the amendment offered by Senator CHURCH. It would enable taxpayers, age 65 and over, to have the choice of claiming the old retirement income credit or the new elderly credit for 1976.

I say to the distinguished chairman of the Committee on Finance that all that the Church amendment is striving to do is give the elderly—65 and over—another year. As the Senator well knows, the Tax Reform Act of 1976 did not come into being until October of that year; and the elderly—65 and over—had no real notice of the change in the tax system.

Mr. LONG. Mr. President, after explaining my position with regard to the Church amendment, I explained that I thought that the bill was a better balanced bill than some people in the media understood, and the discussion wandered away from the Church amendment to other matters.

Mr. MATSUNAGA. Yes.

Mr. LONG. I am not asking the Senator to vote against the Church amendment.

Mr. MATSUNAGA I heard the Senator's remarks earlier.

I feel that because under the Finance Committee bill we are not affecting retirees below 65 and we are giving different treatment only to those 65 and over, we at least should give them the option

of choosing between the old and the new for this tax year.

Mr. THURMOND. Mr. President, I rise today in support of Senator CHURCH's amendment No. 190, to the Tax Reduction and Simplification Act of 1977. This amendment will give to taxpayers 65 or older the option to claim for taxable year 1976 either the former retirement income credit or the new elderly credit. I am pleased to cosponsor this measure.

Unfortunately, there were a number of sections of the Tax Reform Act of 1976 which had adverse retroactive application. A great number of taxpayers were caught unprepared for greatly increased tax burdens as they had no notice of impending changes. Changes in tax laws are to be expected, but the retroactive application of them is grossly unfair.

In the instance of the new credit for the elderly, the retroactive application of this measure has a serious detrimental effect on our taxpaying senior citizens. This amendment very simply would allow that for this one taxable year, 1976, those who qualify for the new credit may opt to be taxed under the old retirement credit. They may file an amended return or file for a refund.

Mr. President, I strongly support this amendment and urge my colleagues to consider it favorably.

CREDIT FOR THE ELDERLY

Mr. WILLIAMS. Mr. President, I am delighted to have this opportunity to express my full support for this amendment which would make the new credit for the elderly apply more equitably.

The 1976 Tax Reform Act replaced the former retirement income credit with a new credit for the elderly. Under the provisions of the 1976 Act, those aged 65 or more are allowed a 15 percent tax credit on all types of income up to a maximum base amount of $2500 for single individuals and $3750 for married couples filing joint returns in instances where both partners are aged 65 or older. These base amounts are reduced dollar for dollar by tax exempt income such as social security and railroad retirement benefits. In addition, an adjusted gross income phaseout was established in order to limit the credit to lower and moderate income persons. This phaseout provision requires that the amounts on which the credits are based must be reduced by $1 for each $2 of adjusted gross income above $7500 for single persons, and $10,000 for married couples filing joint returns. Thus single persons aged 65 or above with adjusted gross incomes above $12,500 and married couples filing joint returns with adjusted gross incomes above $17,500 are ineligible for the credit.

Under the Tax Reform Act of 1976, these revisions in the tax code were to apply to taxable year 1976. As a result, many of our elderly citizens are finding that their tax obligations for last year are substantially higher than they had expected due to the operation of the adjusted gross income phaseout. For some these tax increases will cause great financial hardship.

The amendment before us would allow taxpayers aged 65 and over to choose between the former retirement income credit or the new credit for the elderly for taxable year 1976. This adjustment to the tax code would protect many elderly from unfair, retroactive tax increases. The Senate took similar action when it recently voted unanimously to remove the retroactive features of the changes made in the sick pay exclusion.

Mr. President, I believe that this is a fair and very necessary amendment and I urge its adoption.

The PRESIDING OFFICER. The hour of 3:50 having arrived, under the previous order, the Senate will proceed to vote on amendment No. 190 by Mr. CHURCH, and others.

The question is on agreeing to the amendment of the Senator from Idaho.

The yeas and nays have been ordered, and the clerk will please call the roll.

The assistant legislative clerk called the roll.

(At this point Mr. RIEGLE and then Mr. CULVER assumed the chair.)

Mr. CRANSTON. I announce that the Senator from Maine (Mr. HATHAWAY) is necessarily absent.

Mr. STEVENS. I announce that the Senator from Indiana (Mr. LUGAR) is necessarily absent.

The result was announced—yeas 97, nays 1, as follows:

[Rollcall Vote No. 106 Leg.]

NOT VOTING—2

Hathaway Lugar

So Mr. CHURCH's amendment was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President——

The PRESIDING OFFICER. Will the majority leader kindly suspend? The Senate is not in order, and proceedings will be suspended until order is restored.

The Senate will be in order.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BENTSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from West Virginia was seeking recognition.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, at the request of Mr. HOLLINGS and Mr. THURMOND, I ask unanimous consent that the Senate go into executive session for 1 minute to consider the nomination of the U.S. marshal for South Carolina, which was reported unanimously today by the Committee on the Judiciary.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF JUSTICE

The legislative clerk read the nomination of Andrew J. Chishom, of South Carolina, to be U.S. marshal for the district of South Carolina.

Mr. HOLLINGS. Mr. President, I would like to thank my colleagues on the Judiciary Committee for their very prompt action in sending to the floor today the nomination of Mr. Andrew J. Chishom as U.S. Marshal for South Carolina.

As the member primarily interested in Mr. Chishom's appointment, I urge the Senate's speedy confirmation of this nomination.

By every yardstick, Mr. Chishom is superbly qualified for the position of U.S. Marshal, and he has the full support of every member of my State's Congressional delegation and his peers in South Carolina.

Mr. Chishom is a leading expert in the field of criminology, holding an undergraduate degree in that course of study from the University of Maryland and a master's and doctorate in correctional rehabilitation from the University of Georgia. He has put that education to superb practical use—especially in South Carolina.

In his capacity as chairman of the board of the Community Organization for Drug Control in Greenville, S.C., in 1970 and 1971, he established the first drug treatment unit in my State and worked with all segments of the society in solving drug-related problems. At the same time, Mr. Chishom was actively involved in the recruitment, training and employment of minority representatives in the building and construction industry as a field director of the labor education advancement program of the National Urban League.

Mr. Chishom's involvement and concern earned him the honor of "Outstanding Citizen" by the Greenville City Council and the observance of "Andy Chishom Day" there.

It is important to point out, I think, that Mr. Chishom has been involved at the street level in the problems of crime and law enforcement. He began his career with the community relations division of the Washington Metropolitan Police Department in 1968 and developed a program in high crime areas to promote

better relations between police officers and citizens.

He served on the staff of Gov. John C. West in South Carolina in 1972 as coordinator of the correctional master plan study which was designed to collect data on county and State prisons so as to improve conditions and operations. Mr. Chishom has also served as a consultant to the States of South Carolina and Georgia and the Federal Law Enforcement Assistance Administration in various civil rights, minority enterprise and correctional roles. At the time of his nomination as U.S. Marshal, Mr. Chishom was serving as an assistant professor in the Department of Criminal Justice at the University of South Carolina.

I think my colleagues can determine from this very brief description that Mr. Chishom is a distinguished choice for the position to which he has been nominated by the President and that he will bring solid expertise and real experience to the office. South Carolina and the Nation are fortunate that a person such as Andrew Chishom wants to serve and that he can do so in an effective way.

I thank the Senate for its attention to this matter.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objction, it is so ordered.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The Senate continued with the consideration of the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

Mr. DECONCINI. Mr. President, I ask unanimous consent that Jerry Bonham, of my staff, be granted the privilege of the floor during the consideration and votes on the bill H.R. 3477.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSFER OF CERTAIN MEASURES TO UNANIMOUS CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two measures on the General Orders Calendar that have been cleared for passage by unanimous consent. They are Calendar Orders 80 (H.J. Res. 16) and 81 (H.J. Res. 40). I ask that the clerk refer them to the Unanimous Consent Calendar.

The PRESIDING OFFICER. They will be so transferred.

SUPPLEMENTAL HOUSING AUTHORIZATION—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I have been requested by the distinguished senior Senator from Wisconsin (Mr. PROXMIRE) to call up a conference report on H.R. 3843. I understand it has been cleared on the other side of the aisle.

Mr. President, I submit a report of the committee of conference on H.R. 3843 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated by title.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3843) to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

EARLY AND LATE SESSIONS DURING REMAINDER OF WEEK

Mr. ROBERT C. BYRD. Mr. President, there will be no more votes today. I should say, however, that it is anticipated that the Senate will be in tomorrow, Thursday, and Friday early and late; that there will be rollcall votes daily tomorrow, Thursday, and Friday on the tax bill and on other matters which may be cleared for action by that time.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, with no resolutions coming over under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

At 2:25 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its clerks, announced that the House has passed without amendment the following bill and joint resolution:

S. 385. An act to name a certain Federal building in Grand Rapids, Mich., the "Gerald R. Ford Building"; and

S.J. Res. 44. A joint resolution to authorize the printing and binding of an edition of Senate Procedure and providing the same shall be subject to copyright by the author.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the enrolled bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes.

The enrolled bill was subsequently signed by the President pro tem pore.

At 3:48 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the following bills and agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H.R. 5638. An act to amend the Fishery Conservation Zone Transition Act in order to give effect during 1977 to the Reciprocal Fisheries Agreement between the United States and Canada;

H.R. 5675. An act to authorize the Secretary of the Treasury to invest public moneys, and for other purposes;

H.R. 5970. An act to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes;

H.R. 6370. An act to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential appointment to the Chairman and Vice Chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes; and

H. Con. Res. 162. A concurrent resolution providing for the printing of 20,000 additional copies of the subcommittee print of the Subcommittee on Consumer Affairs of the Committee on Banking, Finance, and Urban Affairs entitled "Give Yourself Credit: Guide to Consumer Credit Laws."

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–1213. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, notice of the intent to obligate $72.7 million of funds available in the DoD Stock Fund for war reserve inventory for the Defense Logistics Agency (with an accompanying report); to the Committee on Appropriations.

EC–1214. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Implementation of Emergency Loan Guarantee Act" (PSAD–77–101) (with an accompanying report); to the Committee on Banking, Housing and Urban Affairs.

EC–1215. A letter from the Secretary of Commerce transmitting, pursuant to law, the Annual Report of the Secretary of Commerce for the fiscal year ended June 30, 1976, and the transition quarter ended September 30, 1976 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1216. A letter from the Chairman of the U.S. Consumer Product Safety Commission transmitting, pursuant to law, a copy of the

Commission's letter to the Director of Office of Management and Budget regarding H.R. 2482, a bill to regulate commerce by establishing national goals for the effective, fair, inexpensive, and expeditious resolution of controversies involving consumers, and for other purposes (with accompanying papers); to the Committee on Commerce, Science, and Transportation.

EC-1217. A letter from the Chairman of the Board of Trustees of the Public Defender Service for the District of Columbia transmitting, pursuant to law, the annual report of the Public Defender Service Board of Trustees for fiscal year 1976 (with an accompanying report); to the Committee on Governmental Affairs.

EC-1218. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, the monthly report on gasoline service station market shares for the month of December 1976 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-1219. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report on the confusion and uncertainty as to the need for and use of Air Launched and Tomahawk Cruise Missile Programs (PSAD-77-36) (with an accompaning report); to the Committee on Governmental Affairs.

EC-1220. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "New Approach Needed To Control Production of Major Crops if Surpluses Again Occur" (CED-77-57) (with an accompanying report); to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Human Resources:

With an amendment:

H.R. 4975. An act to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs (title amendment) (Rept. No. 95-102).

Mr. KENNEDY. Mr. President, I submit the committee report on H.R. 4975, the extension of our major health care programs for a period of 1 year. This is an extremely important measure.

We have had a number of different recommendations and suggestions from various groups. All have pretty well agreed that they would withhold their recommendations until later in the year when we will begin a very extensive examination of the whole series of extensions of the Public Health Service Act. This involves our planning legislation; it involves the NIH legislation, the cancer control, heart disease, and lung legislation, the basic extensions of the Public Health Service Act. We wanted to give the new administration the opportunity to examine these pieces of legislation and coordinate to the extent necessary with their approaches on health care generally.

It seems to me to be a wise way to proceed. It has the active support of the administration and the other interested groups. I am hopeful we can consider that extension legislation at an early time in the Senate calendar.

The PRESIDING OFFICER. The report will be received and printed.

By Mr. SPARKMAN, from the Committee on Foreign Relations:

With amendments:

S. Res. 94. A resolution entitled "International Cooperation To Curb Nuclear Proliferation (Rept. No. 95-103).

By Mr. STEVENSON, from the Committee on Banking, Housing and Urban Affairs:

With an amendment:

S. 69. A bill to amend and extend the Export Administration Act (title amendment) (Rept. No. 95-104).

SUPPLEMENTAL HOUSING AUTHORIZATION ACT OF 1977—H.R. 3843—CONFERENCE REPORT

Mr. PROXMIRE. Mr. President, I am submitting at this time a conference report on H.R. 3843, the Supplemental Housing Authorization Act of 1977.

Title I of this act would authorize additional funds for housing assistance for lower income Americans in fiscal year 1977; would extend section 8 assisted housing contract terms from the present 20 years to 30 years with respect to privately developed, newly constructed housing units; would extend Federal riot reinsurance and crime insurance programs to September 30, 1978; and would increase, to $1.341 billion, authorizations to cover losses incurred by the FHA insurance fund. In addition, title I also amends miscellaneous provisions relating to mortgage insurance programs and increases authorizations for HUD's very successful urban homesteading demonstration program.

Title II of the act would authorize the creation of a National Commission on Neighborhoods, comprised of 20 members representing local government officials, elected officers of recognized neighborhood groups, other outstanding individuals from fields such as finance, business, education, civic affairs, and the Congress. The establishment of a nongovernmental commission will provide the Nation with a unique opportunity to examine, in depth, the ways in which public and private policies affect our Nation's neighborhoods. The commission would be charged with the responsibility for developing policy recommendations that would result in a comprehensive and coordinated strategy for revitalizing our urban neighborhoods that are threatened by urban decay.

The conference report does not contain two provisions which were in the Senate bill. The first provision would have amended the Emergency Homeowners' Relief Act to add a congressional finding that—

Severe localized economic distress caused by the legal claims of the Mashpee Tribe in Mashpee, Massachusetts, may require the furnishing of assistance under this Act to avoid mortgage foreclosures and distress sales resulting from the temporary loss of employment and income.

The second provision would have provided that assistance under the act could be made available if a mortgagor's involuntary unemployment or underemployment is the result of adverse local, as well as national, economic conditions.

The conferees agreed that alternative legislative means would be found to address the problems arising out of the legal claims of the Mashpee Indians during consideration by the House and Senate of fiscal year 1978 housing and community development act authorizations.

Mr. President, the Senate conferees believe that this bill will greatly improve the administration of various HUD programs, increase the supply and availability of federally assisted housing for needy families, and, in the creation of the National Commission on Neighborhoods, lead to more rational and realistic policies for revitalizing neighborhoods.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PROXMIRE, from the Committee on Banking, Housing, and Urban Affairs:

John Lovell Moore, Jr., of Georgia, to be President of the Export-Import Bank of the United States.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. MAGNUSON, from the Committee on Commerce, Science, and Transportation:

Frank Alan Weil, of New York, to be an Assistant Secretary of Commerce.

Charles Linn Haslam, of North Carolina, to be General Counsel of the Department of Commerce.

Elsa Allgood Porter, of Virginia, to be an Assistant Secretary of Commerce.

Jordan J. Baruch, of New Hampshire, to be an Assistant Secretary of Commerce.

Langhorne McCook Bond, of Illinois, to be Administrator of the Federal Aviation Administration.

Quentin Saint Clair Taylor, of Maine, to be Deputy Administrator of the Federal Aviation Administration.

Frank Press, of Massachusetts, to be Director of the Office of Science and Technology Policy.

The following officers of the U.S. Coast Guard for promotion to the grade of rear admiral:

Thomas T. Wetmore III

Benedict L. Stabile

Raymond H. Wood

The following-named captain of the Coast Guard Reserve to be a permanent commissioned officer in the Coast Guard Reserve in the grade of rear admiral:

Olin A. Lively

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. EASTLAND, from the Committee on the Judiciary:

Andrew J. Chishom, of South Carolina, to be U.S. marshal for the district of South Carolina.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. WILLIAMS, from the Committee on Human Resources:

Wayne L. Horvitz, of the District of Co-

lumbia, to be Federal Mediation and Conciliation Director.

Graciela (Grace) Olivarez, of New Mexico, to be Director of the Community Services Administration.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 5638. An act to amend the Fishery Conservation Zone Transition Act in order to give effect during 1977 to the Reciprocal Fisheries Agreement between the United States and Canada; to the Committee on Commerce, Science, and Transportation.

H.R. 5970. An act to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

H.R. 6370. An act to authorize appropriations to the International Trade Commission for fiscal year 1978, to provide for the Presidential appointment of the chairman and vice chairman of the Commission, to provide for greater efficiency in the administration of the Commission, and for other purposes; to the Committee on Finance.

H.R. 5675. An act to authorize the Secretary of the Treasury to invest public moneys, and for other purposes; jointly, by unanimous consent, to the Committee on Banking, Housing and Urban Affairs, and the Committee on Finance.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was referred to the Committee on Rules and Administration:

H. Con. Res. 162. A concurrent resolution providing for the printing of twenty thousand additional copies of the subcommittee print of the Subcommittee on Consumer Affairs of the Committee on Banking, Finance, and Urban Affairs entitled "Give Yourself Credit: Guide to Consumer Credit Laws".

JOINT REFERRAL OF A BILL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent—and this has been cleared with the Senator from Louisiana (Mr. LONG), the Senator from Wisconsin (Mr. PROXMIRE), and the minority leader—that when H.R. 5675 is received from the House of Representatives, it be jointly referred to the Committees on Banking, Housing, and Urban Affairs, and Finance.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. MCCLELLAN (for himself, Mr. BARTLETT, Mr. ROBERT C. BYRD, Mr. CANNON, Mr. DECONCINI, Mr. DOLE, Mr. DOMENICI, Mr. EASTLAND, Mr. GARN, Mr. GOLDWATER, Mr. HATCH, Mr. HAYAKAWA, Mr. HELMS, Mr. JOHNSTON, Mr. LAXALT, Mr. MCCLURE, Mr. ROTH, Mr. SCOTT, Mr. THURMOND, and Mr. ZORINSKY):

S. 1382. A bill to establish rational criteria for the imposition of the sentence of death, and for other purposes; to the Committee on the Judiciary.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 1383. A bill to amend the Employee Retirement Income Security Act of 1974 to clarify the status of the Hawaiian prepaid health care law under title I and title IV of such Act; to the Committee on Human Resources.

By Mr. JAVITS:

S. 1384. A bill to amend the Internal Revenue Code of 1954 to allow a tax credit for certain contributions of literary, musical, or artistic compositions; to the Committee on Finance.

By Mr. HELMS:

S. 1385. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for services furnished by physician extenders; to the Committee on Finance.

By Mr. RANDOLPH (for himself and Mr. ROBERT C. BYRD):

S. 1386. A bill to provide the Corps of Engineers with continuing authority to provide technical assistance to States and political subdivisions thereof in the planning, design, and preparation of specifications for snagging and clearing projects in navigable streams and tributaries thereof; to the Committee on Environment and Public Works.

By Mr. RANDOLPH (for himself, Mr. ROBERT C. BYRD, Mr. FORD, and Mr. HUDDLESTON):

S. 1387. A bill to authorize necessary flood protection at locations in Kentucky and West Virginia on an expedited basis; to the Committee on Environment and Public Works.

By Mr. METCALF:

S. 1388. A bill to reaffirm the right of State education agencies and school districts to expend funds appropriated for school construction and other purposes under the Indian Self-Determination and Education Assistance Act; to the Select Committee on Indian Affairs.

By Mr. GRAVEL:

S. 1389. A bill for the relief of Louis Ike Ogbogu; to the Committee on the Judiciary.

By Mr. PELL:

S. 1390. A bill to amend section 8332(b) of title 5, United States Code, in order to authorize certain national guard employment to be credited for civil service retirement purposes; to the Committee on Governmental Affairs.

By Mr. KENNEDY (for himself, Mr. HATHAWAY, and Mr. ANDERSON):

S. 1391. A bill to establish a transitional system of hospital cost containment by providing for incentives and restraints to contain the rate of increase in hospital revenues, to establish a system of capital allocation designed to encourage communities to avoid the creation of unneeded and duplicative hospital facilities and services, to provide for the publication and disclosure of information useful to the public in making decisions about health care, to provide for the development of permanent reforms in hospital reimbursement designed to provide incentives for the efficient and effective use of hospital resources, and for other purposes; jointly, by unanimous consent, to the Committee on Finance and the Committee on Human Resources.

By Mr. RIBICOFF (for himself, Mr. HATHAWAY, and Mr. KENNEDY):

S. 1392. A bill to strengthen and improve the early and periodic screening, diagnosis, and treatment program and for other purposes; to the Committee on Finance.

By Mr. BAYH:

S. 1393. A bill to authorize actions by the Attorney General to redress deprivations of constitutional and other federally protected rights of institutionalized persons; to the Committee on the Judiciary.

By Mr. NELSON:

S. 1394. A bill to amend the Arms Export Control Act to require the President to provide certain information to the Congress with respect to any proposed major arms sales to a country which is not a member of the North Atlantic Treaty Organization and to provide the Congress with thirty days of continuous session in which to disapprove proposed arms sales; to the Committee on Foreign Relations.

S. 1395. A bill to amend the Arms Export Control Act to provide the Congress with an opportunity to disapprove proposed transfers from the recipient country to another country of defense articles or related training or other defense services supplied by the United States; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MCCLELLAN (for himself, Mr. BARTLETT, Mr. ROBERT C. BYRD, Mr. CANNON, Mr. DECONCINI, Mr. DOLE, Mr. DOMENICI, Mr. EASTLAND, Mr. GARN, Mr. GOLDWATER, Mr. HATCH, Mr. HAYAKAWA, Mr. HELMS, Mr. JOHNSTON, Mr. LAXALT, Mr. MCCLURE, Mr. ROTH, Mr. SCOTT, Mr. THURMOND, and Mr. ZORINSKY):

S. 1382. A bill to establish rational criteria for the imposition of the sentence of death, and for other purposes; to the Committee on the Judiciary.

(The remarks of Mr. MCCLELLAN and other Senators on the introduction of the above bill are printed earlier in today's RECORD.)

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 1383. A bill to amend the Employee Retirement Income Security Act of 1974 to clarify the status of the Hawaiian prepaid health care law under title I and title IV of such act; to the Committee on Human Resources.

Mr. INOUYE. Mr. President, today I am introducing along with my colleague, Senator SPARK MATSUNAGA, legislation to specifically insure that the State of Hawaii's Prepaid Health Care Act will be exempted from the preemption provision of the Employee Retirement Income Security Act of 1974—ERISA.

In June of 1974 the State of Hawaii became the first State in our Nation to

enact a comprehensive scheme of mandatory employee health insurance. This statute required employers in the private sector to provide a minimum health benefit package to those regular employees who worked at least 20 hours a week. The minimum benefit package has been expanded and today it includes various medical and hospital benefits, such as maternity and mental health care, as well as treatment of illnesses resulting from alcoholism and substance abuse. By law, the maximum contribution by the individual employee may only be 1.5 percent of his wages. The Hawaii statute is not applicable when collective bargaining agreements provide for health benefits, and its provisions terminate upon the enactment of a national health insurance program.

It has recently come to my attention that the U.S. Department of Labor has taken the position that under the current statutory language of ERISA, the Hawaii Prepaid Health Care Act must be preempted with respect to those employers who are engaged in commerce, or in an industry or activity affecting commerce. The primary purpose behind the passage of ERISA was clearly not the enactment of a national health insurance program and accordingly, ERISA does not establish standards that are in any way comparable to Hawaii's statute. The legislation which I am introducing today would specifically modify ERISA so as to provide that health insurance laws such as Hawaii's would be treated in the same manner as disability insurance laws, worker's compensation laws, and unemployment compensation laws, and thereby be excluded from preemption.

It would be most tragic if what is perhaps the most progressive and comprehensive statewide health insurance program in our Nation was placed in jeopardy due to an inadvertent legislative oversight in drafting ERISA.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1383

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (3) of section 4(b) of the Employee Retirement Income Security Act of 1974 is amended by striking out "or unemployment compensation or disability insurance laws" and inserting in lieu thereof the following: ", or unemployment compensation laws, or disability or health insurance laws".

By Mr. JAVITS:

S. 1384. A bill to amend the Internal Revenue Code of 1954 to allow a tax credit for certain contributions of literary, musical, or artistic compositions; to the Committee on Finance.

Mr. JAVITS. Mr. President, I am introducing a bill to provide a tax credit for artists who contribute their original work to nonprofit organizations such as museums, libraries, and universities. While there is not a great deal of revenue loss to the Government, this is an important amendment for the institutions in our country which make it possible for the general public to enjoy the pleasures of viewing great works of art.

The bill provides a tax credit equal to 30 percent of the fair market value of an artistic work contributed by the artist to a tax-exempt organization such as a museum, library, or university. The amount of the credit may not exceed the amount of any tax on the income of the artist attributable to the sale of artistic works. Additionally, the credit cannot exceed the greater of: First, the artist's tax liability if it is not in excess of $2,500; or, second, 50 percent of the artist's tax liability. A last limitation is that no credit shall be allowed for any artistic work which exceeds $35,000 in value. If the credit is in excess of the limitations for any taxable year the excess may be carried over for the next 5 succeeding taxable years.

The bill also contains a prohibition against the credit being used for papers or similar property prepared by or for an individual during such time as that individual is holding public office.

The provisions of this bill are identical to those of an amendment I offered to the Tax Reform Act of 1976 which was agreed to by the Senate but which was not included in the final version of the tax bill enacted into law. A similar bill, H.R. 439, has been introduced in the House by Congressman ED KOCH of New York.

Mr. President, the basic reason for the bill is that the universities, libraries, and museums of the country are suffering from an existing provision of law which dates from 1969. Before 1969, the law was general and broad. If an artist gave his work to a museum, the value of that work was a gift, just like any other gift.

In 1969, the tax code was amended so that the artist was deprived of that opportunity. All a painter could deduct was the cost of his canvas and paint. But the collector was not deprived of that opportunity. If he were a buyer of art and the value appreciated—let us say he bought a painting for $500 and it became worth $50,000—he could give that to a museum and get a full $50,000 charitable deduction, and he can do that today. So the law discriminated as between the man or woman who did the work and the person who acquired such a work, even if he acquired it from that very same artist.

Another anomaly in the law was if that artist died and his estate had to be valued for tax purposes, his estate had to pay an estate tax on the full value, not on the value of the paint and the canvas but on the full value.

There is not much revenue loss involved. The estimate of the Treasury Department on my bill is about $5 million a year. It is an order of magnitude that, obviously, they cannot calculate exactly. But the consequences of this proposal of the American people are very great. Let me just describe what has happened.

The museums have suffered a drastic dimunition of gifts from artists, particularly those who have done contemporary work within this very same period from 1969 until today. I believe most of my colleagues have heard from museums precisely for that reason.

Let me give an example of the New York City Museum of Modern Act, one of the great museums of the country. During the 2-year period, 1968–69, the New York City Museum of Modern Art received 125 donations by artists of their own works. In the 4-year period, 1972–75, the museum received only 28 donations. In the critical and very valuable field of painting and sculpture, the reduction was from 42 works of art received in 1968 and 1969, to only one received in 1972–75.

The artists feel very strongly about this as evidenced from a very interesting point. The National Endowment on the Arts, which we established, and I am very proud to have been one of its initiators, wrote a letter to Senator LONG on April 29, 1976, stating these very considerations which I have described while commenting on an earlier version of this bill.

I ask unanimous consent that that letter may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 29, 1976.

Hon. RUSSELL B. LONG,
Chairman, Committee on Finance, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The National Endownment for the Arts strongly recommends favorable consideration of S. 1435, the bill pending before your Committee which relates to the tax consequences of charitable contributions by creative artists and others of literary, musical, and artistic compositions, and similar property.

The bill under consideration would enable an artist to deduct from his adjusted gross income 75 percent of the fair market value of his works which he contributes to nonprofit institutions. Such legislation would restore part of the deduction available to creative artists prior to passage of the Tax Reform Act of 1969. (Of course, the Endowment would prefer to see the full deduction, i.e., 100 percent of the work's fair market value, restored.) The restoration of this deduction, far from being a windfall to individual artists is, in our view, an essential measure which must be taken in order to rectify the inequities existing under present law.

As you know, certain tax benefits attend the transfer, sale, or contribution of a capital assets. Under the Tax Reform Act of 1969, however, Section 1221 of the Internal Revenue Code of 1954 was amended to exclude from the definition of a capital assets (and therefore from the tax advantages) a copyright, literary, musical or artistic composition, a letter or memorandum, or similar property when any of the above are in the hands of the taxpayer whose personal effects created the property. Thus, in accordance with Section 170(e) of the Internal Revenue Code, when a taxpayer-creator donates one of his works to a non-profit institution, the allowable deduction is computed by reducing the fair market value of the work by the amount of the appreciation of such property. As a result, the artist may deduct from his adjusted gross income only the cost of the materials utilized to create the work. However, in the hands of a collector or one who procures a work of art from the creator the work is characterized as a capital asset and the collector who contributes the same work to a non-profit institution enjoys the benefits of deducting a portion of the fair market value of the work from his adjusted gross income.

The pending legislation, by affording the creative artist the same benefits as the purchaser/collector, would rectify the inequities which exist under the present law. The present distinction in the tax benefits available to donors of creative works based upon the donor's status as either a purchaser and collector on the one hand, or, on the other, a creative artist, is, in our view, contrary to the basic concept of equal treatment under the law. In any case, once the work is received by the donee/non-profit institution it is considered a capital asset regardless of the status of the donor. Therefore, we believe that the law as presently written could be viewed as having an unconstitutional taint in that it creates two classes of donors and applies to each separate and unequal treatment without justification.

The arbitrary treatment of the creative artist continues to affect the artist's estate after his death. Ironically (and unfairly), while he is entitled to deduct only the value of the utilized materials in cases of charitable contributions of his works during his lifetime, all works which become part of an artist's estate are taxed, for estate tax purposes, at 100 percent of their fair market value. As a result, under present law, an artist is faced with the undesirable alternative on the one hand, of selling, donating (without the attendant tax benefits), or otherwise transferring his works during his lifetime, or, on the other, subjecting his family to estate tax liability for the full fair market value of the creative works which become part of his estate.

Further, another adverse consequence of present law is a reported substantial reduction in donations of creative works to nonprofit institutions, such as museums, universities and libraries subsequent to passage of the 1969 Act.

By conferring on creative artists equitable tax treatment with respect to the donation of their works during their lifetime, S. 1435 would help to rectify the above described problems in a manner consistent with the nation's growing support and encouragement of the Arts, as manifested in the National Foundation on the Arts and the Humanities Act of 1965, as amended. Any adverse effect on the Federal Treasury caused by restoration of the deduction previously available to creative artists for the donation of their works would, in our view, be more than compensated for by the salutary benefits to this nation's artistic community, its cultural institutions, and the massive public audience, they serve.

For the above stated reasons, the National Endowment for the Arts strongly recommends favorable consideration of the bill now being studied. Such legislation is necessary in order to restore equality of treatment for our nation's artists and authors under our tax laws, and should provide the incentive for the contribution of more of their valuable works of art and literature to our libraries, universities, and museums, thereby enriching to a significant extent the cultural life of the nation.

The Office of Management and Budget has informed us that there is no objection to the submission of this report, although the Administration has not yet established a position as to the merits of this proposed legislation.

Sincerely,

NANCY HANKS,
Chairman.
JAMIE WYETH.

Mr. JAVITS. That letter protested very seriously both the diminution of the work moving to artists and the discrimination against artists as compared to collectors or other people who buy art. That letter was signed not only by Nancy Hanks, the chairman, but by a prominent member of the National Council of the Arts, Jamie Wyeth, one of our leading artists have been here to talk to Members of the Senate respecting the deep feeling which exists concerning this matter.

One of the points which has been made to me relates to the valuation which may be put on a work of art which is, under this amendment if it becomes law, gifted to a museum. Of course, before 1969 we had very serious trouble with the question of valuation. That was one of the reasons for the 1969 law which tightened up on philanthropic and charitable matters all along the line except, in this case, it really was retrogressive.

But valuation was a problem. Moreover, very material progress has been made in the matter of valuation, and an Art Advisory Panel of a very high order has been developed to advise the IRS Commissioner. I have a list of the members, and it is certainly one of the premier lists in this country. The panel meets 3 times a year, and does the evaluation under the general supervision and jurisdiction of a representative of the Treasury Department.

I have before me a charter for the Art Advisory Panel of the Commissioner of Internal Revenue, which lists the work which they do, and which is dated March 3, 1975. Included in the list of those on the art advisory panel, for example, is Adelyn Breeskin, the curator of the National Collection of Fine Arts, and a whole list, from Kansas City, New York, Cleveland, Washington, Boston, Los Angeles, Toledo, Ohio, of curators and directors of the leading museums of art in the United States.

I have been assured by the Treasury Department itself that they are perfectly satisfied that the question of valuation is now very tightly handled, and that we need have no worry on that score. To me, this is a very major point.

One other very interesting point which should especially interest us as Members of Congress is that not only the museums around the country have suffered from the dearth—and as I say, I think probably most Members have heard from museums on this subject—but the Library of Congress has suffered from it, because the Library itself collects literary, artistic, and musical donations in the way of original manuscripts and scores.

I ask unanimous consent that the charter and the membership list for the Art Advisory Panel of the Commissioner of Internal Revenue to which I referred be printed in the RECORD at this point.

There being no objection, the charter was ordered to be printed in the RECORD, as follows:

THE ART ADVISORY PANEL OF THE COMMISSIONER OF INTERNAL REVENUE

This Charter is prepared and filed in accordance with the provisions of the Federal Advisory Committee Act, Public Law 92-463, enacted October 6, 1972.

A. *Official Title.* The Committee's official designation is: The Art Advisory Panel of the Commissioner of Internal Revenue.

B. *Objectives and Scope.* The Committee's objectives and scope of its activity are: to assist the Internal Revenue Service by reviewing and evaluating the acceptability of property appraisals submitted by taxpayers in support of the fair market value claimed on works of art involved in Federal Income, Estate, or Gift taxes in accordance with sections 170, 2031, and 2512 of the Internal Revenue Code of 1954. This activity is based on the authority to administer the Internal Revenue law conferred upon the Secretary of the Treasury by section 7801 of the Code and delegated to the Commissioner of Internal Revenue.

C. *Time Period.* The period of time necessary for the Committee to carry out its purpose is indeterminate as the need recurs regularly during the audit of Federal Income, Estate and Gift tax returns. Two-day Panel meetings have been held three times a year since 1968.

D. *Reporting.* The agency or official to whom the Committee reports is the Commissioner of Internal Revenue.

E. *Support Service.* The agency responsible for providing the necessary support for the Committee is the Internal Revenue Service.

F. *Duties.* A description of the duties, all of which are solely advisory, for which the Committee is responsible follows:

1. Prior to a meeting of the Panel, each panelist independently examines copies of photography of the works of art and reviews the text of appraisal reports secured and submitted by the taxpayer in support of his claimed valuation. The panelists are not told the identity of the taxpayer, or of his appraiser, or the tax consequences of adjusting the valuation up or down.

2. At the Panel meeting each member is invited to express his opinion as to the acceptability of the claimed valuation. In the event a panelist disagrees with the taxpayer's valuation, the panelist may state his estimate of value and his reasoning.

This reasoning may include such matters as, challenging the authenticity of the claimed artistic attribution, citing sales prices of comparable works or art, introducing other expert opinions, and reassessing the work's condition, historic importance, or aesthetic qualities. Sometimes experts are identified for needed further studies or for possible use as government witnesses in event of litigation. In some circumstances, a panelist might serve as such a witness. Discussion on each appraised item continues until a consensus of value is reached. The consensus of value is announced as the official advisory conclusion by the chairman of the Panel who moderates the discussions. This full time IRS employee, who specializes in the appraisal of personal property, then so informs the IRS director of the district from which the case was referred.

G. *Annual Operating Costs.* The estimated annual operating cost in dollars and man-years is as follows: Since panelists are not paid for their time or services, the major operating costs consist of reimbursing the panelists for their travel and lodging expenses for three two-day meetings in Washington, D.C. each year. This amounts to approximately $6,000. One man-year of regular employee staffing is required to administer the Panel and to handle the preparation and follow though on the approximately 750 art appraisals reviewed annually by the Panel.

H. *Number and Frequency of Meetings.* The estimated number and frequency of committee meetings are: three two-day meetings each year.

I. *Termination Date.* The services of the Committee are expected to be needed for two years. Unless formally continued, the termination date will be two years from the filing date.

J. *Filing Date.* The date of filing of this Charter is March 3, 1975.

ART ADVISORY PANEL OF THE COMMISSIONER OF THE INTERNAL REVENUE

PRESENT MEMBERS—1976

Mrs. Adelyn D. Breeskin, Curator, Twentieth Century Paintings and Sculpture, National Collection of Fine Arts, Smithsonian Institution, Washington, D.C.

Mr. Ralph T. Coe, Assistant Director and Curator or Paintings and Sculpture, William Rockhill Nelson Gallery of Art, Kansas City, Missouri.

Mr. Everett Fahy, Director, Frick Collection, New York, New York.

Mr. Stephen Hahn, Owner, Director, Stephen Hahn Gallery, New York, New York.

Mr. Edward B. Henning, Curator of Contemporary Art, Cleveland Museum of Art, Cleveland, Ohio.

Mr. Sidney Janis, Owner, Sidney Janis Gallery, New York, N.Y.

Mr. James Maroney, Jr., Associate, Hirschl & Adler Galleries, New York, New York.

Mr. Thomas Kesser, Director, Guggenheim Museum, New York, New York.

Dr. John Seymour Thacher, Director (Ret.), The Dumbarton Oaks Research Library and Collection, Washington, D.C.

Mr. Maurice Tuchman, Senior Curator, Los Angeles County Museum of Art, Los Angeles, California.

Mr. Robert C. Vose, Jr., President, Vose Galleries, Boston, Massachusetts.

Mr Otto Wittman, Director, Toledo Museum of Art, Toledo, Ohio.

Mr. JAVITS. The Manuscript Division of the Library of Congress reports the following:

Prior to the enactment of the Tax Reform Act of 1969, the Manuscript Division received an average of 15 to 20 new manuscript gifts each year from authors and musical composers. The following table illustrates the gifts to the Library of Congress in this field:

Calendar year 1968	20
Calendar year 1969	17
Calendar year 1975	2
Calendar year 1976 to date	3

This is similar to the comparison I made for the Museum of Modern Art in the city of New York.

I ask unanimous consent that the report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

Donations by artists of their own works of art to the Museum of Modern Art

Year, number of artists, and number of works of art:

PAINTING AND SCULPTURE		
1967	2	10
1968	1	1
1969	17	41
1972	1	1
1973	0	0
1974	0	0
1975	0	0
DRAWINGS		
1968	5	31
1969	8	23
1972	2	4
1973	2	6
1974	2	3
1975	0	0
PRINTS		
1968	7	12
1969	6	17
1972	2	2
1973	5	7
1974	3	5

Mr. JAVITS. This clearly illustrates that the very, very drastic fall off in donations is attributed to this particular change in law made in 1969. Also, the Music Division of the Library of Congress reports as follows:

It is estimated that some 35 well-known composers have ceased making gifts to the Library of Congress, including Samuel Barbour, Aaron Copland, and Walter Piston.

Likewise, the Prints and Photographs Division of the Library of Congress reports that a number of leading artists have ceased donating their original works to the Library of Congress since 1969. Mr. President, this is simply a way of demonstrating the results since 1969. The facts speak for themselves.

Who will be benefited and who will be hurt if we pass this particular measure? As I said, the order of magnitude is very small: $5 million a year. The National Endowment for the Arts, for example, will give grants to museums for acquisition. That is Federal taxpayers' money. And yet, when it comes to facilitating the giving by the artist of his own work, we seem to be holding back. Would we rather pay for it with taxpayers' money? That is what it comes down to, especially with the very tightened up procedure regarding valuation which I have described.

The other people who pay for it are students. Students are very much interested, and the letter from the National Endowment on the Arts makes that very clear.

Students are interested in the sketches and other preliminary works which go into the development of a major work of art. This is the very thing that the artists will not give on the present basis, but would be very much interested in giving on the basis of some ability to at least get the value of the gifts applied on their art-related income.

I believe that this bill would be of great value to the cultural institutions of our country and to the general public. I am hopeful that it will be enacted into law this year. This is an effort which has gone on for some time and I believe now is the time to address this problem in an equitable manner.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1384

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44B. CERTAIN CONTRIBUTIONS OF LITERARY, MUSICAL, OR ARTISTIC COMPOSITIONS

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 30 percent of the fair market value of a literary, musical, or artistic composition created by the personal efforts of that individual and contributed by that individual to an organization described in section 501(c)(3) which is exempt from tax under section 501(a).

"(b) LIMITATIONS.—

"(1) INCOME FROM LITERARY, MUSICAL, OR ARTISTIC COMPOSITION.—The amount of the credit allowed by subsection (a) for the taxable year may not exceed the amount of tax under this chapter attributable to the gross income of the individual for the taxable year attributable to the sale of literary, musical, or artistic compositions in that taxable year and in previous taxable years.

(2) AMOUNT OF CREDIT.—The amount of the credit allowed under subsection (a) to the taxpayer for the taxable year, after the application of paragraph (1), shall not exceed the greater of—

"(A) so much of the taxpayer's liability for tax under this chapter for the taxable year as does not exceed $2,500, or

"(B) 50 percent of the taxpayer's liability for tax under this chapter for the taxable year.

"(3) CREDIT DENIED FOR CERTAIN LETTERS, MEMORANDUMS, OR SIMILAR PROPERTY.—The credit allowed by subsection (a) shall not be allowed for the contribution of a letter, memorandum, or similar property which was written, prepared, or produced by or for the individual while he held an office under the Government of the United States or of any State or political subdivision thereof if the writing, preparation, or production of such property was related to, or arose out of, the performance of the duties of such office.

"(4) LIMITATION OF CONTRIBUTIONS.—No credit shall be allowed under subsection (a) for any literary, artistic, or musical composition to the extent that the total of such compositions contributed by such individual for the taxable year to organizations described in subsection 501(c)(3) exceeds $35,000.

"(c) CERTIFICATION REQUIRED.—No credit is allowable under subsection (a) for the contribution of a literary, musical, or artistic composition by the taxpayer unless the taxpayer received from the donee a written statement that the donated property represents material of artistic, musical, or literary significance and that the use of such property by the donee will be related to the purpose or function constituting the basis for its exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described in section 170(c)(2)(B)).

"(d) CARRYOVER OF EXCESS CREDIT.—If the amount of the credit determined under subsection (a) for any taxable year exceeds the limitations provided by subsections (b)(2) and (b)(4) for the taxable year, the excess shall be added to the amount allowable as a credit under subsection (a) for the next five succeeding taxable years to the extent it may be used in those years.".

(b) Section 170(e) of such Code (relating to certain contributions of ordinary income and capital gain property) is amended by inserting at the end thereof the following:

"(4) DENIAL OF DEDUCTION FOR CERTAIN CONTRIBUTIONS OF LITERARY, MUSICAL, OR ARTISTIC COMPOSITIONS.—No deduction shall be allowed under this section for any contribution for which a credit is claimed under section 44B.".

(c)(1) The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following:

"Sec. 44B. Certain contributions of literary, musical, or artistic compositions.".

(2) Section 42(b) of such Code (relating to the taxable income credit) is amended by striking out "and" at the end of paragraph (4), by inserting "and" at the end of paragraph (5), and by inserting after paragraph (5) the following new paragraph:

"(6) section 44B (relating to credit for certain contributions of literary, musical, or artistic compositions),".

(3) Section 56(c) of such Code (defining regular tax deduction) is amended by strik-

ing out "and" at the end of paragraph (7), by striking out the period at the end of paragraph (8) and inserting in lieu thereof ", and", and by adding at the end thereof the following new paragraph:

"(9) section 44B (relating to credit for certain contributions of literary, musical, or artistic compositions).".

SEC. 2. The amendments made by the first section of this Act shall apply to taxable years beginning after December 31, 1976.

By Mr. HELMS:

S. 1385. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for services furnished by physician extenders; to the Committee on Finance.

Mr. HELMS. Mr. President, I am today introducing legislation which would amend the medicare law to authorize payment under part B for services furnished by physician extenders. The rural health clinics of America face possible extinction unless Congress acts quickly to correct a basic inequity in the medicare program.

As the law is presently written, medicare funds cannot be used to reimburse rural physicians extenders who are providing the same services as urban physician extenders. This inequity exists because reimbursements under the medicare program are permitted only when a licensed physician is actually on the premises at the time of treatment.

For urban clinics, where resident physicians are plentiful, this restriction does not pose a problem. But it is wholly unrealistic to apply it to rural health clinics. Physicians, as we know, are in short supply in the rural areas of America; the country doctor is a disappearing institution. In most rural clinics, therefore, there is no resident physician. Indeed, these clinics usually provide only basic or primary health care through physician extenders—nurse practitioners, nurse clinicians, nurse midwives, physician assistants, and Medex—medical extenders who are former military corpsmen—who have been specially trained in diagnosis and treatment for primary and emergency medical care. To require the presence of a physician for reimbursement purposes when there is no physician available to supervise the physician extender is like asking the physician to be in two places at once.

Furthermore, this restriction imposes an intolerable financial burden on rural health clinics, and clearly discriminates against the people they serve. My own State of North Carolina is a case in point. At present, there are 30 such clinics throughout the State, most of which are funded through State grants. Because of the medicare restriction regarding reimbursement for services of physician extenders, however, all of these clinics may soon be forced to close their doors—and the local citizens may be compelled to seek medical assistance in the urban areas.

Here is why: All of these clinics have a contractual relationship with a physician, who may live many miles away from the clinic and cannot visit the clinic on a daily basis. In his absence, a physician extender, working under the physician's written instructions, attempts to care for most of the patients who come to the clinic for medical treatment. Those who require the attention of a physician or specialist must either travel to another area or wait until the physician makes his next visit to the clinic. To avoid the burden of paperwork under medicare, most of the physicians working with the clinics receive a salary from the clinics and reassign their medicare payments to the clinics. But the clinics are unable to receive these payments because of the medicare restriction concerning the physician extenders.

In other words, Mr. President, the rural health clinics are currently providing primary health care to medicare patients but are not being reimbursed by medicare funds. This inequitable system of financing undermines the whole rural health care program. These clinics have been set up under 3-year grants, with a view toward economic self-sufficiency at the end of the 3-year period. This goal cannot be realized if the clinics continue to accumulate deficits as a result of nonpayment for medicare services. When the grant runs out, there will no longer be funds to cover the deficits.

And this is precisely the problem we now face. The first State-supported rural health clinic in North Carolina, the East Bend Clinic in Yadkin County, was established in the summer of 1974. In July of this year it will run out of funds. Some of the federally funded clinics, such as those in the small communities of Hot Springs, Walnut, and Laurel, will run out of funds this month. Within the near future, every rural health clinic in North Carolina may have to close down. The prospect of keeping these clinics open is just as bleak in other States, of course, as it is in North Carolina.

Mr. President, if the medicare law is not changed, the millions of dollars that have been expended to establish these clinics may go down the drain—to say nothing of the vast sums spent for Government-sponsored physician extender training programs. A greater waste of the taxpayers' money cannot be imagined.

The people of North Carolina are proud of their rural health clinics. Through private donations and local fundraising activities, the rural communities, as well as the legislature, of my State have worked hard to assist these clinics in getting established. In fact, North Carolina has taken an active lead in the Nation in establishing State-supported clinics and training programs for physician extenders. These clinics cannot make it on their own when their hands are tied. The medicare restriction which impedes their progress was written into the law before the extender clinics came into existence. It is time to bring our medicare program up to date.

The bill that I am introducing is similar in its scope and objectives to various proposals already pending in the Senate; but it is designed to avoid the problems which, in my judgment, may arise under these different approaches. The information that I have received from the Office of Rural Health Services in North Carolina and the Appalachian Regional Commission, and the discussions that I have had with several physicians in my home State—particularly Dr. Edgar T. Beddingfield, Jr., of Wilson, N.C., who has personal experience with the physician assistant utilization program, lead me to the conclusion that the extender reimbursement concept can successfully enhance the quality and accessibility of health care in rural America only if the assistant has received sufficient formal training from appropriately credited training programs, meets all State requirements for provision of services, and remains subject to, and answerable to, the supervision of a physician. The other proposals that are under consideration do not, in my view, adhere strictly to these standards.

METHOD OF REIMBURSEMENT

In the first place, we must recognize the essential nature of the physician extender. He is not an autonomous provider of health care services, but an extension of the physician. He is and should remain under the supervision and control of a physician. This is not to say that the physician must be physically present, or even that the service must be performed in his office, but rather that he be in direct communication with the extender for consultation and medical advice. Only by maintaining this close relationship can we be assured that the physician will be primarily responsible for the care rendered to his patients by the extender; only then can we be assured that a high standard of health care is maintained in the clinics.

An important, if not key, aspect of this relationship between the physician and the physician extender concerns the method of reimbursement. Services provided by the physician extender are billed in the physician's name, and properly so. This method strengthens the relationship by eliminating all questions of accountability. It not only recognizes the ultimate responsibility of the physician to the patient, but also avoids troublesome malpractice problems which might arise if the extender possessed the attributes of an independent practitioner. Moreover, this method allows approved extender services, whether performed in a clinic or private office, to be covered.

In light of these considerations, I question certain provisions of pending legislation which add a new payment authorization for "rural health clinic services." S. 708, for example, indicates that medicare should pay a specially recognized facility—the rural health clinic—for physician services performed by a nonphysician. Such a method of reimbursement, in my judgment, would tend to discourage close supervision of the extender by the physician. It would establish a mechanism whereby the extender, instead of being directly answerable to, or employed by, the physician, would in effect become an employee of the clinic. This could lead to a situation whereby the employer is a nonphysician, and the services provided are subject to the policies of nonphysicians. The legislation that I am proposing avoids the problem by following the current practice of limiting reimbursement to the physician.

STATE CONTROL OF PHYSICIAN EXTENDERS

In the second place, the several States should have exclusive power to determine the physician extender's qualifications and scope of practice. Physician extenders should, of course, complete a training program or have experience meeting training program standards of recognized accrediting agencies; but the standards required by the States are sufficient.

Some of the proposals introduced by Congress, unfortunately, call for Federal intervention through the Secretary of Health, Education, and Welfare in connection with the physician extender's training, education, and experience requirements.

Mr. President, the Federal Government should not be in the business of setting standards for physician extenders and their services. Once we have abandoned the principle that this power rests with the States, we have established a dangerous precedent. In fact, such a usurpation of State power would serve as an open invitation to Federal licensing of not only physician extenders but also physicians. It would, indeed, serve as a ladder to nationalized medicine. I, for one, believe that the American people do not want their system of medicine built on the British model, and I think we should be wary of legislative schemes which may provide the bricks and mortar.

My bill precludes these possibilities by stipulating that reimbursable physician extender services shall be those authorized under State law. The several States already have the exclusive power of deciding who shall be permitted to practice medicine within their jurisdictions, and it necessarily follows that they are equally capable of making those same decisions with respect to a physician's assistant.

Mr. President, my legislation addresses a very real need in a manner acceptable to the greatest number of those involved in meeting that need. It is legislation which can go a long way toward equalizing the relative opportunities for quality health care among our elderly—whether they live in an urban or rural environment. Let me also point out that studies have shown that health care provided by physician extenders can actually cut the costs of medicare by reducing the number of hospital days per patient. Reduced hospitalization, of course, results in cost savings to medicare.

As a member of Senate Committee on Agriculture, Nutrition, and Forestry, which has been examining the physician extender problem, I am interested in seeking ways to expand utilization of the special service which physicians' assistants may provide in medical care shortage areas. It is my hope that the Senate Finance Committee, which has appropriate jurisdiction, will be able to use my proposal as the basis for quick action.

Mr. President, for the benefit of my colleagues, I ask unanimous consent that the text of my physician extender reimbursement measure be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1385

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1861(s)(1) of the Social Security Act is amended by inserting immediately before the semicolon at the end thereof the following: "(including physician extender services to the extent recognized under State law or State regulatory mechanisms, rendered under the supervision and direction of, and billed by, a physician, whether or not such services are performed in the physician's office or at a place where the physician is physically present)"; and

(b) Section 1861 of the Social Security Act is amended by adding to the end thereof the following new subsection:

"PHYSICIAN EXTENDER

"(aa) The term 'physician extender' means, a physician's assistant, medex, nurse clinician or nurse practitioner who performs (under the supervision and direction of a doctor of medicine or osteopathy who has an unrestricted license) such services as he is legally authorized to perform in the State in which he performs such services."

SEC. 2. The amendments made by the first section of this Act shall apply with respect to services furnished on or after the first day of the month following the month in which this Act is enacted.

By Mr. RANDOLPH (for himself and Mr. ROBERT C. BYRD):

S. 1386. A bill to provide the Corps of Engineers with continuing authority to provide technical assistance to States and political subdivisions thereof in the planning, design, and preparation of specifications for snagging and clearing projects in navigable streams and tributaries thereof; to the Committee on Environment and Public Works.

Mr. RANDOLPH. Mr. President, on behalf of myself and Senator ROBERT C. BYRD, I am today introducing legislation to authorize the Army Corps of Engineers to plan, design, and engineer projects for clearing, debris removal, and straightening of channels in small streams to relieve localized flooding.

Under this measure, the Corps of Engineers would provide technical assistance if requested by the Governor or appropriate local authorities in developing a plan for the removal of materials in small streams which increase the susceptibility of flooding. The corps would not construct the work but merely provide assistance to a local government so that it could ultimately construct the project.

The bill authorizes funds to the corps for the engineering but it remains silent as to the local governments funding mechanism of the construction project. The local or State government could use Federal revenue-sharing funds, public works funds, or any available source of local funds for completing the work designed and recommended by the engineers.

The authorization provided will do much to alleviate damage to communities from small stream flooding. It is often not economically feasible for the Corps of Engineers to construct a flood protection facility in small communities or rural areas but this does not mean the protection is not necessary. The legislation will provide a mechanism to address local needs and provide assistance for developing appropriate local responses.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1386

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 208 of the Flood Control Act of 1954 (68 Stat. 1256, 1266), as amended, is hereby further amended by adding subsection "b" as follows:

"(b) Upon request of the Governor of a State, or appropriate official of local government, the Secretary of the Army, acting through the Chief of Engineers, is further authorized to provide designs, plans and specifications, and such other technical assistance as he deems advisable, at Federal expense, to such State or political subdivision for its use in carrying out projects, for removing accumulated snags and other debris, and clearing and straightening channels in navigable streams and tributaries thereof."

By Mr. RANDOLPH (for himself, Mr. ROBERT C. BYRD, Mr. FORD, and Mr. HUDDLESTON):

S. 1387. A bill to authorize necessary flood protection at locations in Kentucky and West Virginia on an expedited basis; to the Committee on Environment and Public Works.

Mr. RANDOLPH. Mr. President, on behalf of myself and Senator ROBERT C. BYRD, I am today introducing legislation to authorize the Army Corps of Engineers to repair, replace, and rehabilitate flood protection structures damaged by recent flooding in southern West Virginia and eastern Kentucky. The flooding on the Tug Fork of the Big Sandy River in Mingo County, W. Va., was the most serious ever experienced in that area.

The flood waters virtually destroyed the towns of Williamson and Matewan and seriously damaged many smaller communities. Damage resulting from the April 1977, flood has been estimated to be in excess of $100 million. Cleanup operations and the recovery efforts are now underway. It will take time but the homes and businesses destroyed by this flood will be repaired or replaced.

It is essential that floodwalls, levees, and other facilities be provided on the Tug Fork which will prevent damage of the magnitude experienced in this flood. The Tug Fork crested 20 feet above normal. The existing structures provided little protection for the residents.

The legislation will authorize repair of existing facilities and completion of additional floodwalls and levees to protect the area from the ravages of this most severe flood if it should ever occur again.

I ask unanimous consent that the text of the bill be printed in the RECORD.

S. 1387

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to design and construct, at Federal expense, floodwalls, levees and other appurtenant facilities,

and to provide modifications to existing flood protection structures as appropriate, at or in the vicinity of Pikeville, Kentucky on the Levisa Fork of the Big Sandy River; Pineville, Kentucky on the Cumberland River; and Williamson and Matewan, West Virginia on the Tug Fork of the Big Sandy River, that the Chief of Engineers determines are necessary to afford these communities and their immediate environs a level of protection against flooding at least sufficient to prevent any future losses to these communities from the likelihood of flooding such as occurred in April 1977; *Provided*, non-Federal interests shall hold and save the United States free from damages due to the construction works, and maintain and operate all the works after their completion in accordance with regulations prescribed by the Secretary of the Army.

Mr. HUDDLESTON. Mr. President, I congratulate the Senator from West Virginia for developing this highly needed legislation to provide some additional flood protection to those people of Kentucky and West Virginia who have just suffered another series of devastating floods.

This legislation would authorize the Corps of Engineers to design and construct, at Federal expense, floodwalls, levees, and other appurtenant facilities in those areas hit hardest by the recent flooding.

I would hasten to add that this authorization does not include any new flood control dams; it merely applies to flood control structures such as levees, floodwalls, and modification of existing facilities.

Mr. President, I personally joined several of my colleagues from Kentucky in touring the flood areas of my State immediately after the floods hit. The devastation was tremendous. The persons whose homes were ruined will spend years and thousands of dollars trying to put their lives back together.

It seems so much more logical and humane to try to prevent these floods in the first place. And if it can be done through the use of floodwalls and levees and modification of existing structures then we should move with haste to do so.

By Mr. PELL:

S. 1390. A bill to amend section 8332 (b) of title 5, United States Code, in order to authorize certain National Guard employment to be credited for civil service retirement purposes; to the Committee on Governmental Affairs.

Mr. PELL. Mr. President, I send to the desk a bill to amend section 8332(b) of title 5, United States Code, in order to authorize certain National Guard employment to be credited for civil service retirement purposes.

This bill is designed to provide service credit for the period of time certain National Guard technicians performed services under the Federal-State contract agreements. There are a number of National Guard technicians who were originally employed as security guards under 5 U.S.C. 709, and were administratively separated from technician status with the Federal Government and placed as State employees under the Federal-State contract agreement, pursuant to 10 U.S.C. 2304. While employed as State employees under the service contract, they performed the same support services which they performed as National Guard technicians.

On January 1, 1969, the National Guard Technician Act, Public Law 90–486, became effective. This law legislated Federal employee status for National Guard technicians, shifting them from State to Federal employment effective January 1, 1969. However, it did not extend Federal status to pre-1969 service. Rather, it granted limited credit in the annuity computation, in certain cases, for prior State technician service, if such service were performed under 32 U.S.C. 709.

The Civil Service Commission Appeals Review Board, in its decision of December 12, 1974, said:

The only possible way this contract service can be considered creditable is for it to meet the requirement set out in the National Guard Technician Act, that it be performed under 32 U.S.C. 709. However, the contract was clearly authorized under 10 U.S C. 2304 . . . Therefore, the Board has no alternative but to concur in the Bureau's finding [the Commission's Bureau of Retirement, Insurance and Occupational Health] denying service credit for appellant's contract service.

I ask unanimous consent that the decision of the Civil Service Commission Appeals Review Board be printed at this point in my remarks.

There being no objection, the decision was ordered to be printed in the RECORD, as follows:

[U.S. Civil Service Commission—Appeals Review Board]

DECISION

In the matter of Angelo Maiorisi.

Type Case: Ret'rement-Service Credit.

Before: Griffiths, McDonald and Roel, Board Members.

INTRODUCTION

Appellant is appealing from the decision of the Commission's Bureau of Retirement, Insurance, and Occupational Health denying him service credit for Civil Service retirement purposes for his period of employment as security guard under a Federal-State Service Contract Agreement.

STATEMENT OF THE CASE

Appellant is seeking service credit for the period of time during which he performed service under the Federal-State Contract Agreement with the State of Rhode Island. Appellant was originally employed as Security Guard under 5 U.S.C. 709, and was administratively separated from technician status with the Federal Government and placed as a state employee with the State of Rhode Island government under the aforementioned agreement. While he was employed as a state employee under the service contract, he performed the asme support services which he otherwise performed as National Guard technician.

Appellant submitted to the Bureau a copy of a letter from Major General Leonard Holland from the Office of the Adjutant General of the State of Rhode Island and another letter from Francis S. Greenlief, Major General, U.S.A., Chief, National Guard Bureau, to substantiate his claim that his service qualified under FPM Supplement 831–1, subchapter S3–3, which outlines the criteria for Federal employment.

On August 2, 1974, the Bureau issued its decision disallowing service credit for the service involved, on the basis it was performed under the authorization of 10 U.S.C. 2304 rather than 32 U.S.C. 709.

REPRESENTATIONS TO THE BOARD

By letter dated August 19, 1974, appellant appealed to the Board contending the decision of the Bureau is erroneous because the facts are that:

(1) His job did not change;

(2) His pay did not change;

(3) The method of payment, a federal check, did not change;

(4) The administrative procedures insofar as annual leave, sick leave, military leave, did not change;

(5) His duties and responsibilities were exactly the same as when he performed as an Air Technician providing security of buildings and aircraft.

He further contends that 10 U.S.C. 2304 did not relate to the service contract he was under. In addition he questions who his employer was during his service contract employment.

ANALYSIS AND FINDINGS

The Appeals Review Board has reviewed the entire record in the case and has given thorough consideration to appellant's representations in support of his contentions. However, the Board finds no basis to reverse the Bureau's decision.

Section 2304, tit.e 10, U.S.C., in pertinent part, reads as follows:

"(a) Purchases of and contracts for property or services covered by this chapter shall be made by formal advertising. However, the head of an agency may negotiate such a purchase or contract, if—

"(10) the purchase or contract is for property or services for which it is impracticable to obtain competition."

According to a copy of the contract contained in the record, this quoted provision of law gave birth to the Service Contract Agreement between the state of Rhode Island and the National Guard Air Base, by which appellant's employee status was changed coverage under 32 U.S.C. 709 to coverage under 10 U.S.C. 2304 for the period of time in issue. Obviously, this service contract agreement placed the appellant out of jurisdiction of 32 U.S.C. 709 which in pertinent part states:

"(a) Under such regulations as the Secretary of the Army may prescribe, funds allotted by him for the Army National Guard may be spent for the compensation of competent persons to care for material, armament, and equipment of the Army National Guard. Under such regulations as the Secretary of the Air Force may prescribe, funds allotted by him for the Air National Guard. A caretaker employed under this subsection may also perform clerical duties incidental to his employment and other duties that do not interfere with the performance of his duties as caretaker."

In reviewing the case file the Board finds that appellant has not introduced any new evidence to substantiate his claim for credit for the period of contract service. He has merely reemphasized the fact that there was no change in his duties, supervisor, or method of salary payment, during the period when he was employed under the service contract. The point, however, is that there was a change in appointing authority. That is, the National Guard Bureau transferred security guards from employment in the Air Technician Program to employment under the Air Service Contract in 1958. The appellant was so transferred and employed under the service contract until November 27, 1961, when he received an appointment within the Air Technician Program.

Appellant states that he wants to know who his employer was during the time he was employed under the service contract. The

answer, of course, is the State of Rhode Island. In fact, the State of Rhode Island was his employer until January 1, 1969, when the National Guard Technician Act (Public Law 90-486) became effective. This law legislated Federal employee status for National Guard Technicians, shifting them from State to Federal employment effective January 1, 1969. However, it did not extend Federal status to pre-1969 service. Rather, it granted limited credit in the annuity computation, in certain cases, for prior State (technician) service if such service were performed under 32 U.S.C. 709.

The very fact that it was necessary to legislate Federal status for National Guard Technicians establishes that, prior to the effective date of such legislation, this technician service was not considered Federal service. Since Mr. Maiorisi claims that the service performed under the contract is identical to technician service performed prior and subsequent to it, his service should be examined within this context.

Technician service is, by definition, State service if performed prior to January 1, 1969. As a result, the only possible way this contract service can be considered creditable is for it to meet the requirement, set out in the National Guard Technician Act, that it be performed under 32 U.S.C. 709. However, the contract was clearly authorized under 10 U.S.C. 2304 and this fact is not disputed by appellant. Therefore, the Board has no alternative but to concur in the Bureau's findings denying service credit for appellant's contract service.

DECISION

In view of the foregoing, the Appeals Review Board hereby affirms the decision of the Bureau of Retirement, Insurance, and Occupational Health issued on August 2, 1974.

The Civil Service regulations provide that the decision of the Board is final and that there is no further right of administrative appeal.

For the Commissioners:

WILLIAM P. BERZAK,
Chairman.

December 12, 1974.

Mr. PELL. Mr. President, the sole purpose of this bill is to provide service credit for civil service retirement purposes for those technicians whose employment shifted back and forth by virtue of transactions of Congress and the State, but who physically never changed their duties and responsibilities, their pay, their method of payment, their administrative procedures insofar as annual leave, sick leave, and military leave. I believe that equity demands that we follow through and give them retirement credit also.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1390

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That clause (6) of Section 8332(b) of Title 5, United States Code, is amended to read as follows:

"(6) (A) employment under Section 709 of Title 32, or any prior corresponding provision of law;

"(B) employment under Section 2304 of Title 10, if the employee was employed under such Section 2304 immediately prior to his employment under Section 709 of Title 32 and the services performed by him under both such Sections were identical;".

By Mr. KENNEDY (for himself, Mr. HATHAWAY, and Mr. ANDERSON):

S. 1391. A bill to establish a transitional system of hospital cost containment by providing for incentives and restraints to contain the rate of increase in hospital revenues, to establish a system of capital allocation designed to encourage communities to avoid the creation of unneeded and duplicative hospital facilities and services, to provide for the publication and disclosure of information useful to the public in making decisions about health care, to provide for the development of permanent reforms in hospital reimbursement designed to provide incentives for the efficient and effective use of hospital resources, and for other purposes; jointly, by unanimous consent, to the Committee on Finance and the Committee on Human Resources.

Mr. KENNEDY. Mr. President, today I am pleased to introduce the administration's legislation regarding the urgent necessity to restrain hospital cost increases in the short term by limiting hospital revenue increases to a minimum level recognizing general inflation and including a small increment to allow hospitals to improve their quality of care. The need for such legislation is widely recognized.

The legislation, Mr. President, will also impose a limit on new capital expenditures for acute care hospitals. The program will fix a national level for such expenditures below that of recent years and allocate new capital spending among the States by formula. With the assistance of local planning agencies, each State will determine which facilities merit new capital expenditures.

Mr. President, I wish to acknowledge at this time that the task of controlling the escalating costs of health care has been a matter which has been under very considerable review by the senior Senator from Georgia (Mr. TALMADGE) and the members of the Senate Finance Committee. It is my understanding that the Health Subcommittee of the Ways and Means Committee and the Health Subcommittee of the Interstate and Foreign Commerce Committee are considering joint hearings on this legislation which was introduced yesterday in the House of Representatives.

Mr. President, as chairman of the Senate Subcommittee on Health and Scientific Research. I will hold extensive hearings on this and related legislation in full cooperation with the Senate Finance Committee. These hearings will be specifically designed to elucidate the relevant issues regarding methods for constraining the all too rapidly rising costs of health care with the intent to promptly report a bill.

Mr. President, national health expenditures tripled between 1965 and 1975. In fiscal year 1976, the annual expenditures for health totaled $139.3 billion, up 14 percent over the $122.2 billion spent in fiscal year 1975. This rate of increase was approximately twice the CPI for the same period. Without any intervention, it has been estimated that this $139 billion spent on health care in 1976 may grow to $230 billion in 3 years.

Expenditures for hospital services—which account for 40 cents of every dollar Americans spend on health care—have been escalating far faster than the overall cost of living for more than two decades.

Last year the Nation's total hospital bill jumped to $55.4 billion or more than $1,000 per family. Next year, without any control, the figure is predicted to increase dramatically to almost $64 billion.

Since 1950, the cost of a day of hospital care has climbed more than 1,000 percent. The average cost per day has risen from $15 to $176. In the last decade the cost of an average hospital stay has skyrocketed from less than $300 to more than $1,300. Not many of us can afford to get sick and go to the hospital.

Right now medicare and medicaid pay approximately one-quarter of the bill for hospital services and this went up by $5 billion last year. Individual States paid twice as much for medicaid in 1976 than they did in 1971.

We are all paying for these runaway costs. Americans today must work more than 1 full month of every year just to pay for their health care—2 weeks wages for hospital costs alone. If health care was not so expensive workers could have higher take home pay and better pensions.

We are pouring so much money into hospitals right now to cure illness that we have not had money to spend on basic preventive health care. It is more humane and a lot less expensive to prevent illness than to have to put someone into a hospital to cure them. Vital programs such as immunizing children have been overlooked for too long.

Two factors unique to the hospital industry lie behind the explosive growth in hospital costs.

The first factor is that most hospitals are presently reimbursed on the basis of the costs of services they provide. The budget is open-ended, and there is no economic incentive to hold down costs. In fact, the reimbursement system tends to encourage hospitals to add expensive new facilities and technologies. For example, over the past 6 years, the number of laboratory tests per hospitalization has increased by over 8 percent annually, from 2.9 billion tests in 1971 to more than 5 billion tests in 1975. The costs of these tests has risen during this same period from $5.6 billion to greater than $15 billion—a 10-percent annual growth. Laboratories' services now account for 11 percent of total health expenditures. And there is no evidence that all these tests make people healthier. This excess capacity in the medical care system means that the consumer must bear the burden of paying for the fixed costs of greatly underutilized facilities, services, and equipment. This Nation as a whole has 100,000 more hospital beds than it needs.

The second factor is that 90 percent of all hospital costs are paid for by someone other than the patients—by Blue Cross, medicare, medicaid, or other insurance carriers or public programs. Few

patients even know what their hospital stay costs. It is virtually impossible for consumers to do any kind of comparative shopping since most do not have the knowledge to diagnose or prescribe for themselves and must rely on the medical profession. Any permanent system to control cost must include programs for patient education so that consumers can be better informed about their own health needs and be part of the decision-making process.

Mr. President, the Hospital Cost Containment Act of 1977 is a purely transitional program, and I expect the Secretary of HEW to submit his recommendations for more permanent reforms in the way we finance and deliver health care, including his recommendations for national health insurance, by March 1, 1978. The success of any long-range program, however, will be severely limited unless we begin to bring the increase in hospital costs more in line with price trends in the rest of the economy.

The savings in fiscal year 1978 from the program outlined in this bill would total $1.8 billion including $578 million in medicare funds, $143 million in medicaid, and $879 million in private funds.

By 1980, net savings would triple to almost $5.6 billion including $1.755 billion under medicare, $429 million under medicaid, and $2.64 billion in private funds.

Mr. President, the legislation that I am introducing today presents the administration's view on how to slow down the escalating costs of hospital care. I believe, however, that the approach taken by the administration leaves several unresolved issues which I will address at the time of hearings held before the Senate Subcommittee on Health and Scientific Research.

Firstly, the limits on revenue increase are for inpatient hospital care only. Incentives must simultaneously be built to encourage use of ambulatory care facilities, outpatient departments, appropriate long-term care facilities, and home health agencies. We must insure that no one in need of care is denied care because of present limitations on the reimbursement system.

Secondly, I feel strongly that in order to effect larger changes in our system of health care we must develop better methods for controlling the intensity of services provided, for reducing the inappropriate utilization of ancillary services, and for influencing physician behavior. The physician determines, for the most part, whether or not a patient should be hospitalized, how long he will stay, what diagnostic tests he will receive, and the therapeutic procedures he will undergo. Clearly, any cost-control system should encourage the elimination of unnecessary or marginal testing and therapeutic procedures, and it should encourage hospitals to have their medical staffs eliminate marginal and unnecessary admissions.

Third, no one yet knows what is the best reimbursement system. Therefore, while we are planning for more permanent and long-term solutions, we should be encouraging experimentation with alternative systems. These systems could address, for example, various methods of hospital grouping, case mix adjustments and prospective reimbursement.

Fourth, as the health systems agencies and the State health planning and development agencies have increased responsibilities under the administration's bill, I would anticipate that these agencies, which are already understaffed, will receive increased funding.

Finally, although the administration's bill requires hospitals, for the first time, to make available to the public certain financial information, we must insure that this information is easily understood by all consumers so that they can make truly informed decisions about the type of health care they will purchase.

These are some of the concerns that I have, and I encourage witnesses at future hearings to comment on the administration's proposal, the issues I have raised, and to express their own concerns.

I ask unanimous consent that the bill and a detailed summary and rationale of the bill be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DETAILED SUMMARY AND RATIONALE

I. BASIC METHOD

Total hospital revenue would be constrained by limiting *increases* in payments from each third-party cost payor—such as Blue Cross, Medicaid and Medicare—and from charge payors—including private insurance and individuals who pay their own bills—as a class. The limit would be about 9 percent in the first year of the program. The program would begin October, 1977.

Rationale

The approach can be implemented and administered quickly and simply.

It requires no new data collection or reporting forms and can be readily understood by hospitals.

It guarantees immediate savings to the Medicare and Medicaid programs, to private insurance and to the public.

Future year savings will be even greater as hospital managers alter employee staffing patterns and take a more cost-conscious view of expenditures for new services and equipment.

II. COVERAGE

The program would cover the in-patient revenues of about 6,000 acute-care and speciality hospitals. It would exclude chronic-care hospitals, new (less than 2-year-old) hospitals, and those getting at least 75 percent of their revenues from Federally defined Health Maintenance Organizations (HMOs) on a capitation basis. Federal hospitals would not be covered directly; such hospitals would be directed by the President to stay within the limits.

Rationale

The cost-containment program would apply only to inpatient services because they represent the most expensive mode of treatment. The Administration views as desirable shifts from in-patient to out-patient care when quality of care is maintained, since out-patient care is considerably less costly.

Federal Government hospitals would not specifically be included in the legislation because these facilities already operate under budget constraints—and these constraints would be modified with respect to short-term in-patient units to reflect the objectives of the overall national system and to set an example for the private sector.

Exemption of hospitals dealing predominantly with Federally defined HMOs provides an added incentive for further development of these cost-effective organizations. Chronic care hospitals would be excluded because they do not have the same inflationary problems as acute-care hospitals.

To prevent hospitals from shifting costs of in-patient services outside the hospital to avoid the revenue limit, the ceiling would exclude from the base any services previously performed in the hospital that were moved out of the hospital.

III. SETTING THE BASIC LIMIT

The basic limit on increases in total-in-patient care revenues would be set by a formula reflecting general price trends in the economy as a whole, plus an additional amount to accommodate some increase in intensity of patient services.

The formula would use the "GNP deflator," published by the Commerce Department, which measures price changes in the whole economy, and would work as follows:

The allowable increase would equal the increase in the GNP deflator for the most recently published 12-month period, plus ⅓ of the difference between the average annual increase in hospital costs in the preceding two years and the increase in the GNP deflator in that same period.

Example: Assume for 1975 and 1976 that the increase in hospital costs was 15 percent and the increase in the GNP deflator for the relevant periods was 6 percent.

Allowable increase equals 6 (GNP deflator) plus (15 minus 6) divided by 3 equals 6 plus 9 divided by 3 equals 6 plus 3 equals 9.

In future years, as the gap between overall price increases and hospital costs narrowed, the allowable increase would come down.

Rationale

A legislated formula based on a general economic price index plus an allowance for limited expansion of services should serve to reassure hospitals that unreasonably low limits will not be set.

A formula based on the overall rate of price increases in the economy will reflect increases in the costs of the things hospitals buy, in most instances.

The additional allowance for expansion of services provides a cushion to hospitals with above-average increases in the prices of what they buy.

IV. ADJUSTING THE BASIC LIMIT FOR CHANGING PATIENT LOAD

The basic limit would be adjusted to reflect any major changes in patient load:

Increases in total allowable revenue would remain constant where patient load, measured by admissions, increased 2 percent or decreased by 6 percent (10 percent in the case of small hospitals—those with fewer than 4,000 annual admissions).

Revenue increases equal to one-half of average revenue per stay in the base year would be allowed for each increased admission beyond 2 percent. However, no additional allowance would be made for admissions beyond 15 percent in the case of large hospitals unless a specific exception were granted.

Similarly, revenue decreases equal to one-half of average revenue per stay would be imposed for decreased admissions below 6 percent. For reductions in patient load beyond 15 percent, full revenue reduction would be imposed, except for small hospitals.

Example

Assume that the basic revenue increase limit is 9 percent and that Hospital X's base year revenue figure is $10,000,000 derived from 10,000 admissions—$1,000 an admission. If Hospital X's admissions in the year begin-

ning October 1, 1977, are the same as in the base year then the total revenue allowed to the hospital is $10,900,000—$900,000 more than in base year.

If the number of admissions in the hospital increased to 11,000, 1,000 or 10 percent more than in the base year, the hospital is allowed a $500 increase in revenue—50 percent of the revenue per admission in the base year—for 800 of these admissions (the excess over 2 percent), or $400,000.

Thus, the total revenue allowed for Hospital X would be $11,300,000 (representing the basic increase of $900,000 plus the increase of $400,000, reflecting the increased patient load). The limit on payments per admission by each major type of third-party payor would be adjusted accordingly.

Rationale

The adjustment provides incentives for hospitals to identify and reduce unnecessary hospital utilization.

Limiting to 50 percent the automatic upward adjustment in revenues for major changes in patient load reduces the incentive to increase admission arbitrarily.

Special treatment for small hospitals, which are subject to wider percentage changes in patient load from year to year, would not seriously undercut the effectiveness of the overall constraint, and would ease Federal administration of the Act.

V. APPLYING THE LIMIT

To meet the overall limit of about 9 percent, the allowable increase in revenue per admission would be calculated by estimating the expected changes in hospital admissions. For example, with an overall limit of 9 percent and an estimated increase in hospital admissions of 2 percent, a hospital would be permitted an increase in average revenue per admission of 7 percent. Cost payors would estimate the limit per stay for purposes of interim reimbursement, based on any anticipated changes in patient load, and apply the actual limit in final settlement, using final fiscal year data on actual changes in patient load.

In addition, the Medicare intermediary would assume responsibility for determining any excess charges per stay for commercial carriers or self-pay patients, from data routinely reported on Medicare cost reports.

If total charges per stay exceeded the rate of increase allowed for the hospital, it would be required to reduce charge increases in the following year accordingly. Adequate public notice of the hospital's violation would be required. Any hospital or third-party payor that was found to have paid or received funds in violation of this Act could be required to pay a tax to the U.S. Treasury equal to 150 percent of the amount in violation.

Example

If Hospital X overcharged charge-payors by $10,000 in a year, then refused to put the overcharge in escrow to be deducted from the following year's ceiling, it would be subject to a tax of $15,000.

Rationale

Applying the allowable percentage increase by major type of payor is administratively simple, permits each major third-party payor (Medicare, Medicaid, Blue Cross) to make final settlements without waiting for all other payors, and would not require any additional reporting forms or audit.

The approach is neutral with regard to type of payor, neither favoring nor discriminating against any type of payor.

Imposing the tax and requiring hospitals to publicize any overcharges should be a significant deterrent to excess charge increases.

VI. BASE FOR APPLYING THE LIMIT

The base would be the dollar total of the hospital's revenue from each class of payor for calendar 1976 (or, in the case of hospitals with a non-calendar fiscal year, for its accounting year that ended in 1976). To bring the 1976 base up to date, an adjustment would be made that would treat the revenue increases in 1977 as though they had been the same as the average annual increase in the two years 1975 and 1976. However, the adjustment rate could not exceed 15 percent or be lower than 6 percent.

Rationale

This method would assure that any hospital which raised charges after public announcement of the Administration's hospital cost containment effort would not benefit from that action.

It would reward hospitals with increases in their revenues of less than 6 percent annually in recent years.

Using previous trends from a period of generally high cost increases is a generous standard, and should not impose a burden on hospitals.

VII. EXCEPTIONS

Exceptions to the total revenue limit would be permitted on only two grounds:

(1) Exceptional changes in patient load (anticipated to encompass about 3 percent of all hospitals); and

(2) Major increases in capacity or types of services, or major renovation or replacement of physicial plant.

Local and state health planning agencies would review and comment on exceptions. To receive added revenues under any exception, a hospital would also have to demonstrate a relatively poor financial condition. Specifically, it would have to show that its ratio of current assets to current liabilities put it in the bottom 25 percent of hospitals covered by the program.

HEW would have to act on requests for exceptions within 90 days or the hospital and third-party payors could presume approval.

Any hospital granted an exception would be subject to an operational review of effectiveness and efficiency by the HEW Audit Agency or its agents. The report of the HEW findings would be made public.

Rationale

Limited criteria for exceptions are necessary to maintain the effectiveness and administrative simplicity of the program.

Strong tests of community necessity for new services by health planning agencies and the requirement that a relatively poor financial condition be demonstrated should ensure a limited number of exceptions.

VIII. ADJUSTMENT FOR NONSUPERVISORY EMPLOYEES

To avoid an inequitable impact on the earnings of low-wage hospital workers, hospitals would be permitted an adjustment of the revenue limit based on actual increases in pay they granted to non-supervisory employees. At the end of 18 months, the Secretary of HEW would determine if the adjustment should be continued.

Under this method the hospital revenue-increase limit is computed by making a separate calculation for the wages of non-supervisory employee.

Example

Assume that Hospital X's costs in the base year are distributed as follows: 35 percent for wages of non-supervisory employees and 65 percent for all other costs. Assume that the earnings per non-supervisory employee have increased 11 percent in the current year. In this case, the revenue-increase limit is 9 percent for 65 percent of the hospital's costs and 11 percent for the remainder, or a total of 9.7 percent.

Rationale

This provision is needed to assure that low-wage hospital workers do not bear the brunt of the cost containment program.

IX. MAINTENANCE OF EFFORT

Hospitals would be required to maintain their charity patient load shares. Enforcement would be on the basis of investigation by health planning agencies of complaints by other area hospitals.

Rationale

Although it is not expected to be a major problem, there is a possibility that some hospitals would seek to avoid the intent of the limits by replacing patients without any insurance coverage with those covered by government or private insurance. This provision would reduce that possibility.

X. DISCLOSURE

Hospitals would be required to make available to the public current charge schedules and cost-reimbursement reports. The local health service agency would publish every six months a list of hospitals with their charges for typical services.

Rationale

These provisions would foster better understanding of hospital costs by consumers and other concerned parties and provide an incentive for self-enforcement of the Act by hospitals.

XI. STATE PROGRAMS

Hospitals in States which receive a waiver from the Federal cost containment program would not be covered. A State would have to meet the following conditions:

a. A hospital cost containment program must have been in effect in the State for at least one year prior to the requested waiver;

b. That program included all payors in the State (except Medicare) and covered at least 90 percent of the hospitals that would be included in the Federal program;

c. The State agrees to comply, on an aggregate basis, with the basic Federal ceiling;

d. There is the expectation, based on demonstrated performance, that the State will achieve the Federal objective under its own program;

e. The State plan provides that any excess revenues generated will be returned to payors.

The requirement that all payors except Medicare have been included in the State plan can be waived if the States has had a program covering at least 50 percent of total hospital payments for one year and the State adds all payors to its plan effective no later than the time of the requested waiver.

New State programs could be added over time, but only under the strict criteria of the experimental programs established under present law.

Rationale

Recognition should be given to State activity in hospital cost containment since the methods developed by some States are more sophisticated and refined than the initial national effort.

XII. ENFORCEMENT

Payment above the cost containment limits would be disallowed under the Medicare and Medicaid programs.

Payment by Blue Cross or other cost payors, or receipt of hospitals of excess revenues, would be subject to a tax at the rate of 160 percent unless rebated to the payors.

Local Health Systems Agencies (HSAs) and State health planning agencies would be required to comply with provisions of the program or face loss of their designation and of Federal funding under the Public Health Service Act.

Rationale

Unless all hospital revenues are controlled, hospitals would have an incentive to discriminate against Federal beneficiaries for whom they receive lower payments, and to compensate for revenue reduction by increasing costs to private plans and individual payors.

XIII. CAPITAL EXPENDITURE PROGRAM

First, the program would set an annual national limit on new capital expenditures by acute care hospitals. The limit would be set at a level somewhat below expenditures in recent years.

The national limit would be allocated to the States by a formula based on population for at least the first year. In later years, the Secretary of HEW could adjust the formula to take into account factors other than population—such as costs of construction and need for capital expansion or modernization. States would award new certificates of need to hospitals up to their limit. HSAs would assist the States by reviewing and commenting on applications of certificates.

Medicare and Medicaid would deny reimbursement to hospitals for unapproved projects. The Federal Government would operate the program in States which do not agree to participate.

Second, in any health service area in which the number of hospital beds exceeds 4 per 1,000 population, or in which the average hospital occupany rate is less than 80 percent, no certificates of need would be allowed if they would yield a net increase in beds in the area. In addition, no Federal grants, loan guarantees or tax subsidies for construction of beds in excess of the existing number would be permitted.

Rationale

A cost containment effort can only be effective over a long period of time if steps are taken now to slow the rate of growth of bed capacity and the duplication of expensive technology.

An effective capital spending constraint will have further benefits by reducing the number of hospitals qualifying for exceptions in future years.

S. 1391

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Hospital Cost Containment Act of 1977".

REPORT ON PERMANENT REFORM IN THE DELIVERY AND FINANCING OF HEALTH CARE

SEC. 2. The Secretary of Health, Education, anid Welfare (hereinafter in this Act referred to as the "Secretary") shall submit to the Congress, no later than March 1, 1978, a report setting forth his recommendations for permanent reforms in the delivery and financing of health care which will increase the efficiency, effectiveness, and quality of health care in the United States and which will replace the transitional provisions of title I of this Act.

TITLE I—TRANSITIONAL HOSPITAL COST CONSTRAINT PROVISIONS

PART A—PURPOSE AND GENERAL DESCRIPTION OF THE PROGRAM

PURPOSE

SEC. 101. It is the purpose of the transitional hospital cost containment program established by this title to constrain the rate of increases in total acute care hospital inpatient costs, beginning October 1, 1977, and continuing until the adoption of the permanent reforms referred to in section 2, by limiting the amount of revenue which may be received, by the hospitals involved, from government programs, private insurers, and individuals who pay directly for such care.

GENERAL DESCRIPTION OF PROGRAM

SEC. 102. (a) In order to carry out the purpose of the transitional program as set forth in section 101, the inpatient revenues of short-term acute care and specialty hospitals (excluding new hospitals and certain HMO-related hospitals) are to be limited in the manner outlined in the succeeding provisions of this section (and more particularly described in parts B and C of this title).

(b) The increase in total revenue which a hospital (as defined in section 121) may receive in any accounting year in the form of—

(1) reimbursement paid under the medicare and medicaid programs, and by cost payers, for inpatient services, and

(2) charges imposed upon other persons for inpatient services,

may not, on a per-admission basis, exceed the average inpatient reimbursement due or inpatient charges imposed per inpatient admission in the base period (in general, the hospital's accounting year ending in 1976) by more than the percentage which is applicable to the hospital for such accounting year under section 111.

(c) Such percentage, in the case of any hospital for any accounting year, is to be determined by—

(1) establishing for such year, under section 112(b), an "inpatient hospital revenue increase limit" based on increases in the GNP deflator and in total hospital expenditures nationwide,

(2) modifying the limit so established by the "admission load formula", as promulgated under section 113, to take account of major changes in patient loads experienced by that particular hospital, in order to arrive at an "adjusted inpatient hospital revenue increase limit" for that hospital in such year, and

(3) applying such adjusted limit for periods after September 30, 1977, with recognition being given under section 111(a)(1) to cost increases prior to that date. (d) An exception from the limits otherwise established may be granted in accordance with section 115 (for a particular period) to any hospital which is experiencing substantially higher costs as a result of extraordinary changes in patient loads or major changes in facilities and services, to the extent required to assure that the necessary additional revenue will be available where necessary to meet actual community needs.

(e) Compliance with these limits is to be enforced, in accordance with section 116, in various ways. Such compliance is required under the medicare program by directly applying the limits for purposes of both interim and final reimbursement. Amounts paid to hospitals under the medicaid program in excess of such limits will be disallowed as a basis for Federal matching payments. Hospitals and nongovernment cost payers exceeding the limits will be subject to a Federal excise tax in an amount equal to 150 percent of the excess (except in the case of a hospital which is exempt as a result of corrective actions as prescribed under section 116(d)(2)).

(f) The Secretary is authorized, under section 117, to waive the limits otherwise established for all hospitals located in any State which has had in effect for at least one year a hospital cost containment program which covers at least 90 percent of all acute care hospitals in the State, applies to all payers except the medicare program, limits inpatient hospital revenue increases to a rate no greater (in the aggregate) than the rate established for the period involved under section 112(b), and provides for return of excess hospital revenues.

PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

IMPOSITION OF LIMIT ON HOSPITAL REVENUE INCREASES

SEC. 111. (a) The average reimbursement paid to a hospital for inpatient services under title XVIII of the Social Security Act, under a State plan approved under title V or title XIX of such Act, or by any cost payer, and the average charges imposed by a hospital for inpatient services, in any accounting year any part of which falls within a period subject to this title, may not (except as provided in subsection (b)) exceed the base inpatient hospital revenue per inpatient admission (as established under section 114) by a percentage greater than the sum of—

(1) the percentage by which the costs involved would have increased in the period elapsing after the close of the hospital's base accounting year and prior to October 1, 1977, if such costs had increased (during that period) at the average annual rate actually experienced by the hospital during the two-year period ending with the close of such base accounting year, except that such percentage as applied for purposes of this section shall not be more than 15 percent nor less than 6 percent,

(2) the percentage by which such costs would have increased in the period elapsing after September 30, 1977, and prior to the first day of the accounting year for which the limit is being imposed if such costs had increased (during such period) at an annual rate consistent with the inpatient hospital revenue increase limit determined and promulgated under section 112(b), and

(3) the percentage by which such costs would have increased in the accounting year for which limit is being imposed if such costs had increased (during such year) at an annual rate consistent with the adjusted inpatient hospital revenue increase limit applicable to the hospital under section 112(a).

(b) Where less than a full accounting year falls within a 12-month period subject to this title, the limit set forth in subsection (a) of this section, and the limit established under section 112(a), shall apply with respect to reimbursement due or charges imposed for the part of such accounting year which falls within such period in the same proportion as the number of days in such accounting year that fall within such period bears to the total number of days in such accounting year.

DETERMINATION OF ADJUSTED INPATIENT HOSPITAL REVENUE INCREASE LIMIT

SEC. 112 (a) The "adjusted inpatient hospital revenue increase limit" which is applicable to any hospital for purposes of section 111(a)(3) with respect to any accounting year shall (subject to section 111(b) and section 124) be equal to the inpatient hospital revenue increase limit determined and promulgated under subsection (b) of this section for the 12-month period in which such accounting year or any part thereof falls, modified by the application of the "admission load formula" which is promulgated under section 113 and applied to that hospital.

(b)(1) Between July 1 and October 1 of each calendar year beginning with 1977, the Secretary shall promulgate a figure which (subject to paragraph (2)) shall be the "inpatient hospital revenue increase limit" applicable to the 12-month period beginning October 1 in such year (with each such 12-month period being referred to in this title as a "period" or a "period subject to this title"). Such figure shall be the sum of—

(A) the implicit price deflator of the Gross National Product as calculated by the Bureau of Economic Analysis of the Department of Commerce and published in the

Survey of Current Business (hereinafter in this title referred to as the "GNP" deflator") for the 12-month period ending June 30 of such year, and

(B) one-third of the difference between—

(i) the average annual rate of increase in total hospital expenditures which is found by the Secretary to have occurred during the 24-month period ending on the day preceding January 1 of such calendar year, and

(ii) the annual rate of increase in the GNP deflator for the 24-month period ending on the day preceding January 1 of such calendar year.

(2) If the Secretary finds during any period subject to this title that the GNP deflator with respect to such period is expected to exceed by more than one percentage point the GNP deflator which was used in making the determination under paragraph (1) (or in making a prior adjustment under this paragraph), the Secretary shall increase (or further increase) the GNP deflator so used by the amount of such excess; except that no adjustment made under this paragraph shall be effective with respect to any accounting year ending prior to the calendar quarter preceding the calendar quarter in which such adjustment is made.

PROMULGATION OF ADMISSION LOAD FORMULA

SEC. 113. The "admission load formula" shall be promulgated by the Secretary by October 1, 1977, and shall be such that—

(1) a hospital will be allowed an increase in total revenue from inpatient services in any accounting year to the extent (and only to the extent) consistent with the inpatient hospital revenue increase limit promulgated under section 112(b), for the period in which such accounting year or any part thereof falls if admissions in such accounting year have increased by less than 2 percent or declined by less than 6 percent as compared to the base accounting year (2 percent and 10 percent, respectively, in the case of a hospital with no more than four thousand admissions in the base accounting year);

(2) in the case of a hospital whose admissions in any accounting year are beyond the applicable range set forth in paragraph (1), the amount of total revenue from inpatient services in such year which is otherwise allowed under paragraph (1) shall be further increased for each admission above such range by one-half of the average revenue per admission that would have been allowed under paragraph (1) if the actual percentage change in admissions (as compared to the base accounting year) had been zero, or shall be reduced for each admission below such range by one-half of the average revenue per admission that would have been so allowed, except as provided in paragraph (3); and

(3) in the case of a hospital which had more than four thousand admissions in the base accounting year, no additional revenue will be allowed for increased admissions (with respect to any accounting year) beyond 15 percent above those in the base accounting year, but the revenue otherwise permitted such a hospital under paragraphs (1) and (2) shall be reduced (dollar for dollar) for decreased admissions (in that year) beyond 15 percent below those in the base accounting year.

BASE INPATIENT HOSPITAL REVENUE

SEC. 114. (a)(1) The revenue base for application of the adjusted inpatient hospital revenue increase limit with respect to any hospital in any accounting year shall (subject to subsection (b)) be the revenue from reimbursement due and inpatient charges imposed for inpatient hospital services provided in the hospital's base accounting year (as defined in paragraph (2)).

(2) For purposes of this title, a hospital's "base accounting year" is its accounting year which ended in 1976, or, in the case of a hospital which did not meet the definition contained in section 121 for at least one full accounting year prior to an accounting year ending in 1976 in which it met such definition, the accounting period immediately prior to the first accounting year in which it satisfied such definition.

(b) The base revenue established for any hospital by subsection (a) shall (except as provided in subsection (c)) be reduced by an amount equal to any inpatient charges in such base accounting year for elements of inpatient services for which payment is not made to the hospital in an accounting year any part of which falls within a period subject to this title.

(c) Subsection (b) shall not apply with respect to revenue for inpatient services which have been found inappropriate under section 1523(a)(6) of the Public Health Service Act by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital involved is located.

ESTABLISHMENT OF EXCEPTIONS

SEC. 115. (a) The Secretary shall have authority to grant exceptions from the limits established under this title to individual hospitals for particular periods, but in any case only to the extent that the hospital requesting the exception provides evidence satisfactory to the Secretary—

(1) of the extent to which costs of providing inpatient hospital services in an accounting year any part of which falls within a period subject to this title exceed such costs in the base accounting year as the result of—

(A) changes in admissions beyond the range specified in section 113(3), or

(B) changes in capacity or in the character of inpatient services available in the hospital or major renovation or replacement of physical plant, but only if such changes have increased inpatient costs per admission by more than one-third of the difference specified in section 112(b)(1)(B) over inpatient care costs per admission in the previous accounting year;

(2) that the revenue otherwise allowable (taking into account all other available resources) is insufficient to assure the solvency of the hospital as indicated by the existence of a current ratio of assets to liabilities (determined in accordance with the last sentence of this subsection) of less than the ratio which the Secretary estimates is being experienced by 25 percent or less of the hospitals subject to this title; and

(3) that the changes in admissions, capacity, plant, or services available generating the excess costs described in paragraph (1) have been found to be needed under section 1523(a)(5) of the Public Health Service Act or appropriate under section 1523(a)(6) of the Public Health Service Act by the State health planning and development agency, designated under section 1521 of such Act for the State in which the hospital involved is located.

For purposes of paragraph (2), the term "current ratio of assets to liabilities", with respect to any hospital, means the sum of the cash, notes and accounts receivable (less reserves for bad debts), marketable securities, and inventories held by such hospital divided by the sum of all liabilities of such hospital falling due in an accounting year for which the exception is requested under this section.

(b) The Secretary shall either approve any request for an exception made by a hospital under subsection (a), or deny such request, within a period not to exceed 90 days after the hospital has filed in a manner and form prescribed by the Secretary the evidence required by such subsection. Any such request not denied within such 90-day period shall be deemed approved.

(c) Any hospital granted an exception under this section must make itself available for an operational review by the Secretary. The findings from any such review shall be made public, and continuance of the exception shall be contingent on implementation of any recommendations which may be made (as a result of such operational review) for improvements to increase efficiency and economy.

(d)(1) If the Secretary grants an exception with respect to any accounting year to a hospital which had 4,000 or more admissions in the base accounting year on the grounds set forth in subsection (a)(1)(A), such hospital shall be allowed increased revenue for purposes of this title as though it were a hospital with fewer than 4,000 admissions in such base year under section 113.

(2) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(B), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on its allowable rate of increase in inpatient hospital revenues shall be adjusted upward accordingly) in an amount no greater than the amount necessary to maintain the current ratio of its assets to liabilities (determined in accordance with the last sentence of subsection (a)) at the level specified in subsection (a)(2).

(e)(1) Any hospital which is dissatisfied with a determination of the Secretary under this section may obtain a hearing before the Provider Reimbursement Review Board established under section 1878 of the Social Security Act, if the amount in controversy is $25,000 or more and the request for such hearing is filed within 180 days after receipt of the Secretary's determination.

(2) For purposes of paragraph (1), the Secretary (notwithstanding section 1878(h) of the Social Security Act) shall appoint five additional members to the Provider Reimbursement Review Board, following the specifications for expertise applicable to the existing five members. Such five additional members shall constitute the Board for purposes of reviewing appeals under this title. All other provisions of section 1878 of the Social Security Act shall apply except that the Board as so constituted shall be considered as reviewing decisions of the Secretary rather than of a fiscal intermediary, and subsection (b) of such section shall not apply.

ENFORCEMENT

SEC. 116. (a) Notwithstanding any provision of title XVIII of the Social Security Act, reimbursement for inpatient hospital services under the program established by that title shall not be payable, on an interim basis or in final settlement, to the extent that it exceeds the applicable limits established under this title.

(b) Notwithstanding any provision of title V or XIX of such Act, payment shall not be required to be made by any State under either such title with respect to any amount paid for inpatient hospital services in excess of the applicable limits established under this title; nor shall payment be made to any State under either such title with respect to any amount paid for inpatient hospital services in excess of such limits.

(c) Notwithstanding any other provision of law, receipt by any hospital of payment for inpatient hospital services in excess of the applicable limits established under this title, or payment by any cost payer (as defined in section 122(e)(2)) for inpatient hospital services on a cost basis in excess of such limits, shall subject such hospital or cost payer—

(1) to the Federal excise tax imposed by section 4991 of the Internal Revenue Code of 1954 (as added by section 128 of this Act), and

(2) to exclusion, at the discretion of the Secretary, from participation in any or all of the programs established by titles V, XVIII, and XIX of the Social Security Act.

(d)(1) Where the Secretary determines that average charges per admission billed for inpatient services by a hospital during an accounting year any part of which is included in a period subject to this title exceed the applicable limits established under this title, he shall promulgate (or shall require the hospital to promulgate in such manner as he may prescribe) the percentage by which the average charge per admission billed in that accounting year by the hospital exceeded the applicable limitation on average charges per admission established under this title.

(2) Any hospital described in paragraph (1) shall be exempt from the penalties set forth in subsection (c) if it holds in escrow an amount equal to the percentage promulgated under such paragraph multiplied by the hospital's total inpatient charges less its inpatient charges applicable to cost payers (as defined in section 122(e)), imposed on the accounting year referred to in such paragraph, until such time as charges below the applicable limits established under this title, equal in the aggregate to such amount, are experienced; but any such hospital which fails to do so shall be subject to such penalties.

EXEMPTION FOR HOSPITALS IN CERTAIN STATES

SEC. 117. (a) At the request of the Governor (or other Chief Executive) of any State (including the District of Columbia and Puerto Rico) the Secretary may exclude from the application of this title all hospitals physically located in such State if the Secretary finds that—

(1) such State has had in effect for at least one year as of the date of such request a program for containing hospital costs in the State which covers at least 90 percent of the hospitals in the State which would otherwise be covered under the program established by this title;

(2) the State program applies at least to all inpatient care revenues of such hospitals (except revenues received under title XVIII of the Social Security Act);

(3) the Governor (or Chief Executive) certifies, and the Secretary determines, that the aggregate rate of increase in inpatient hospital revenues for all hospitals in the State will not exceed the rate promulgated by the Secretary under section 112(b); and

(4) the Governor (or Chief Executive) has submitted, and had approved by the Secretary, a plan for recovering any excess of revenue which (notwithstanding paragraph (3)) may occur.

(b) A State which would meet the conditions of this section except that its program does not satisfy subsection (a)(2), but whose program did cover at least 50 percent of all inpatient care revenues during the 12-month period preceding the date of its request under subsection (a), will nonetheless be eligible under this section if, by the date of such request, it does have a program which satisfies such subsection.

EXEMPTION FOR HOSPITALS ENGAGED IN CERTAIN EXPERIMENTS OR DEMONSTRATIONS

SEC. 118. A hospital may be excluded from the application of this title if the Secretary determines that (1) such exclusion is necessary to facilitate an experiment or demonstration entered into under section 402 of the Social Security Amendments of 1967 or section 222 of the Social Security Amendments of 1972, and (2) such experiment or demonstration is consistent with the purposes of this title.

PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS

DEFINITION OF HOSPITAL

SEC. 121. (a) For purposes of this title (subject to subsection (b) of this section), the term "hospital", with respect to any accounting year, means an institution (including a distinct part of an institution participating in the program established under title XVIII of the Social Security Act) which—

(1) satisfies paragraphs (1) and (7) of section 1861(e) of the Social Security Act, and

(2) had an average duration of stay of 30 days or less in the preceding accounting year.

(b) An institution shall not be considered a "hospital" during any part of a period subject to this title if with respect to such period it—

(1) is a Federal hospital;

(2) has met the conditions specified in subsection (a) (under present and previous ownership) for less than two years before such period; or

(3) derived more than 75 percent of its inpatient care revenues on a capitation basis, disregarding revenues received under title XVIII of the Social Security Act, from one or more health maintenance organizations (as defined in section 1301(a) of the Public Health Service Act).

OTHER DEFINITIONS

SEC. 122. For purposes of this title—

Accounting Year

(a) The term "accounting year" with respect to any period means—

(1) in the case of a hospital participating in the program established by title XVIII of the Social Security Act, a period of 12 consecutive full calendar months including the same months as the last full reporting period allowed for reimbursement purposes under such title;

(2) in the case of a hospital not participating in the program established by title XVIII of the Social Security Act, a period of 12 consecutive full calendar months including the same months as the last full accounting period used by such other cost payer as the Secretary may designate; and

(3) in the case of a hospital which is not participating in the program established by title XVIII of the Social Security Act and for which the Secretary does not designate an accounting year under paragraph (2), a calendar year.

Inpatient Hospital Services

(b) The term "inpatient hospital services" has the meaning given it by section 1861(b) of the Social Security Act (including in addition the services otherwise excluded by paragraph (5) thereof).

Inpatient Charges

(c) The term "inpatient charges" means regular rates, applied to all inpatient hospital services, that meet the requirements of section 405.452(d)(4) of the Federal regulations applicable to title XVIII of the Social Security Act.

Admissions

(d) The term "admission" means the formal acceptance of an inpatient by a hospital, excluding newborn children (unless retained after discharge of the mother) and transfers within inpatient units of the same institution.

Cost Payer

(e) The term "cost payer" means—

(1) a program established by or under title V, XVIII, or XIX of the Social Security Act, and

(2) any organization which (A) meets the definition of contained in section 1842(f)(1) of the Social Security Act, and (B) reimburses a hospital subject to this title for inpatient hospital services on the basis of cost as defined for purposes of such reimbursement.

DETERMINATION OF INPATIENT REIMBURSEMENT

SEC. 123. For purposes of section 111, inpatient reimbursement under the programs established by titles V, XVIII, and XIX of the Social Security Act shall be determined without regard to adjustments resulting from the application of section 405,460(g), 405.455(d), 405.415(f), or 405.415(d)(3) of the Federal regulations applicable to such title XVIII.

EXEMPTION OF NONSUPERVISORY PERSONNEL WAGE INCREASES FROM REVENUE LIMIT

SEC. 124. (a) At the request of any hospital which is subject to the provisions of this title and which provides the data necessary for the required calculation, the Secretary shall modify the inpatient hospital revenue increase limit and the adjusted inpatient hospital revenue increase limit otherwise established for such hospital with respect to any accounting year under section 112 to allow such hospital to receive, without restriction, revenue equal to the average amount of any increase in regular wages granted in such year to employees who do not meet the definition of "supervisor" as that term is used for purposes of the National Labor Relations Act and (if not employees of a State or political subdivision thereof) who are covered by such Act.

(b) Such modified limits for any accounting year shall be calculated by adding together—

(1) the average percentage increase in regular wages granted to the employees referred to in subsection (a) since the close of the preceding accounting year multiplied by the percentage of total inpatient cost (as determined for purposes of title XVIII of the Social Security Act attributable to such wages in such preceding year; and

(2) the inpatient hospital revenue increase limit or, as appropriate, the adjusted inpatient hospital revenue increase limit otherwise applicable to the hospital under this title multiplied by the percentage of revenues (as determined for purposes of title XVIII of the Social Security Act) attributable to all other expenses in the preceding accounting year.

(c) The modified inpatient hospital revenue increase limit and adjusted inpatient hospital revenue increase limit established under subsection (b) for any hospital with respect to any accounting year shall constitute such hospital's inpatient hospital revenue increase limit or, as appropriate, the adjusted inpatient hospital revenue increase limit for such year under section 111 for all of the purposes of this title.

(d) This section shall apply to accounting years beginning after March 31, 1979, only to the extent the Secretary so determines.

DISCLOSURE OF FISCAL INFORMATION

SEC. 125. (a)(1) Every hospital shall (A) submit semiannually to the health systems agency designated under section 1515 of the Public Health Service Act for the health service area in which it is located, by March 1 and September 1 of each year, its average semi-private room rate and the charges for the 10 other services which the health systems agency finds represent the services which are most freqeuntly used or most important for purposes of comparing hospitals, and make available all cost reports submitted to cost payers, and (B) submit annually its overall plan and budget described in section 1864(z) of the Social Security Act.

(2) Failure by any hospital to comply with the requirement of paragraph (1) shall subject it to exclusion, at the discretion of the Secretary, from participation in any or all of the programs established by titles V, XVIII, and XIX of the Social Security Act.

(b) Each health systems agency designated under section 1515 of the Public Health Service Act shall publish every April 1 and October 1, in readily understandable language for public use, the information it receives under this section, in a manner designed to facilitate comparisons among the hospitals in its area.

IMPROPER CHANGES IN ADMISSION PRACTICES

SEC. 126. Upon written complaint by any institution meeting the conditions set forth in paragraphs (1) and (7) of section 1861(e) of the Social Security Act that one or more hospitals subject to this title in a health service area for which a health systems agency has been designated under section 1515 of the Public Health Service Act has changed its admission practices in a manner that would tend to reduce the proportion of inpatients of such hospital or hospitals for whom reimbursement at less than the inpatient charges (as defined in section 122(c) of this Act) applicable to such inpatients is anticipated, such health systems agency shall investigate the complaint and, upon a finding by such agency that the complaint is justified, the Secretary may impose the sanction set forth in section 116(c)(2) of this Act.

REVIEW OF CERTAIN DETERMINATIONS

SEC. 127. Any determinations made on behalf of the Secretary under this title with respect to the application of its provisions to individual hospitals (other than determinations made under section 115 or 126) shall be subject to the provisions of section 1878 of the Social Security Act in the same manner as determinations with respect to the amount of reimbursement due a provider of services under title XVIII of such Act.

EXCISE TAX ON EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

SEC. 128. (a) Subtitle D of the Internal Revenue Code of 1954 (relating to miscellaneous excise taxes) is amended by adding at the end thereof the following new chapter:

"CHAPTER 45—TAX ON CERTAIN EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

"Sec. 4991. Imposition of tax.

"SEC. 4991. IMPOSITION OF TAX.

"(a) IN GENERAL.—There is hereby imposed, with respect to the receipt by any hospital of payment for inpatient hospital services in excess of the applicable limits established by title I of the Hospital Cost Containment Act of 1977, and with respect to any payment made by any cost payer as defined in section 122(e)(2) of such Act for inpatient hospital services on a cost basis in excess of such limits, a tax equal to 150 percent of the amount of such excess. The tax imposed by this subsection shall be paid by the hospital or cost payer.

"(b) EXCEPTION.—The tax imposed by subsection (a) shall not apply with respect to any hospital so long as it is determined by the Secretary of Health, Education, and Welfare to be taking the corrective action described in section 116(d)(2) of the Hospital Cost Containment Act of 1977.

"(c) DEFINITIONS.—Terms used in subsections (a) and (b) have the meanings given them by title I of the Hospital Cost Containment Act of 1977.

"(d) ADMINISTRATION.—Under and to the extent provided by regulations of the Secretary, the appropriate provisions of subtitle F (relating to procedure and administration) shall be made applicable with respect to the tax imposed by subsection (a) of this section.".

(b) The table of chapters for subtitle D of such Code is amended by adding at the end thereof the following new item:

"Chapter 45. Tax on Certain Excessive Payments for Inpatient Hospital Services.".

TITLE II—LIMITATION ON HOSPITAL CAPITAL EXPENDITURES

SEC. 201. (a) Part A of title XV of the Public Health Service Act is amended by adding at the end thereof the following new section:

"LIMITATION ON HOSPITAL CAPITAL EXPENDITURES, CEILING FOR THE SUPPLY OF HOSPITAL BEDS, AND STANDARD FOR OCCUPANCY OF HOSPITAL BEDS

"SEC. 1504 (a)(1) Before the beginning of the fiscal year beginning October 1, 1977, and at least 60 days before the beginning of each succeeding fiscal year, the Secretary shall promulgate a sum as a hospital capital expenditure limit applicable to such fiscal year. The sum promulgated as a limit under the preceding sentence for any period shall be an amount which may not exceed $2,500,000,000.

"(2) The Secretary shall apportion the sum promulgated under paragraph (1) for any fiscal year among the various States on the basis of the population of the various States; except that for any fiscal year beginning more than 18 months after the date of enactment of this section the Secretary shall apportion the sum promulgated under paragraph (1) for such fiscal year among the various States, taking into account the population of the various States; and also taking into account, to the extent feasible, variations among the States in the costs of construction, population patterns and growth, the need for hospital facilities and equipment and for modernization of existing hospital facilities and equipment, and other factors important to the equitable apportionment of such sum.

"(b)(1) At the time the Secretary promulgates under subsection (a) a hospital capital expenditure limit the Secretary shall also promulgate for the fiscal year to which such limit is applicable—

"(A) a national ceiling for the supply of hospital beds within health service areas established under section 1511 (hereinafter in this title referred to as the 'supply ceiling'), and

"(B) a national standard for the rate of occupancy of hospital beds within such areas (hereinafter in this title referred to as the 'occupancy standard').

"(2) The supply ceiling promulgated for any fiscal year under paragraph (1)(A) may not exceed the ratio of 4 hospital beds per 1,000 of population; but the Secretary may promulgate under such paragraph a different supply ceiling for health services areas which have special characteristics or which meet special requirements established by the Secretary.

"(3) The occupancy standard promulgated under paragraph (1)(B) for any fiscal year may not be less than 80 percent; but the Secretary may establish a different occupancy standard for health service areas which have special characteristics or which meet special requirements established by the Secretary.".

(b)(1) Part C of title XV of the Public Health Service Act is amended by adding at the end thereof the following new section:

"CERTIFICATE OF NEED PROGRAM

"SEC 1527. (a) The certificate of need program required by section 1523(a)(4)(B) shall provide for the following:

"(1) Review and determination of need under such program of institutional health services, health care facilities, and health maintenance organizations shall be made before the time such services, facilities, and organizations are offered or developed or substantial expenditures are undertaken in preparation for such offering or development.

"(2) The program shall be administered in such a manner that only those services, facilities, and organizations found to be needed shall be offered or developed in the State in which the program applies.

"(3) In issuing a certificate of need for any such service, facility, or organization, the State shall specify in the certificate the maximum amount of capital expenditures which may be made for such service, facility, or organization under such certificate.

"(4) The aggregate of the maximum amounts of capital expenditures authorized in a fiscal year in accordance with paragraph (3) for hospitals may not exceed the portion of the sum promulgated under section 1504(a)(1) and apportioned to the State under section 1504(a)(2) for such fiscal year, as adjusted in accordance with this paragraph. For any fiscal year the sum apportioned to a State under section 1504(a)(2) shall (A) if the aggregate of the maximum amounts of capital expenditures authorized by the State in the preceding fiscal year in accordance with paragraph (3) for hospitals was less than the portion of such sum so apportioned to the State for such fiscal year, the difference between each authorized maximum amounts and the sum so apportioned shall be added to the sum so apportioned to the State for the fiscal year following such fiscal year, and (B) if in the fiscal year there was a closure of a hospital (or part thereof) through which institutional health services found under section 1523(a)(6) to be inappropriate were provided, then the amount by which the historical cost (as defined for purposes of title XVIII of the Social Security Act) of such hospital or part exceeds the total amount of depreciation of such hospital or part claimed for purposes of establishing the reasonable costs of services provided by the hospital for purposes of receiving reimbursement under title XVIII of the Social Security Act shall be added to the portion of such sum so apportioned to the State for such fiscal year.

"(b)(1) Under such a certificate of need program a certificate of need may not, except as provided in paragraph (2), be granted for an institutional health service or health care facility within a health service area established under section 1511 if the development of such service or facility under such certificate would result in a number of hospital beds within such area which is in excess of the applicable supply ceiling promulgated under section 1504(b)(1)(A).

"(2) If in a health service area the number of hospital beds is in excess of the supply ceiling applicable to a fiscal year, then a certificate of need may be granted for such a service or facility the development of which would result in a number of new hospital beds which is not more than one-half the number of hospital beds removed permanently from service in such area in such fiscal year.

The amount by which the number of new hospital beds with respect to which certificates of need may be issued in a fiscal year under the preceding sentence is less than the number of new hospital beds with respect to which certificates of need were issued in such fiscal year may be added to the number of new hospital beds with respect to which certificates of need may be issued in the succeeding fiscal year.

"(c)(1) Under such a certificate of need program a certificate of need may not, except as provided in paragraph (2), be granted for an institutional health service or health care facility within a health service area if the development of such service or facility could reasonably be expected to produce a number of hospital beds which would result in a hospital bed occupancy rate within such area which is less than the applicable occupancy standard promulgated under section 1504(b)(1)(B).

"(2) If in any fiscal year the hospital bed occupancy rate within a health service area is less than the occupancy standard applicable for such fiscal year, then a certificate of need may be granted for a service or facility the development of which would result in a number of new hospital beds which is not more than one half of the number of hospital beds removed permanently from service in such area in such fiscal year. The amount by which the number of new hospital beds with respect to which certificates of

need may be issued in a fiscal year under the preceding sentence is less than the number of new hospital beds with respect to which certificates of need were issued in such fiscal year may be added to the number of new hospital beds with respect to which certificates of need may be issued in the succeeding fiscal year.

"(d) In granting certificates of need under such a program a State shall take into account priorities recommended by health systems agencies within the State under section 1513(h).".

(2) The second sentence of section 1523(a)(4) of the Public Health Service Act is repealed.

(c) Section 1531 of the Public Health Service Act is amended (1) by striking out "For purposes of this title" and inserting in lieu thereof, "Except as otherwise, provided for purposes of this title", and (2) by adding after paragraph (5) the following new paragraphs:

"(6) For purposes of sections 1504 and 1527, the term 'hospital', with respect to any accounting year, means an institution (including a distinct part of an institution participating in the program established under title XVIII of the Social Security Act) which—

(A) satisfies paragraphs (1) and (7) of section 1861(e) of the Social Security Act, and

(B) has an average duration of stay of 30 days or less in the preceding accounting year,

except that for any fiscal year such term does not include a Federal hospital or an institution which during such fiscal year derived more than 75 percent of its inpatient care revenues on a capitation basis, disregarding revenues received under title XVIII of the Social Security Act, from one or more health maintenance organizations (as defined in section 1301(a)).

"(7) For the purposes of sections 1504 and 1527, the term 'capital expenditure' means an expenditure which, under generally accepted accounting principles, is not properly chargeable as an expense of operation and maintenance and which (A) exceeds $100,000, (B) changes the bed capacity of the facility with respect to which such expenditure is made, or (C) substantially changes the services of the facility with respect to which such expenditure is made, except that such term includes expenditures for obtaining a facility or part thereof, or equipment for a facility or part, under a lease or comparable arrangement but does not include the acquisition of an existing hospital facility if such acquisition does not make a change in the services or bed capacity of such hospital facility. For purposes of clause (A) of the preceding sentence, the cost of the studies, surveys, designs, plans, working drawings, specifications, and other activities essential to the acquisition, improvement, expansion, or replacement of the plant and equipment with respect to which such expenditure is made shall be included in determining whether such expenditure exceeds $100,000. If a person makes an acquisition of equipment for a hospital and donates it to the hospital, the expenditure for such acquisition shall be considered a hospital capital expenditure for purposes of sections 1504 and 1527.".

(d) Section 1532(b)(2) of the Public Health Service Act is amended (1) by striking out "ninety days" and inserting in lieu thereof "one year", and (2) by adding before the period "or longer than such shorter period from such date as the Secretary may prescribe".

SEC. 202. (a)(1) Section 1122 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(j)(1) Except as provided in paragraph (2), in determining the Federal payments to be made under titles V, XVIII, and XIX with respect to services furnished in a health care facility located in a State—

"(A) which has not entered into an agreement with the Secretary under this section, or

"(B) which does not have a certificate of need program approved under title XV of the Public Health Service Act,

the Secretary shall not include an amount equal to ten times any amount which is attributable to depreciation, interest on borrowed funds, and return on equity capital (in the case of proprietary facilities) or other expenses related to capital expenditures after September 30, 1977, for such health care facility unless the Secretary has approved, in accordance with procedures and criteria established by the Secretary, such expenditures after taking into account any recommendation made by a State agency designated under section 1521 of the Public Health Service Act. With respect to any organization which is reimbursed on a per capita or a fixed fee or negotiated rate basis, in determining the Federal payments to be made under titles V, XVIII, and XIX, the Secretary shall exclude an amount which in his judgment is a reasonable equivalent to the amount which would otherwise be excluded under this subsection if payment were to be made on other than a per capita or a fixed fee or negotiated rate basis.

"(2) Paragraph (1) shall not apply with respect to determination of Federal payments to be made under title V, XVIII, or XIX with respect to services furnished in a health care facility located in a State which has a certificate of need program, approved by the Secretary for purposes of this section, which applies to capital expenditures for hospitals and with respect to which such capital expenditures meet the requirements of section 1527 of the Public Health Service Act.".

(2) Subsection (e) of such section 1122 is amended by striking out "subsection (d)" and inserting in lieu thereof "subsection (d) or (j)".

(3) Subsection (b) of such section 1122 is amended by inserting before the period at the end thereof the following: "or does not meet any applicable requirement of subsection (a)(4), (b), or (c) of section 1527 of the Public Health Service Act".

(4) Subsection (d)(1) of such section 1122 is amended by striking out "any amount" in the matter following subparagraph (B) of the first sentence of such section and inserting in lieu thereof "an amount equal to ten times any amount".

(b) The amendments made by subsection (a) shall apply with respect to capital expenditures made after September 30, 1977.

SEC. 203. (a) Section 103 of the Internal Revenue Code of 1954 (relating to exclusion from gross income of interest on certain governmental obligations) is amended by redesignating subsection (f) as subsection (g), and by inserting after subsection (e) the following new subsection:

"(f) Obligations Supporting Increases in Acute Care Hospital Beds.—Any obligation issued by a State or territory for an institutional health service, health care facility, or health maintenance organization—

"(1) the development of which would result in a number of hospital beds within a health service area which number is in excess of the applicable supply ceiling for such area promulgated under section 1504(b)(1)(A) of the Public Health Service Act, or

"(2) for which a certificate of need has not been issued under a certificate of need program approved under title under title XV of the Public Health Service Act,

shall be treated as an obligation not described in subsection (a)(1).".

(b) The amendments made by subsection (a) shall apply with respect to taxable years beginning after the date of the enactment of this Act.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the bill be referred jointly to both the Committee on Finance and the Committee on Human Resources.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be received and appropriately referred.

Mr. HATHAWAY. Mr. President, I am joining with the Senator from Massachusetts (Mr. KENNEDY) to introduce President Carter's proposed Health Cost Containment Act of 1977. This act represents the culmination of much careful study and attention by this administration to the problem of rising hospital expenditures. While I am not necessarily convinced that the specific provisions or overall approach of the President's measure will successfully answer all the questions generated by health care inflation, I do agree that such inflation has reached intolerable levels and must be curbed.

Moreover, it is clear that considerable thought and effort went into fashioning this measure, and it therefore represents a good point from which Congress can begin to consider ways to bring these inflationary trends under control.

An ever growing share of our GNP is consumed by health care today. While 20 years ago only 5 percent of our GNP was spent in the health sector, over 8.6 percent is spent for these purposes today. Few people understand or appreciate that this health care crisis is as serious for us in America today as the energy crisis, or any other crisis we face.

Just as there comes a point when the cost of energy causes our standard of living to decline, there comes a time when health care costs will diminish the attainment of other human needs.

Today, nearly 12 cents of every Federal dollar goes for health care—nearly 9 cents for hospital care alone. Just as States have had to raise taxes and cut services to cover their skyrocketing medicaid costs, so the Federal Government has had to set more money aside for hospital costs, which consume 40 percent of the Nation's health care budget and which have been escalating faster than the cost-of-living for more than two decades.

Since 1965, for example, the cost of an average hospital stay climbed from less than $300 to more than $1,300. Americans today must work an average of more than 1 full month of every year just to pay for their health care, which will just pay for their hospital costs. This is reflected in an average 15 to 20 percent rise in private health insurance premiums. And the end of the upward spiral is nowhere in sight. In calendar year 1976 the cost of a stay in a hospital increased more than 15 percent, or 2½ times the 6 percent increase in the Consumer Price Index. The hospital cost increase even outstripped increases in energy and food. Based on these inflationary patterns, the need for controlling increases in hospital costs is clear and compelling.

The Hospital Cost Containment Act of 1977 will—

Limit the in-patient reimbursements

of acute care hospitals, excepting new hospitals, Federal hospitals, and Health Maintenance Organization, HMO, hospitals.

Provide an automatic formula to adjust the 9 percent limit for moderate changes in expected patient load. The formula will contain strong incentives to discourage unnecessary hospitalization.

Include an adjustment for hospitals which provide wage increases to their nonsupervisory employees.

Provide an exceptions process for the small percentage of hospitals which will undergo extraordinary changes in patient loads or major changes in capital equipment and services. The program will require the Department of HEW to respond to any application for an exception within 90 days.

Disallow in the computation of a hospital's base cost any unwarranted expenditures made in anticipation of the implementation of this program.

Allow States which operate cost containment programs, and are capable of meeting the Federal program's criteria, to continue their own regulatory approaches.

The administration maintains that this program will save about $2 billion in fiscal year 1978—over $650 million in the Federal budget, over $300 million in State and local budgets, and almost $900 million in private health insurance and payments by individuals. In fiscal year 1980, total savings will exceed $5.5 billion.

As a member of both the Finance and Human Resources Committees, to which the administration's proposal will be jointly referred, I have agreed to cosponsor this measure because I strongly agree with its overall goals and objectives. However, I also agree with those of my colleagues who believe we should move only with great caution in this area, and that in the process we should make our own careful analysis of all the needs of all the participants in our Nation's health care system today.

For example, the problems and questions that will almost certainly need to be addressed in the weeks and months ahead include:

The need to provide carrots as well as sticks in order to convince hospitals to operate more efficiently;

The need to examine rising costs in all kinds of health care facilities, such as nursing homes, or intermediate care facilities, as well as in hospitals;

The need to differentiate among different types of hospitals, with different needs and clienteles, so as to be able to adjust a system of controls to each individual hospital's unique situation;

The need to insure that cost controls are not achieved at the expense of meeting the health care needs of the poor and the disadvantaged;

The need carefully and critically to examine those elements that contribute to rising hospital costs, such as physician's fees, hospital supply companies, and other areas, as well as simply examining the hospital charges themselves;

The need to examine other contributing factors that may well be generated by the Federal Government itself, such as increased paperwork or unrealistic requirements generated by an ever-growing body of Federal regulations;

The need to insure equitable treatment for all classes of salaried hospital employees, including nurses, and to insure that it does not fall to them alone to bear the burden of supporting cost containment; and

The need to insure that expenses completely beyond the hospital's control, such as energy costs, are adequately accounted for in the process of containing costs.

This is by no means an exhaustive list of the very serious questions and problems we will confront in attempting to enact an effective, equitable cost containment proposal into law. Yet, I am convinced that we can obtain such a law, and I believe the President's proposed legislation is an excellent starting point for congressional consideration of this profound and significant national problem.

By Mr. RIBICOFF (for himself, Mr. HATHAWAY, and Mr. KENNEDY):

S. 1392. A bill to strengthen and improve the early and periodic screening, diagnosis, and treatment program and for other purposes; to the Committee on Finance.

Mr. RIBICOFF. Mr. President, I am pleased to introduce the administration's new child health assessment program.

This initiative will expand and improve the existing early periodic screening, diagnosis, and treatment program. It is important. Poor children have a greater number of illnesses than other children. They lose more days from school, and they have less access to a doctor's care. Discovery and treatment of these health problems at an early age improves a child's chance of having a productive adulthood.

We all recognize the importance of preventive health care for young children. However, implementation of the early and periodic screening, diagnosis, and treatment program has been incredibly slow. The program became law in January 1968. It took the Department of Health, Education, and Welfare 3 years to issue regulations. Today only about 2 million of the 12 million children eligible for medicaid are screened. Twenty-two percent of those found to need treatment do not get it. And the program competely ignores approximately 700,000 children under 6 who are poor but ineligible for medicaid.

This new child health assessment program strengthens our efforts to screen and to treat children. It extends medicaid eligibility to children under 6 whose families meet the income requirements for medicaid but do not meet other State eligibility requirements.

Most of these children are in intact families. All of these children will now be eligible for medicaid and for screening, diagnostic, and treatment services. Immunization against childhood diseases will also be provided.

The quality of care will be improved by phasing in a requirement that assessments be performed by centers or physicians capable of delivering treatment.

The child health assessment program includes regularly scheduled health assessments and treatments for conditions and problems diagnosed.

These improved State services will be made possible through an increase in the Federal matching rate for the program. The matching rate for assessment and treatment of children will increase from an average of 55 percent to an average of over 75 percent. States which meet performance standards will also have their Federal matching payment for medicaid administration costs increased.

The administration estimates that this program will cost $180 million in the next fiscal year. This is a tiny sum in comparison to the overall medicaid budget. This money is an investment in our future. It gives us a chance to offer poor children a healthy and productive life.

Mr. President, I ask unanimous consent that a summary of this bill and a breakdown of the costs be printed immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION SUMMARY

The first section of the draft bill would provide the short title of the Act—the "Child Health Assessment Act".

Section 2 of the draft bill would provide the purposes of the Act—to expand the availability of health care to financially needy children, to improve the quality of such care, and to increase immunization levels of children.

Section 3 of the draft bill would amend section 1902(a)(13) of the Social Security Act by adding two new subparagraphs to the Medicaid State plan requirements. The first would require that, effective October 1, 1977, all children under the age of six who are members of families who meet the income and resources eligibility requirements in each State for aid to families with dependent children (AFDC) be eligible under the State plan for the program currently referred to as early and periodic screening, diagnosis, and treatment (EPSDT). Other provisions in the draft bill are designed to improve the quality of care under this program and would modify the terms used to describe the program. Currently, the federal law requires that the EPSDT program and Medicaid be made available only to recipients of federal categorical cash assistance, although States may, at their option, make eligible for Medicaid and EPSDT other children under 21 whose families are within the federal income limitations for Medicaid.

The second new paragraph which would be added to the State plan requirements by section 3 of the draft bill would require each State to make available to any assessed child—whether the child was assessed as required by federal law or at the option of the State—all medical care and services for which federal financial participation under Medicaid is available, other than those for the treatment of mental illness, mental retardation, developmental disabilities and dental problems not discovered during an assessment. Currently, services which are required to be provided are specified in regulations and are limited to services each State already makes available under its Medicaid

plan, as well as services for the treatment of vision, hearing, and certain dental problems.

Section 4(a) of the draft bill would amend section 1902(a)(10) of the Social Security Act to require that States make eligible for Medicaid all children under the age of six who are members of families who meet the income and resources eligibility requirements for AFDC in each State.

Section 4(b) of the draft bill would make conforming changes in title XIX of the Social Security Act to make clear that child health assessments and follow-up services provided as a result of amendments contained in the draft bill are not thereby to be required to be provided to individuals not meeting the appropriate age requirements.

Section 5 of the draft bill would add a new section to title XIX of the Social Security Act. That section describes the child health assessment program which would be required by the law. The program would be available to AFDC recipients under 21 (as under current law), certain income eligible children under 6 as previously described (currently optional in each State), and other income eligible children under 21 at each State's option. The section would require each health care provider in the program to enter into an agreement with the State Medicaid agency to (1) perform periodic health assessments as required by regulations of the Secretary; (2) assume over the next three years gradually increasing responsibility for the provision of a minimal range of diagnostic and treatment services as required by regulations of the Secretary so that (except in areas where the Secretary grants a waiver) diagnostic and treatment services will be provided directly at the end of the three year period; (3) refer children for other appropriate services; (4) take responsibility for case management; (5) be available to meet the continuing health needs of assessed children; and (6) make reports required by the State or Secretary. The new section 1912 would also make eligible for continued Medicaid services for a period of six months any child who has been assessed but whose family income has increased, or who has become ineligible for AFDC, and would thereby otherwise become ineligible for Medicaid.

Section 6 of the draft bill would add an additional State plan requirement that States encourage participation by physicians and health care centers in the child health assessment program. It also would require appropriate coordination among relevant State and local agencies and arrangements for the provision of appropriate support services.

Section 7(a) of the draft bill would provide for increased federal financial participation in the cost of health assesments and all related or follow-up care and services provided to assessed children. Currently, the federal share of the cost of such care is the "medical assistance percentage" for each State. The range of that percentage is between 50 percent and 78 percent (and averages 55 percent). Section 7 would increase the percentage for purposes of the child health assessment program to the average of the current medical assistance percentage in each State and 90 percent or to 75 percent, whichever is greater.

Section 7(b) of the draft bill would provide a fiscal sanction for any State which fails to meet certain program standards specified in the bill. The sanction would be a reduction by 20 percent of the amount payable to a State for administration of the Medicaid program. Currently the reduction is one percent of federal financial participation in a State's AFDC costs. Other changes in the fiscal reduction provision are that it would be applied only with respect to fiscal quarters after a State is notified of a shortcoming (currently the sanction applies retroactively as well) and that the Secretary could postpone any reduction for up to six months to permit a State to correct its program. The amendment also would allow the Secretary to set by regulation the standards of performance a State must attain.

Section 7(b) would also provide a financial bonus to any State meeting the standards of good performance which the Secretary would specify in regulations. The bonus would be an increase from 50 to 75 percent in federal reimbursement for general State administrative costs for Medicaid.

Section 8 contains three conforming amendments. One would repeal, effective with respect to fiscal quarters after September 30, 1977, the current financial sanction applicable to the AFDC program. The others would modify the terms currently used in title XIX to refer to the child health program and would provide for the transition into the revised program of children currently being served under LPSDT.

Fiscal year 1978 costs—Child health assessment program

[In millions]

Expanded coverage for currently eligible children	$60
Extending care to poor children not currently eligible	48
Guaranteeing eligibility for treatment for at least 6 months after screening	27
Increased administrative expenses	20
Additional or expanded resources (especially rural health centers	25
Total	180

Mr. HATHAWAY. Mr. President, with increasing public and private concern over escalating health care costs and the administration's stated commitment to a national health policy, it becomes incumbent upon us to find more effective means of promoting and maintaining health. And at least on its face, no investment of public resources is better spent than on the prevention, early detection and treatment of disease and disability in children. Whether one couches the decision in the rhetoric of cost-benefit ratios and life-years or in the humanistic phrases of equality, access, quality of care and the right to health, the allocation of public moneys for the detection of illness in poor children and its followup is money well spent. The Child Health Assessment Act of 1977 would do this through improving the EPSDT program by reaching more poor children with more comprehensive, continuing primary and preventive health health care.

When the Social Security Act was amended by Public Law 92-603, it was hoped that the early periodic prevention, screening detection, and treatment program would reach all eligible children in need. These hopes were not fully realized.

Current efforts to improve health services for poor children are clearly inadequate. The major existing program seeks to provide health screening and treatment for medicaid-eligible children.

EPSDT reaches only 30 percent of the 12 million children currently eligible for medicaid.

Approximately 22 percent of the children screened under EPSDT and found to need treatment do not get the service required.

The program does not reach an estimated 700,000 children under 6 who are in families whose income meets State financial requirements for medicaid but whose family structure—the father is present, for example—makes them ineligible for medicaid. States now have the option of covering children in such families under medicaid, but only 16 States now do so. I am pleased to say my own State of Maine is one of those that does cover these children.

Even now, over a decade after medicaid and 5 years after the passage of the law setting up the EPSDT program, children do not receive adequate and continuous health care.

Poor children are likely to have twice as many hospital days as children with adequate income.

They lose more days from school.

They are bedridden more days.

They have more chronic diseases.

They have less access to a regular source of physician's care.

The proposed new child health assessment program—CHAP—would substantially strengthen the existing program by:

Requiring States to provide medicaid and EPSDT services to the estimated 700,000 poor children under 6 whose family structure makes them ineligible for medicaid.

Providing an incentive to States to improve their current service to all poor children by increasing the Federal medicaid matching rate for all assessment performed for currently eligible children by the States, all such assessment for new children who will not be eligible for the program, and for all ambulatory—nonhospital—medical care required by children who have been assessed. The new Federal match will average over 75 percent of the cost of providing these services, as opposed to the current nationwide average Federal share of 55 percent of all services.

Providing net fiscal relief to the States of some $18 million in fiscal year 1978. The increase in the Federal match will more than offset the higher costs to States of serving more children.

Improving the quality of care for children assessed under this program by gradually phasing in over the next 3 years the requirement that assessments be performed through comprehensive health care centers or primary care physicians capable of delivering necessary followup diagnosis and treatment.

Requiring that all children reached by this program be immunized against childhood diseases.

Providing additional incentives to States to meet certain goals and standards by increasing the Federal matching payments from 50 to 75 percent for all medicaid administrative expenses in States which meet such goals while assessing a penalty against the Federal share of medicaid administrative costs for failure to meet certain standards under the current law.

The essential features of this legislation are:

First. Medicaid eligibility is extended to children under 6 years old whose families meet the State's income test for AFDC or medically needy, but do not meet the family characteristic requirements. Thus, children in two-parent families and working parent families become eligible.

Second. The Federal matching rate

will be increased to cover health assessments and all ambulatory treatment to assessed children. The higher rate will be one-half of the distance between the State's current matching rate and 90 percent, but not less than 75 percent. The current average is 55 percent; the new average is 75 percent.

Third. When a child has been assessed, eligibility for medical care continues for 6 months after AFDC or medically needy status terminates.

Fourth. The States will be required to provide treatment for all conditions found in the assessment, with limitations on mental illness, mental retardation, developmental disabilities, and dental care.

Fifth. A fund of $23 million will be provided to establish, expand or improve agencies which can provide assessment and needed diagnosis and ambulatory treatment.

Sixth. A major aim of the modified program is to encourage States to enroll children with health care providers—physicians or health centers—who will render preventive and continuing care. After 3 years, reimbursement will not be provided to agencies which can perform only the screening and cannot render the needed follow-up treatment.

Seventh. States which meet performance standards will receive 75 percent reimbursement for medicaid administrative costs. States which fail to meet process standards will have their Federal reimbursement for administrative expenses reduced.

The savings to States will be $18 million, while the cost to the Federal Government will be $180 million. In the long run, this could prove an excellent investment in health capacity and the development of a continuum of care.

Mr. KENNEDY. Mr. President, I am pleased to join today with my good friend and colleague, Senator RIBICOFF, in introducing the administration's legislation that will expand and improve the availability of health care for poor children, the Child Health Assessment Act of 1977.

For too long we have been spending many billions of dollars on curative medicine when some of these resources could be better allocated to preventive medicine.

In many respects the children of the desperately poor are the individuals who can benefit the most, and benefit society the most, from efforts designed to prevent the crippling and disabling diseases, which may otherwise afflict them.

In the last decade, the percentage of children 1 to 4 years old immunized against polio has dropped from 84 percent to 60 percent. Other diseases tragically show similar trends. The major existing health program for poor children, entitled early and periodic screening, diagnosis and treatment—EPSDT—has reached only 30 percent of the 12 million children currently eligible for medicaid. Almost a quarter of the children originally screened under the EPSDT program failed to get the treatment or services they needed, and the program never reached the over half-a-million children under 6 who are in poor families not categorically eligible for medicaid.

Mr. President, the new child health assessment program—CHAP—introduced today will go a long way toward improving health care for many children. It will expand the number of children eligible for federally supported health care and will provide financial incentives to States to improve their current services to all poor children by increasing the Federal medicaid matching rate.

Mr. President, the program will include a uniform health assessment, including hearing and vision tests, and will insure that any disease detected is adequately treated. A uniform schedule for assessment at specific ages would be established, and it would be required that all children reached by the program be immunized against childhood diseases.

The Neighborhood Health Centers have played an important role in delivering comprehensive health services to children. This bill will expand the funds available for these centers.

Mr. President, as chairman of the Senate Subcommittee on Health and Scientific Research, I hope the Congress will take early and positive action on this important legislation.

By Mr. BAYH:

S. 1393. A bill to authorize actions by the Attorney General to redress deprivations of constitutional and other federally protected rights of institutionalized persons; to the Committee on the Judiciary.

Mr. BAYH. Mr. President, today I am introducing legislation designed to give statutory authority to the Justice Department to initiate suit to enforce constitutional and other federally guaranteed rights of institutionalized persons. This legislation codifies the authority exercised by the Deparment in the past to intervene in and to initiate civil actions on behalf of persons confined to mental hospitals, prisons, mental retardation facilities, reformatories for juvenile delinquents, facilities for emotionally disturbed children, and nursing homes.

The institutionalized are uniquely unable to assert their own rights. Whether for lack of intellectual or emotional capacity to aid in their own lawsuit, or merely for lack of funds to finance the extensive discovery necessary to document widespread abuses in large institutions, such persons cannot hope to present their cases effectively before a court of law. Recognizing this, the Justice Department has, during the past decade, brought a number of actions against State institutions, successfully documenting widespread deprivations of residents' constitutional and Federal rights, and compelling State officials to upgrade conditions of confinement and treatment.

Two recent Federal court decisions however, now threaten to halt the Department's litigation program. In *U.S.* v. Solomon, 419 F. Supp. 358 (D. Md. 1976) and *U.S.* v. *Mattson*, D. Mont., C.A. No. 74-138, Sept. 28, 1976, district court judges in Maryland and Montana ruled that, absent specific statutory authority, the Executive lacks standing to sue on behalf of the institutionalized. Only by codifying the Department's authority to assert the rights of such persons can Congress insure that the constitutional and Federal rights of those least able to protect themselves will be guaranteed vindication.

I. BACKGROUND—CONDITIONS IN INSTITUTIONS

A brief look at the cases brought on behalf of the institutionalized will highlight the need for continued participation by the Justice Department. In 1971, a case arising in the Federal district court in Alabama brought to the attention of the lay and legal communities alike the appalling conditions prevalent in State institutions designed to house and allegedly rehabilitate the mentally ill. In that landmark case, *Wyatt* v. *Stickney*, 325 F. Supp. 781 (M.D. Ala. 1971), 334 F. Supp. 1341 (1971), 344 F. Supp. 373 (1972), 344 F.Supp. 387 (1972), *aff'd sub nom. Wyatt* v. *Aderholt*, 503 F. 2d 1305 (5th Cir. 1974), the Justice Department was instrumental in developing a record of institutionwide abuses to which inmates of mental hospitals were being subjected. Retarded persons were tied to their beds at night and confined to strait jackets for years in the absence of sufficient staff to care for them.

To avoid additional cleanup work for staff, inmates were denied access to toilet paper and in lieu of proper sanitary maintenance, were required to walk naked—like vehicles in a car wash—through intersecting streams of water; the atrocities resulting from misuse of of hoses by institution inmates and inadequate regulation of water temperature were documented in all too graphic detail in the reported decisions. *Wyatt* v. *Aderholt*, 503 F. 2d 1305, 1310–11 (5th Cir. 1974).

Evidence of insect infestation was found in the kitchen and dining rooms, while the less than 50 cents per patient per day spent on food resulted in meals "coming closer to punishment by starvation than nutrition." *Wyatt* v. *Aderholt*, 503 F. 2d at 1310. At one institution, inadequate staff, insufficient supervision, and uncontrolled brutality of other inmates resulted in the deaths of four residents. *Wyatt* v. *Aderholt*, 503 F. 2d at 1311.

Later cases revealed no less appalling conditions in the State's prisons. Just last year a Federal district court found in one State facility "as many as six inmates packed in 4-foot by 8-foot cells with no beds, no lights, no running water, and a hole in the floor for a toilet which could only be flushed from the outside." *Pugh* v. *Locke*, 406 F. Supp. 318, 327 (M.D. Ala. 1976).

The conditions in Alabama's institutions were by no means exceptional. In New York's Willowbrook State Developmental Center, the largest mental retardation facility in the country, residents were subjected to massive overdrugging to compensate for inadequate staff supervision. Unsanitary conditions resulted in an outbreak of hepatitis affecting 100 percent of the patients. *New York Association for Retarded Children* v. *Rockefeller*, 357 F.Supp. 752 (E.D. N.Y. 1973); *sub nom. NYARC* v. *Carey*, 393 F. Supp. 715 (1975).

In the course of litigation brought to correct abuses in Texas' juvenile reformatories, a Federal court found the State juvenile system rampant with officially sanctioned brutality, including beatings,

tear gasings, and placement in homosexual dormitories as a form of punishment. *Morales* v. *Turman*, 364 F.Supp. 166 (E.D. Texas 1973); 383 F.Supp. 53, 70–87 (1974); rev'd on procedural grounds, 535 F.2d 864 (5th Cir. 1976).

II. THE ROLE OF THE JUSTICE DEPARTMENT

If there is a bright side to this dismal picture, it is that in all of the cases I have referred to, the Justice Department's efforts succeeded in securing relief for the residents of the institutions in question. Judge Johnson, who initially ordered the Department to appear as *amicus curiae* in Wyatt, was sufficiently impressed to commend government lawyers for having "performed exemplary service for which this court is indeed grateful." *Wyatt* v. *Stickney*, 344 F.Supp. at 375, n.3.

Following Wyatt and other cases in which the Department participated, a number of States adopted statutes providing a right to treatment for mentally ill institutionalized persons, and a series of Federal court cases further substantiated a constitutional right to such treatment. The Department of Health, Education, and Welfare followed suit by adopting many of the standards first enunciated in Wyatt as conditions for participation in federally funded programs of care for the mentally handicapped. See 45 CFR 249.13 (1974).

Public attention was brought to the efforts of the Justice Department as writers in nationally distributed periodicals commented favorably on the Department's litigation program. (See, e.g. Herr, *Civil Rights, Uncivil Asylums and the Retarded*, 43 CIN. L. REV. 679, 779 (1974); Wald & Schwartz, *Trying a Juvenile Right to Treatment Suit: Pointers and Pitfalls for Plaintiffs*, 12 AMERICAN CRIM. L. REV. 125, 153 (1974); Wooden, WEEPING IN THE PLAYTIME OF OTHERS, Ch. I, McGraw-Hill (1976); Velie, *Is Anybody Watching?* READERS DIGEST, page 114 (March 1976).) By late last year, the Department was involved in approximately 20 cases concerning the rights of institutionalized persons, including the mentally ill and retarded, juvenile delinquents, dependent and neglected children, the aged, and the chronically physically ill.

III. THE SOLOMON AND MATTSON DECISIONS

The first serious setback to these efforts came last year, when a Federal district court in Maryland dismissed a suit brought by the Justice Department concerning the conditions at the Rosewood State Hospital for the mentally retarded. In *U.S.* v. *Solomon*, 419 F. Supp. 358 (D. Md. 1976), the court held that the Justice Department lacked inherent or common law authority to sue to enforce constitutional and Federal rights of hospital inmates. Following the Solomon decision, a Federal district court in Montana dismissed another suit initiated by the Department challenging conditions in a State mental retardation hospital, again declaring that, absent express statutory authority, the Department lacked standing to sue. *U.S.* v. *Mattson*, D. Montana, C.A. No. 74–138, September 28, 1976.

The impact of these two cases on the Justice Department's litigation program on behalf of the institutionalized cannot be overstated. Louis M. Thrasher, Director of Special Litigation in the Civil Rights Division, has stated that with the *Solomon* and *Mattson* decisions outstanding,

> There will be substantial question in the minds of potential defendants as to whether or not there is any federal agency that can proceed to enforce such rights. Moreover, given the present status, defendants will continue to file motions to dismiss our lawsuits which will of course have a delaying effect.

Letter to Senator FRANK E. MOSS, chairman, Senate Subcommittee on Long-term Care, September 23, 1976.

Though appeals have been filed in both cases, their outcome is not dispositive of the need for the legislation I propose today. The Justice Department has made clear that regardless of the result of those two cases on appeal, the need for authorizing legislation is immediate and unconditional. In the words of Mr. Thrasher,

> There can be no doubt that a statute specifically authorizing the Attorney General to bring such suits would have a beneficial effect upon the willingness of state and local governments to take action to protect the rights of our mentally handicapped (and other institutionalized) persons. . . . It is clear that statutory authority would assist in ensuring a sustained and orderly effort to ensure that the Constitution protects all of our citizens. (Id.).

IV. EFFECT OF LEGISLATION

As the following section-by-section analysis demonstrates, this bill creates no new substantive rights, nor does it open the doors of the Federal courthouse to a new class of litigants. Under the standards I have proposed, the authority of the Department to bring suit on behalf of the institutionalized is limited to cases alleging widespread deprivations of constitutional and Federal rights, and thus poses no threat to state officials of repeated Federal intervention on behalf of individuals alleging isolated instances of abuse. In fact, by clarifying once and for all the authority of the Department to participate in suits to redress systematic ongoing violations of institutionalized persons' rights, this legislation will minimize proliferation of separate suits by individual litigants.

V. SUPPORT FOR LEGISLATION

Mr. President, the need for this legislation has already been recognized. H.R. 2439, a bill substantially similar to the one I am proposing, was introduced in the House earlier this session by Representative KASTENMEIER, and the Justice Department will be appearing later this week to testify on it. The American Bar Association's House of Delegates, following a recommendation of its Commission on Correctional Facilities and Commission on the Mentally Disabled, adopted a resolution in support of similar legislation introduced last session, and can be expected to lend its support to this proposal. Numerous organizations working on behalf of institutionalized persons have indicated interest in and support for such legislation. It is now the responsibility of Congress to recognize and act upon this acknowledged need.

VI. CONCLUSION

The struggle to secure the rights of the institutionalized has been called the last great frontier in civil rights litigation. Whether the guarantees of the Constitution and Federal laws become reality for the thousands of institutionalized persons throughout the country depends on Congress' willingness to provide an effective enforcement mechanism for securing those guarantees. The Justice Department stands ready to commit its resources to the task; the Constitution and laws of this land demand no less.

Mr. President, I ask unanimous consent to print in the RECORD the text of the proposed law and a section-by-section analysis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1393

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Whenever the Attorney General has reasonable cause to believe that a State or its agent is subjecting persons confined in an institution, as defined in Section 4, to conditions which deprive them of any rights, privileges, or immunities secured by the Constitution or laws of the United States, and that such deprivation is pursuant to a pattern or practice of resistance to the full enjoyment of such rights, privileges, or immunities, the Attorney General is authorized to institute a civil action for or in the name of the United States in any appropriate district court of the United States against such party or parties for such relief as he deems necessary to insure the full enjoyment of such rights, privileges, or immunities. The district courts shall exercise such jurisdiction without regard to whether the aggrieved party or parties shall have exhausted any administrative or other remedies provided by law. Whenever, in a proceeding instituted under this Section, any official of a State or subdivision thereof is alleged to have committed any act or practice subjecting persons confined in an institution to the deprivation of any rights, privileges, or immunities secured by the Constitution or laws, the act or practice shall also be deemed that of the State and the State may be joined as a party defendant. If, prior to the institution of such proceeding, such official has resigned or has been relieved of his office and no successor has assumed such office, the proceeding may be instituted against the State.

SEC. 2. Prior to the institution of a suit under Section 1, the Attorney General shall certify that he has notified appropriate officials of the institution of the alleged deprivations of rights, privileges, or immunities secured by the Constitution or laws of the United States, that following such notification he is satisfied that the institution of an action will materially further the vindication of such rights, privileges, or immunities, and that such a suit by the United States is in the public interest.

SEC. 3. Whenever an action has been commenced in any court of the United States seeking relief from conditions which deprive persons confined in institutions of any rights, privileges, or immunities secured by the Constitution or laws of the United States, the Attorney General for or in the name of the United States may intervene in such action upon timely application if the Attorney General certifies that the case is of general public importance. In such case, the United

States shall be entitled to the same relief as if it had instituted the action.

SEC. 4. As used in this Act, "institution" means—

(1) any treatment facility for mentally ill, disabled, or retarded persons;

(2) any facility for the chronically physically ill or handicapped;

(3) any nursing home;

(4) any jail, prison or other correctional facility, or any pretrial detention facility; or

(5) any facility in which juveniles are held awaiting trial or in which juveniles have been placed for purposes of receiving rehabilitative care or treatment or for any other state purpose.

SECTION-BY-SECTION ANALYSIS

Section 1 of the bill, modeled after a similar provision in Title II of the Civil Rights Act of 1964, 42 U.S.C. 2000a–5, empowers the Attorney General to initiate suit for or in the name of the United States to enforce constitutional and other federally guaranteed rights of institutionalized persons whenever he has reasonable cause to believe that a State or its agent is subjecting institutionalized persons to a systematic deprivation of such rights. The requirement that the Attorney General have cause to believe the deprivations are pursuant to a pattern or practice of resistance to the full enjoyment of such rights is designed to limit actions initiated under this section to cases involving widespread abuses of institutionalized persons' federally guaranteed rights.

The section gives the federal district courts original jurisdiction over such suits and specifically provides that the aggrieved party or parties need not have exhausted other remedies before invoking the jurisdiction of the federal court. A similar provision appears in a subsection of the Civil Rights Act of 1957, 42 U.S.C. 1971(d). Since private parties suing to enforce constitutional and federal rights under 42 U.S.C. 1983 are not required to exhaust state remedies, *Monroe v. Pape*, 365 U.S. 167, 81 S.Ct. 473 (1961), there is no reason to require the United States to do so.

The section further provides that where the person or persons allegedly responsible for the unlawful deprivation is an official of the State, the State may be made a party defendant in a proceeding initiated under this section. This provision is modeled after a similar subsection of Title VI of the Civil Rights Act of 1960, 42 U.S.C. 1971(c), enacted pursuant to the enforcement clause of the fifteenth amendment and upheld as a proper exercise of Congress' enforcement powers under Section 2 of that amendment. *U.S. v. State of Mississippi*, 380 U.S. 128 (1965). The analogous enabling clause of the fourteenth amendment, Section 5, provides corresponding authority for this provision.

Section 2 requires the Attorney General, before initiating suit, to notify state officials of the alleged grievances which the proposed action seeks to redress. It further requires him to determine that the action will materially further the vindication of these consitutional or federal rights sought to be enforced. This requirement presupposes a determination by the Attorney General that, absent such action, the State or its officials cannot reasonably be expected to remedy the alleged violations. Finally, the Section requires the Attorney General to find that the proposed action is in the public interest. This too insures that actions initiated by the United States will be limited to those designed to redress widespread—as opposed to isolated—violations of institutionalized persons' rights.

Section 3 provides for intervention by the Attorney General in any action initiated by another party or parties seeking to vindicate constitutional or federal rights of institutionalized persons, provided the Attorney General certifies that the case is of general public importance. As provided in Section 3, this requirement again limits intervention by the United States to actions involving potentially broad-ranging relief. The Attorney General may request and receive the same relief as if the action had been initiated under Section 1.

Section 4 of the bill defines the term "institution." This definition is intended to encompass all facilities in which prisoners, pretrial detainees, juveniles, the mentally ill, the mentally retarded, the physically handicapped, and the aged reside.

By Mr. NELSON:

S. 1394. A bill to amend the Arms Export Control Act to require the President to provide certain information to the Congress with respect to any proposed major arms sales to a country which is not a member of the North Atlantic Treaty Organization and to provide the Congress with 30 days of continuous session in which to disapprove proposed arms sales; to the Committee on Foreign Relations.

S. 1395. A bill to amend the Arms Export Control Act to provide the Congress with an opportunity to disapprove proposed transfers from the recipient country to another country of defense articles or related training or other defense services supplied by the United States; to the Committee on Foreign Relations.

ARMS SALES

Mr. NELSON. Mr. President, the two bills which I am submitting today are designed to fill several loopholes in the present reporting requirements of the Arms Export Control Act. Together, they: First, give Congress a longer period of time to review thoroughly arms sales proposals made by the executive branch; second, provide Congress automatically with more information upon which it can base better analyses of arms sales proposals; and third give Congress veto authority over third country transfers of arms produced by the United States.

I have previously introduced legislation to bring about all three of these objectives in earlier Congresses. Identical legislation has also been introduced in this—the 95th Congress—by Congressman SOLARZ and 39 cosponsors.

It is now only too well documented that the United States is the world's leader in selling arms abroad. From 1966 to 1975, this country sold $34.9 billion worth of armaments to other countries, or more than the rest of the world's major suppliers combined. In the last fiscal year alone, the United States agreed to sell abroad military equipment and weapons worth over $14 billion.

TRENDS

The trends are disturbing. We have witnessed over the last several years an alarming growth in the volume of military equipment and arms sold abroad by the United States. As recently as 1970, our entire foreign military sales program accounted for less than $1 billion worth of equipment and weapons, this in stark contrast to last year's total, which represents nearly 14 percent of the dollar value of all U.S. foreign military sales in the last quarter century.

There has also been a dramatic change in the identity of those receiving our arms largesse. A program originally designed to assist major NATO Allies has become the chief means by which many nations of the so-called Third World acquire weapons. The developing countries bought over half—53 percent—their weapons from the United States during 1966–75. Our share of this market totaled $27.5 billion. This included 96 percent of their imports of air-to-surface and air-to-air missiles. More than half of our foreign military cash sales in recent years have been made to nations of the newly oil-rich Persian Gulf and Mideast. By fueling local arms races, the United States advances the potential for the creation or exacerbation of regional tensions and conflicts, which in turn increase the likelihood of major-power confrontation.

In addition, the United States is selling increasingly destructive and sophisticated military equipment. In contrast to the days when the United States drew only on surplus stocks for foreign military sales, we now sell some of our most advanced missiles, warplanes, and electronic gear. This policy has deleterious effects on our own armed services readiness as well as our overall national security. With the move away from U.S. military aid and toward payment by the recipient country for its arms, the recipients are more often demanding—and receiving—our most sophisticated armaments off the same assembly line that supplies our own forces, and sometimes before we are fully supplied. Foreign orders for highly advanced weaponry are made even before we proceed to their full-scale production. Maintenance of our technological superiority is threatened by such concurrent sales of advanced weaponry. This is especially so when sales are made to unstable regimes, whose successors may not be friendly to the United States, or when such equipment falls into hostile hands in a regional conflict.

Mr. President, in 1973 I first introduced legislation giving Congress a voice in controlling the burgeoning U.S. arms trade. Passed by Congress in 1974 and enacted in 1975, this measure gave Congress the opportunity to consider—and if necessary, reject—any proposed foreign military sale of $25 million or more by concurrent resolutions of each House. Strengthened in 1976 with passage of the Arms Export Control Act (Public Law 94–329), congressional review now extends to the proposed sale of any major defense equipment or arms over $7 million. Congressional oversight has been further improved by the addition of more stringent reporting requirements. There remain obstacles, however, to the establishment of a truly comprehensive congressional oversight capability with regard to U.S. foreign military sales policy. It is with the intention of removing some of these barriers that I introduce this legislation.

PROVIDING CONGRESS ADEQUATE TIME TO CONSIDER ARMS SALES PROPOSALS

Existing law is based on an amendment which I offered and which was included

as part of the Foreign Assistance Act of 1974—Public Law 93-559—under which the President is required to submit to Congress any proposed foreign military sale in excess of $25 million. According to the provision finally adopted by the conference committee and by both Houses in 1974, the Congress had a period of 20 calendar days in which to veto the proposed sale by the passage by both the Senate and the House of a concurrent resolution of disapproval.

Last Congress, I introduced an amendment which was essentially the same as the one I am introducing today. Final congressional action on that legislation resulted in extending the period of congressional review to 30 calendar days. It seems to me, however, that Congress still requires greater time to review major arms sales. And for that reason, I am resubmitting the amendment which gives the Congress 30 days during which Congress is in continuous session in which to veto a proposed arms sale. This would give Congress more than a mere 30 calendar days. It would mean that the days on which either House is in adjournment for more than 3 days would not be included in the 30-day computation.

The change embodied in this amendment is clearly needed. The present time period of 30 calendar days for the passage of a concurrent resolution by both Houses is clearly inadequate. It is extremely difficult for Congress to act this quickly on almost any matter of importance.

It is simply not realistic to expect that a resolution of disapproval of a proposed arms sale, a matter which would require comprehensive review and hearings in both Houses, could possibly be passed in such a short time frame. In addition, since even after an arms sale is agreed to, delivery time can extend over several months or years, there is no reason to believe that this slightly extended period of time for congressional consultation would be onerous either for the prospective arms buyer or for the State or Defense Departments. In fact, $32 billion worth of arms have been approved by the Congress but have not yet been delivered to their destined country. Moreover, this proposed change in the language of the law would also prevent a situation in which an administration could report several proposed sales during the August recess, for example, and thus effectively prevent a congressional veto.

Mr. President, let me only say in final argument for this legislation that this bill is identical to part of legislation previously passed by the Senate when it originally voted on my arms sales proposal in 1973. The need that I foresaw at that time for a sufficiently long period for review has been demonstrated in the practical application of the Nelson amendment since its original passage. The 1975 sale of Hawk missiles to Jordan constituted a major test of the Nelson amendment procedure. In that instance, Congress forced debate on the important foreign policy ramifications of the sale, exposed serious disagreement within the administration on the wisdom of the sale as proposed, and in the end extracted significant concessions in the form of assurances from the President that the weapons would not be transferred in such a way as to allow their use in an offensive capacity against Israel. Those were not insignificant accomplishments. In the words of Judith Miller of the Progessive magazine, Congress effectively "Served notice that it is able and willing to exercise supervisory authority in some cases over administration arms sale policy."

But one will recall that the case of the Jordan Hawk missile sale also pointed out very serious shortcomings in the present congressional veto procedure. At the very least, it became apparent that 20 calendar days was altogether too short a time for both Houses of Congress to consider adequately a significant and controversial arms sale proposal.

If Congress is to act responsibly, hearings must be held and adequate time allowed for genuine debate of the merits of a specific sale.

Moreover, notification of the sale, coming as it did shortly before the August recess, further dramatized the inadequacy of the present time frame. Nothing presently stops any administration from submitting a sale when Congress is not in session, thus precluding any congressional action.

Last year, Congress increased the time period from 20 to 30 calendar days, but 30 calendar days is still inadequate considering that the clock on that 30 days does not stop ticking over the weekends. The 30-calendar-day procedure makes no distinction between workdays and recesses.

Events in the closing days of the last session dramatically demonstrated the shortcomings even of the 30-calendar-day period. On Wednesday evening, September 1, 1976, on the eve of Congress traditional Labor Day recess, the President informed Congress of a decision to sell arms to 11 separate countries for a total dollar figure of $6.024 billion in 37 separate transactions. Starting from the moment Congress received the executive announcement, the clock began ticking toward the 30-day deadline. Failure to act meant that the sales could go through exactly as proposed by the President. The clock had ticked over the recess. When Congress returned from the Labor Day recess, it had only 24 days in which to act.

Therefore, Mr. President, I have concluded from the history of the Nelson amendment in practice, that we need a 30-day period to review a sale in Congress that would exclude from the counting any period of adjournment of more than 3 days or the adjournment of the Congress sine die.

GREATER JUSTIFICATION OF PROPOSED SALES

Another lesson learned in the closing days of the last Congress was that Congress should have at its disposal greater executive justification for the arms sales they propose to Congress for approval. As the law stands now, Congress is only informed what country is involved, the total estimated value of the transaction, a description of the articles and services offered, which U.S. military service is involved, and the sales commission being paid in connection with the sale. This information is insufficient and in the past at least has appeared to be sketchy and lacking in thought of the full range of the implications of such sales.

Such bits and pieces are clearly not adequate to reach any sort of responsible judgment as to the ramifications and advisability of any given sale. What is even worse, frequently such little data as is transmitted is classified in the actual notification to Congress.

Pursuant to section 36(b)(1) of the Arms Export Control Act, more detailed and analytical information is available to Congress upon its request. This includes data outlining the impact of the proposed sales on U.S. foreign policy, on regional balances and arms sales, on arms control policies and negotiations, on the military preparedness of U.S. Armed Forces and on war reserve stocks. But Congress is allowed only 30 calendar days to act on a proposed arms transfer. Notification, hearings, consideration and any legislative initiatives must all be completed within this time, which has proved inadequate. The 30-day clock, moreover, begins ticking the moment notification is transmitted to Congress. Clearly, Congress has not the time—once notification is given—to wait for the Executive to formulate responses on request to submitted questions on complicated issues. Although the information outlined in section 36(b)(1) (A-M) should be in the Executive's hands before any decision to make an arms transfer is made, experience has shown that it is not.

The legislation I am introducing today requires that this comprehensive analytical information, now available only on request, be transmitted as a matter of course at the same time that notification is given. This provision would not apply to NATO or its member countries.

THIRD COUNTRY TRANSFERS

The third objective of the legislation extends the Nelson amendment mechanism, including its veto procedure, to review of third country transfers of U.S. supplied military equipment.

Present law allows the President to permit transfers of American made equipment to third countries, provided only that he notify Congress of his intentions. The legislation which I am introducing today brings Congress into this year's decisionmaking process by permitting the Congress to scrutinize such a Presidential grant of permission for a weapons transfer. However, the amendment makes provision for a Presidential waiver of the congressional review requirement, if in his judgment an emergency exists which requires a transfer in the national security interests of the United States.

Both Houses of Congress approved this oversight capability in last year's original International Security Assistance and Arms Export Control Act, S. 2662. President Ford, however, vetoed the entire bill and the third country provision was sacrificed to make S. 2662's successor more palatable to Ford's taste.

In my view, if Congress has the right and responsibility to review and possibly

reject a sale in the first instance, it should also have the right and responsibility to disapprove the transfer of those weapons to other countries. The volume of sales has increased geometrically and thus the potential for those weapons to get passed along to other countries is also vastly expanded. This legislation would, for example, enable Congress to consider potentially controversial transfers where the President has given his permission but Congress has not, such as the transfer of a number of F–5 aircraft from Iran to Jordan.

Mr. President, I am encouraged by President Carter's stance on restraining the heavy flow of arms abroad. His administration reflects a philosophy in refreshing contrast to that of recent administrations. As Vice President MONDALE asserted at the end of his European trip, the sale of arms has "reached disgraceful proportions, and is robbing nations of resources they need." The Vice President has also voiced his opinion that "international control of arms transfers" should be placed "at the front rank of the world's agenda." The President also assured us that:

> The Secretary of State will be more hesitant in the future to recommend to the Defense Department the culmination of arms sales agreements. I have asked that all approval of arms sales, for a change, be submitted to me directly before the recommendations to Congress.

I would hope that the President will move forward in actions as well as words. As pleased as I am by such Executive pronouncements, however, they ought not serve to obstruct further congressional progress in reasserting its participation in the conduct of foreign affairs.

This is not a partisan issue. It is a question of the constitutional need for adequate input by the legislative branch into the process by which this country relates to others. This requirement speaks to the proper congressional role, and is independent of Executive intent.

The Congress should take pride, moreover, in the fact that it was the legislative branch which first recognized and focused on the significance of U.S. arms transfers, and brought the issue into the public forum. Foreign military sales constitute major foreign policy decisions involving the United States in military activities and potential de facto commitments without sufficient deliberation or participation by those outside the confines of the executive branch. These matters require serious consideration by the Congress in an institutionalized fashion, and should not be the exclusive domain of the executive branch.

If Congress is serious about exercising its full constitutional duty in the formulation of U.S. foreign policy, it must clearly fashion substantive tools with which to forge a responsible arms control policy.

Mr. President, I ask unanimous consent that the texts of the legislation I am introducing today be printed in the RECORD at this time.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1394

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 36(b)(1) of the Arms Export Control Act is amended—

(1) by amending so much of the second sentence as precedes subparagraph (A) to read as follows: "In addition, if the letter of offer is to be issued to a country which is not a member of the North Atlantic Treaty Organization or is to be issued to an international organization other than the North Atlantic Treaty Organization, the President shall transmit to the Committee on International Relations of the House of Representatives and to the Committee on Foreign Relations of the Senate a statement setting forth—"; and

(2) by inserting the following new sentence immediately after subparagraph (M) and before the third sentence: "If the letter of offer is to be issued to a country which is a member of the North Atlantic Treaty Organization or is to be issued to the North Atlantic Treaty Organization, the President shall, upon the request of either the Committee on International Relations or the Committee on Foreign Relations, transmit promptly to both such committees a statement setting forth, to the extent specified in such request, the information described in subparagraphs (A) through (M)".

SEC. 2. Section 36(b)(1) of the Arms Export Control Act is amended by striking out "thirty calendar days after receiving such certification" in the last sentence and inserting in lieu thereof "the first period of 30 days of continuous session of Congress (as determined in accordance with section 601(b)(1) of the International Security Assistance and Arms Export Control Act of 1976) which begins after the date on which such certification is received by the Congress".

S. 1395

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3(d) of the Arms Export Control Act is amended—

(1) by striking out ", 30 days prior to giving such consent," in the text preceding paragraph (1);

(2) by redesignating such section as section 3(d)(1) and redesignating paragraphs (1) through (5) thereof as subparagraphs (A) through (E), respectively; and

(3) by adding the following new paragraph at the end thereof:

"(2) Unless the President states in the certification submitted pursuant to this subsection that an emergency exists which requires that consent to the proposed transfer become effective immediately in the national security interests of the United States, such consent shall not become effective until the end of the first period of 30 days of continuous session of Congress (as determined in accordance with section 601(b)(1) of the International Security Assistance and Arms Export Control Act of 1976) which begins after the date of such submission and such consent shall become effective then only if the Congress does not adopt, within such 30-day period, a concurrent resolution disapproving the proposed transfer.".

ADDITIONAL COSPONSORS

S. 49

At the request of Mr. MATHIAS, the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 49, to establish a Small Business Administrative Review Court.

S. 123

At the request of Mr. INOUYE, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 123, to amend the Social Security Act.

S. 223

At the request of Mr. INOUYE, the Senator from Maryland (Mr. SARBANES) and the Senator from Minnesota (Mr. ANDERSON) were added as cosponsors of S. 223, to amend the Social Security Act.

S. 233

At the request of Mr. INOUYE, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 233, relating to the medicare and medicaid programs.

S. 247

At the request of Mr. GOLDWATER, the Senator from New Hampshire (Mr. MCINTYRE) was added as a cosponsor of S. 247, to provide recognition to the Women's Air Force Service Pilots.

S. 327

At the request of Mr. INOUYE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 327, relating to the retired salaries of certain Federal judges.

S. 359

At the request of Mr. STEVENS, the Senator from Alaska (Mr. GRAVEL) was added as a cosponsor of S. 359, to amend title 5, United States Code.

S. 695

At the request of Mr. PROXMIRE, the Senator from Massachusetts (Mr. KENNEDY) and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of S. 695, the Defense Production Act Amendments of 1977.

S. 716

At the request of Mr. INOUYE, the Senator from Alaska (Mr. GRAVEL) was added as a cosponsor of S. 716, to amend title 5 of the United States Code.

S. 845

At the request of Mr. DOLE, the Senator from Ohio (Mr. GLENN) was added as a cosponsor of S. 845, the Dole-McGovern Food Stamp Act of 1977.

S. 939

At the request of Mr. BAYH, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 939, the Trade Adjustment Assistance Act amendments.

S. 995

At the request of Mr. WILLIAMS, the Senator from Alaska (Mr. GRAVEL) was added as a cosponsor of S. 995, to amend the Civil Rights Act of 1964.

S. 1021

At the request of Mr. BAYH, the Senator from Oregon (Mr. HATFIELD) and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of S. 1021, to extend the Juvenile Justice and Delinquency Prevention Act of 1974 for 5 years.

S. 1077

At the request of Mr. INOUYE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 1077, the Essential Maritime Transportation Act of 1977.

S. 1180

At the request of Mr. CHURCH, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 1180, the endangered American wilderness bill.

S. 1181

At the request of Mr. HATHAWAY, the Senator from South Dakota (Mr. MCGOVERN) was added as a cosponsor of

S. 1181, to amend the Social Security Act.

S 1284

At the request of Mr. HUMPHREY, the Senator from Minnesota (Mr. ANDERSON) and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 1284, to amend the Internal Revenue Code of 1954.

S. 1310

At the request of Mr. DOLE, the Senator from West Virginia (Mr. RANDOLPH), the Senator from Minnesota (Mr. HUMPHREY), and the Senator from New York (Mr. JAVITS) were added as cosponsors of S. 1310, providing for a telecommunication device to be installed in the Congress.

S. 1346

At the request of Mr. BAYH, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 1346, to amend the Civil Rights Act of 1964.

SENATE RESOLUTION 76

At the request of Mr. HAYAKAWA, the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Wyoming (Mr. HANSEN), the Senator from Kansas (Mr. DOLE), the Senator from Florida (Mr. STONE), and the Senator from California (Mr. CRANSTON) were added as cosponsors of Senate Resolution 76, relating to unilateral regulations by the European Economic Community.

SENATE RESOLUTION 117

At the request of Mr. NELSON, the Senator from Indiana (Mr. BAYH), the Senator from Arkansas (Mr. BUMPERS), the Senator from New Hampshire (Mr. DURKIN), the Senator from Arizona (Mr. GOLDWATER), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Rhode Island (Mr. PELL), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Alaska (Mr. STEVENS), the Senator from Illinois (Mr. STEVENSON), the Senator from South Carolina (Mr. THURMOND), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of Senate Resolution 117, requesting the President to designate the week of May 22 through 28, 1977, as National Small Business Week.

SENATE RESOLUTION 120

At the request of Mr. HUMPHREY, the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of Senate Resolution 120, relating to the ban on saccharin.

SENATE RESOLUTION 124

At the request of Mr. KENNEDY, the Senator from Hawaii (Mr. MATSUNAGA) and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of Senate Resolution 124, relating to negotiations for a Comprehensive Test Ban Treaty.

SENATE RESOLUTION 138

At the request of Mr. MATHIAS, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of Senate Resolution 138, to designate Fair Housing Month.

SENATE CONCURRENT RESOLUTION 6

At the request of Mr. BAYH, the Senators from Minnesota (Mr. HUMPHREY and Mr. ANDERSON), the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senators from Massachusetts (Mr. KENNEDY and Mr. BROOKE), the Senator from Arkansas (Mr. BUMPERS), the Senators from New Jersey (Mr. WILLIAMS and Mr. CASE), the Senator from Idaho (Mr. CHURCH), the Senator from Iowa (Mr. CLARK), the Senator from California (Mr. CRANSTON), the Senator from Missouri (Mr. DANFORTH), the Senators from Ohio (Mr. GLENN and Mr. METZENBAUM), the Senators from Alaska (Mr. GRAVEL and Mr. STEVENS), the Senator from Colorado (Mr. HASKELL), the Senator from South Carolina (Mr. HOLLINGS), the Senators from New York (Mr. JAVITS and Mr. MOYNIHAN), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Maine (Mr. MUSKIE), the Senator from Michigan (Mr. RIEGLE), the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from Nebraska (Mr. ZORINSKY), and the Senators from Maryland (Mr. MATHIAS and Mr. SARBANES) were added as cosponsors of Senate Concurrent Resolution 6, to place a statue of Martin Luther King, Jr., in the Capitol.

SENATE CONCURRENT RESOLUTION 15

At the request of Mr. WEICKER, the Senator from Indiana (Mr. BAYH) and the Senator from California (Mr. CRANSTON) were added as cosponsors of Senate Concurrent Resolution 15, to reduce the risk of chemical warfare.

AMENDMENT NO. 186

At the request of Mr. KENNEDY, the Senator from Iowa (Mr. CLARK) and the Senator from California (Mr. CRANSTON) were added as cosponsors of amendment No. 186 intended to be proposed to S. 826, to create an Office of Assistant Secretary for Competition and Consumer Affairs within the new Department of Energy.

AMENDMENT NO. 190

At the request of Mr. CHURCH, the Senator from Louisiana (Mr. JOHNSTON) and the Senator from Maine (Mr. HATHAWAY) were added as cosponsors of amendment No. 190, intended to be proposed to H.R. 3477, the Tax Reduction and Simplification Act of 1977.

AMENDMENT NO. 207

At the request of Mr. PROXMIRE, the Senator from New Jersey (Mr. WILLIAMS), the Senator from California (Mr. CRANSTON), the Senator from Vermont (Mr. LEAHY), the Senator from Connecticut (Mr. WEICKER), the Senator from Maine (Mr. HATHAWAY), the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Oregon (Mr. HATFIELD) were added as cosponsors of amendment No. 207, intended to be proposed to Senate Concurrent Resolution 19, the first resolution on the budget.

SENATE RESOLUTION 151—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL EXPENDITURES BY THE COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

(Referred to the Committee on Rules and Administration.)

Mr. MAGNUSON, from the Committee on Commerce, Science, and Transportation, reported the following resolution:

S. RES. 151

Resolved, That, in holding hearings, reporting such hearings, and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate, the Committee on Commerce, Science, and Transportation, or any subcommittee thereof, is authorized from July 1, 1977, through February 28, 1978, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $1,987,831, of which amount not to exceed $405,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(1) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1978.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SENATE RESOLUTION 152—SUBMISSION OF A RESOLUTION RELATING TO THE U.S. BROADCASTING INDUSTRY

(Referred to the Committee on Foreign Relations.)

Mr. MOYNIHAN (for himself, Mr. ALLEN, Mr. ANDERSON, Mr. BURDICK, Mr. CHILES, Mr. GRAVEL, Mr. HELMS, Mr. JAVITS, Mr. MAGNUSON, Mr. MELCHER, Mr. METCALF, Mr. RIEGLE, Mr. SASSER, Mr. SCHMITT, Mr. SCHWEIKER, Mr. STAFFORD, Mr. WILLIAMS, and Mr. YOUNG) submitted the following resolution:

S. RES. 152

Whereas, the people of the United States place the utmost value on their enduring friendship and special relationship with the people of Canada;

Whereas the people of Canada and the people of the United States have established singular standards of openness and candor in discussing mutual interests and concerns;

Whereas the Senate seeks to amend certain provisions of the United States Internal Revenue Code, which provisions appear to inhibit travel by Americans to Canada; and

Whereas recent amendments to the Canadian tax code appear to inhibit commercial relations between Canadian businesses and American broadcasters: Now, therefore, be it

Resolved, That the Senate call on the President to raise with the Government of Canada the question of the impact of the recent provisions of the Canadian tax code on the United States broadcasting industry with a view to adjusting outstanding differences.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to the President.

SENATE RESOLUTION 153—SUBMISSION OF A RESOLUTION PROVIDING FOR RADIO AND TELEVISION COVERAGE OF SENATE PROCEEDINGS

(Referred to the Committee on Rules and Administration.)

Mr. METCALF (for himself, Mr. ABOUREZK, Mr. ANDERSON, Mr. BAYH, Mr. BELLMON, Mr. BUMPERS, Mr. CHILES, Mr. CLARK, Mr. DECONCINI, Mr. DOLE, Mr. GARN, Mr. GOLDWATER, Mr. GRAVEL, Mr. HASKELL, Mr. HEINZ, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JAVITS, Mr. LEAHY, Mr. LUGAR, Mr. MCCLURE, Mr. MCGOVERN, Mr. MCINTYRE, Mr. MATHIAS, Mr. MATSUNAGA, Mr. PERCY, Mr. RIBICOFF, Mr. RIEGLE, Mr. ROTH, Mr. SCHWEIKER, Mr. STAFFORD, Mr. STEVENSON, Mr. STONE, and Mr. ZORINSKY) submitted the following resolution:

S. RES. 153

Resolved, That (a) beginning as soon as possible during the second session of the Ninety-fifth Congress and continuing for the remainder of that session, the Committee on Rules and Administration (hereafter in this resolution referred to as the "committee") is authorized to provide for radio and television coverage of the proceedings in the Senate Chamber. Such coverage shall be provided for continuously at all times while the Senate is in session, except for any time when a meeting of the Senate is ordered with closed doors.

(b) The committee shall maintain videotapes of such coverage and shall maintain separately recording of the audio portion of such coverage. Copies of such videotapes and recordings shall be made available to public and commercial broadcasting stations as provided in this resolution. Copies of such videotapes and recordings shall be deposited with the Library of Congress and, under rules and regulations prescribed by the committee, shall also be made available to educational institutions, libraries, and other organizations.

SEC. 2. (a) The committee shall initially provide for monitors with which to receive the television coverage of the proceedings in the Senate Chamber to be located in such offices in the Capitol and the Senate office buildings as it considers desirable. As soon as practicable, the committee shall make the television coverage of the proceedings, and the videotapes thereof, available to public and commercial television broadcasting stations in accordance with the provisions of section 4.

(b) The committee shall, at the request of any Member or officer of the Senate or the House, any committee of the Senate or the House, or any joint committee of the Congress, provide for transmission of the audio portion of the coverage of such proceedings into the office of such Member, officer, committee, or joint committee. As soon as practicable, the committee shall make such audio portion, and recordings thereof, available to public and commercial radio broadcasting stations in acordance with the provisions of section 4.

SEC. 3. The committee shall also provide a daily written summary of the proceedings of the Senate and other information pertaining to legislative activity. Under rules and regulations prescribed by the committee such information shall be made available, by means of teletype printers or other written means to the news media and Members, officers, and committees of the Senate.

SEC. 4. The radio and television coverage of the proceedings in the Senate Chamber, videotapes of such coverage, and recordings of the audio portion of such coverage shall be made available to public and commercial broadcasting stations subject to the following terms and conditions:

(1) Such coverage, videotapes, and recordings shall be broadcast solely for the education, enlightenment, and information of the general public.

(2) No part of such coverage, videotapes, or recordings may be used in any commercial advertisement.

(3) No part of such coverage, videotapes, or recordings may be broadcast with commercial sponsorship, except as part of bona fide news programs and public affairs documentary programs.

(4) No part of such coverage, videotapes, or recordings may be used to promote or oppose the candidacy of any person for elective public office, whether in a paid political broadcast or otherwise.

SEC. 5. (a) The committee is authorized to employ such professional, technical, and other personnel as may be necessary to carry out the provisions of this resolution. The committee is also authorized to enter into contracts with individuals, corporations, and organizations to carry out its functions and duties under the resolution.

(b) the expense of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

SEC. 6. As soon as possible after the conclusion of the second session of the Ninety-fifth Congress the committee shall evaluate, and report to the Congress with respect to—

(1) the effectiveness of audio and video systems as a means of monitoring activities in the Senate Chamber,

(2) the effect radio and televison coverage on proceedings in the Senate Chamber, and the attitude of Members of the Senate toward such coverage,

(3) the extent and nature of the use of the radio and television coverage, and videotapes and recordings thereof, by public and commercial broadcasting stations in accordance with this resolution.

(4) the response of the general public to broadcasts of such coverage, videotape, and recordings, and

(5) the effectiveness of the information provided and made available under section 3 for the viewpoint of the news media and Members, officers, and committees of the Senate.

SEC. 7. As soon as possible after the report required in section 6 has been filed, the committee shall report to the Senate with respect to the radio and television coverage of proceedings in the Senate Chamber and other activities carried out under this resolution, together with its recommendations thereon, including its recommendations for continuing such coverage and other activities.

BROADCAST COVERAGE OF SENATE PROCEEDINGS

Mr. METCALF. Mr. President, the resolution that I am resubmitting today authorizes a year's experiment with radio and television broadcast coverage of Senate floor sessions—the most practical, immediate, and direct way to improve public understanding of this institution's functions and operations.

Additionally, the resolution provides for installation of a closed-circuit audio and video system, permitting Senators to monitor Chamber activities while away from the floor, together with a running summary of debate transmitted by teletype to Members' offices and to the news galleries.

Cosponsors of the resolution—which is identical to Senate Resolution 39 of the 94th Congress—are Senators ABOUREZK, ANDERSON, BAYH, BELLMON, BUMPERS, CHILES, CLARK, DECONCINI, DOLE, GARN, GOLDWATER, GRAVEL, HASKELL, HEINZ, HUDDLESTON, HUMPHREY, JAVITS, LEAHY, LUGAR, MCCLURE, MCGOVERN, MCINTYRE, MATHIAS, MATSUNAGA, PERCY, RIBICOFF, RIEGLE, ROTH, SCHWEIKER, STAFFORD, STEVENSON, STONE, and ZORINSKY.

Mr. President, in 1974, after a comprehensive, 2-year study and extensive hearings, the Joint Committee on Congressional Operations recommended opening the Chambers of the Senate and House to broadcast coverage, not as a device to improve the "image" of Congress but as a practical way to involve more citizens in the workings of representative democracy.

Since then, the Commission on the Operation of the Senate, a special study group headed by former Senator Harold Hughes, has strongly urged an extended test of television coverage of Senate floor activities. And a closed circuit video system is presently in operation in the House, on an experimental basis, along with a teletype summary of debate.

Moreover, because of continuing technical advances in broadcasting, it is now possible to provide for coverage in the Senate Chamber without installing additional lights. According to the Architect of the Capitol, the lighting level in the Chamber—which was upgraded last summer—is 50 foot candles and is considered adequate for color coverage with the new cameras that have been available to broadcasters for the past year or so.

In short, broadcast coverage can be accomplished today without intruding unduly upon Senate proceedings and without disturbing or discomforting Senators on the floor. The time has come—now—to take this step, to increase public interest in and understanding of the legislative process in the Senate, to communicate more effectively about the issues we must resolve in our debates and, ultimately, with our votes.

Mr. President, to realize the full potential of broadcast coverage, it is essential that we carefully consider the technical requirements and procedures for installing and operating cameras and microphones.

A system planned solely with closed circuit television in mind—as a means of improving communications within the Senate—will not produce a video "feed" of sufficiently high quality to be useful to broadcasters. A system designed entirely for the convenience of the broadcasters will not meet our needs for improved internal communication or, equally importantly, for creation of a complete audio and visual record of Senate Chamber action for historical and educational purposes.

Further, we must insure that the design and operation of the system serves the interests and requirements of local broadcast outlets. These are the stations, throughout the Nation, which are most likely to find video and audio tapes dealing with matters of local or regional concern informative and useful. As a practical matter, other than occasional, brief segments for the nightly news broadcasts, the major commercial networks are not likely to televise lengthy portions of Senate floor debate in any but the most exceptional circumstances.

What this means is that whoever operates the system—whether a network pool, the public broadcasting system, or

the Senate itself, perhaps through a contract arrangement with a private entity—the video and audio "feed" must be readily available to local broadcasters for bona fide news or public affairs programing at a reasonable cost.

Mr. President, the resolution that I am reintroducing today is designed to insure the proper balance between internal communication and broadcast interest, and to reduce to a minimum any possible disruption of Senate proceedings resulting from broadcast coverage.

It specifies, first, that the cameras will be "on" and the microphones "open" continuously while the Senate is in session. Provision of a continuous "feed" is absolutely necessary, not only for service to closed-circuit monitors and for creation of a complete record of the day's floor action but as a means of "routinizing" television coverage.

Experience in the State legislatures—44 of which now provide for some type of broadcast coverage—indicates that cameras which are "on" continuously are far less intrusive than those which are switched on for specified periods during the day's proceedings, thereby signaling that coverage is about to begin.

Under terms of this resolution, the Senate would exercise no control over the selection of materials for broadcast use. Instead, whenever the local or network broadcasters wished to use a segment they would be free to begin taking the "feed" for a "live" telecast or radio program, or for taping segments for later use. The continuous feed thus would be available for airing at their discretion, and no agency of the Senate would be involved in making choices between debates to be covered, or selecting in any way portions of the proceedings to be provided for their use.

As a necessary supplement to the closed-circuit capability of the system, Mr. President, the resolution also provides for a running summary of floor debate, to be transmitted on teletype printers. Without such a written record, video and audio monitors can only be of limited utility, unless staff employees are assigned by their individual offices to watch or listen to them throughout much of the daily session.

Furthermore, the debate summary, plus daily committee schedules, bill status and other relevant information, would be made available for use in the press galleries by the wire services and other media outlets, as well as in the offices of Senators.

Mr. President, the resolution does not specify who would set up and operate the cameras. I believe that this could be done most efficiently—particularly during the year's experimental period—by the Corporation for Public Broadcasting, the Public Broadcasting Service, and National Public Radio. But I also believe that the Senate Committee on Rules and Administration, which would be responsible for overall supervision of the experiment, should have sufficient flexibility to decide, after further hearings, which is the best and least expensive alternative for development of this system.

It is my hope that such hearings can be held soon, and that the Senate will move to open its floor proceedings—where policies are debated, ideas challenged, positions defended and, finally, decisions made—to the most powerful of all media, to the news broadcasters who today are the source of most Americans' information about Government.

AMENDMENTS SUBMITTED FOR PRINTING

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977—H.R. 3477

AMENDMENT NO. 220

(Ordered to be printed and to lie on the table).

Mr. KENNEDY submitted an amendment intended to be proposed by him to H.R. 3477, an act to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

AMENDMEKT NO. 221

(Ordered to be printed and to lie on the table.)

Mr. ALLEN (for himself and Mr. SPARKMAN) submitted an amendment intended to be proposed by them jointly to H.R. 3477, supra.

BABYSITTER AMENDMENT

Mr. ALLEN. Mr. President, along with my distinguished senior colleague, Mr. SPARKMAN, I am introducing today an amendment to the tax bill, H.R. 3477, which is identical to an amendment adopted by the Senate last year during consideration of H.R. 10612, the Tax Reform Act of 1976. The amendment is designed to permit employment agencies placing companion sitters to be exempt from the Internal Revenue Code requirements imposed on employers in regard to FICA—social security, and FUTA—unemployment—taxes. The amendment would also exempt such agencies from the requirement of withholding Federal income taxes inasmuch as the agencies involved are not the actual source of wages.

The amendment is made necessary by revenue ruling 74-414, which defines a companion sitter agency as an employer within the meaning of the employment tax regulations. In my judgment, the ruling was ill-advised, because in practical effect it would drive out of business many agencies performing a valuable public service and because it fails to acknowledge the fact that sitter agencies are not employers but are rather agents acting either for the sitter or the party employing the sitter. The effect of the ruling has been to drive companion sitter agencies out of business or to bring them to the brink of bankruptcy.

Typically, a companion sitter agency will work from a list of names and phone numbers of persons willing to act as sitters. When contacted by an individual desiring a sitter, the agency will check from its list and put a sitter in touch with the person needing those services. Obviously, if a sitter agency is required to act as an employer for tax purposes of some 50 to 100 employees, then the administrative and financial burden is overwhelming. Unless Congress acts, in effect, virtually all such owner-operated agencies will fail and only those with substantial financial resources will be able to remain in business—with corresponding costs to the public in increased sitter fees to cover administrative overhead.

Although the amendment adopted last year was dropped in conference with the House of Representatives, the conference agreement noted the seriousness of the problem and urged the Internal Revenue Service to withdraw revenue ruling 74-414. Yet, Mr. President, the IRS has not withdrawn the revenue ruling involved and, in fact, is pursuing vigorously many of these small sitter placement agencies and is demanding from them payment of the various taxes associated with their alleged status as employers.

Obviously, Mr. President, we were mistaken in our belief that the IRS would react favorably to the request set forth in the conference report on the Tax Reform Act of 1976. Apparently the guidance and the desire of Congress is not going to be sufficient and the matter is going to have to be nailed down and made crystal clear before the Service will relent. The IRS has never been noted for its flexibility, and I guess this is going to be one more example of Congress being required to resolve fully a problem which should never have existed in the first instance.

My hope is, Mr. President, that the Senate will again see the wisdom of adopting the amendment I have proposed and that our efforts in this case will not go down the drain as a result of a desire to accommodate the sensibilities of the one agency of the Federal Government whose attention is difficult to get except with a club.

AMENDMENT NO. 222

(Ordered to be printed and to lie on the table.)

Mr. BENTSEN submitted an amendment intended to be proposed by him to H.R. 3477, supra.

AMENDMENT NO. 223

(Ordered to be printed and to lie on the table.)

Mr. BARTLETT submitted an amendment intended to be proposed by him to the bill (H.R. 3477), supra.

NOTICES OF HEARINGS

CONDUCT OF MONETARY POLICY

Mr. PROXMIRE. Mr. President the Committee on Banking, Housing and Urban Affairs will hold 2 days of public hearings on the conduct of monetary policy on May 3 and 10, each day at 10 a.m. in room 5302 of the New Senate Office Building.

On Tuesday May 3, 1977 the committee shall receive the testimony of the Honorable Arthur F. Burns, Chairman, Board of Governors of the Federal Reserve System.

On Tuesday May 10, 1977, the committee shall receive the testimonies of a panel of four distinguished economists: Dr. Albert M. Wojnilower, senior vice president and director of the First Boston Corp., New York; Prof. James Tobin, Sterling professor and chairman, Department of Economics, Yale University, New Haven, Conn.; Prof. William Poole, professor of economics, Brown Univer-

sity, Providence, R.I.; and Prof. Allan Sinai, professor of economics, Massachusetts Institute of Technology, Cambridge, Mass.

CHANGE OF HEARING NOTICE

Mr. NELSON. Mr. President, the hearing scheduled on the Small Business Administration fiscal year 1978 authorization for April 27 at 10 a.m. in room 424 of the Russell Senate Office Building, is now rescheduled for May 2, 1977, at 10 a.m. in room 424 of the Russell Senate Office Building.

NOMINATION HEARING

Mr. RIBICOFF. Mr. President, I wish to announce that the Committee on Governmental Affairs will hold hearings on the nomination of Alan K. Campbell, of Texas, to be a Commissioner of the Civil Service Commission, on Monday, May 2, 1977. The hearings will begin at 9 a.m. in room 3302, Dirksen Senate Office Building.

NOMINATION HEARING

Mr. WILLIAMS. Mr. President, I wish to announce that the Committee on Human Resources has scheduled a hearing on Friday, May 13, 1977, at 9 a.m. in room 4232, Dirksen Senate Office Building, on the nominations of Peter G. Bourne of the District of Columbia to be Director of the Office of Drug Abuse Policy and Lee I. Dogoloff of Maryland to be Deputy Director of the Office of Drug Abuse Policy.

Persons wishing to testify or submit statements, please contact: Nancy Olson, room 4230, Dirksen Senate Office Building, of the committee staff.

ADDITIONAL STATEMENTS

MR. WARNKE'S HIT LIST

Mr. GOLDWATER. Mr. President, a large number of Senators, including this one, did not vote for Mr. Paul Warnke when his appointment came before us to represent us in arms control and disarmament. The reason, as I told Mr. Warnke to his face, was that I thought he was too soft. Now here are other reasons creeping in that make his appointment seem even worse than it did at the time we were talking about it in committee. Mr. Anthony Lake, who is President Carter's national security helper, asked for a list of civil servants and career foreign service officers, with information about their careers. These are careers connected with the Arms Control and Disarmament Agency. Mr. William Safire has written a very penetrating analysis of what has gone on so far under the guidance of Mr. Lake with the compliance, I suppose, of Mr. Warnke. I think each Member of this body should read this analysis because Mr. Warnke and Mr. Vance are now the people who are going to represent us across the table from the Soviets, and the last thing we need at this point in our history is any semblance of weakness. I thank Mr. Safire for this penetrating article and I hope he will continue to write on this subject. If he does, I will continue to make them available to the Members of the Senate. I ask unanimous consent that Mr. Safire's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MR. WARNKE'S HIT LIST

(By William Safire)

WASHINGTON.—Before the Inauguration, the Arms Control and Disarmament Agency received a demand from Anthony Lake, Mr. Carter's dovish national security helper, for a list of its civil servants and career Foreign Service officers, with information about their careers.

Properly, the agency turned down the demand; although there is nothing wrong with sweeping out Presidential political appointees at the change of Administrations, there is a great deal wrong with compiling a "hit list" of civil servants for the purpose of changing an agency's ideology.

At his stormy Senate confirmation hearings, Paul Warnke—who had been Senator McGovern's foreign policy adviser and was President Carter's sop to the doves as disarmament chief—was asked under oath about reports of a planned "purge" at the agency. He replied firmly that there was "no substance" to those reports.

The Senators were particularly concerned about "verification" at the A.C.D.A. Those are the people who work with the C.I.A. and National Photographic Interpretation Center to put into SALT agreements some way of seeing if the Soviets are cheating. Neither the Soviets nor our doves like our persnickety "verifiers." To ingratiate himself with skeptical Senators, Mr. Warnke took a hard line saying: "An agreement which is not verifiable is worse than no agreement."

Off went Mr. Warnke on Secretary Vance's arms control mission to Moscow last month, grumping about the United States position that had been based on a 17-page letter from Senator Henry Jackson and the first SALT paper in four years siged by the Joint Chiefs of Staff.

When the Russians stonewalled, the U.S. team held a seven-hour strategy session. As might be expected, Mr. Warnke's hearing-toughness vanished; he persuaded Mr. Vance to make a significant concession to the Soviets.

The Warnke concession was to offer to limit cruise missiles to 600 kilometers on non-heavy bombers. We had been willing originally to limit the cruise missile's range to 2,500 kilometers because we don't need another intercontinental missile—but we do need a theater weapon. Mr. Warnke in making the cruise missile acceptable to the Soviets, makes it far less valuable to us.

The Russians turned up their nose to this concession; most Americans do not even know it was offered. But as the Vance party returned in disarray, the career "verifiers" back home in the agency began to point out some big problems in the concessions.

The Soviet Union has a large cruise missile of its own, the AS-4 to be carried by its Backfire bomber. Although it would be easy for the Russians to check on any United States cheating in cruise missiles (by reading Aviation Week), it would be more difficult for us to verify Soviet compliance.

That is because the cruise missile, unlike the ICBM, does not have to fly 3,000 miles to a target to be tested, inviting surveillance; instead, they can be tested in a "racetrack pattern," flying in circles locally. The ICBM crashes on the target, requiring it to send back data in flight, which our verifiers intercept; but the cruise, which can land by parachute, is silent.

"Verification" is the name of the arms control game. Now consider what has happened to this crucial watchdog function since the return from Moscow.

The ideological "hit list" has been activated. Throughout the Arms Control and Disarmament Agency, the hard-line professionals—not the political appointees, but the career officials—have been told to quit or find jobs elsewhere. Civil servants, Foreign Service Officers and active-duty military like Robert Behr, Leon Sloss, William Steerman, Lee Niemela, Charles Estes, Paul Wolfowitz, William Graves and dozens of others are being "relocated"—to make room for men who won't make waves when U.S. strategic interests are conceded away.

Worst of all, the Verification Bureau has been abolished. The civil servant in charge, GS-18 Fred Eimer—nonpolitical—was asked to find work elsewhere. The next man, GS-17 Burt Aschenbrenner, was pushed out last week, and Cairns Lord, Philip Jackson, Eric Erlinson and other experienced verifiers have fanned out to other Government agencies or to universities.

Thus the only group in the Government whose sole job is to develop systems to verify arms control has been systematically disbanded.

The dovecote that is now our Arms Control Agency will say that no verification bureau is needed, that the function can be handled at C.I.A. or sprinkled around the agency. But every savvy bureaucrat can see through that: the verifiers must have no vested interest, no bureacuratic loyalty other than to curtail possible Soviet duplicity.

Nor is the C.I.A. empowered to come up with treaty language or arms control negotiation suggestions dealing with verification. That is what should be the responsibility of an objective body within our State Department.

Firing political appointees is a legitimate function of a new broom; but compiling a "hit list" on an ideological basis, aimed at dispersing a group of nonpolitical professionals, deserves investigation. Ironically, Mr. Warnke's abuse of power is a step toward American strategic impotence.

TWENTY-EIGHT YEARS OF SILENCE

Mr. PROXMIRE. Mr. President, it has been almost 28 years since President Truman signed and transmitted the Genocide Convention to the Senate of the United States. It has been 26 years—since January 12, 1951—that the Genocide Convention has actually been in effect. We have stood silent for that long.

The Genocide Convention represents the voice of mankind condemning the mass destruction of any people on ethnic, cultural, or religious grounds. The world body of nations has spoken out against this horrible crime by ratifying the Genocide Treaty. The world has said that it will not support, nor condone, any such genocidal acts.

More than 80 nations have joined their voices in this cry of conscience, but the United States has remained mute. We have stood silent by refusing to ratify the Genocide Convention. We have said nothing. We have not lived up to our heritage.

Mr. President, we have gained nothing by our refusal to ratify the Genocide Convention. Our world image and our national credibility have suffered, as has the treaty itself because of our long absence from the rolls of its supporters. In this instance, Mr. President, silence on our part has been anything but golden.

We have seen the Genocide Convention in effect for 28 years and we have observed no ill effects. The Genocide Convention does not make the world perfect, as recent events in Uganda have shown, but it points us in the right direction.

Mr. President, I urge my colleagues to

end our long silence by ratifying the Genocide Convention. Let us put our votes where our hearts are. We have nothing to lose and a conscience to gain. Please, gentlemen, not one more year of deafening silence.

THE SMITHSONIAN INSTITUTION

Mr. MATHIAS. Mr. President, as a native of nearby Frederick, Md., I have been able to visit Washington and to enjoy its cultural attractions all my life. I first visited the Smithsonian Institution as a young boy when its collections were housed in those two marvelous Victorian buildings on Independence Avenue—the Castle and the Arts and Industries Building—and in the Museum of Natural History on Constitution Avenue. I have been visiting it ever since and have watched its growth with pleasure and satisfaction. It has added the same kind of intellectual dimension to my children's lives as it has to my own—only many times magnified thanks to the imaginative direction of S. Dillon Ripley, who in 13 years has brought it to a magnificent fruition.

I was delighted to find my view of the Smithsonian shared in the lead editorial in the April 5 Washington Star, which summarized the spirit of the Smithsonian and urged that it continue to enjoy the flexibility which has made its remarkable growth possible.

I am confident anyone who has visited any of the Smithsonian enterprises from the National Zoo to the recently opened triumphant Air and Space Museum cannot fail to agree. I ask unanimous consent that the Star editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Apr. 5, 1977]

BOOKKEEPING AT THE SMITHSONIAN

It is our impression, but not ours alone, that the Smithsonian Institution is administered with a skill and imagination that other agencies would do well to emulate.

It has nonetheless been the target of persistent congressional and journalistic potshotting and has now been subjected to two investigations by the General Accounting Office, one in 1970, the other just concluded.

What the problem boils down to is a disagreement—considerably colored by journalistic hype—over accounting and money-handling practices—as well as the style of the Smithsonian's estimable secretary, S. Dillon Ripley. One columnist, with a heavy dose of the journalistic hype we noted above, wrote last October of the "free-wheeling" Mr. Ripley and spoke of the Smithsonian as a "sacred cow" immune to ordinary standards of public accountability.

There is room for honest disagreement about the Smithsonian's budgetary procedures—or at least some of those necessitated by its quasi-private character and its need to be as free as possible of bureaucratic apron strings. But we know of no evidence—certainly none has turned up in either GAO investigation—to support the suggestion of one "Hill source" last fall that there may be "some kind of laundering operation at the Smithsonian": the implication of which, we suppose, is that procedures questioned by the staff of a Senate subcommittee are necessarily dubious.

Indeed, the GAO, though critical of the payout of funds by two non-public corporations set up by the Smithsonian to administer grants, found its own criticism "muted by the fact that there is nothing to suggest that appropriated funds were spent on anything but the programs authorized."

If so, what is all the shouting about? It has been the contention of two senators, and certain other critics, that the Smithsonian is insufficiently accountable for the way it handles—and commingles with public appropriations—approximately $17 million (fiscal 1976 figures) in endowed and donor income. Yet it is far from clear that the mystery is the Smithsonian's fault; it has made no attempt, so far as we can determine, to conceal its practices—how could it, when it is governed, under law, by a board of regents which includes prominent members of Congress, the administration and the judiciary? Those who are mystified might, at any rate, be referred to the Secretary's annual Statement, with its detailed tables and report from the Smithsonian's accountants.

If the Smithsonian's budgetary procedures are unusual or "questionable," their aim would seem to be effectiveness in that "diffusion of knowledge" enjoined by its original benefactor, James Smithson. That some question those procedures does not, of course, make them unwise or unacceptable public procedure. The Smithsonian's quasi-private character—Mr. Ripley's salary, for instance, is paid from private funds—affords flexibility. Nothing could more quickly limit its effectiveness than rigid or puritanical notions of the public purpose.

Tell-tale in this regard are the cheap shots at Secretary Ripley's travels, and at his ornithological studies at Litchfield, Conn. The test of Mr. Ripley's abilities is not whether he is chained to a desk in Washington 365 days a year; it is whether the Smithsonian under his direction is flourishing and is serving as its founder intended it do. And none of Mr. Ripley's critics deny that it is.

In response to the more recent GAO report, the Smithsonian has said that it is ready, even eager, to co-operate with the Senate Interior subcommittee in revising its practices to assure greater accountability. And so it should be. But the Smithsonian ought to resist the kind of budgetary regimentation some of its critics seem to have in mind for it, and it should be supported in that resistance by the American public. A creative institution needs room to maneuver.

SENATE JOINT RESOLUTION 47

Mr. INOUYE. Mr. President, with my colleague, Senator MATSUNAGA, I have introduced Senate Joint Resolution 47 to remedy a serious deficiency in the collection of current population statistics by the U.S. Bureau of the Census and several executive departments. For too long, public policymakers and citizen groups have suffered from a lack of accurate and timely data on this country's Asian and Pacific Island American population.

The joint resolution I propose seeks to assure that the Federal Government develops methods to improve and expand on the collection, analysis, and publication of a wide variety of population statistics relating to Americans of Asian and Pacific Island descent.

It is no small problem that worthwhile data about this group has been lacking through the years. Too often, we in Congress pass legislation relating to employment, health, social welfare, and education without knowing its impact on our Nation's Asian and Pacific Island American people.

Policymakers should know, for example, to what extent Government bilingual education funds are in demand by this population. It seems ridiculous to me to authorize expenditure of tax dollars on vital programs like bilingual education without all the basic facts. And without the same basic facts, local and State administrators are unable to fully assess the success or failure of a program like bilingual education, which is directed in part to the Asian and Pacific student.

In my home State of Hawaii, ordinary 10-year census counts give local planners figures reflecting populations of "white," "black," "Spanish-speaking" or "other." Of what use is the decennial census if more than 60 percent of Hawaii's population must be counted as "other"?

Better statistics about the Asian and Pacific Island Americans would help many States in meeting the multilingual ballot requirements set by the 1975 Voting Rights Act amendments, particularly those States that have become home for many recent Asian immigrants desiring citizenship. And figures on Asian unemployment rates and other social indicators may help public officials approach more knowledgeably the problems of urban Asian ghettos and low-income neighborhoods.

I believe an improved data-gathering operation will facilitate a more complete grasp of the needs and problems of the American pople, and also will help to bring to the Asian and Pacific Island Americans Federal programs and benefits accorded other Americans.

If our distinguished colleagues agree that the Federal Government should not ignore this population group, perhaps they also will agree that efforts to survey them and to draw social and economic profiles of them must be conducted with a full awareness of and sensitivity to Asian and Pacific Island American concerns.

There should be sufficient sensitivity so that, for example, basic racial and ethnic counts do not lump together all Asian and Pacific Island groups under headings like "yellow" or "oriental," two labels currently in consideration for use in the 1980 census. What is needed is an accurate breakdown of Asian nationalities as well as Pacific Island people such as Samoan Americans and native Hawaiians to meet the needs of local, State, and Federal officials and planners. The joint resolution I propose has provisions to help assure that legitimate Asian and Pacific Island concerns are reflected in the collection of current population data.

I am hopeful this legislation may be passed quickly, because we must meet the need to bring our Nation's Asian and Pacific Island American population on an equal footing with the rest of the American people.

Mr. President, I request unanimous consent to have the text of the joint resolution printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 47

Relating to the publication of economic and social statistics for Americans of East Asian or Pacific Island origin or descent.

Whereas more than two and one-quarter million Americans identify themselves as being of East Asian or Pacific Island back-

ground and trace their origin or descent from the East Asian Continent or the Pacific Islands; and

Whereas these Americans of East Asian or Pacific Island origin or descent have made significant contributions to enrich American society and have served their Nation well in time of war and peace; and

Whereas a large number of Americans of East Asian or Pacific Island origin or descent suffer from racial, social, economic, and political discrimination and are denied the basic opportunities they deserve as American citizens and which would enable them to begin to lift themselves out of the poverty many of them now endure; and

Whereas improved evaluation of the economic and social status of Americans of East Asian or Pacific Island origin or descent will assist localities, States, the Federal Government, and private organizations in the accurate determination of the urgent and special needs of Americans of East Asian or Pacific Island origin or descent; and

Whereas the provision and commitment of local, State, Federal, and private resources can only occur when there is an accurate and precise assessment of need: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Department of Labor, in cooperation with the Department of Commerce, shall develop methods for improving and expanding the collection, analysis, and publication of labor force characteristics relating to Americans of East Asian or Pacific Island origin or descent for those States with localities containing significant populations of East Asian or Pacific Island Americans.

SEC. 2. The Department of Commerce, the Department of Labor, the Department of Agriculture, and the Department of Health, Education, and Welfare shall each collect, and publish regularly, statistics which indicate the social, health, and economic condition of Americans of East Asian or Pacific Island origin or descent for those States with localities containing significant populations of East Asian or Pacific Island Americans.

SEC. 3. The Director of the Office of Management and Budget, in cooperation with the Secretary of Commerce and with the heads of other data-gathering Federal agencies, shall develop a Government-wide program for the collection, analysis, and publication of data with respect to Americans of East Asian or Pacific Island origin or descent for those States with localities containing significant populations of East Asian or Pacific Island Americans.

SEC. 4. The Department of Commerce, in cooperation with appropriate Federal, State, and local agencies and various population study groups and experts, shall immediately undertake a study to determine what steps would be necessary for developing creditable estimates of undercounts of Americans of East Asian or Pacific Island origin or descent for States with localities containing significant populations of East Asian or Pacific Island Americans.

SEC. 5. The Secretary of Commerce shall insure that, in the Bureau of the Census data-collection activities, the needs and concerns of the East Asian or Pacific Island origin population are given full recognition through the use of East Asian or Pacific Island language questionnaires, bilingual enumerators, and other such methods as deemed appropriate by the Secretary for States with localities containing significant populations of East Asian or Pacific Island Americans.

SEC. 6. The Department of Commerce shall implement an affirmative action program within the Bureau of the Census for the employment of personnel of East Asian or Pacific Island origin or descent and shall submit a report to Congress within one year of the enactment of this Act on the progress of such program.

U.S. CANAL ZONE SOVEREIGNTY: CHRISTIAN SCIENCE MONITOR EDITORIAL CONFUSION CLARIFIED

Mr. HELMS. Mr. President, one of the features in the current massive propaganda campaign to win the support of the American people and Congress to accept the surrender of U.S. sovereign control over the Panama Canal and its protective strip of the Canal Zone has been editorials in some of our leading newspapers based on erroneous information. A recent example was published in the February 15, 1977, issue of the Christian Science Monitor, which supported the State Department's program for giving up the canal but perpetrated a serious error of fact on the legal status of the Canal Zone as an unincorporated territory of the United States. As such, the canal cannot be surrendered without the authorization of Congress (U.S. Constitution, Article IV, section 3, clause 2). Efforts for surrender without such authorization are attempted usurpations of executive authority, which must not be permitted.

Fortunately, such editorials as that cited are subject to the scrutiny of many authorities well informed on canal matters. One of the most outstanding is Dr. Donald M. Dozer, professor of history emeritus of the University of California, Santa Barbara, and an eminent authority on Latin America whose numerous writings are authoritative.

In a letter to the editor of the Christian Science Monitor on February 16, 1977, he stresses one major error in the editorial as regards the status of the United States as sovereign over the Canal Zone.

As to such status, it should be noted that there was no doubt in the minds of eminent contemporary observers of the early 20th century Isthmian events. The British Ambassador, Lord James Bryce, in 1906 stated that the 1903 Treaty "ceded perpetuity" the Canal Zone to the United States—James Bryce, "The American Commonwealth," revised edition, page 408.

Mr. President, because the letter of Dr. Dozer should be of interest to all Members of the Senate at this time when the time for submission of a new canal treaty seems approaching, I ask unanimous consent for it and the Monitor's editorial to which it refers to be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SANTA BARBARA, CALIF.,
February 16, 1977.

The CHRISTIAN SCIENCE MONITOR,
Boston, Mass.:

I call attention to a serious error of fact about the legal status of the United States Territory of the Canal Zone in your editorial, "Canal talks: back to bargaining," in the *Monitor* of February 15.

A little research in easily accessible source materials would have shown your editorial writer that in Articles II and III of the Hay-Bunau-Varilla treaty of 1903 Panama granted all sovereign rights over the Canal Zone "in perpetuity" to the United States for the price of $10 million to the entire exclusion of the exercise of any such sovereign rights by the Republic of Panama. Since the purchase was a clean bill of sale, the treaty contained no provision for a later renegotiation. So eager was Panama to provide the site for the benefit of her national economy that the Panama National Assembly ratified the treaty before the United States Senate gave its consent. In addition the Panama National Assembly adopted other acts recognizing that they had ceded the Canal Zone to the United States.

Both the United States Congress and the Supreme Court have recognized the transfer of the Canal Zone as a cession of sovereign rights to the United States in perpetuity. The leading case is *Wilson* v. *Shaw* 104 U.S. 24 (1907) in which the United States Supreme Court held that with the exchange of ratifications of the purchase treaty of 1903 "ceding" the Canal Zone title to it passed to the United States. This decision was reaffirmed as recently as 1972 when the Supreme Court denied certiorari in the case of *United States* v. *Husband* (R) 406 U.S. 935, 1972. This confirmed the ruling of the United States Circuit Court of Appeals for the Fifth Circuit which ruled that the Canal Zone is unincorporated territory of the United States and as such is subject to the plenary authority of the Congress. Article IV, Section III (2) of the Constitution specifically gives Congress "power to dispose of and to make all needful rules and regulations respecting the territory and other property belonging to the United States."

The status of the United States as sovereign over the Canal Zone has not been altered in any of the provisions of subsequent treaties between the two countries.

Sincerely,

DONALD M. DOZER.

[From the Christian Science Monitor, Feb. 15, 1977]

CANAL TALKS: BACK TO BARGAINING

A determined and commendable effort to work out a new treaty with Panama, covering the Canal Zone and the interocean waterway, now is getting under way. This represents the Carter administration's first venture into the sphere of international negotiations, and the new President naturally is anxious to see it succeed. The U.S. team, headed by veteran diplomat Ellsworth Bunker, has been augmented by Washington lawyer Sol M. Linowitz, a man likewise dedicated to achieving a new agreement with Panama.

Intermittently since 1964, the quest for an agreement has dragged on, but now Mr. Carter is hoping a new treaty can be completed by this coming June. This may prove optimistic on his part, considering the difficulties still ahead, but at least the mentioning of such a target date lends stimulus and encouragement to the delegations to get on with the task.

Panama meanwhile has injected a note of uncertainty into the talks by suddenly removing its chief negatiator, Foreign Minister Aquilino Boyd, and replacing him with Nicolás Gonzales Revilla, the young Panamanian Ambassador to the United States, who has not had much direct contact with the discussions hitherto.

Two major questions now remain to be ironed out. One is the final termination date for the new treaty, which means the date on which control of the canal and its zone passes to Panama. The two parties are not very far apart on this. The second is more difficult: U.S. access to, and defense of, the waterway once it is under Panama's control.

This matter of future American rights in the area inevitably involves an element of national pride on both sides, with resultant domestic political implications. One pro-

posal, by Panama, is that guarantees of access and Canal Zone neutrality ought to be vested in the United Nations, but this may not go down well with the U.S. Senate which must ratify the treaty.

Indeed, unless the negotiators are skillful in working out provisions acceptable to both sides, and unless the Carter administration is adept at justifying the settlement to the American people, treaty ratification could become a major issue. Lots of hard bargaining plainly looms ahead.

Working in favor of a settlement that both capitals can approve, however, is the sheer need to solve the problem. Ambassador Bunker is not alone in believing that a new Panama treaty is imperative if future American relations with Latin America as a whole are to be warm and credible. Moreover, Panama never ceded sovereignty over the Canal Zone, so a mutual arrangement now must be found that enables Panama eventually to resume control, without impairing U.S. strategic interests or Panama's integrity as an independent nation. The temper of the times clearly requires revision of the 1903 pact, and the United States should not shrink from taking the essential steps to bring it about.

SHARE DRAFT POWERS FOR FEDERAL CREDIT UNIONS

Mr. EASTLAND. Mr. President, on Tuesday, April 19, one of my constituents, W. Liddon McPeters from Corinth, Miss., testified before the National Credit Union Administration on a proposed regulation to authorize share draft powers for Federal Credit Unions. Mr. McPeters is president of the American Bankers Association and was accompanied on that occasion by the general counsel of the association, Mr. William H. Smith.

The statements of Mr. McPeters and Mr. Smith are very informative and deserve the attention of the Senate. I am sure that their testimony will be of particular interest to members of the Committee on Banking, Housing, and Urban Affairs.

Mr. President, I ask unanimous consent that the statements made by Mr. McPeters and Mr. Smith be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF LIDDON MCPETERS

Mr. Montgomery and members of the NCUA staff, I am Liddon McPeters, President of the Security Bank, Corinth, Mississippi, and President of the American Bankers Association, on whose behalf I am appearing today. Accompanying me is William Smith, General Counsel to the Association. We appreciate this opportunity to present the views of our Association, whose membership consists of approximately 92% of the nation's more than 14,000 commercial banks, of the Administration's proposed rule for share draft programs for Federal Credit Unions.

As you have perhaps surmised from our previous actions, the ABA is strongly opposed to the proposed NCUA regulation on share draft powers for Federal Credit Unions. The basis for our Association's opposition to the proposed program is twofold in nature: 1) the addition of share draft powers changes the functional concept of the credit union and raises certain public policy issues, including competitive inequity between commercial banks and credit unions; and 2) the illegality of the NCUA proposed authorization of and participation in a share draft program by Federal credit unions.

I will focus my remarks on our first area of concern and Mr. Smith, in his statement, will address the illegality of the NCUA proposed program.

Traditionally, our Association has not opposed the extension of third-party payment powers to credit unions and other types of thrift institutions if the public is served by equal treatment being established for all the depository institutions having such powers. Equal treatment pertains to taxation, reserve requirements, deposit interest rate regulation, and other supervisory and regulatory requirements imposed on institutions chartered to engage in the business of accepting deposits payable on demand. Indeed, we believe that such balanced and equitable changes in regulations covering deposits are, in the long run, in the public interest, offering an expanded and more convenient payment service to the public.

In the judgment of our Association, however, the share draft program proposed by the Administration will further aggravate the existing competitive imbalance and unfair advantage enjoyed by credit unions at the expense of other financial institutions and most particularly commercial banks, since payment services are an integral feature of the business of these institutions.

Checking accounts have long been a distinctive service of banks. Use of checks by households, as well as by business and government, is more widespread and commonplace in the United States than in any other country. Banks have thus provided a broad-based and convenient means of payment in our economy. Entry of credit unions, which have previously been granted special competitive privileges, into the third party payment business would add to the already intense competition in the checking account business. Because banks will likely suffer losses of deposits and earnings due to these competitive inequities, it is understandable that bankers argue that credit unions not be authorized to enter the checking account business unless the ground rules governing competition are equal. Share draft accounts are checking accounts—they should be called checking accounts, not obfuscated by marketing gimmickry which must be explained by saying that they are "like a check."

Much of the competitive advantage enjoyed by credit unions stems from the special privileges under which they operate and the extraordinary subsidies they receive. Credit unions receive public subsidies in the form of tax exemption and the absence of deposit reserve requirements. They often receive additional subsidies in the form of contributions, such as rent-free space, from the sponsoring organization. These subsidies, coupled with the lack of corporate shareholders expecting earnings, enable most credit unions to pay a higher interest rate on deposits and make loans at lower rates than banks and thrift institutions. The result is that commercial banks and other thrift institutions would be at a significant competitive disadvantage if credit unions receive share draft powers without redressing the competitive imbalances which could then more obviously exist.

Indeed, one can question whether some of the subsidies which provide credit unions with such an advantage continue to serve any useful social purpose, since those subsidies no longer benefit primarily lower-income groups or those without access to financial services from other sources. The continuation of all of these subsidies, combined with expanded credit union powers, could eventually transform credit unions into a primary supplier of personal financial services in many market areas. There is no valid justification in the competitive American marketplace for such special privileges to continue.

Until recently, the credit unions' advantage has been offset by thir inability to offer third party payments. The introduction of share drafts, therefore, makes it virtually impossible for many banks and other thrifts to compete effectively with credit unions for a sizable portion of available household deposits.

Competitive equality relative to credit unions and the thrift institutions is especially important to the future viability of thousands of small- and medium-size banks roughly 13,000 are small- to medium-size and serve local communities and suburban areas. About 2,400 small banks averaged less than $40,000 in net income in 1974. Another 3,160 relatively small banks averaged less than $85,000 net income. Such banks are particularly susceptible to adverse effects from changes in competition with thrift institutions, such as that which would result if the NCUA adopts the proposed share draft program.

Let me cite just a few specific examples.

Alaska National Bank in Anchorage has lost $600,000 in checking accounts of 375 customers while Alaska USA Federal Credit Union has acquired 1,900 share draft accounts worth over $4 million. These 1,900 accounts represent a mere 3.8% of the membership of this particular credit union, and the $4 million just over 3.3% of the total assets of the credit union. What will be the effect on Alaska National Bank if all or most of the credit union's members shift their checking accounts from Alaska National to Alaska USA?

First National Bank of Big Spring, Texas, has lost $100,000 and over 100 accounts. State National Bank in Big Spring has lost approximately the same amount, and perhaps a few more accounts. Security State Bank in Big Spring has lost in excess of $400,000 and up to 175 accounts. Meanwhile, Webb Air Force Base Federal Credit Union has acquired almost $645,000 in 900 or so share draft accounts and, as a result of action taken by your office recently, was authorized to expand its "common bond" of membership to the entire community in which it operates.

First National Bank of South Carolina, with branches in Charleston, has lost $414,000 in checking and savings accounts, while CAB Federal Credit Union in Charleston has accumulated nearly $1.3 million in nearly 1,700 share draft accounts. Only 10% of the membership of the credit union now have share draft accounts. What will happen to the banks in that area when 100% of the members open such accounts?

In Peru, Indiana, the Peru Trust Company has a $1.8 million branch office serving the Grissom Air Force Base. The Grissom Federal Credit Union is participating in the share draft "experiment" in the same location and anticipating some 2,000 or 3,000 share draft accounts within a year. If this occurs, Peru Trust is resigned to losing its branch. The deposit base remaining after the anticipated losses to the credit union will not support its continued existence. The single and obvious fact is that funds in share draft accounts at credit unions are coming directly from checking accounts at banks and banks are legally banned from meeting such competition.

Your program, to date, has been billed as an experimental one, involving a few hundred credit unions out of the nearly 13,000 institutions under Federal Charter. Most of the share draft "experiments" have been operating for only a little longer than a year, or for an even shorter period if the typically limited "start-up" period is excluded. If the proposal is adopted in permanent form, there are several hundred other Federal credit unions interested in offering share drafts. It is not unreasonable to expect that eventually thousands of credit unions will be participating in share drafts. There are 10,000 state-chartered credit unions in the United States as well. The regulatory authorities for these institutions will, by and large, follow the lead the Federal agency takes in approving

or disapproving this program. So-called "wild-card" statutes in several states would automatically grant share draft powers to state credit unions, and in other cases it will be done simply to prevent a flood of charter conversions from state to Federal.

Credit unions have become full fledged participants in our nation's financial system. Under professional management, the more aggressive credit unions have made a farce of the common bond concept and have emerged with their historic traditions intact, as aggressive competitors with many smaller banks. Prior to any further expansion of credit union powers—such as the share draft proposal—we believe it is incumbent that both the NCUA and the industry it regulates should first accept the supervisory and regulatory burdens imposed on other participants in our nation's financial system.

Another aspect of competitive equity involves reserve requirements. Reserve requirements on checking accounts assist the Federal Reserve in its administration of monetary policy and help insure the safety and soundness of institutions offering such accounts. In the commercial banking industry, the Federal Reserve sets reserve requirements for member banks and states set reserve requirements for nonmember banks. Since member banks currently have the bulk of demand deposits, this system has adequately served the twin goals of not interfering with the central bank's administration of monetary policy, and fostering a sound and innovative banking system through a system of dual chartering at the state and Federal level. If credit unions receive the power to offer share draft accounts, the system can only be preserved by imposing on all federally-chartered credit unions the same reserve requirements as those imposed on Federal Reserve member banks. Although it can only be done through legislation, we also believe states which empower state-chartered credit unions to offer share drafts should be encouraged to impose the same reserve requirements on these credit unions as they impose on state-chartered nonmember banks.

Moreover, the payment of interest on deposit balances available for transfer to third parties would be attractive to private individuals and corporations where this type of deposit is made available. This ability to attract additional deposits through interest bearing share drafts would encourage many Federal credit unions to offer this type of payment device. These advantages could reduce the need for demand deposits of commercial banks. Under these circumstances, there would be decreases in commercial bank deposits which are subject to monetary control, while at the same time the share draft accounts of credit unions would, in effect, operate as part of the money supply, but would do so outside the control of the Federal Reserve. Thus, the effectiveness of the Federal Reserve in exercising its monetary policy could be hampered.

In summary, the competitive inequities between banks and credit unions which I have described would be expanded in and of themselves and significantly extended by the Administration's proposed share draft program. Moreover, the effects of the rule would adversely affect the conduct of national monetary policy.

We would now like to direct our remarks to the illegality of the share draft program.

STATEMENT OF WILLIAM H. SMITH

I am William H. Smith, General Counsel of the American Bankers Association. I would like to thank the NCUA for the opportunity extended to our Association to appear here today and to express our views on the proposed share draft rules.

These views can be very simply stated. Share drafts for Federal credit unions are bad policy and worse law.

Policy considerations, and particularly the present and expected harm to commercial banks, are addressed in the statement of ABA President Liddon McPeters. I will focus instead on the legal aspects of share drafts under the Federal Credit Union Act.

We can find no authority in the Act for share draft accounts. The proposed rule doesn't help us much either. The Administrative Procedures Act requires that an agency state in a proposed rule the source of authority for the rule. NCUA has cited, as authority, the Administrator's rulemaking powers under the statute. We know that he has authority to make rules in general, but what is his authority to make this rule? That is nowhere stated.

The ABA takes the position that none of the express powers of Federal credit unions convey this authority; that the implied power of Federal credit unions are inadequate to accomplish this purpose; and that, accordingly, the NCUA cannot create such a power in Federal credit unions out of the whole cloth. Furthermore, share drafts are inconsistent with the whole history of Federal credit unions and the history of financial instutions in general.

First, the express powers of Federal credit unions include the right to sue and be sued; to make contracts, to adopt a common seal, to cash and sell checks and charge a fee for doing so, to own property, to make loans, receive deposits, borrow money and assess late charges. Where, among these powers, does one find any reference to share drafts in any way, shape or form? It simply is not there.

This then leaves the "implied powers" of Federal credit unions. Credit unions may do anything which is necessary or requisite to carry out the purpose for which they are incorporated.

In what sense do share drafts meet the "necessary or requisite" test? In the proposal, we are told only that member convenience is the object of this program. This is insufficient, as a matter of law, to justify the rule.

Under the law, the implied powers of a financial institution are only those which bear some connection to the performance of an enumerated power. The First Circuit Court of Appeals has held that "if this connection between an incidental activity and an express power does not exist, the activity is not authorized as an incidental power."

Where is the legally required connection in the case of share drafts? Are these drafts somehow necessary or requisite in order for a credit union to adopt a common seal? Are we supposed to assume that because a credit union has the power to make contracts that any contract is a necessary incident—including the contracts which underlie the creation of a share draft program? Are we going to be told that credit unions will not be able to make loans without share drafts? We reject any such contention as ludicrous at worst and bootstrapping at best.

I suppose it might be said that survival and growth of an institution are "necessary or requisite" but, quite clearly, this necessity has been met without share drafts. Over the past ten years, credit unions have increased their assets 281%, far outstripping any other form of financial institution in rate of growth.

Instruments for third party withdrawals from interest-earning accounts are, likewise, not incidental to the operations of a financial institution dedicated, by law, to promoting thrift. The Supreme Court of Maine, in 1971, and the New York Court of Appeals, in 1975, have so held. The institutions involved in these suits were designed to promote thrift; there was no specific statutory authority for them to permit third-party withdrawals from interest-bearing accounts; a "necessary and proper" type clause appeared in the savings bank statutes; and, in both cases, there was no long prior history of the questioned activity before legal challenges were instituted. Nothing distinguishes the facts in the present share draft situation from the facts in these savings banks cases. The result, therefore, should be the same. If these accounts were not permitted in New York and Maine before specific statutory authority was granted, neither should similar accounts be permitted to Federal credit unions in the absence of a statute saying so in clear terms.

Additionally, a particular activity can hardly be considered to be an "implied power" where there are indications elsewhere in the statute that such activity is not intended to be exercised.

I think that it would be fair to say that the Administrator recognizes that Federal credit unions do not have "demand deposit" powers; the ABA certainly takes this position. When the share draft rule was proposed, the Federal Credit Union Act specifically prohibited the Administrator from insuring demand deposit accounts in state credit unions. It also prohibited the Administrator from discriminating against state-chartered credit unions. These two provisions could exist virtually side by side only because Federal credit unions lack authority to have demand deposit accounts, and therefore, it is not discriminatory to exclude the state demand deposit accounts from the insurance program.

The prohibition against demand deposit accounts for Federal credit unions is recognized by NCUA itself. The General Counsel, Mr. John Ostby, has written that a particular proposed arrangement whereby a credit union would guarantee payment of a share draft cashed at a bank would be improper, since the drafts would then "take on the appearance of demand deposit accounts and might be subject to court challenge as such." Share drafts, however, are payable on demand and thus obviously payable from demand deposit accounts because nothing on the face of the instrument says otherwise. Under the Uniform Commercial Code that fact is decisive. Any agreement between the credit union member and the credit union to the contrary would not be binding on a third party and would be unenforceable.

At the same time, we are told that there is, in the credit union bylaws, a provision that reserves to credit unions the right to require notice prior to withdrawal. A credit union member may or may not be aware that such a bylaw exists or that it is applicable to a share draft account. No such terms or conditions are stated in the agreement the member signs when he opens a share draft account. But even if the member were fully aware of such a rule, the merchant who takes a draft in payment for goods is not aware of its existence, and he is conclusively presumed not to be aware of it. Once the draft is in his hands, it is legally impossible for the credit union to invoke its alleged right to prior notice, even if it wanted to do so.

There is a further point to support this position that share drafts are, in fact, demand instruments. Various banks in different parts of the country have treated share drafts as "collection items." In Wyoming, Texas and Florida, credit unions have filed suit against the banks to compel them to treat share drafts as "cash items," and process them through the Federal Reserve clearing system. The Fed's Regulation J defines "cash items" as checks and "other items payable on demand." So the credit unions themselves, when it suits their purposes, claim that these instruments are demand items. Calling the drafts something else doesn't make it so; and fabricating a wholly fictitious "prior notice" requirement buried in an obscure and inapplicable bylaw doesn't make it so either. You admit that credit unions don't have demand deposit authority, and yet you propose to authorize demand accounts anyway. That is illegal.

What about the power of the agency as distinct from the powers of the credit unions? Here again, there is no express power contained in the Federal Credit Union Act that authorizes the Administrator, at will, to create separate, different or additional classes of shares. The agency admits this as well. A letter from the Administrator to Credit Union National Association in September 1971, states that the law does not authorize anything "other than traditional share accounts." The recent enactment of H.R. 3365, subsequent to the promulgation of this proposed rule, is the only thing that changes this. This Act will allow, by specific statute, a variable rate share certificate, which is an untraditional account. Where is the specific statute authorizing share drafts?

Of course, there are the general "rule-making" powers of the Administrator. They are found in two places in the statute, and the agency relies solely upon these two sections as authority for the proposed rule. Section 209 of the Act provides that the Administrator may exercise various enumerated and implied powers in administering the share insurance subchapter. Somebody is going to have to explain to me, and to our bankers, what the existence or non-existence of share draft accounts has to do with the creation, administration or protection of the Share Insurance Fund.

The other section, Section 120 of the Act, likewise contains a list of the Administrator's enumerated powers, the power to prescribe rules and regulations for the administration of the Act, and the power to do other things necessary or appropriate to carry out the provisions of the Act. None of the enumerated powers has anything to do with share drafts. The Administrator is not given the power to do anything outside the scope of the Act. Courts have invariably held that an agency may not exceed the scope of its statutory authority. This is particularly true with respect to financial institutions. The U.S. District Court for the District of Columbia held, in November 1976, that the Administrator's powers were analogous to the powers of the Comptroller of the Currency and the Federal Home Loan Bank Board. Look what has happened in the case of these two agencies.

In the 1960's the Comptroller authorized a whole range of activities by national banks—data processing services, collective investment funds, travel agencies, etc. One by one, these activities were challenged; and time after time, the courts have struck them down. Nothing in the law authorized the banks to engage in these activities, and therefore, they could not do so, the Comptroller of the Currency notwithstanding. The Home Loan Bank Board has had a similar lack of success in attempting to expand its powers beyond the statute. The Board authorized data processing services for the Federal Home Loan Banks, and a federal court in Ohio overturned this authorization. It isn't in the statute, and the agency can't put it there.

Why is the National Credit Union Administration different? What is there that gives this agency plenary powers that the other regulators do not have? Only if the new activity to be authorized can be supported by the statute itself, or at least by its legislative history, will the activity be proper.

Consider then the legislative history of the statutes regulating financial institutions.

When the Federal Credit Union Act was passed in 1934, the debates on it emphasized, over and over and over, that these institutions were designed for two purposes and two only—to promote thrift and to provide loans at reasonable rates to people who could not get them from banks.

In fact, one of the major proponents of the Act, Congressman Henry B. Steagall, stated that the services to be rendered by credit unions were not comparable to those rendered by banks. Now, the National Credit Union Administration tells us that share drafts—advertised as "just like a checking account at a commercial bank"—were certainly in the comprehension of the Congress when it gave credit unions powers necessary or requisite to carry out the purpose for which they were incorporated. This is just plain wrong.

So pervasive in the minds of the sponsors were these dual purposes of thrift and credit that they wrote the words into the law in 1934 and there the words have remained for 43 years without change. If share drafts can be said to promote thrift and credit, it is surprising that the implied powers of credit unions were not relied upon at any time in all these years to justify creation of such accounts.

As additional support for the proposition that Federal credit unions do not, by virtue of their implied powers, have the authority to engage in the business of accepting demand deposit accounts, we point to the fact that Congress has in the past discovered and dealt with problems related to the level of reserves on demand deposits, the method of keeping these reserves, and the payment of interest on demand deposits. In each case, the Congress moved to regulate or prohibit the activities in question, and yet there is no mention of Federal credit unions in the statutes. Having taken steps to correct the problems associated with demand deposit accounts, Congress enacted the Federal Credit Union Act and never mentioned such accounts in your enabling legislation. Indeed, in the intervening 43 years, the Federal Credit Union Act has been amended many times, and yet Congress has never seen fit to set down any legislative rules or regulations for demand account activities in credit unions. It is reasonable to assume, therefore, that Congress never intended that Federal credit unions should possess this power. If demand deposit accounts, per se, were what Congress intended to regulate, it is inconceivable to us that they would have excused Federal credit unions from such regulation, particularly without saying so specifically, if credit unions in fact had such powers.

Perhaps the best, and most recent, illustration of this point is the NOW account experiment in New England. If somehow one can successfully argue that a share draft is not a check, at the very least it bears a striking resemblance to a Negotiable Order of Withdrawal. In order for NOW accounts to exist at all, Congress obviously believed that specific statutory authority was necessary. What makes Federal credit unions so much different that they may postulate such a power without a specific statute? Also, Congress has considered NOW accounts to be experimental, and, as such, felt it necessary to limit them to a specified geographic region. What makes credit unions so much different that the same type of account may be permitted nationwide?

Further, Congress has enumerated those types of financial institutions which may participate in the experiment within the selected area, and in doing so, very deliberately omitted credit unions. Only in financial institutions other than credit unions, and only in New England, can NOW accounts be offered by specific Congressional mandate. Yet your proposed rule would permit the same kind of account to be offered by the excluded institution in the excluded areas of the country. How could it be clearer that what you propose is plainly illegal?

If this is not enough of an indication that Congress does not intend for Federal credit unions to have these powers, consider as well what Congress has not done. In 1965 and 1969, Rep. Wright Patman introduced bills in the House which would have given credit unions checking account powers. They did not pass. Are we to assume that Rep. Patman did not know what he was doing? If credit unions already had this power, Mr. Patman's bills were superfluous. Wright Patman was a major proponent of the Federal Credit Union Act in Congress in 1934 and of virtually every amendment since then. Above all men, he must have known what the Act did and did not authorize.

Just last year, Rep. Fernand St Germaine introduced a bill which would have given Federal credit unions parity with state credit unions in third-party payment accounts. It did not pass. Was he also guilty of performing a superfluous act? If credit unions already had these powers, and more, as the agency now claims, it would seem that he was. The ABA rejects that contention and submits that Congressman St Germaine understood full well the need for that legislation.

I want to return now, for a moment, to the concept of "thrift and credit."

A credit union's powers are limited to those that are necessary or requisite to carrying out those two purposes. The law says so in no uncertain terms.

Share drafts clearly do not promote thrift. To the contrary, they encourage spending of funds by making it easy to do—as easy as spending money in a checking account. Throughout your experimental program, the credit unions' advertising has consistently emphasized this—"Use them anywhere money is spent"; "Spends like cash"; "Replace your commercial bank checking account" and so forth. Are we to assume that the credit unions were deceiving their members, and that share drafts were really designed for saving money instead? Not very likely.

What about providing a source of credit to members? Are share drafts "necessary or requisite" for that? Somebody is going to have to prove that to us. Primarily, share drafts are programs for large credit unions, not small ones. Under your proposal, you would very likely find small credit unions unable to handle the additional business. At the same time, the large credit unions don't need the additional funds. In fact, according to one expert, employed by the credit union industry, the large credit unions in Colorado at least cannot get rid of the excess funds they have already, much less any increase in funds that might result from a share draft program. Consider also an organization like McGuire Community Federal Credit Union in New Jersey. At the close of 1975, this credit union had 40% of its assets in investments other than loans to members. You have an obligation to demonstrate to us and others that McGuire's share draft program is necessary so that its members will have a source of credit.

Even if excess funds are not on hand, they can be borrowed, under the law, to meet loan demand. The credit unions have created 38 Central Credit Unions specifically for this purpose, plus the U.S. Central Credit Union. The U.S. Central now has the capability of controlling $1 billion of the $8 billion total excess liquidity of credit unions. With this amount of excess funds, are we being told that the credit unions need still additional funds?

I can only summarize this statement by repeating what I said at the beginning. There is not one scintilla of support for share drafts in the statute; not an iota of intent by Congress in the legislative history that these instruments should be allowed to exist; not a pittance of proof that they are necessary or requisite. The National Credit Union Administration must enforce the law, and not make the law. The ABA submits that you have no choice except to withdraw this proposed rule.

ENERGY

Mr. MATHIAS. Mr. President, anyone tempted to challenge the premise of

President Carter's energy message should first look at the record of increasing volume of oil imports and the increasing cost in dollars spent abroad. If that dismal record is not enough to shock a majority of Americans then we are apt to have hard times indeed. When a once-energy-independent nation must import half of its petroleum demand, there are bound to be profound effects on national security and foreign policy as well as on the availability of energy itself. When we contemplate sending 50 billion American dollars annually, not only out of our country, but out of our economy, in order to buy a consumable commodity, we need to ask whether we are not putting goals such as full employment beyond the reach of the private sector of the United States.

So I applaud and welcome President Carter's forthright acknowledgment that our diminishing energy resources and our inordinate energy consumption pose the greatest challenge we face in the next decade.

But I warn the President that the road that lies ahead of him is rough. Many of us who have been on that road know its difficulties and its frustrations. A year ago at the New School for Social Research in New York City I warned:

> No more serious challenge faces us today than how to get this country going on the road to conservation and self-sufficiency.

But frankly, that is a warning that only a President can give with any prospect of effective response and I am heartened that the President has undertaken the job.

I hope the President will be prepared to repeat and repeate the warning that he has issued. It is not enough to predict that someday even the costly foreign sources of oil may run dry. The subtle linkage between energy and modern civilization must be revealed clearly to every voter and every taxpayer. In 1976 at the Colorado School of Mines I tried to suggest this by saying:

> We don't face just an "energy crisis," we face a challenge to our entire civilization. This distinction is crucial, both to understanding our present danger and to finding the necessary responses to it. The phrase "energy crisis" is misleading. It suggests energy is just one of many problems inherent in modern society . . . that the "crisis" can be handled by one or two bold strokes . . . (but) energy is not just an aspect of modern society. It is society's lifeblood. Energy is to modern man what wildlife was to the Indian. It sustains life. Our economy . . . food, jobs, industry, income, homes, transportation . . . all of these and more depend on energy.

I support the purpose and direction of the President's approach to resolution of our energy problems, but I want to study carefully his legislative proposals, including those relating to increased taxes, to determine whether they offer the best hope for addressing the many complexities of this dilemma.

To be successful any approach to the energy problem must emphasize equally and urgently two aspects of the question: conservation and priority development of alternate sources of energy.

We must pay the true cost for the fuel we use, but we must also assure that our industries and workers do not become victims and that we do not produce economic dislocation in the process of resolving our energy crisis. In addition, we must analyze the impact our plans and actions will have on our trade position and our relations generally with other countries.

I pledge myself to support the President in the continuing educational effort that will be necessary and to work with him in evolving and evaluating alternative solutions to the problem.

Meanwhile, it is important to remember that this is not some lofty issue to be determined at Olympian heights by demigods. It is a practical problem for every American and each of us can volunteer some simple everyday ideas that will contribute in some measure to both the conservation of energy and to our constant awareness of the problem. In this spirit, I suggest that every elevator button in the Capitol and the congressional office buildings be provided with a sign saying "Walk Down—Save Energy." Such a simple sacrifice might even inspire the more hardy of us to start walking up, which would be good for our hearts and good for America.

PIKETON URANIUM ENRICHMENT PLANT

Mr. METZENBAUM. Mr. President, in his April 20 energy message, President Carter recommended that plans to construct a major gaseous diffusion uranium enrichment plant in Piketon, Ohio, be abandoned in favor of a newly developed centrifuge technology. The administration has not decided where the centrifuge facility will be located, but there are reports that Oak Ridge, Tenn., is under consideration.

I am not in a position to make a judgment on the comparative merits of the two enrichment technologies, but I do know that a decision to shift the plantsite from Piketon would have severe negative effects on an economically depressed region. Unemployment is over 15 percent in the Piketon area at this time and the community has based its plans for the future on the Federal commitment—firm until now—to construct the plant there. Businessmen have made investments, schools in Ohio and Kentucky have established programs to train potential workers, and plans have been launched to insure that minority-run firms—hardest hit by unemployment—will have an opportunity to participate in the project. If the plantsite is moved, all of these efforts will have been for naught, and a depressed area will sink further into economic chaos.

On April 21, I wrote to President Carter to express my profound concern about the implications of his decision for the Ohio economy. Tomorrow, Senators GLENN, FORD, HUDDLESTON, and I will meet with the President to express our views to him directly.

Mr. President, labor leaders, businessmen, public officials, and concerned citizens in Ohio and the neighboring States have expressed strong support for locating whatever uranium enrichment facility is built at the Piketon site. I ask unanimous consent that my letter of April 21 to the President and a selection from the hundreds of messages I have received on this matter from people in all walks of life in Ohio be printed in the RECORD for the information of the Senate.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE, COMMITTEE ON ENERGY AND NATURAL RESOURCES,
Washington, D.C., April 21, 1977.

PRESIDENT CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I would like to express my concern that your decision to redirect uranium enrichment technology from gaseous diffusion to centrifuge may jeopardize the expansion of the Federal facility at Portsmouth, Ohio.

As you know, the Congress has repeatedly authorized funds for increasing our Nation's enriched uranium supply through expansion of the Portsmouth site. It is my understanding that there are no technological or engineering features of this new technique which would necessitate shifting the proposed facility away from Portsmouth.

The City of Portsmouth and surrounding communities have eagerly anticipated the infusion of over $4 billion into this economically depressed region. The promise of an estimated 10,000 jobs through the construction of the gaseous diffusion plant and the three powerplants would insure prosperity where there is now unemployment over 12 percent. State and local officials, labor leaders and concerned citizens have all expressed to me today their deep concern over the prospect that Portsmouth may lose this promised facility.

Mr. President, I strongly urge you to name Portsmouth, Ohio as the site for the centrifuge uranium enrichment facility. Your statement last fall that "I have long supported full authorization and funding for enlargement of the government-owned uranium enrichment facility at Portsmouth, Ohio," recognized that this project is of the utmost importance to this region and the entire State. I respectfully request your assistance in this matter.

Warm regards,
HOWARD M. METZENBAUM,
U.S. Senator.

[Telegram]

STATE CAPITOL BUILDING,
Columbus, Ohio.

DEAR SENATOR: We are vitally concerned about published reports that the planned add on facility committed by ERDA at the Piketon, Ohio uranium enrichment facility may be threatened. This plant is located in the Appalachian region of Ohio which is now experiencing the highest rates of unemployment in the State. The economy of the region sorely needs the stimulus that is being generated by the present expansion of the Piketon plant. We urge that the commitment to expand this existing plant be fulfilled by incorporating the centrifuge process into the facility at Piketon. This would preserve the promise of employment for the residents of this part of Ohio and also produce the much needed enriched uranium for our present and future nuclear power plants at an earlier date than any alternate plan.

JAMES A. RHODES,
Governor of Ohio.

E. STATE STREET,
Columbus, Ohio.

Sen. HOWARD METZENBAUM,
Senate Office Building,
Washington, D.C.:

In behalf of the entire labor movement in Ohio I respectfully urge your involvement and effort to restore the building of the addition to the Portsmouth Power Project. I

understand President Carter has cancelled this project and intends to have the addition built in Tennessee, the impact of this change on Ohio will mean the loss of potential employment in construction and satellite industries. Thousands of jobs badly needed by Ohio's economy will be lost. Your immediate attention is drastically needed. Workers on this job (an expected 10,000 at height of construction) will come from all over Ohio.

The President, as a candidate, promised support for this project. To date Ohio has been almost totally ignored by the Carter administration. However, this amounts to an affront which cannot be ignored.

I would appreciate your response as to your effort to help restore this project.

Sincerely,

MILAN MARSH,
President, Ohio AFL-CIO.

GREENUP COUNTY AREA,
VOCATIONAL EDUCATION CENTER,
South Shore, Ky., April 22, 1977.
